\$10 Payments Due February 1, 1906

ON YEARLINGS IN

Pacific Breeders Futurity Stakes No. 5---\$7000 Guaranteed

NOTHING MORE TO PAY BEFORE 1907.

For Foals of Mares covered in 1904. To trot or pace at two and three years old. Entries closed October 15, 1904. **Nothing More to Pay Before 1907**, when your foal can start in the Two-Year-Old Division. Stakes divided as follows: \$3250 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

A Chance for Those Who Failed to Enter.

Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for Foals of 1905 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you neglected to name when entries closed, send \$22, with Color, Sex and Breeding of the foal, on or before February 1st next, which covers payments to February 1, 1907, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

E. P. HEALD, President.

F. W. KELLEY, Sec'y, 36 Geary St., S. F.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

Running Horse Owners and Trainers

"Save-the-Horse" has proven absolutely unfailing on Bucked Shins. One bottle will cure from five to twenty cases. For strained, injured and broken down tendons, it is marvelously effective.

W. A. Redmond, Attorney, McGill Building.

Washington, D. C., December 27, 1904.

Troy Chemical Company, Binghamton, New York.

Gentlemen—I first tried the remedy on a thoroughbred, which had bowed both tendons and which had been fired once and blistered a number of times, but every time he was trained one or the other of the legs would fill. This happened three years in succession. Last Spring I bought a bottle of "Save-the-Horse," and used it according to directions with the result that he started 7 times, at all distances in July last, and won 3 times, second 3 times and third once—an excellent record—and he appears to be perfectly sound to-day, and will be raced next month. I am firmly convinced without your remedy he would not have been worth a dollar as a race horse.

I have a roadster which stepped in a hole at pasture and wrenched a hind ankle—so badly that he could not put his foot on the ground. I was advised to shoot him, as it was claimed that he had injured his hip. Instead, I blistered him and he became serviceably sound, but limped at every step. Upon close examination I found a growth between the coronary band and the ankle which developed into bone. I used one bottle of "Save the Horse" on the growth, and it entirely disappeared. He has not taken a lame step since.

Knowing the value of the remedy I do not hesitate to recommend it to all horse owners of my acquaintance.

Very truly,

W. A. REDMOND.

The fire iron is uncertain; blistering is less effective, and both necessitate laying up the horse from four weeks to two months; mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Wind puff, Weak and Sprained Tendons and all Lameness.

Horse can be worked as usual, it cures without scar, blemish or loss of hair.

\$5.00 Per bottle, written guarantee with every bottle, constructed solely to satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way. The need of second bottle is improbable except in rarest cases. Send for copy of guarantee and booklet. All druggists and dealers or sent express prepaid.

San Francisco, Saturday, January 6, 1906

CALIFORNIA STAKE PAYMENTS DUE IN 1905.

Pacific Breeders' Futurity Stakes.

(Payments should be made to F. W. Kelley, secretary, 36 Geary street, San Francisco.)

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—\$10 due March 1, 1906, and starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 5, \$7000, foals of 1905—\$10 due February 1, 1906.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

THE POSSIBILITIES OF HARNESS RACING in California during the present year are far beyond the expectations of a majority of horsemen, for could there be, by some means not yet discovered, a little enthusiasm and energy infused into the veins of the managers of the many excellent mile tracks in this State, a circuit could be arranged that would attract the patronage of horse owners and the public and result in meetings that would be profitable to the associations and the horsemen. The start of the California circuit this year will be at Los Angeles, where there are as many game and enthusiastic horsemen as can be found in any city of the same size in the United States. The Los Angeles Harness Horse Association gave two high class meetings last year, which did not pay a financial profit but, nothing daunted, they are ready to open the circuit again in June this year, and have already so announced. From Los Angeles horsemen could make short shipments to San Bernardino and Santa Ana if meetings were given in those towns. Coming north, Fresno would probably be the next point on the circuit. It has an excellent mile track, is a prosperous city of 25,000 inhabitants, and a horse center. The Breeders' Association has held two successful meetings at Fresno, and a local association could do even better. From Fresno it is not a far cry to Stockton, which has been off the racing map for a few years, but could be made one of the best. Then should come Pleasanton, the real horse center of California, where the first two-minute trotter was developed and the first two-minute pacer is now kept in the stud. Pleasanton, if her people would all pull together, could give a meeting that would be second to none. From Pleasanton the line of march would be to San Jose, where one of the finest tracks in the world is located and where a great meeting could be given every year under proper management. The next place on the circuit should be Santa Rosa, the birthplace of Lou Dillon and the location of the celebrated Santa Rosa Stock Farm, which has as fine and well appointed a race track as can be found on the Pacific Slope. The Santa Rosa meeting over, Woodland would be the next racing point, and whenever Woodland announces a meeting every California horseman arranges to be there. After the Woodland meeting the State Fair would be the center of attraction, and then those desirous of racing on the North Pacific Circuit could

ship direct to the Oregon State Fair at Salem, while those who wanted to take in the smaller meetings during September and October in California would have opportunities at Marysville, Salinas, Hollister, Ukiah, Concord, and many other places where the purses range from \$400 to \$100. There can be a circuit of ten weeks harness racing arranged as above suggested. All that is necessary is for some enterprising person in each of the towns mentioned to take the matter in hand and start work on the same.

AMONG THE VISITORS to the office of the Breeder and Sportsman this week was Mr. C. R. Bentley, vice-president and manager of the corporation which publishes that excellent trotting horse journal "The Horse World," of Buffalo, New York. Mr. Bentley is also secretary of the Buffalo Driving Club, an organization that gives one of the best of the Grand Circuit meetings every year. Mr. Bentley is making a flying trip to California, but has found time to visit Los Angeles, Pleasanton, Santa Rosa and other important horse centers, and is enjoying his visit. He is a strong advocate of the three-heat plan for all harness races, holding that the old three-in-five system is not adapted to modern racing where heats are trotted and paced below 2:15. That his opinions are shared by the majority of owners and trainers who race on the Grand Circuit is evident by their published statements in the turf journals. Mr. Bentley states that Buffalo will be in line as usual this year with a program of large purses and stakes and hopes to hold the banner meeting of its history.

A \$10 PAYMENT IS DUE on the first of next month on all yearlings entered in the Pacific Breeders' Futurity Stakes No. 5, for foals of 1905. This stake is guaranteed to be worth \$7000 and will probably be worth much more, as there were 388 original entries. Remember, it is for the foals of 1905, which are now yearlings, and when this payment of \$10 is made there is nothing more to pay until 1907. Keep your colts paid up in all stakes in which they are entered. This is the last chance to substitute in this stake. If your mare failed to foal in 1905, or the foal died, you can name another foal on February 1st without regard to ownership, but not after that date. A few of those owning foals of 1905 that were not entered in this stake can secure substitutions by applying to Secretary Kelley, 36 Geary street, on or before February 1st. The cost of these substitutions is \$22 each, which amount is paid back to the original nominator.

Mr. STERLING R. HOLT, owner of the Maywood Stock Farm, near Indianapolis, home of Sidney Dillon, is making a short visit to California. He spent Thursday of this week at the Santa Rosa Stock Farm, where Proprietor Frank Turner showed him over twenty head of young Sidney Dillons that confirmed Mr. Holt in his belief that he owns the greatest sire of speed the world has yet seen. Sidney Dillon's book was filled last year and many mares were turned away, after he had returned to his owner more than his purchase price. This year his fee will be increased but the bookings are already so numerous that the limit will be reached early in the season.

ANSWERS TO CORRESPONDENTS.

D. C. T.—The chestnut filly, Nancy Starr, was bred at Palo Alto but foaled the property of Monroe Salisbury. At the sale of colts, fillies and brood mares from Palo Alto Farm, held at the salesyard of Fred H. Chase & Co., January 14th, 1904, a four-year old bay filly by Dexter Prince, out of Lady Agnes by Electioneer, was knocked down to Monroe Salisbury for \$325. The filly was in foal to Mendocino at the time. We understand she foaled a chestnut filly a few months later, which was called Nancy Starr. As to the breeding it is correctly stated in the catalogue.

E. P. Y. H., Arroyo Grande.—We cannot find either the stallion or the mare you name registered in the American Stud Book. If you can give sire and dam of each, we will be able to tell you whether they are thoroughbreds and entitled to registration as such.

Wm. Mead, Santa Maria.—Flacon is a chestnut horse foaled 1895, and was bred by August Belmont. He is by imported Rayon d'Or, dam Flavia by imp St. Blaise. He won a five furlong race as a four-year-old in 1:02.

B. L. Elliott, Mendocino, Cal.—Flit Madison is registered in Volume 15, American Trotting Register. She is a bay mare foaled 1899, sired by James Madison 17,909, dam Clear the Way by Steinway 1808, second dam Clara by Bucaneer 2656, third dam Rachael by Wayland Forest, etc. She was bred by John F. Boyd, Oakwood Park Stock Farm, Danville, Cal.

W. B., Campbell, Cal.—California Lambert's record is 2:27. His register number is 10,936. He was bred in Vermont, and owned by the late L. U. Shippee of Stockton. His sire was Ben Franklin, a son of Dan-

iel Lambert, and his dam was Maud, a daughter of Daniel Lambert, and his grandam Columbia by Columbus, son of Black Hawk 5. He was a bay horse with a dash of white in his face and foaled in 1883.

ARIZONA TERRITORIAL FAIR.

From partial files of the Phoenix, Arizona, papers kindly sent the Breeder and Sportsman by Mr. Geo. T. Beckers, owner of Zombro, we are able to present the following incomplete report of the races held at Phoenix during Christmas week. The fair was a big success and the racing first class in every particular. The results of the harness races were as follows:

First Day.

Trotting, 2:27 class; purse \$400.

Jessie Mac	1	1	1
Billy H.	2	2	3
Peggy Arnett	3	3	2
Helen Dare	dis		

Time—2:21¼, 2:26½, 2:21¼.

Trotting 2:14 class; purse \$400.

Zombowette	2	2	1	1	1
Boralma's Brother	1	1	2	2	3
Leunmetta	3	3	3	3	2

Time—2:18¼, 2:16¼, 2:16¼, 2:17¼, 2:19.

Pacing, 2:13 class; purse \$400.

Seldon Wilkes	1	1	1
Victor Platte	2	2	2
Byron Lace	4	3	3
Florence Wilton	3	4	4

Time—2:12¼, 2:15½, 2:15½.

Second Day.

Pacing, free for all, purse \$1000. Zolock won the first and fastest heat in 2:07. Hazel Patch took the next three in 2:08, 2:07¼, and 2:11½. Custer, by Sidney Dillon, was third, and Daedalion fourth.

The 2:22 pace was won by W. C. Greene's Billings.

Third Day.

Pacing, special, purse \$400.

Fearnot, by Lynmont	1	1	1
Billy A.	6	2	2
Byron Lace by Lovelace	2	6	5
Monkey Mac	3	3	3
Surprise	4	4	4
Col. Greene	5	5	6

Time—2:14¼, 2:14¼, 2:13¼.

Trotting, 2:24 class; purse \$400.

Boralma's Brother	1	1	1
Helen Dare, by Zombro	2	3	2
Leunmetta	3	2	3
Billy H.	4	4	4

Time—2:17, 2:16½, 2:16½.

Fourth Day.

Pacing, 2:09 class; purse \$400.

Stranger O.	1	1	1
Daedalion	2	2	2
Seldon Wilkes	3	3	3
Byron Lace	4	4	4

Time—2:09½, 2:10½, 2:10½.

Pacing, two-year-olds, half mile.

Pickels	1	1	1
Gipsy Queen	2	2	2
Lad	3	3	3
Winnie	4	4	4

Time—1:44, 1:25, 1:22.

Fifth Day.

Pacing, three-year-olds—Helena Morgan won third, fourth and fifth. Billings won first and second. Lillian Zolock was third. Time, 2:11½, 2:14¼, 2:15, 2:22½, 2:19½.

The free-for-all trot resulted: Boralma's Brother won first, third and fourth heats. Briney K. won second heat. Time, 2:12¼, 2:14¼, 2:13¼, 2:16¼. Only two starters.

The two-year-old trot was won by George Sotot Sarony, Oakes Murphy, Rachella and Willie Amber, finishing in the order named.

Sixth Day.

Pacing, 2:17 class; purse \$400.

Paul D. Kelly (2)	1	1	4	4	4
Fearnot	2	2	3	1	2
Billy A.	3	4	2	3	1
Seldon Wilkes	4	3	1	2	3

Time—2:15¼, 2:17, 2:13¼, 2:13½, 2:14¼.

Pacing, 2:22 class; purse \$400.

Surprise	3	1	1	3	1
Victor Platte	1	2	2	1	3
Clara P.	2	3	3	2	2
Florence Wilton	5	dr			
Sullivan	4	dis			

Time—2:16½, 2:17¼, 2:20, 2:22, 2:22¼.

Pacing, 2:03 class; purse \$500.

Hazel Patch	1	1	1
Zolock	2	2	2

Time—2:05½, 2:05¼, 2:11½.

American bred trotters have finished first and second in the annual race for the championship of Europe ever year since the event was established, at Baden, in 1895. Following is a list of the winners, with the best time made:

1895—Spofford	2:16
1896—Mattie H.	2:18
1897—Bravado	2:17¼
1898—Que Allen	2:17½
1899—Que Allen	2:08½
1900—Cald	2:10
1901—Athania	2:10
1902—Greenbrino	2:10
1903—Wig-Wag	2:13½
1904—Contralto	2:11¼
1905—Axworthy	2:16½

Paul D. Kelly 2:20, the champion yearling pacer that took his record in 1904, started against a lot of aged pacers at Phoenix, Arizona, last week in the 2:17 pace. The two-year-old was dead game and won two heats in 2:15¼ and 2:17, which gave him the race, although Fearnot, Billy A. and Seldon Wilkes each took a heat in faster time.

ANOTHER CLAIMANT.

In last week's Breeder & Sportsman appeared an item in which it was stated that Mr. Gus Lindauer, of this city, believed his trotter, Homeway 2:14½, was the fastest fifteen-year-old trotter. We have received a letter from Mr. T. H. Fogarty of Bakersfield, owner of "the little blue horse," Richmond Chief 2:11, who states that his horse is entitled to the crown in this case as he won his record in the fall of 1902 when he was past fifteen years of age. Richmond Chief was foaled in June 1887, and in the fall of 1902 started in five races, winning three and being second in the other two. He met and defeated such horses as Alta Vela 2:11¼, Cozad 2:11¼, Vic Schillar 2:11¼ and others. He made his record at Fresno October 2d. The race was a hot one from start to finish of the four heats. Richmond Chief won the first and second heats in 2:11½ and 2:11, Cozad just beat him the third in 2:11¼ and then Richmond Chief won the fourth in 2:12.

We know Mr. Lindauer, owner of Homeway 2:14½, will cheerfully acknowledge that Richmond Chief has his horse badly beaten for the fifteen-year-old record, but as his trainer, Dan Misner, said, the only way to find out whether Homeway was entitled to the record or not was to claim it, knowing that if the owner of the fifteen-year-old champion was alive he would make the horse's presence and title known.

Richmond Chief will soon be nineteen years old, but he is still a great trotter. He would have been campaigned last year in his eighteen-year-old form had there been a 2:11 class for trotters. Mr. Fogarty worked him miles over the Bakersfield track last year in 2:19¼, and all horsemen know that track is from five to seven seconds slow. Until some other county is heard from Mr. Fogarty is certainly justified in claiming the title of champion fifteen-year-old trotting stallion for his horse Richmond Chief whose record was made in the second heat of a winning race.

GOOD PURSES AT BUTTE.

Editor Breeder and Sportsman—At a meeting of the directors of the Butte Racing and Fair Association it was decided to give a two weeks' race meeting in Butte this coming summer. The meeting, according to present arrangements, will take place in the early part of August, and a circuit is now being formed in the state so that horses can go from one town to the other without losing more than one or two days, and the towns will be arranged so as to make the shipments as short as possible.

Butte will offer six stakes of one thousand dollars apiece and none of the harness races will be for a purse of less than five hundred dollars. The complete announcement will follow later, in all probability in the form of a circuit announcement, which will be arranged at a meeting of the secretaries of the different Racing and Fair Associations in the state to be held January 5th.

This meeting will not be exclusively a harness meeting, as two running events will be placed on the program each day. Great enthusiasm is being shown along harness lines throughout the state, and the Montana circuit promises to be one of the best of the western circuits this coming year. Mr. W. A. Clark, Jr., who is president of our Butte Racing Association, has promised to bring a number of his horses to Montana this year, and in probability a great number of other good horses will be brought in from the outside. Respectfully yours,

A. D. GALBRAITH, Secretary.

NEW TRACK AT EXETER.

Visalia, Jan. 1, 1906.

Editor Breeder and Sportsman—It is my pleasure to chronicle what is to me a happy new year message. The citizens of the prosperous little citrus town of Exeter, located on the Porterville branch of the Southern Pacific Railroad, ten miles east of Visalia, are organizing themselves into an agricultural association for the purpose of holding an annual fair and race meeting. An attorney has been employed to make an application for a ten thousand dollar corporation permit, money has been collected and a 40-acre tract of land purchased and a stockholders' meeting is called for Wednesday to elect a permanent set of officers. A regulation half mile track will be built at once. The soil of this tract of land is of uniform texture of tough yellow clay that will not cup or break away and a strenuous effort will be made to make it the safest and fastest half mile track on the coast. A competent civil engineer will be in constant charge during its construction, and every care taken that a uniform and systematic blending together of the turns and stretches in the grading are made to overcome a fault so commonly found in the construction of half mile tracks.

J. BROLIAR.

A late Lexington, Ky., dispatch says that Dan Patch is to have a handsome silver cup for breaking the world's record over the Lexington track last fall. The cup is one of the finest ever given by the association in honor of a performance. Sitting on an ebony base it stands about twenty-three inches tall, and on one side is engraved the following: "Kentucky Trotting Horse Breeders' Association to Dan Patch, world's champion pacer, 1:55¼, Lexington, Ky., October 7, 1905." The cup has been sent to Mr. W. W. Savage, Minneapolis, Minn., owner of the great pacer.

The North Pacific Fair Association, an organization of all the principal fair and racing associations in the Northwest, will hold a meeting at Portland, Oregon, next Wednesday at which time dates will be arranged for the North Pacific Circuit of 1906.

NEWS FROM DENVER.

Racing men at Denver have been considerably exercised over reports that the Western Jockey Club and the American Turf Association, the rival running horse organizations, were trying to secure Overland Park and track. Negotiations were entered into by C. John Condon of Chicago through Ed Chase of Denver for the purchase of Overland Park, which belongs to Henry R. Wolcott, brother of the late Senator Edward O. Wolcott. Henry Hanington, who is the Denver agent for the Wolcott properties, placed a price of \$150,000 on the plant, which is more than either Mr. Condon or the agents of the American Turf Association care to pay for breaking into a doubtful country. So just at this time the outlook is that the Overland Park will remain in the hands that have handled it for several years. What had stirred up harness racing men was that the running horse associations had stated that they purposed using the track for running meetings only. Had they secured possession the trotters would have been left clear out in the cold.

At that there is some doubt concerning what management will be in control of Overland Park during the coming summer. For the past four years racing has been conducted by a Denver Overland Racing Association, of which E. A. Colburn is president and G. A. Wahlgreen secretary. The owner of the park had advanced the rental from \$6000 to \$7500, which is greater, the secretary thinks, than his association can afford to pay. Experience has shown that Denver will spend only about so much each year on racing, and that amount is not enough to warrant the renting of the park at the figure asked. Certain other parties are figuring on giving racing, and have asked the agent of Overland not to make agreements with any until they are ready to state whether they will pay the higher rental demanded. If they decline to accept the terms, the racing will likely be in the same hands as during the past few years.

Another matter that has entered into calculations for the June meeting has been the attitude of one of the judges on the district bench in Denver County. Though he has been a judge for almost two full terms, he had not discovered that he could interfere with gambling, or the saloons, until it became almost time for his third effort for election. During the past two months he has stirred up all kinds of trouble in Denver. It is even hinted that he will carry his campaign for re-election so far that he will prevent pool selling at the track next summer. If he does take that stand, with the power that he can invoke to carry out his orders, racing may be doomed. Better things are hoped for, as the sentiment of the community has been several times shown to be strongly in favor of allowing racing to be conducted without interference.

J. F. McGuire, driver for G. H. Estabrook, has given Rightway, full brother to Winfield Stratton 2:05¼, a careful working this fall, with the intention of making him the successor of his famous brother when the "grasshopper pacer" shall be ready to retire. Last week he sent Rightway a half mile in 1:07. The track was not at its best, being hard and dry. Mr. McGuire is very much pleased with the improvement shown by the youngster.

During the early part of last month a number of the colts from the Gumaer stock farm, near Florence, were sold at auction in Denver. Most of the colts sold were youngsters sired by Saraway and Rex Denmark, Jr. The foals of 1904 brought prices ranging from \$80 to \$100, and those of 1903 from \$100 to \$400. The Saraway colts were all rather small but wiry, active fellows, full of life. Their conformation generally was very good, one of the older ones having already captured prizes at horse shows. Mr. Gumaer was not closing out his stock, merely selling some of his surplus. During the past year he added a fine line of brood mares to his farm. He will continue his efforts to produce another Saraway colt that will be the equal to Winfield Stratton.

BOGUS PEDIGREE REGISTERS.

Breeders' Gazette: A number of so-called registers or stud books have come into existence the past few years for the registry of grade animals. Some of them will record any pedigree, whether it contains a bit of pure blood or not. Others claim that they require a certain number of top crosses of registered sires before they will accept an animal. We call all such registers bogus because they issue certificates of pedigrees which will deceive the ignorant into believing that they represent pure breeding. It is difficult to fathom the motive which would lead any honest man or men to establish books of records for grades. In some cases there can be no manner of doubt that the work is planned deliberately to promote fraud. It is designed to issue a certificate of registry, ornamented with a large gilt seal, with which an unscrupulous salesman may be able to palm off on an unsuspecting or ignorant buyer a grade animal as a pure bred. Language fails to characterize adequately the contemptible character of this low form of fraud.

The season is rapidly approaching when salesmen will be placing stallions all over the country and forming companies for their purchase. Let no man be deceived. No horse should be bought without a pedigree that corresponds in age and markings with the animal to which it is said to belong. In case of any doubt the secretary of the stud book should be consulted. If the name and address of this official is not known, we will be glad to supply it. Especial care must be exercised to avoid deception that may be practiced by certificates issued for grades. Such certificates are issued by men in Iowa, Minnesota, Kansas and New York, and a recent addition to the list is a register for grade Percherons operated near Chicago. Beware of such snares.

A FASHIONABLE TYPE.

The introduction of the new strain of Hackney blood by Mr. Stephen T. Britten of Menlo Park is an acquisition to the breeding interests that will be appreciated by all lovers of this class of carriage horses so much in favor with the rich and fashionable. There seems to be a lack in California of what in the East is called "Finish in Carriage Turnouts," and we have very few teams of high stepping carriage horses of the Hackney type that have the education demanded in a stylish carriage team of this description. Mr. Britten, realizing this, has taken to the breeding of Hackneys purely from the standpoint of an amateur breeder who is in it for the pleasure to be derived from the knowledge that he is improving the Hackney horses in California and breeding and selling a few teams here that would be a credit to any part of the world. The bringing out of Mr. Britten's new stock should have a very marked effect on Hackney horses here, as it will present a chance of cross breeding that should improve the stock. The premier stallion of the Toghill Stud is the Squire of Chester. He is by Squire Rickell out of Danish Lady. This horse is a handsome blue roan and is of the breed of prize winners from away back. On his sire's side he traces four times to Denmark, while the same celebrated stud served three times in the breeding of his dam. Mr. Britten purchased his stock in Canada from one of the best known breeders and importers in the Dominion. The Hackneys from this farm have a world wide reputation, and the show winners that it has sent out caused Mr. Britten to seek from that stock for his California farm. Squire of Chester is a beautifully built animal, with a fine balance that speaks of power in every line. He is intelligent, gentle and controllable beyond a degree that is expected of a stallion. When in motion, he has a gait that is characteristic of the Hackney type. Stepping well out in front with a high lift that gives the action desired by the fashionable in horses of this description. His haunches are well muscled and well cut showing a wonderful power of speed and endurance. He is a three-year-old and a horse of great promise. Of the mares on the farm, Danish Lady, a bay roan, nine years old, is most interesting. She is broken both to saddle and harness and walks, trots and canters in the most approved style. She has also won several jumping competitions in Canada before she came to this Coast. A stable mate of Danish Lady is Lady Minto, foaled in 1898. She is by Barthorpe Performer, out of Lady Lynn, and a prettier gaited Hackney will be hard to find. She, like Danish Lady, has been broken to saddle as well as harness and challenges her stable mate for admiration in high stepping qualities. Another of Mr. Britten's mares worthy of special mention is Lady Lynn, who is by a noted English Hackney, and although well along in years, she still retains her Hackney type to perfection. All the stock in Mr. Britten's string are registered in the English or American Stud Books and have pedigrees without a break. Mr. Britten has housed his stock in one of the most up to date establishments on the Coast, and one visiting the farm cannot help noticing that all the details have been considered in making it perfect, and when his horses are brought out for review, they show the extreme care with which they are handled. As will be seen by the advertisement of the Toghill Stud, a few engagements may be booked to Squire of Chester by owners of well bred mares. Particulars may be obtained by addressing Wm. Walker, manager Toghill Stud, Menlo Park, Cal.

ADMIRE AMERICAN HORSES.

Edwin Howlett, the "Father of Coaching in France," sailed recently from New York on his way to Paris, after his first visit to the United States. Mr. Howlett thinks that the horses to be seen in New York and vicinity are much better than those of Paris.

"I have enjoyed every minute of my stay," said the veteran driver. The residences of the wealthy over here are far more sumptuous than I have ever seen abroad, the theaters are more wonderful—in fact, everything seems to be on a grand scale.

"And the horses. I cannot say I have seen a lame horse since I came here. All the animals at the Horse Show, which I attended, were wonderful. I have been out driving several times with society women who were my pupils in Paris, and on the roads the horses I saw were, on the whole, excellent and speak well for American breeding.

"One thing that astonished me was the luxury in which horses are kept. I have been out to Georgian Court, Mr. George Gould's place, and I have seen the stables of Mr. H. McK. Twombly at Morristown and those of Mr. C. K. G. Billings. I never dreamed of such luxury for horses as that in which Mr. Twombly's are kept. There is nothing in Europe that can be compared with it. I hope to get over here again."

When F. W. Gooch, the English dealer, employed by the National Horse Show Association of America to judge saddle horses at the recent show in Madison Square Garden, returned to London he took with him a few show horses purchased in New York. Among them was a thoroughbred saddle horse entered at the Garden show by W. A. McGibbon, and sold by him to Mr. Gooch; also the thoroughbred gelding St. Bluff by St. Blaise, that won second prize as a cavalry horse at the Garden show, when exhibited by Mr. McGibbon. From Tichenor & Co. of Chicago Mr. Gooch bought a handsome trotting bred carriage horse of the brougham type, which he may, it is said, show in England.

Sober up on Jackson's Napa Soda.

THE TROTTER IN THE SHOW RING.

American Horse Shows are different in some respects from those of any other country, and as an educator in the field of improving the different types of horses all fair minded critics must concede that the system in vogue in this country is superior to that of any other.

In the heavy harness classes in England the only competitors as a rule are pure bred hackneys, while in our shows we have trotting bred horses, hackneys, and occasionally French coach horses competing in the same classes. By the performances of these different types our breeders are able to form a judgment as to which of the respective breeds is best adapted to our use. That a great majority of our people are prejudiced to some extent at least in favor of the home product is but natural.

When it is considered that the hackney has been bred for more than one hundred years with a view to perfecting his qualities as a carriage and fancy driving horse, and that the trotter which has been his principal opponent in our shows during the past few years has been produced by accident, rather than by the process of scientific breeding, the showing made by the trotter during the past year in the different contests where these two breeds have been the actors has been most gratifying to the admirers of the American bred horse. Progress in the breeding and development of the trotting bred horse as a high stepper has not been of sufficient duration to justify the expectation that in contests of this nature he can successfully compete with the hackney. And yet, notwithstanding this handicap, the victories he has won during the past season are scarcely less than marvelous.

The great show stables of the country in which the trotting bred horse alone is relied upon to carry their colors to victory in the heavy harness classes are those of J. Hobart Moore of Chicago, Alfred G. and Reginald C. Vanderbilt of New York, and C. W. Watson of Baltimore. The only exclusive hackney stable of any considerable importance now being exhibited is that of Eben D. Jordan of Boston. Both Judge W. H. Moore and Mrs. John Gerken of New York own and exhibit both breeds, and as the battle for show ring honors at the large shows during the past season has been largely between the entries from these stables a brief review of some of the principal contests may prove of interest in showing the progress the trotter has made in this comparatively new field as well as the important part he is likely to play in future show ring contests.

The first great show of the year where the above mentioned stables with the exception of Mr. Watson's came in competition was at Philadelphia. In an important high stepping class, at that show were entered among others Judge Moore's peerless hackney gelding Forest King, J. Hobart Moore's well known and popular prize winning trotting bred Burlington, Mr. Jordan's great hackney mare Hildred, and Reginald C. Vanderbilt's splendid young trotting bred gelding The Dictator. This class is selected for the reason that in it was some of the highest class specimens of these two breeds owned in this country. In some respects the contest was hardly fair to the American bred horse for the reason that Forest King is not only a phenomenal show ring horse, but in all the years that English breeders have been engaged in perfecting the highest type of high steppers it is not believed that they have ever produced but one Forest King. And it may also be said that everything considered it is doubtful if they have ever produced another mare that was the superior of Hildred. Both Burlington and The Dictator are the products of accidental breeding. Watching the performances of these grand horses presented an object lesson full of instruction to those interested in the production and development of the trotting bred high stepper. Forest King is gifted with an ability to fold his knees to a greater extent than any other horse ever seen in this country, and in this respect it is not believed that he has an equal living. He also flecks his hocks to a degree seldom seen in a high stepping show horse. While therefore as a horse for fancy work before a gig or other vehicle where the element of speed is not a necessary factor he is in a class by himself, yet it must be remembered that his excessive action calls into play all of his progressive machinery and if he expends his power in high stepping it necessarily follows that he has no reserve force to propel him forward when much speed is required. Burlington is a horse of quite a different type and is built upon more rugged lines than the celebrated hackney. His knee action while remarkably good, lacks much of being equal to that of Forest King, while his hock action is so comparatively inferior as to mar the beauty which a perfectly balanced gait presents. While therefore Burlington was not able to step as high as his hackney competitor yet it was plain that he had not used up his propelling power in the effort, and was able to trot faster than either of the hackneys.

Balanced and unbalanced gaits are among the distinguished characteristics which separate the two breeds as finished show ring performers. The beautifully turned Hildred is an excellent example of the strides made in England towards perfecting the best type of horse for fancy and serviceable purposes. Perhaps no horse now before the public has a more evenly balanced gait than this superb animal possesses, and when viewed from the side none is more attractive. The superior qualities of Forest King and Hildred spoken of are the results of study and the application of intelligent methods to the subject of breeding for a specific purpose. With this advantage in favor of the hackney it could hardly be expected that the trotting bred horses in this class would make much of a showing, and yet while the judges placed Forest King first, they placed Burlington over Hil-

dred who in turn defeated The Dictator for third place.

The limits of this article will not permit a review of any considerable number of contests between the hackney and trotter for show ring honors the past season. It is however desirable to consider to some extent the important classes at the National show in which the two breeds participated.

The first class was for novice horses not under 15.1 and not exceeding 15.3. There were twenty-nine entries the most of which were trotting bred. Among the hackneys were Mr. Jordan's grand mare Laodamia and Irvington Farm's Queen Welcome and Bally Prince. The best of the trotting bred animals were Mr. Watson's Lord Baltimore, Alfred G. Vanderbilt's The Youngster, J. Hobart Moore's Burlington and Edward Kinerien's Kissing. The ribbons were given to the trotting bred animals above named, and for once in a large class of high steppers the hackneys were clearly beaten and left the ring without an award of any kind.

In a class for middle-weight pairs there were six contestants, of which Mr. Jordan's well known Lord Burleigh and Lord Belfast, and William Carr's magnificent roans, Roan King and Fakenham Princess, were the hackney representatives. This class was won by the trotting bred mares Wilpen Belle and Wilpen Beauty, second prize was awarded to J. Hobart Moore's trotting bred geldings Harold H. and Lord Roberts and third prize was the only one the hackneys secured, that going to the Jordan entry. The middle weight class for single horses had eighteen contestants all of which with four exceptions were trotting bred. The hackneys were Lord Burleigh, Electric Light, Roan King and Fakenham Princess. The judges placed Lawrence Jones' trotting bred Gallant Lad first, and Lord Burleigh second. The other prize winners were both trotting bred. In another class, which was won by Forest King, the trotting bred mare Laughing Water defeated Mr. Jordan's hackney mare Laodamia for second place, and the other hackneys did not get a ribbon. The class for small pairs of high steppers was won by the trotting bred Newsboy and Shopgirl, Kitty Grey and Norina the only hackneys in the class were placed second.

In the class for light weight single horses there were twenty-four entries, of which the only hackneys were Mr. Jordan's Norina and Miss Emily Bedford's Fandango Rufus. This class was won by Mrs. Gerken's trotting bred Shopgirl. The only ribbon given to the hackneys was the yellow which went to Norina. The class for single brougham horses was won by the trotting bred Operator, and the other ribbon winners were all trotting bred. Mr. Jordan's Electric Light, the only hackney in the class, being left entirely outside the awards. The two breeds competed in three tandem classes and another victory for the trotting bred animals resulted. The small class was won by the hackneys Kitty Grey and Norina. The middle weight by the trotting bred Laughing Water and Indian Chief, and the large class by the trotting bred The Youngster and Rustling Silk.

The championship classes in which the hackneys and trotting bred horses competed resulted in a practically drawn battle. In the two important gig classes Forest King was invincible, Hildred was placed reserve in one class, and Lord Baltimore in the other.

This general summary of results in the principal heavy harness classes furnishes much encouragement to the admirers of the American type of carriage horse and is an indication of what can be accomplished by persistent efforts along correct lines of breeding. This showing, however, is somewhat misleading, and in justice to the hackneys it should be said that the entry of trotting bred animals outnumbered the hackneys as many as ten to one, and that two of the three judges are what is known as "trotting horsemen." While it is not probable that this fact would consciously effect their decisions, yet where, as in many cases, the contest was exceedingly close, it is but human to believe that they would favor the American product. In the lighter classes such as the runabout, the roadster, the hackney makes no pretense of being the equal of his trotting bred cousin, and it is exceedingly rare that anything but the trotting bred is entered in those classes.

As both breeds sprang from the same ancestry, there is no apparent reason why, if American breeders pursue the same methods as those that produced the hackney, they can not in time evolve a type of horse that will be as successful in the show ring as he has been upon the race track. The difference in the methods adopted by English and American breeders is strikingly illustrated in the types of horses exhibited each year in American show rings. In England there has never been any interest taken in the sport of light harness racing and the aim of the producer has been to produce a highly finished horse with plenty of bone and substance for heavy harness work without reference to extreme speed, while in this country the exact reverse has been true and the object sought has been ability to win races regardless of conformation, bone, size, or high stepping qualities. One system has produced the hackney of which Hildred is a sample, and the other has evolved the trotting bred race horse of which the champion roadster show mare Allie Nunn is a prominent specimen.

The hackney blood of Imp. Bellfounder that coursed through the veins of Hambletonian 10 occasionally crops out in his descendants and it is from this fountain head that most of the successful trotting bred show horses have come. It is therefore within the range of probability that if the tendency to show ring qualities in heavy harness classes which many of the descendants of George Wilkes possess, be cultivated and properly developed, the trotting bred

horse will be a more prominent show ring figure in future years than he was in 1905.—P. M. Babcock, in Christmas Horseman.

ESSENTIALLY A PRACTICAL ANIMAL.

The American trotting-bred horse is essentially a practical animal, especially adapted to adding to the comfort and pleasure of his owner. While quite a number are used each season for purposes of racing, by long odds the greater proportion of trotting-bred horses are used for purposes of business or pleasure, says the Western Horseman. This being true, why is it that so few breeders of light harness horses pay so little attention to ultimate use of the products of their farms? Unless the foals are thought good enough to race, or good enough to partially develop and then sell to those looking for racing prospects, the trotting-bred foals on too many farms are never thoroughly broken and pass from them in an unfinished condition.

It is a lamentable fact, but nevertheless a true one, that on many farms devoted largely or in whole to the breeding of the light harness horse the visitor will note the absence of suitable driving horses. At many farms the owner must resort to a public stable whenever he wishes to make a drive for business or pleasure. Men with thousands of dollars invested in the breeding of trotters will patronize the livery stable when they have occasion to drive a patron or visitor to the farm. This is no fanciful tale. The writer has seen it demonstrated in by far too many instances, not alone in the west, but in Ohio, Kentucky, Massachusetts, Rhode Island and other states located east of the Mississippi river.

Every foal bred in trotting lines will not mature into a stake winner, or even a horse good enough to race through the "short grass circuit." A majority of the foals must be sold for other uses. This being true, why not make it a point to thoroughly break the horses that must find an outlet through the general channels of trade and prepare them for some particular business?

Every few days it is stated by some one connected with the breeding of light harness horses that dealers make too large profits on the horses that pass through their stables. There is a reason for this, and the cause rests with the breeder. The colts and fillies are not broken at home as they should be, are not especially prepared for market, and must naturally be put through a course of education after passing into the dealer's hands.

The party looking for a pair of coach or carriage horses will not purchase the average trotting-bred horse as he comes from the breeding farm. The horse is not a finished product, is not ready for the work desired to place him at, and is not at all desirable as a coach, carriage, surrey, trap or coupe animal. The dealer is prepared to furnish the buyer with a finished horse, one that has been thoroughly schooled in the ways of heavy harness horses, hence is always able to secure a handsome profit on each animal sold.

Breeders of light harness horses should always be able to turn out, at a moment's notice, a handsome, stylish, clever-acting single driver, or a pair of attractive and thoroughly broken carriage horses, and this thing of owners being compelled to patronize a public stable whenever they have occasion to drive, either for pleasure or business, should come to an end. When this condition of affairs becomes general among breeders of trotting-bred horses, we will hear less of the dealer reaping all the profits of the industry. It will also enable owners to more thoroughly appreciate and enjoy the fruits of their breeding, which of itself will be equal to a reasonable per cent of profit on their investments in lands, improvements, stock, etc.

London society is to pay a tardy homage to the horse. At last they are to hold a horse show there. Not one of the dull, old-fashioned horse fairs, so long popular with the English, but a genuine American horse show, or rather, an international one, conducted after the American methods. It is to be held in the vast auditorium of the London Olympia, which, for the occasion, is to be modeled as closely as possible after the Madison Square Garden Horse Show, in the early part of next year, and is to be patronized by the King and Queen and most of all London's smart set. The social aspect of the show, however, is perhaps not the most interesting. That will be a picturesque tournament between American and English breeders. At this show, for the first time, the English and American show horses will be brought into direct rivalry. There will be a battle royal between the American standard bred trotting and coach horses and the famous English hackney, commencing with exhibiting what is considered the American gentlemen's trotting horse, known as the speedy roadster (long tail), many of which are already owned in Europe.

The fast four-year-old colt Casco, by Moko, dam Hattie Case, dam of Feren, 2:05½, by Simmons, 2:28, has been purchased by Lawrence Jones of Louisville, Ky. from John B. Stewart of Lexington and will be prepared for the show ring. Casco was one of the most promising colts in training at Lexington.

F. H. del Carroll, New Orleans, La., is the present owner of the M. & M. winner of 1904, Stanley Dillon, and is using him on the road.

Purses amounting to \$5,000 will be given at the ice meeting at Montreal January 23-27.

Harold D. 2:11¼ by Dexter Prince is said to be the snow pacing champion of Philadelphia this winter.

Jackson's Napa Soda does not tangle the feet.

NOTES AND NEWS.

Sol Shockley of Merced had the misfortune to lose his stallion, Loyalty, last week. The horse was playing in his paddock and slipped, injuring himself internally so that he died in a very short time.

A five-year-old colt, standing 14.2, weighing 900 pounds, a bright bay in color and suitable for a polo pony, as he can run a quarter in 23 second or better, is offered for sale or the owner will trade for a draft stallion. See advertisement.

Los Angeles, Woodland, Santa Rosa and Sacramento can be depended on as places where good harness meetings will be held this year. Fresno, San Jose, Pleasanton, Stockton and several other places where good mile tracks are located should declare themselves in early in the season.

April 1st is the date of the next payment on colts and fillies entered in the Breeders' Futurity for three-year-olds of 1906. Due notice will be sent to all nominators by the secretary.

When one looks over the list of 2:15 performers under their sires, it is very easy to understand why breeders are enthusiastic over the great McKinney. No other stallion living or dead can approach him as a sire of 2:15 performers.

A large number of new stalls will be erected immediately at the Concord race track as the demand for stall room is much greater than the supply. The Concord track is one of the best training tracks in California. A first-class county fair and race meeting will be held there this year.

Stranger O. 2:08½ won the 2:09 pace at Phoenix, with Daedalion second in each heat. The time was 2:09½, 2:10½, 2:10½.

There were never three handsomer full brothers than the McKinney stallions Tom Smith 2:13½, Constructor and Gen. J. B. Frisbie. They will all be in the stud in California this year.

At the Kenney Manufacturing Company's shops at 531 Valencia street, there is now a second-hand McMurray cart that is a good one, and for sale at a bargain price. Mr. Kenney invites horsemen to call and see a beautiful new light speed cart just in from the eastern factory. It is about the neatest thing in the cart line yet made.

Star Pointer 1:59¼ continues to be the great attraction at Pleasanton track and all visitors want to take a look at the first two-minute horse. Mr. DeRyder reports that the prospects are excellent for a good season and many high class mares.

"Shorty" Roberts reports his fast stallion Eden Vale 2:16 by Eros, son of Electioneer, as looking fine and fit for the season of 1906, which he will make at Mr. Roberts' Sea Breeze Resort on the ocean beach in this city.

Few stallions that have stood in California have sired as uniform size, style and speed as Seymour Wilkes. Every colt he gets is a \$300 horse as soon as he is three years old. That's the sort to raise. There is a good profit in raising the get of this horse as one always has a salable colt. They all have speed, too, and are from Missouri as soon as they are broke to harness.

The breeders of San Benito county are very lucky in having such a horse as Dictatus Medium in their midst. His sire is the sire of two 2:10 performers and his dam is the dam of Stam B. 2:11¼, one of the best trotters ever seen in this State. There is no better breeding than that of Dictatus Medium. He is siring speed, all of his colts old enough to train being good gaited and naturally fast. Breeders should not overlook Dictatus Medium when looking for a sire that will pay to breed to.

The blood of the old campaigner Director 2:17 is good to have on any stock farm. There is at Haywards, Cal., a very handsome son of Director called Educator. He is owned by Mr. M. Henry and gets as handsome foals as any sire in California. The most profitable way to breed is to try to get a handsome roadster. If it trots or paces fast enough to race, so much the better and the profit is greater. But get your handsome horse first and you can always sell. The sons and daughters of Educator never linger on the market. A word to the wise is sufficient.

Fearnot by Lynmont won a good race at the Phoenix, Arizona, meeting Christmas week, pacing his three winning heats in 2:14¼, 2:14¼ and 2:13¼. Billy A. was second and Byron Lace third.

Boralmas Brother won a hotly contested race from the filly Helen Dare by Zombro at Phoenix, Arizona, last week. The time of the three heats was 2:20½, 2:16½ and 2:16½.

It has been officially announced that the Memphis Trotting Association will not apply for dates in the Grand Circuit for 1906, and that there will be no other meetings held at that track till the anti-betting laws of Tennessee are repealed.

W. S. Clark, the well known horseman of Concord, Contra Costa county, will have the Red Wilkes stallion Dictatus 2:17 in the stud at the Concord track this year. Dictatus is coming rapidly to the front as a sire of speed. He has two in the 2:10 list—Funston 2:08¼ and Dictatress 2:08¼, and another, Oma A. 2:10½, that is knocking at the door. Dictatus is being wintered at the Brentwood Stock Farm and looks like a two-year-old.

Mr. C. C. Crippen, one of the best posted horsemen in California, has associated himself with Budd Doble, owner of the great trotting stallion Kinney Lou 2:07¼, and will assist the prince of reinsmen in the management of this horse during the coming season. It was due in a great measure to Mr. Crippen's energetic work that Searchlight and Lecco were so well patronized during the time they were in California, as he was at that time in the employ of their owners. Few men in California have made a closer study of harness horse breeding than Mr. Crippen, who is not only a deep student of pedigrees and blood lines, but also a practical horseman, having been for years connected with the training department of the Palo Alto Stock Farm. Mr. Doble has secured a very valuable man in Mr. Crippen and the latter is already at work getting out Kinney Lou literature for the season of 1906, which promises to be a record breaker for this, the greatest trotting son of McKinney. The yearlings and weanlings by Kinney Lou are such handsome, natural trotters that their owners are already predicting that his list of standard performers will begin growing as soon as his foals are old enough to start, and will contain many very high class performers.

Zolock set the Arizona pacing record at 2:07 on the opening day of the Territorial Fair at Phoenix, and a few days later, when Hazel Patch and Zolock met in a race there, the association offered \$50 for every half second this mark was reduced. Hazel Patch paced a heat in 2:05¼ and was awarded \$175 in addition to the regular purse.

An advertiser desires to purchase a good survey horse. See advertisement for description of horse wanted.

Alta McDonald denies the story that is going the rounds of the Eastern horse papers to the effect that Sweet Marie 2:04½ recently figured in a runaway. He says nothing of the sort ever happened, that the McKinney mare is all right and ready to meet all comers during 1906.

The stallion, Lord Russell, full brother to Maud S. 2:08½, died at Newark, Ohio, Tuesday night, December 26. He died the property of Mr. H. V. Hardway, of that city. Lord Russell, because of his breeding, his dam being the famous Miss Russell, enjoyed considerable fame during the early part of his life. He was foaled in 1881, and was bred by A. J. Alexander, Spring Station, Ky. He was the sire of thirty-five standard performers. Among them the following: Kremlin 2:07¼, Hustler Russell 2:12¼, Russellmont 2:12¼, Sea Bird 2:13¼, Lee Russell 2:16¼, and others. Twenty-two of his sons are sires of standard performers. He has been owned at Newark for several years.

Horsemen have read with thrilling interest the graphic description of the taming of Pommers, by Sir Conan Doyle, in his first chapter of "Sir Nigel Loring." According to Sir Conan, the famous Pommers was by a Spanish sire, his dam being an Arab. Also, according to Sir Conan, the famous yellow horse was seventeen hands high. The novelist, like the poet, is accorded wide latitude, but, as a matter of fact, it is doubtful whether there ever lived in real life a horse of the height named possessed of the blood lines described. To begin with, the Spanish horse was, and is, of Saracen blood and kin to the Arabian, if not of pure Arabian blood; probably a Barb, which is a half-breed Arabian. The pure Spanish horse was, and is to-day, a small animal—scant fifteen hands—while the average Arabian is about 14.2. Each breed is noted for its weight-carrying qualities, but, at best, fitted only for light cavalry. When the Saracens invaded the South of France along in the eighth century, though splendidly mounted and the best horsemen the world had ever seen, it was the heavy Flanders horses ridden by Charles Martel and his followers that overcame the invaders and drove them back, and not the superior bravery of the French. There is so much of poetry and romance connected with the Spanish horse and his congener, the Arabian, that Sir Conan doubtless felt justified in mounting Sir Nigel on an animal that could trace his lineage to the stud of King Solomon. Possibly Pommers was a freak.—Ex.

The Mikado 2:19¼ is being talked about as one of the "low down" trotters of 1906. He is credited with a mile better than 2:15 over a half mile track. The Mikado is by Russia out of Lea 2:18¼, own sister to Sidney Dillon and Cupid 2:18.

Trainer John Howell has Tiverton 2:04¼ looking as good and strong as he ever did in his career, says Trotter and Pacer. He is going sound and it is his opinion that he will be as good or better than he was in the spring of 1904. It only goes to show what care will do, especially by a man of intelligence and patience. Senator Mills 2:12¼ is big and strong, and it will surprise but a few if he lowers his record quite a little next season. They will both be shipped to Poughkeepsie early in the spring to be prepared to meet all comers in their respective classes.

Dr. J. C. McCoy, the former owner of Boralma 2:07 and Ethel's Pride 2:07¼, says the practice of doping trotters and pacers is becoming very common, despite the rule made at the last Turf Congress to stamp it out. He gives it as his opinion that stimulating dope caused the death last season of several prominent trotters, whose sudden taking off was attributed to dilation of the heart. It was dilation of the heart which caused the death of Sadie Mac 2:06¼.

Onward 2:25¼ now heads the list of trotting sires, with 146 trotters and 40 pacers to his credit in the 2:30 list. The great son of George Wilkes died the property of W. E. D. Stokes a few years ago. If living he would now be thirty years old.

More than two thousand trotters and pacers entered the 2:30 list in the harness racing campaign of 1905. About as many more previously in the list lowered their records.

J. M. Johnson is now president of the New England Horse Breeders' Association. The directors made an excellent selection.

Dr. J. C. Mewhinney of Spring City, Pa., claims the distinction of owning the largest pacing horse in the world—Frank Marriott, who got a mark of 2:12¼ in a seven-heat race at Tiffin, O., July 11, 1902, for a \$1,000 purse. He is 17 hands high, weighs 1,200 pounds, is of symmetrical form, and with a tail that touches the ground. He went in a race for a \$2,000 purse at Cleveland, O., July 29, 1901, finishing second to Dan Patch and beating out Pauling Boy, Legal Hal and Barolitta. He can go a half in one minute flat, and wears only quarter boots. Dr. Mewhinney uses his famous pacer in his daily calls on patients, and says that he is not for sale.

Mr. Nathan Straus has a couple at the Empire track, says Trotter and Pacer, that will bear watching the coming year. A bay filly by Handspring 2:18½, out of the champion of her day, Alix 2:03¼. She is four years old, about 15.3 hands, and has been worked but very little, as she was thought to be with foal, but proved not to be. She looks as though she would learn to trot very fast. The other is a bay colt by the same sire out of Semi-Tropic 2:24, by Sultan 2:24, second dam Lady Mackey (dam of Oakland Baron 2:09¼, by Silverthreads. He is five years old, 15.3 hands and has been a mile this fall in 2:16½. The speedway string, Ida Highwood 2:09¼, Ted 2:15¼, Malacca 2:18½, and last but not least the old warrior Cobwebs, now nearly eighteen years old, are all in the best of condition. Mr. Straus is indeed fortunate to have as reliable and painstaking a trainer and manager as he has in Tim Sullivan.

Dispatches from Cleveland, O., which may or may not be authoritative, state that instructions have been received from Mr. C. K. G. Billings for Major Delmar and Lou Dillon to remain in that city during Mr. Billings' sojourn abroad, and that Major Delmar will be trained and driven against his record in the matinees next season, while Lou Dillon is to be turned out for a year's rest. It is stated further that Mr. Billings contemplates breeding the queen next season, and that if he does she will be mated with John A. McKerron. The dispatch further says: "Recently the millionaire horseman of Chicago has written to several prominent horsemen asking advice as to whether it would be advisable to breed the champion mare, and the answers have been uniformly in the affirmative, so that the mating of the great performers in the spring is practically assured. Major Delmar will be put on edge during the matinees of the Cleveland Matinee Club, and later in the season will be given a campaign against speed records. Mr. Billings is expected to interrupt his European trip for a month or six weeks during September and October, and will drive the champion pacing gelding in his trials against records."

John H. Shults bought several of the Haggin thoroughbred mares to breed to Axworthy.

John Quinn, the well known Santa Rosa trainer, reached Pleasanton on Wednesday of this week with eight head of trotters and Joe Cuicello followed the next day with his string. The new stalls recently erected by Mr. Ronan, owner of the Pleasanton track, are now about filled and there is demand for more.

S. K. Trefry hooked up Kenneth C. 2:17 at Pleasanton last Wednesday for the first time since the State Fair last year. The son of McKinney is growing right along, and moved out like the great young trotter he is.

It is said 500,000 people attended the Live Stock Show at Chicago last week, and the Horseman says the development of the live stock exposition is only one of the signs of the fact that the farmer has arrived and now commands the attention and respect which rightfully belongs to him. For his use the largest exposition building in the country has been reconstructed at an expense of \$200,000, and it is inadequate. Already plans are being drawn to make it still larger. And with each succeeding year the farmer will be more and more in evidence as an important factor in the business and financial world. The prosperity of the country depends on him more than any one class, and fortunately for prosperity and the country he is not a hard task master. He gives more than he receives and the abundance of the earth is his.

The management of the Libertyville, Ill., track has decided to give a meeting the week preceding the opening of the Grand Circuit.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

Walter Jennings' luck changed from bad to good on the first day of 1906, and his big horse, Proper, annexed the New Year's Handicap, first money in which amounted to \$2420. It was nothing short of a 'fluke' that enabled the Prestonpans horse to get home three parts of a length in front of Gregor K., who beat Lubin (by long odds the best horse in the race) for place honors. Lubin was virtually left at the post, Treubel seeming to be in a hypnotic state at barrier-raise. "The dope" shows him sixteen lengths behind Gregor K., at the quarter pole, or three furlongs after the start had been effected. That Elliott's flyer was but a head behind the pace-setter, Gregor K., at the finish, shows what a horse Lubin was on January 1, 1906. Making up ten lengths in the last seven furlongs on such a horse as Proper italicizes his worth, and, as said in last week's issue, Lubin can beat Proper at even weights and probably could give Jennings' horse a couple of pounds and a beating. At any rate, with 123 pounds and a wide-awake rider on Lubin to 122 pounds on Proper, at a mile and a quarter, we would see a sure enough horse race. Dr. Leggo's poor showing in the New Year's Handicap was a big disappointment to his friends, who are legion. Callaghan apparently did not like the heavy going, and was next to Dr. Leggo, the last horse at the finish.

The first race of 1906 in this part of the world was won by Lucrece at odds of 20 to 1. Owner Coffey apparently loves long odds, Cloche d'Or winning at odds of 13 to 1 at Ingleside just a few days previously.

Barney Schreiber's Sain horses, Pinkerton, Buchanan and Tom McGrath, made a good showing on the initial day of the new year, out of three starts winning three, while the Balgown filly, Marion Rose, ran third in the two-year-old race.

By the way, the practice of giving two-year-old races on the first of January cannot be too strongly criticized. The jockey clubs that put them on the program are guilty of doing great harm to the breed of horses of this country, when the object of the association is always given, "the improvement of the breed of race horses." It's a safe bet that of the ten starters in the alleged two-year-old race, not one was over twenty-three months of age, while perhaps fifty per cent were not twenty-two months old and some not even twenty-one months old. The racing of the little "baby-class" gallopers that should be out in the field acquiring bone and muscle through the stomach route until at least two-years old before even knowing what a race track looks like or feeling the touch of a "breaking" outfit, are "broken" at eighteen months of age or less and put to racing, often when not over twenty months old. This can be likened to asking a thirteen-year old boy to do a stevedore's work six days per week and expecting him to grow up as straight as an Indian and as strong as the proverbial ox. It's against Nature, and the old lady will have her way. The jockey clubs that give races for horses of the tender age spoken of are catering only to a class of greedy owners who have nothing of the welfare of the turf at heart when they will race their "real" baby racers on the first day of January. "Quick action" is all right in this commercial age, but horsemen should not be allowed to get it at the expense of the breed of race horses. The right thing for all jockey clubs to do is to improve the breed, and in order to do this there should be no two-year-old races on a racing program until July, and then they would be sure enough two-year-olds. The watchword of turfmen the past twenty years has been "quick action and speed at the expense of stamina and soundness." If foals did not come along until May and June, when the mother had had a run of eight or ten weeks on the best of green feed, don't you think she would be better prepared to give you a sturdy racer than if the foal came in January or February, when there is no green feed to be had? And if there were no two-year-old races until July of each year would not there be a better chance for development of the young racers and more soundness of limb and wind before putting them at their life's work? This is something for the jockey clubs to ponder over carefully.

W. O'B. Macdonough had his great old mare Libbertiflibbet chloroformed the other day to put her out of the miseries attendant upon extreme old age. Libbertiflibbet, a daughter of Bullion (by War Dance) from a daughter of Kingfisher (like War Dance, also a son of Lexington) was one of the best producers on this Coast, being the mother of Flibbetigibbet, Valencienn, Gold Lace, Hainault, Honiton, and last not least, the famous George C. Bennett, which died recently at Louisville and for which Fred Cook had refused \$30,000. The late August Belmont bred Libbertiflibbet, also her dam, and imported her grand dam from England.

Ed Hayes, who rode the first winner here of 1906, viz.: Lucrece, was taken to France by Johnny Campbell in 1904 after having ridden several times at Butte, Mont., in 1903, when a 60-pounder. In France he piloted several winners.

Elmer D. Lawrence is making an effort to establish a racing circuit between Denver and Butte for the summer of 1906, and it looks as if he should succeed.

Butte and Anaconda should be eager for a race meeting, none being held there for nearly three years, while Salt Lake should support a meeting of ten days or two weeks in good style. Denver was always a good racing city.

Quinlan & Wilson secured Escamado for \$825 by the claiming route January 1st.

Sam Hildreth has lost \$41,000 booking at New Orleans, and announces that his slate will never again be seen in any betting ring. In his opinion, Western players are much wiser than those of the effete East.

The New California Jockey Club has substituted a five-furlong sprint for a \$1500 purse for the mile and a sixteenth \$2500 special the latter part of this month. Bearcatcher, Cruzados, San Nicholas and Neva Lee are named as eligibles.

George H. Keene left early this week for Memphis, Tenn., going to the Tennessee metropolis to prepare a number of two-year-olds for the coming fray.

Harry Stover's stable is furnishing more long-shot winners than any in the country. On the 1st of January a filly at 100 to 1 won for him at Ascot, and on Tuesday Ray Egan won at the same place at odds of 30 to 1, and The Lieutenant at 12 to 1 at Emeryville.

Barney Schreiber heads the list of winning owners at the local tracks, and Proper's win of the New Year's Handicap will put Jennings in close proximity to the genial German.

Enoch Wishard thinks Ort Welles sure to stand training this season.

Chicago, January 2.—Nicol leads all jockeys for last year with 857 mounts, 221 wins, 143 seconds, 136 thirds. W. Knapp is second with 1021 mounts, 186 wins, 158 seconds, 139 thirds. Radtke is third with 693 mounts, 177 wins, 129 seconds, 97 thirds. It was Radtke's first year on the track. Barney Schreiber heads the list of owners who raced exclusively in the West with \$46,030. Ninety-nine winners carried his colors. He was ninety-four times second and eighty-seven times third. Corrigan holds the record for the year of races won with exactly 100.

"The English racing public is supposed to be an easygoing one," said a gentleman who has been abroad recently, "but they would tear the fence down and kill the starter and his assistants in quicker time than it takes to tell it if an assistant was to hold a heavily-played favorite at the start until the field was well on its way. It would never be tried twice there, but since the racing began here last November I've seen seven or eight horses played for a killing that were held hard and fast by the 'Hold-on-Jimmies,' as they are called. The first time an assistant takes a horse by the head some good shot ought to lop off one of his fingers for him. You could beat Ormonde, Hindoo or any other racing celebrity in the world with a bunch of bow-wows if you can get a man to hold on long enough to the public idol. Booking looks like a good proposition under the existing conditions."

Wednesday last will long be remembered by the layers of odd at Emeryville, for "the ring" suffered to the extent of at least \$50,000 over the day's racing. "Plunger" McManus' book dropped \$4,000, Joe Harlan's \$2,700, Barney Schreiber's \$2,000, others to the extent of from \$700 to \$2,000.

W. P. Fine "boosted" Distributor \$300 on Wednesday after he had won the first race, and upon Jim Neil making an insulting remark over the "boost" Fine struck at Neil. The men were then separated before damage was done. Neil was fined \$100 for provoking the row and Fine \$50 for striking at Neil.

Will Applegate of Louisville is here after a trip around the world, and will doubtless book at Emeryville the balance of the season.

The ten leading winning owners of America during the year 1905 were as follows, according to the Daily Racing Form of Chicago:

Owners.	1st.	2d.	3d.	Amount
J. R. Keene.....	28	22	36	\$228,724
H. P. Whitney.....	33	17	16	170,447
S. Paget	55	40	36	137,572
S. S. Brown.....	80	56	35	113,572
A. Belmont	27	19	20	85,154
E. E. Smathers.....	62	47	40	70,588
J. Sanford	8	9	4	56,615
B. Schreiber	99	94	87	46,020
T. Hitchcock Jr.....	18	13	7	45,995
E. Corrigan	100	58	49	41,486

Edward Corrigan holds the record for the number of races won by any owner. Barney Schreiber, who is only one behind him, was in the money oftener than any other owner. He heads the list of owners racing exclusively in the West.

CURED IN TEN DAYS.

Mr. C. A. Farley of Craig, Neb., writes as follows: "I have used Quinn's Ointment for over ten years with the best of results; cured a bad case of curb in 10 days. If more of your valuable remedy were used the suffering of the noble animal would be less. It is far superior to anything I have tried for curbs, splints, spavins and bunches. No horseman can be without it." This is the general expression of horsemen all over the country. If in need of an remedy of this kind, try Quinn's Ointment. Price One Dollar per bottle. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

OCTOGENARIAN DRIVER.

Daniel Bodine of Merchantville, N. J., is claimed to be the oldest light-harness horse trainer and driver now in active service in the United States. He is past 81 years of age, and just as efficient as he was a half century ago, when he branched out as a driver and trainer. He claims that he is as well and hearty and can eat a square meal as good as when a boy, and has never had a day's sickness or an ache or a pain during his life time. He attributes his remarkable longevity to never having smoked or chewed tobacco, never drinking spirituous or malt liquors or losing any sleep in card playing, but claims he can beat anybody pitching quoits in Jersey.

He was born on September 15, 1824, in his father's (James Bodine) tavern at Lycoming, now Berlin, N. J., 15 miles from Camden. At the age of 11 years his parents died and he was compelled to hustle for a livelihood. He went to live with a Thomas Wright, a lover of a good horse, at Berlin, and after driving a four-mule team for two years became horse-proud and yearned for the time when he could own his own trotter.

He drifted to Philadelphia and for six years sold charcoal in the city and drove a ferry wagon, hauling goods from the West Jersey ferry. In those days no wagons were allowed to cross the river on the boats.

He finally was appointed ticket seller at the ferry, and worked for the company for thirty-one years, his duties being usually at night. While in the employ of the company he purchased his first horse, a 3-minute trotter, which he imagined could beat anything on earth. His hopes were soon blasted. He entered the animal at the Old Powelton Fair and drove in his first race (1853). He claims that when he got to the half-mile pole he drove off the track, as the other horses had finished the mile.

In his day he has owned a large number of horses. Among the old timers were Rambo 2:50, the boss of the old Plank Road; American Jackson and Victor Patchen, a great pole team that he drove together in 2:38, a remarkable performance in those days. He afterward sold them for \$4000. Then he got May Queen, selling her to John Turner for \$1600. Turner got \$10,000 for the mare. He also had Garwood Patchen, Lady Collier, who could step in 2:20, and in later days owned Major S. 2:14, and Irene, trial 2:17½.

He marked Major for Fred Walton; Palace Girl and others for Charles McFadden, and Socrates and General Russell for Joseph Butterworth.

Next season he will be again in harness. He is wintering a three-year-old pacer, Aroon, b. m. by Volman, dam Leo 2:12½. He thinks he has his first 2:10 performer in the mare. Helen Hill, black mare, pacer, by Mahogany, a half sister to Miss Mills, is also in his stable.

Bodine has a remarkable memory, and can relate stories by the dozen of the old-time races and men of the bygone days.—Philadelphia Record.

TWO FOALS IN ONE YEAR.

Editor Breeder and Sportsman—In my copy of the "Breeder" for December 30th, I noticed that Whisper, the Fall River, Mass., mare, had two foals in one year. To show that California is hard to beat I will inform you that my mare, Cheta (trial 2:24¼), has one two-year-old and two yearlings at the present time. The two-year-old, sired by Azmoor 2:20½, was foaled January 27, 1904. The first yearling, sired by Marvin Wilkes 2:18, was foaled January 7th, 1905, and the second yearling, also sired by Marvin Wilkes, was foaled December 25th, 1905. When the clock struck for the new year of 1906 I had two yearling and one two-year-old from the same dam. The first two are entered in Breeders' Futurity Stakes Nos. 4 and 5 respectively.

Hoping this equals the Fall River record and wishing you many happy and prosperous New Years, I am,

Yours very truly,

PAUL R. SIMS.

Union House, Sacramento Co.

A POPULAR DISTEMPER REMEDY.

Every horseman should not the advertisement of Craft's Distemper Cure, manufactured and sold throughout the world for many years by the well known chemists, the Wells Medicine Co., Lafayette, Ind. This remedy is not only an excellent preventive of all germ diseases among horses, sheep and dogs, but it is a guaranteed cure for distemper, epizootic, pinkeye, and all similar troubles, which makes it the most popular of remedies among stockmen. Many of the best known and most successful trainers of trotters and pacers have used the preparation for many years, and without exception endorse it. It is sold in liquid form, put up in 50c and \$1.00 bottles, and is obtained at drug stores, or will be sent prepaid by the manufacturers.

Get in line with Craft's Distemper Cure by sending at once to the Wells Medicine Co., 13 Third St., Lafayette, Ind., for their new 32 page booklet, "Veterinary Pointers." It contains much valuable information concerning the most dreaded diseases of horses and colts.

Pat Foley owns two good McKinney stallions that he will place in the stud at Alameda race track during the season of 1906. They are Montesol and Pole Star. The first named is out of a mare by Antevolo and the other out of a mare by Young Venture. Both are bred in great producing lines.

Secretary Moore of Providence and some of the stewards of the Grand Circuit were in conference in New York last week with President D. J. Campau. It is said that the annual meeting of the stewards will be held on January 9 at the Hoffman House, New York City, where the Grand Circuit for 1906 will be decided upon.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
April 1-Sept. 15—Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above the water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and age hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Jan. 4, 6—Southern Ohio Kennel Club. Hamilton, O.
Jan. 10, 11—Bay State Co-operative Bench Show Association. Fall River, Mass. Walter E. Stone, Clerk.
Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary. Entries close Jan. 20.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.
March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary.
June 1, 2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.
Sept. 3, 6—Taunton Kennel Club. Taunton, Mass. A. J. Lee, Secretary.
Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary.

Field Trials.

Jan. 8—Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.
Jan. 8—Texas Field Trial Club. 4th annual trials. Kansas City, Tex.
Jan. 9—Georgia Field Trial Association. 4th annual trials. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. 15—United States Field Trial Club. 17th annual trials. Grand Junction, Tenn. W. B. Stafford, Secretary.
Jan. —National Championship Field Trial Club. 10th annual trials. Followed: U. S. All Age Stake. W. B. Stafford, Secretary, Trenton, Tenn.

A CHRISTMAS IN THE ANTARCTIC—HUNTING SEA ELEPHANTS.

Formerly very plentiful in the Antarctic regions and also to some extent plentiful on the California coast, the sea elephant (*macrorhinus proboscideus*) is now, in this locality, a past memory and the species became practically extinct in the Antarctic. The herds were incessantly hunted for years until the scarcity of the huge animals made it unprofitable to fit out vessels for a trip to the sea elephants' domain. Temporary cessation from pursuit enabled the herds to increase in the Antarctic. Another variety of the species, smaller in size (*M. augustirostris*), is found occasionally on the coast of Lower California, but is now almost extinct.

A decade ago the hunting and killing of the sea elephant was revived at Kerguelen Island by a New London, Conn., sealer, and again in 1897, a Boston vessel visited the island and secured some 4000 of the animals for the skins and oil.

Mr. Robert Hall, a naturalist, who in the summer of 1897 and 1898 (winter time in the temperate zone) made a trip to the island in the brig Edward, which may have been one of the vessels above referred to. Mr. Hall gives an interesting account of the sea elephant as he observed it—the bulk and habits of the animal, their extraordinary inertia and the difficulties and dangers of this butchery. The sea elephant is probably nearer absolute extinction than any other mammal in the world to-day. Mr. Hall's article states:

"Kerguelen's Land is a large island of about ninety miles long by forty miles wide (South Indian Ocean, latitude 49 degrees south, longitude 70 degrees east, owned by France), and full of floods, on the coasts of which the sea elephants congregate in numbers, more especially on the west coast, where they are secure, owing to its ruggedness, dangerous winds and currents. It is thought they arrive to rear a family in August and our observations lead us to believe the departure is timed for February and March. During these months they are very restless, and remain no longer the listless creatures of December. A sea elephant is contrary in nature to a sea lion, for while the former on this island is docile and languid, the latter on the Auckland is active and savage. The elephant, on observing a stranger, shows a restless eye, but quickly goes to sleep again. You may then walk through a herd of fifty sleeping animals and

merely disturb one or two for a moment. These hot-blooded creatures vary in size from six feet to twenty feet six inches, and we found a skeleton of a young one about four feet in length. The largest were exceedingly difficult to handle; but as the enterprise of our ship was principally a commercial one, the business faculty was quickly brought to bear upon any awkward and unwilling customer.

Many of the animals would weigh approximately two to six tons. No five men could turn a large bull over without special levers, and it needed seven sealers to haul half a skin along the sand to the boat in waiting. As for dragging a whole skin, that was quite out of the question under the circumstances. For museum purposes we made a preparation of one, and this we feared would break the tackle while being drawn on board from the end of a towline. Its length was only fourteen feet nine inches, with a girth of ten feet ten inches about the pectoral girdle. From shoulder to shoulder it measured five feet six inches. The circumference at the base of the flippers was three feet six inches.

To the great bulk there was a mouth, with a breadth at the angle of nine inches only, and a tongue (which we found later to be excellent eating) that quite filled it. Dr. Stirling has this specimen mounted in the South Australian Museum. While the blubber ranges from two to six inches in depth, it varies in weight. Six men were employed in changing the position of one fatty skin while on the skinning board. This is a fair example of a male, which is always larger than the female. The congregation in harbors was generally systematic. The bulls occupied one part of the beach and the cows formed a colony in another. There were always several colonies in a harbor, and they seldom appeared to intermingle. The young were not numerous. They had probably set out on their southerly migration before our arrival on December 27, or were scattered promiscuously along the beaches.

It is the general impression that these mammals lie in their rookeries for days or weeks together and do not feed otherwise than on their fatty tissue. With this view I do not altogether agree, for most of the seals are daily to be seen in the water either coming in with the full flood or going out with the early part of an ebb tide. That a young sea elephant six feet in length can live a month on its own fat was proved by one we brought to Melbourne, and which was lodged in the Aquarium, but died a few months later.

One day as many as eighty may be counted; the next day the same beach may only contain ten, with other heads poking above the floating weed, and showing glassy, round, black eyes, quite wide awake. Our men have often shot as many as sixty at one time, and found next day another twenty had come up among the dead, simply because it was their chosen lair. This species dislikes expending energy on land, and they will lie in a group of twenty to sixty in some grassy spot with a sandy landing. Some few will ascend to an inclined distance of 150 yards, and there they are not so active as those below, and probably do not go out daily. The energy would be too much for them, as they are slow crawlers, using only two flippers and the snake-like action of vertebrae and muscles.

The first anchorage of the brig was at Royal Sound, and before we removed from a beach of four miles in extent we had collected 426 skins. Our two anchors were lifted for a second harbor on January 17 (Greenland Harbor).

During the first day sixty to seventy were killed, and similar results often followed. To shoot more at one time was inadvisable. An average of forty per day was considered good, and this allowed time to ship and 'speck' i. e., take the blubber from the skin.

The finest herd we visited just before leaving the island. In all, there were twenty-four magnificent animals, roughly averaging nineteen feet in length. Before introducing ourselves, I noticed one great elephant take a short cut over another and a quarrel arose. Both growled and stood partly supported by their shoulder flippers. Another disagreement arose elsewhere, but it seems to me there is more bark than bite, as animosity is quickly lost in sleep. One unfortunate animal had a badly torn nose, in all probability a dental evidence of past troubles. One of the crew gave me a tooth some seven inches in length, the greater portion of which lies within the gum (e. g., 4.9 inches). When disturbed the belching of each of these old bulls was objectionably strong, for it can scarcely be called a roar. So great is the exertion that blood appears in the pharynx, and this occurred when I was engaged near its head, measuring the trough in which it lay. This lair along the convex part was thirty-two feet in length, the breadth seven feet, tapering toward each end. The depth of these, mostly dry mud holes placed among the grasses, ranges to about two feet, seldom deeper; but they are placed in natural depressions—i. e., extra to the artificial ones. Many of the troughs are continuous and intersect each other, so that a large lair may appear netted, which is uncommon. In one trough there are often two bulls or two cows, the broad part of one and the tapering part of another at one end, and the corresponding parts towards the opposite pole. This insures the trough being well filled.

This place soon showed an unfortunate change. Rifles were presented within six feet of each bull, and the bullet sped through the brain box, partly flattening on the blubber of the opposite side. Now, slits with sharp knives are run dorsally in the long direction, and out rushes venous-like blood to stain the little bay in a few minutes. From one seal some sixty fountains of blood rose in oblique directions to a height of two feet, and all from the single cut on the back. Against the skyline this miniature double line of fountains looked strange, and the spray of a city corporation van is not to be compared to its delicate and colored sprayings. In the viscera I was surprised at the length of the small intestine, which I found to be 255 feet in length and capable of rough haulage. It stood the pulling over the grass from the carcass with only a small distension.

The methods of procuring elephants is a simple, though not an easy one. Three boats, each with a crew of five men, row from the anchorage to the shore, haul up their boats, prospect the field, and with four loaded rifles drive the animals down to within a few yards of high water mark and shoot them. There they lie for the coming of the tide, and get anchored temporarily in a few feet of water.

Some of the seals give considerable trouble before they will leave the high lands (100 yards from the beach on a medium incline), and as many as three hours may be spent in annoying them with the lance before they decide to go. If the seals carry their own skins down it saves more labor and time of the men. The boating is quite enough trouble to bear, as the harbor winds are treacherous and strong; so powerful are they, that I have observed half the body of a "waterfall" blown back many yards before it could leave the ledge where gravity was strongest. Should a gale prohibit the boats from leaving the ship, the crew will sleep in during the day, and with the lull toward midnight leave for the scene of operations. Many a time they have had to row miles against a tempest to save being out all night, and many hours it has taken. Under such conditions, boats have been swamped, the skins floated overboard, and a landing arranged for fresh efforts. I shall not be likely to forget one cold night while going on board with my birds and cameras. The helmsman got a renewed attack of tropical fever, and, almost collapsing, I was given charge of the helm. For three hours mittens and oilskins seemed like miserable calico, and then I fully sympathized with the men who had their Wellingtons partly filled with icy water.

Daily the boats wend their way in much the same manner, and in exactly the same way the skins are taken from the bodies. Roughly speaking, each skillful man can skin the smaller seals—ten in two hours and a half, or fifteen minutes for each. This time is for animals which are not too large for a man to handle. The carcasses in our takings were generally of large size. The following is a case of quick work: After a 1 o'clock dinner (of plum duff) the boats were rowed three miles. Seventy-two seals were killed, and all but fourteen skinned. Twenty-three of the largest were taken on board, and the last was upon the windlass at 9:30 p. m. Two skins of fair size are enough for a small boat, or one of a large bull. The last trip in the above raid took two hours and a half in rowing three miles; this wasted time and much more was spent in endeavoring to get around a certain point. We agreed without a dissenting voice to call this headland Cape Horn of Royal Sound.

This uncharitable point is the type of many another. To leave a harbor for a second one is the event most trying to the constitution, for one never knows until the anchor is safely dropped where the howling wind will drive you. Altogether we tried six harbors, of which four were well worked. The fifth (Swain's Bay) took us three days to enter, and after being ten minutes inside trying to get up the channel, our clever captain put his ship about, and thanked his lucky star he had got safely out of the treacherous "hole." Down this fiord the wind without notice struck the foresails, while the wind astern drove her forward. Here the trouble started, but fortunately quickly ended by good management and good fortune. Had we touched the entrance island the ship would at once have been broken into matchwood.

From this place I carried pleasant recollections, more on account of the bold contour and strangeness of the island than because it pleased my friends to chart it as a tribute to myself. Strange as it may read, among the finding of shipwreck remains there were letters and bottles from a sealing captain mentioned in Prof. Moseley's "Challenger Notes" twenty years ago. Captain Fuller is an old hand at the business, and evidently has the indomitable pluck of the American in the making and losing of fortunes in rough waters! As for ourselves, we managed to quit the land safely on February 18, although for a few hours we could not get over a severe loss we made at the last moment. Having on the 17th killed, skinned and anchored a batch of skins to the value of \$1250, all hands on board heaved anchors next morning to stand into a near bay to take them off. Two storms now showed their effects; one in driving all the skins ashore and burying them in the sand; the other in driving us off the bay altogether.

With a threatening sky our tight and dry little brig, the Edward, now headed for Melbourne, and we started a direct homeward course of 3,400 miles. This was duly accomplished in twenty-two days, and we experienced a phenomenal wind for the last fourteen days, which was from the north instead of the prevailing one from the west, a circumstance of exceedingly rare occurrence.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

GRAND STEELHEAD FISHING IN RUSSIAN RIVER.

For more than two weeks past Russian River at Duncan's Mills, on the line of the North Shore railroad in Sonoma county, has been the Mecca of a large number of enthusiastic devotees of angling.

This famous steelhead fishing resort is at present developing the best output of piscatorial sport that has ensued for about eight years past. Each fall, when the run of steelheads is due from the ocean, much concern is manifested by the sportsmen as to the position of the bar—whether its sandy portals will be thrust aside or not, if the weather conditions will be in favorable conjunction with the ingress of the game fish from the salt water, and also if the rains due at this season of the year will hold off long enough for the anglers to take advantage of the sport promised by the combination of favorable conditions. Each year, this has been anxiously awaited and scores of the fraternity have kept tab on current events in this particular respect. For about eight seasons past the angling horoscope was each year overcast with one or more disrupting conditions and what fishing there was—none at all for one or two years we believe—kept the brothers of the angle nerved up to the possibilities of full enjoyment when the turn came right. Memories of several grand fishing years made the veterans bide their time with a patience that now has been rewarded most bountifully, for the past two weeks has not been exceeded by any similar fishing time of prior seasons in the memory of the oldest veteran of the rod among them all.

The good thing came off on Thursday, December 21st, when the bar at the river's mouth, about four miles from Duncan's Mills, opened for good. Efforts had been made three times before that by interested parties to open the bar by digging until the outgoing volume was heavy enough to cut a channel for the fish to run up into the stream. Each of these attempts were futile, for the huge breakers closed up the openings and put a blanket temporarily on the hopes of many ardent anglers. On Thursday afternoon, however, the pent-up waters of the river rushed through the sand bar obstruction and the river went down eight feet that night, leaving the stream low and clear with sufficient water in the famous Austin pool, located some distance below the railroad bridge, for the fish to loaf in comfortably until the winter freshets raise the river high enough to enable access to the spawning grounds of the tributary streams far up in the mountain ranges.

The big speckled steelheads were seen going over the riffles up stream, after the bar broke, in big schools. The fish are in splendid condition and fiends for fighting this year. Small fish are the exception. The weights of over 500 fish already taken by rod and line running from eight to twelve pounds. This run of fish is about three weeks later than usual this season. The fish were often seen in the ocean off the bar, close to the river's mouth, where the fresh water seeping through the sand kept them waiting for the letting down of the barrier. Whilst the schools were outside the sea lions ravaged the gathered finny hosts; when they finally swam up stream the trolling spinner and the roe-baited double hook awaited them.

This run of fish, both in quality, size and numbers, is an annual occurrence. What makes the sport at present so entrancing to the Waltonians is that weather and water conditions for the sport are ideal. In consequence every rodster in this city who could get away made post haste for the battleground. Some of the fishermen have made or will make two or more trips, for the sport will only last until the rains come and the game is over. The rising and roily waters bar fishing, and the fish will pass on up to the furthestmost gravel beds accessible. After spawning they return to the ocean waters again, spent and out of condition—"razorbacks," they are dubbed—with all the fight taken out of them, unfitted for table or rod and line.

Tuesday, December 25th, in the Austin pool, the kingpin fishing water of the river, a spot about five acres in area, there was a flotilla of twenty-five boats in which were thirty anglers, among them a lady rod enthusiast. Most of the fishers were trolling. The favorite outfit for the troller is a first-class split bamboo rod, from eight and a half to twelve ounces in weight and nine to twelve feet in length, the reel seat either above or below the grip as the angler favors. A reel that holds at least 200 yards of Wilson dyed braided silk line, a heavy three-foot salmon leader to which is attached, generally, a No. 4 Wilson spinner, all copper or copper and silver. Some fishermen accent this lure with a red Benn or Wilson fly tied on a two of three sproat hook. When a fish strikes and is hooked the occupant of the boat makes for shore with his craft immediately. Stepping on the bank, the fish is then played and finally brought to gaff. This is the orthodox manner of taking a steelhead. Everybody, however, is not so proficient, and then a fish is "mauled," that is, pulled up to the boat, or ashore, any old way. With the novice, excitement has much to do in the breach of angling ethics, much to the disgust of the veterans and dilettanti, who have the highest regard for the locality, the sport, and its traditions, and who consider infractions of sacred angling custom and usage almost as personal affront.

Some anglers prefer fishing from the banks. This style is generally bottom fishing. The fisherman uses a No. 2-0 double hook baited with a generous-sized gob of salmon roe instead of the spinner. Some men use two hooks on the leader, but one is considered sufficient by most anglers. The spinner is used for the bankside also, but this style requires cast after cast into the river and is only resorted to by the enthusiast who cannot secure a boat.

Sunday, December 24th, there was a heavy tide, over six feet, the intruding flood carrying everything with

it. The boats drifted upstream instead of the usual direction.

Everybody at Duncan's has taken fish. Among those who were there and the number of fish reported last week were: W. H. Hillegas 7, Raish Terry 6, Sam Wells 21, Black Jack Lemmer and J. Hayden Butler 16, Dave Harefield 6, Jack Sammi 9, Bert Spring 8, Harry Leap 6, Frank Marcus, Charles Breidenstein and Bob Eaton 14, J. M. Thomson 11, M. Cross, Alex. T. Vogelsang, John P. Babcock (formerly chief deputy fish commissioner), R. W. McFarland and Charles W. Bond 8.

James Thomson fished from 1 o'clock the first Sunday afternoon until 2 o'clock Monday afternoon before he landed a fish. He is noted for staying qualities. By Wednesday he had eleven fish that scaled 145 pounds, and was the best looking lot of steelheads landed up to that time. One 14-pound fish made a run that took out 400 feet of line. Alex Vogelsang hooked on to a lusty 12-pounder that gave him a battle for twenty-five minutes before he was beaten. Vogelsang is voted as artistic and thorough an angler in playing a fish as can be seen. A noticeable feature of the present steelhead fest is that the female fish put up the most strenuous fights when hooked. That the fish are exceedingly lively ones is shown in the fact that numerous fish that struck got away before being securely hooked. Al Wilson, than whom there is no better angler on the river, got ten strikes one morning and hooked but three of the fish.

The published statement that "men and boys" were spearing and tossing fish out of the river with pitchforks is not borne out by facts.

The record for the present week is a reiteration of the gratifying experiences of the opening week of the fishing. Among the new rods on the river this week and a partial list of fish caught were: C. P. Medeau, Hart Williams, Bert Harwood 9, C. B. Hollywood 4, Ed. Conlin 5, L. Rondeau 4, Fish Commissioner W. E. Gerber of Sacramento 9, Al. Hall 8, Bert Spring 6, Frank Marcus 6, J. M. Thompson 6, S. A. Wells, 35 all told; Manuel Cross, a total of 40; Dave Harfield and son, 12; W. C. Stevens 9, L. Boutilier about 40 altogether, Jack Lemmer, John Butler, J. Dougall, Al. Wilson and Bob Sangster are reputed to have taken a total of 90 or more; Alex. Vogelsang and John P. Babcock have done equally as well, Dr. Morgan, Harry Coon, W. A. L. Miller, W. F. Hillegass, James Lynch, Joseph Uri, W. C. Street, Joseph Pincus, George Wentworth and many others.

J. Butler landed a 22-pound fish, one of the largest taken this season. Al. Wilson caught a 13-pound striped bass with salmon roe. Vogelsang went him a few points better when he landed a 20-pound striped bass. Frank Marcus believes in variety for he hooked a six-inch flounder which tried to get away with his salmon roe bait. "Raisch" Terry has the proud distinction of hooking and landing two steelheads at once; they weighed 15 and 9 pounds respectively. Whilst this mixup was taking place Terry's fight was watched by a score of brother anglers.

Much as the Golden State needs rain, we fear that not a few anglers are fervently praying that the rain may keep off "for just a few days more—we never had such fishing in our lives before," as one fisherman put it. Taking the game all in all the anglers are to be congratulated, for it may be many seasons again until such phenomenally good fishing will be had in Russian River.

Illegal to Kill Wild Swans.

Contrary to the general impression among the sportsmen of this State it is a violation of the game laws to kill one of the graceful birds.

It appears that the provision making it a misdemeanor to kill a swan at any time of year was inserted in the game laws only at the last session of the Legislature of this State, and it was not embraced in the new game laws as published by the State Game Association. The section is as follows.

'Section 626—Relating to swans, pheasants, bobwhite and imported quail.

"Every person who takes, kills, or destroys, or has in his possession any swan, or any pheasants, or any bob-white quail, or any variety of imported quail or partridge, is guilty of a misdemeanor. Approved March 18, 1905."

Fatal Result From a Common Custom.

A press dispatch from Los Angeles announces a hunting casualty which was caused by an act of carelessness that is altogether too common. The fact that more accidents from this cause—the throwing of a bird into a boat or a wagon, etc., are not reported, may be attributed as much to good luck as anything else. The practice is entirely too much in vogue and what may ensue in the line of fatal or serious injury can be readily understood by the following story, that if proper caution—and common sense had been used would never have appeared in print:

Lying on a cot at the Woodside Hospital in Los Angeles, Miles Crane hovers between life and death, the victim of a peculiar shooting accident. In company with five other men, Crane went out early in the morning of December 31st to shoot ducks on Alamitos Bay. There were two boats in use. Crane was alone in one of these. Each of the two parties secured a string of ducks, and finally one of the men shot an unusually fine duck, which fell near the boat. He paddled over to it and determined to give it to Cane in the other boat. Pulling it out of the water, he threw it over to Cane. As it fell into the boat it struck a gun lying on the seat. The gun was discharged and the entire charge struck Cane in the breast, tearing a fearful hole close to the heart. He cannot live.

Strike—if they don't give you Jackson's Napa Soda when you ask for it.

FIELD TRIAL WINNERS OF 1905.

Results of two trials, supplementary to list of winners published in the Breeder & Sportsman, December 23, 1905.

Eastern Field Trial Club.—Twenty-seventh annual trials. Waynesboro, Ga., December 12, 1905. W. W. Titus, West Point, Miss., and Theo. Sturges, Greenfield Hills, Conn., judges; Theo. Sturges, acting secretary.

Derby—Purse \$500, 3 moneys, 50, 30 and 20 per cent. Entrance \$10, second forfeit \$10, \$10 additional to start, 18 starters (12 English Setters, 6 Pointers).

Winners—1 Ria Baby, black, white and tan English Setter bitch (Col. R.—Monterey) H. R. Edwards, owner; J. Gude, handler. 2 Alford's King, black and white Pointer dog (Alford's John—Belle Rip Rap) W. R. Lyon, owner; E. S. Munger, handler. 3 Miss Ransom, black, white and tan English Setter bitch (Uncle B.—Sport's Belle), H. R. Edwards, owner; J. Gude, handler.

All Age.—December 13, open to all Pointers and Setters, non-winners of first in the Eastern Continental or United States trials. Purse \$500, 3 moneys, 50, 30 and 20 per cent. Entrance \$10, \$20 additional to start, 11 starters (8 English Setters, 3 Pointers).

Winners—1 Hard Cash, liver and white Pointer dog (Young Jingo—Brown's Bella Pointer), A. M. Masters, owner; E. Shelley, handler. 2 Lanark Lad, orange and white English Setter dog (Tony Boy—Pink Tea), F. W. Scott, owner; J. Bishop, handler. 3 Jesse Rodfield's Count Gladstone, orange and white English Setter dog (Lady's Count Gladstone—Jesse Rodfield), Jesse Sherwood, owner; E. Shelley handler.

Subscription Stake.—December 16, Purse \$400, 3 moneys, 50, 30 and 20 per cent. Entrance \$50. Two hour heats in first series, 6 starters (5 English Setters, 1 Pointer).

Winners.—1 Pioneer, orange and white English Setter dog (Count Whitestone—Bonnie Doone), G. N. Clemson, owner; E. Shelley, handler. 2 Lemon's Rodfield, black, white and tan English Setter dog (Rodfield—Fleetwing), J. Lemon, owner; J. Bishop, handler. 3 Hard Cash.

Alabama Field Trial Club.—Huntsville, Ala., December 18. Major J. M. Taylor and Col. Nick Taylor, judges; J. M. Kirkpatrick, Huntsville, Alabama, secretary.

Derby.—For dogs owned in Alabama. Purse, fees; 3 moneys, 50, 25 and 15 per cent. Entrance \$5, 9 starters (5 English Setters, 4 Pointers).

Winners.—Navajo, black, white and tan English Setter bitch (Uncle Sam—Petti Sing), D. E. Rose, owner and handler. 2 Vashti, black, white and tan English Setter bitch (Jesse Rodfield's Count Gladstone—Lady Josephine), F. M. de Graffenreid, owner; J. Bishop, handler. 3 St. Elmo, liver and white Pointer dog (—), C. F. Eastham, owner and handler.

All Age.—December 18. Purse, fees; 3 moneys, 50, 25 and 15 per cent. Entrance \$5. For dogs owned in Alabama, winners of first at any trials prior to September 1, 1905, barred. Ten starters (4 English Setters, 6 Pointers).

Winners.—1 Stix, lemon and white Pointer dog (Jingo's Light—Nellie O.), C. F. Eastham, owner and handler. 2 Romeo, black, white and tan English Setter dog (—), J. E. Gaston, owner; D. E. Rose, handler. Equal 3, Miss Vic Stone, black, white and tan English Setter bitch (Victor Okaw—Ruby Danstone), C. N. Robinson, owner; D. C. White, handler. Equal 3, Blanche, liver and white Pointer bitch (—), C. N. Robinson, owner; D. C. White, handler.

Free-For-All.—December 19. Purse, \$300; 3 moneys, 60, 30 and 10 per cent. Entrance \$10, \$10 to start, 13 starters (6 English Setters, 7 Pointers).

Winners.—1 Lanark Lad. 2 Baby Ale, liver and white Pointer bitch (Jingo's Coin—Fanny Ale), Geo. Cooper, owner; D. E. Rose, handler. 3 Alford's King.

Color of Cocker Spaniels.

"Le Chasseur Français" writes as follows on the colors of cockers in vogue in France: "Nothing must be neglected which tends to make dog breeding perfectly correct, in order that, when one continues an undertaken task, he knows perfectly well the way he is going. I think, therefore, that a good constituted pedigree, no matter which breed it represents, must mention the color of the coat of the ascendants as far back as possible. All the Spaniel men know that, in order to obtain nice specimens, as homogeneous as possible, it is necessary to mate two Cockers of the 'same type,' but not of the same color, which is of small importance. All the colors are admitted—uni-colored, bi-colored and tri-colored; the study, therefore, which I am going to submit to our readers is not out of place here, in order to enlighten the novice who is not au courant with this question, and whom the latter may interest.

"Grand surprises are in store for the amateur mating Cockers, from the point of view of type, as well as from that of color; therefore, I am going to show some 'oddnesses' of mating and the conclusions which this mating admits. It often happens that the mating of two Cockers, white and brown, produces white and orange colored—this latter is very rare and, in my opinion, very nice, if the animal be typical; the mating of two different colors, where there is no orange-white, produces, nevertheless, this last color. Here are some examples: Young Red Coat, white and brown, and Miss du Chaillot, black; progeny, one orange-white, one orange, one white-brown. Young Red Coat, white and brown; Felle of Naze, white and brown; progeny, one orange-white, four white-brown. Echo of Fontainebleau, brown and blue; Felle of Naze, white and brown; progeny, two white and brown;

Marked Salmon in Columbia River.

...the color of the ...

missioned Kershaw of Oregon relative to the operation of hatcheries on the Columbia river. Mr. Kershaw received tails and fins of 100 salmon from a single trap owner on the Columbia river that were plainly marked hatchery fish.

When the hatcheries were placed in operation on the Columbia river a system of marking was adopted for the purpose of ascertaining if any of the salmon turned out in the river returned to their native spawning grounds, and in what length of time.

The marked fins and tails received by Mr. Kershaw were found to be salmon that were turned out of the Kalama and Chinook hatcheries four years ago. The spawn of these fish was taken in 1900, and the young salmon turned out in 1901. The fish were marked in a manner that leaves no doubt of this fact. The small bones in the fins were cut down and a hole punched in the tail. The cutting of the bones in the fin is just the same as a man losing a part of his finger—it never grows out again.

The Columbia river was practically depleted of salmon when the artificial propagation of the fish was commenced on that stream, and the past several years has demonstrated that it has been restocked by some means.

While only a part of the fish were marked when released from the hatcheries, the fact that one trap owner on the river found at least 100 of these salmon during the past season is conclusive evidence that artificial propagation is the only solution of the problem to prevent the depletion of the salmon fisheries.

Mr. Kershaw asked a number of the Columbia river cannerymen and trap owners to watch for the marked salmon, but during the rush of the season it was apparently overlooked, as only one response has been received.

TRADE NOTES.

Averages Reported.

St. Mary's, Pa., December 4th.—Fred Gilbert, first general average, 144 out of 150, shooting DuPont. L. J. Squier, second general average, 139 out of 150, shooting "DuPont."

Lancaster, Pa., December 6th.—Fred Gilbert, first general average, 190 out of 200, shooting "DuPont."

Bridgeton, N. J., December 7th.—Fred Gilbert, first general average, 148 out of 150, shooting "DuPont." J. A. R. Elliott, second general average, 142 out of 150, shooting "New Schultze." H. B. Fisher of Philadelphia, Pa., shooting "Infallible," won first amateur and tied with W. H. Heer, shooting DuPont, for third general average, 141 out of 150. T. D. Hackett, second amateur average, 139 out of 150, shooting "DuPont." F. J. Pratt, third amateur average, 134 out of 150, shooting "Infallible." Fred Gilbert made a run of 144 straight.

Atglen, December 8th.—W. H. Heer, shooting "New Schultze," and Neaf Apgar, shooting "DuPont," tied for first general average, 131 out of 140. J. A. R. Elliott, second general average, 130 out of 140, shooting "New Schultze." Fred Gilbert and L. J. Squier, tied for third general average, 129 out of 140, shooting "DuPont."

Sewickley, Pa., December 9th.—G. E. Kelsey of Pittsburgh, Pa., first general and first amateur average, 187 out of 200, shooting "DuPont." H. C. Watson of Sewickley, Pa., 178 out of 200, shooting "DuPont."

Wallace Boyer, Sewickley, Pa., third amateur average, 177 out of 200, shooting "DuPont." L. Z. Lawrence, of Pittsburgh, second general average, 185 out of 200, shooting "Infallible."

Omaha, Neb., December 12th and 13th.—The three highest averages were all won by amateurs, shooting "DuPont": William Veach of Falls City, Neb., first average, 387 out of 400; Geo. W. Maxwell of Holstein, Neb., third average, 379 out of 400.

York, Pa., December 13th.—Fred Gilbert, first general average, 192 out of 200, shooting "DuPont." Neaf Apgar, third general average, 176 out of 200, shooting "DuPont." N. M. McSherry of York, Pa., second amateur average, 167 out of 200, shooting "DuPont." Andy Somers of Delta, Pa., third amateur average, 166 out of 200, shooting "DuPont."

Lebanon, Pa., December 14th.—Fred Gilbert, first general average, 132 out of 140, shooting "DuPont." E. M. Ludwick of Honeybrook, Pa., first amateur and second general average, shooting "DuPont." Neaf Apgar, third general average, shooting "DuPont." Geo. S. Trafford of Lebanon, Pa., tied for third amateur average, shooting "New Schultze."

U. M. C. Banner Record at Phoenix.

A successful blue rock tournament was held at Phoenix, Arizona, by the Phoenix Gun Club, on December 28th, 29th, 30th and 31st, 1905. Excellent management, good feeling and sportsmanlike methods marked the entire tournament. The attendance was highly satisfactory and the scores likewise. The visiting sportsmen were unanimous in the verdict as to the reception and tournament, all pronouncing the meet a most enjoyable occasion from every point of view.

Mr. J. M. Aitken was winner of the high average for the first day's shoot, using U. M. C. shells. The Gwynn trophy was won by Messrs. Aitken, Tanner and Morrell, all using U. M. C. shells. The Copper Queen trophy was won by Mr. Aitken, using U. M. C. shells with a score of 25 straight. Mr. Aitken also made the longest run on the first day of 68 straight.

On the second day the winning contestants were Messrs. K. L. Hart and W. D. Tanner, shooting for the individual championship of Arizona, both shooters using U. M. C. shells. The score was a tie—47 out of 50—on the shoot-off. Mr. Tanner won. Among the professional shooters in the above event, was Mr. R. C. Reed, who distinguished himself with a score of 49 out of 50, using U. M. C. ammunition. At the end of the second day's shoot, Mr. Tanner had the high average, breaking 182 out of a possible 190, and the longest run of 73 straight, using U. M. C. shells. Mr. J. M. Aitken's phenomenal run of 94 straight was one of the events of the entire tournament, he using U. M. C. shells.

The first prize in the merchandise shoot was won by Mr. W. D. Tanner, using U. M. C. ammunition. The Associated Diamond Medal Team Championship was won by Messrs. Hart, Morrell, Aitken and Tanner, all users of the products of the Union Metallic Cartridge Company. The Two-Man Team Medal was won by W. D. Purcell and A. A. Jones, both using U. M. C. shells. The "Miss and Out" event for a purse of \$80.00, was won by Mr. D. E. Morrell, using U. M. C. "Acme" shells. The second high average for the entire tournament was won by Mr. W. D. Tanner with 94.1-5 per cent, using U. M. C. ammunition.

It is an established fact that in all countries, notably in shooting, nerve and skill are prime requisites and those qualities must be backed by accuracy and reliability in ammunition used; consequently, little

further than the statement of name or make of the successful shooter's choice of ammunition is necessary to establish those qualities that serve the shooter best in his time of need. On the Pacific Coast in Arizona, in the remote places in the interior, the record has been a proud one for the ever-reliable U. M. C. shells.

Of course such matters have usually only local bearing, but in regard to U. M. C. goods it has been a repetition of successful championships, notably high scores and averages throughout the entire country wherever sportsmen could come to enjoy the fine sport of trap shooting. From the north, east, west and south comes the same constant story of U. M. C. goods always to the fore.

Winchester Goods on Top at Phoenix Tournament.

The shooting stars at the thirteenth annual inanimate target tournament of the Arizona's Sportsmen's Association, which was held at Phoenix, Arizona, December 28-29-30-31, 1905, were the ones that used Winchester products. The high professional average for the tournament was made by Mr. W. H. Seaver, of San Francisco, Cal., with a Winchester "pump" gun and Winchester "Leader" shells. Mr. Seaver scored but 19 lost out of the 345 targets that counted on average 94.5-10 per cent, and but 26 lost out of the 450 shot at during the entire four days shooting 94.2-10 per cent, making straight runs of 58, 62 and 71 respectively, and also five different straight scores of 25 during the shoot. At one place during the tournament he scored 98 out of 100, and at another 97 out of 100. Mr. W. J. Rand, of El Paso, Texas, an amateur, tied Mr. Seaver on the high average with a total of 326 out of his allotted 345, and thus walked off with the high amateur average. It was necessary for Mr. Rand to score 97 out of his last 100 to tie Mr. Seaver's scores, and he did it. The gentleman, it is needless to state, always shoots a Winchester "pump" gun and Winchester "Leader" shells. Mr. W. D. Tanner, of Phoenix, Arizona, another shooter that always uses the Winchester "pump" gun, captured the second high amateur average for the tournament with the splendid score of 325 out of his 345, while Mr. C. Bulwer, of El Paso, Texas, shooting the time tried and reliable Winchester "Leader" shells, captured the third high amateur average with the score of 323. The Individual Championship Medal, emblematic of the champion wing shot of Arizona, was captured by Mr. W. D. Tanner, of Phoenix, after shooting off a tie with Mr. K. L. Hart of the same city. Mr. Tanner, as stated before, always shoots a Winchester "pump" gun. The only straight score of 25 in the Wellington Event, which was shot off in a high wind storm, was made by Mr. Seaver, shooting a Winchester "pump" gun and the "Leader" shells. The McVeagh Handicap Medal was captured by Mr. Geo. Julian, of Tucson, Arizona, after shooting off a tie with Mr. D. D. McDonald, of Prescott, Arizona. Both Mr. Julian and Mr. McDonald shot Winchester "pump" guns and the Winchester "Leader" shells. The Two-Man Championship Trophy was won by Mr. W. B. Purcell, of Tucson, Arizona, and Mr. A. A. Jones, of Mesa, Arizona. Both gentlemen shot Winchester "pump" guns, and in connection Mr. Jones used "Leader" shells. Mr. Seaver's and Mr. Rand's scores day by day, were: First day, Seaver 90 out of 95, Rand 90 out of 95; second day, Seaver 88 out of 95, Rand 86 out of 95; third day, Seaver 81 out of 85, Rand 82 out of 85; fourth day, Seaver 67 out of 70, Rand 68 out of 70; grand total, Seaver 325 out of 345, Rand 326 out of 345.

On a hot day drink Jackson's Napa Soñ lemonades and be refreshed.

AGE LIMITS OF DAIRY COWS.

A bulletin from the Wisconsin Station states that a cow is at her best during her fifth and sixth years, up to which time the production of milk and butter fat by cows in normal condition increases each year. The length of time the cow will maintain her maximum production depends on her constitutional strength and the care with which she is fed and managed. A good dairy cow should not show any marked falling off until after ten years of age. Many excellent records have been made by cows older than this. The quality of the milk produced by heifers is somewhat better than that of older cows, for a decrease has been noted of one to two-tenths of one per cent in the average fat content for each year till the cows have reached the full age. This is caused by the increase in the weight of the cows with advancing age. At any rate, there seems to be a parallelism between the two sets of figures for the same cows. Young animals use a portion of their food for the formation of body tissue, and it is to be expected, therefore, that heifers will require a larger proportion of nutrients for the production of milk or butter fat than do older cows. After a certain age has been reached, on the average seven years of age, the food required for the production of a unit of milk or butter fat again increases both as regards dry matter and the digestible components of the food. A good milk cow of exceptional strength, kept under favorable conditions, whose digestive system has not been impaired by overfeeding or crowding for high results, should continue to be a profitable producer till her twelfth year, although the economy

of her production is apt to be somewhat reduced before this age is reached.

POULTRY NOTES.

Eggs are more marketable than fowls. Fowls need to be sold by the dozen or half dozen, amounting to two or three dollars. A merchant does not like to handle one fowl, but few persons will not use a dozen fresh eggs.

While oats and wheat may be fed in the bundle, it is doubtful if corn should be fed in the ear. Hens seem to enjoy thrashing their own wheat and oats, and it may be good for them, but corn is too hard to shell for them to have to peck it off. A man can shell it a good deal easier.

Winter eggs are the ones most desired. A wideawake breed, comfortable scratching pens, plenty of food deep in the straw in the morning, with a warm mash at night, and warm quarters to roost in, is almost a sure recipe to obtain them. It is worth trying.

Chickens are fond of dandelions and will eat them in preference to many kinds of grass. It is practically impossible to start a grass plot of any kind where poultry feed, as they will pick off every sprig as soon as it appears. Grass plots need to be fenced off to themselves in order to get a good start before the fowls are allowed on them.

In raising fowls they should be tame, they should have range, should have a good place in which to roost, should be protected from storms, lice and thieves.

White fowls are more easily dressed, and present a good appearance, with less work, than the dark feathered ones, as they are not discolored by pin feathers.

TOGHILL STUD MENLO PARK

CRABET ARABIAN STUD

CRABET PARK, THREE BRIDGES, and
NEWBUILDINGS, SOUTHWATER, SUSSEX, ENGLAND.

The largest breeding stud of Arabian horses in the world. The conditions under which these horses are bred at Newbuildings produce a type unrivalled for quality and hardiness. The unique knowledge of the breed gained by the owners in Arabia enables them to guarantee purity of blood of the choicest strains, some of which are now extinct in the East. Stallions and mares constantly supplied to breeders throughout the Colonies and on the Continent. A few mares suitable for polo, hacks and quiet in harness generally for sale. For further particulars address GUY CARLETON, Manager, Carpenters, Southwater, Sussex, England.

WRINKLES ON MERINOS.

(By F. Thomas Shaw, an American Sheep Breeder.)

Fashion is one of the most exacting and inconsiderate tyrants of the world. Men are accustomed to say that its power over women is omnipotent, particularly in matters pertaining to dress. But it may well be questioned as to whether fashion is stronger in its hold upon women in these matters, than it is upon men in hard matters of fact that pertain to certain lines of business. Among the many and varied instances which may be chosen to illustrate the potency of fashion over men, in matters pertaining to business, none is more opposite to the purpose of such illustration than that which pertains to the crowding upon American Merino sheep as many wrinkles or folds in the skin as the body may be able to carry. This fashion is to some extent apparently in decadence at the present time, but its power is still strong with some breeders of Merino sheep. Some thirty or forty years ago, its prevalence was almost universal among the breeders of this class as witnessed by the pictures of typical Merinos of those days. But even then practical American breeders have set up a standard of revolt as witnessed in the types and sub-types of Delaines that were then being evolved. The fewer wrinkles in the American Merinos of today bear testimony to decadence in this fashion, but even now individual animals, laden down with wrinkles, are frequently in evidence.

The story of the influence that led to the development of wrinkles would be interesting could it be known. Who is able to tell it? Such peculiarities of development have usually a stratum of utility on which to rest as an excuse for their existence. The large surface covered by wool on the Shropshire was encouraged, it is said, for the better protection of the sheep from flies. In time breeders lost sight of this original intent and soon came to worship at the shrine of abundant wool covering, as an evidence of very much that was good in the animal. Likewise, it is probable that some wrinkles were tolerated at first, as an evidence of some quality or qualities, and that in time wrinkles drew forth the homage of breeders as an evidence of the same.

When did wrinkles first appear? Did they charac-

terize Spanish Merinos in the days of Moorish sway in Spain? Were they borne by the Merinos of Tarentum in Sicily? Did they characterize the ancestors of the Spanish Merinos in Italy in the days of Pliny? Were they inherent in the race or are they the outcome of spontaneous variation perpetuated by man through selection in breeding? Who can go back through the mists of those vanished years and dig up some information with reference to these questions from out the buried centuries?

Whatever led to the fostering of the wrinkles on American Merinos, are there any good reasons why they should be perpetuated? If there has been some recession from extreme wrinkly form during recent years, how far should such decadence be allowed to go? Should it go to the extent of entire obliteration, or should some wrinkles be retained, and if so how many? Partial obliteration has taken place in the breeding of Rambouillets, the direct descendants of the Spanish Merino, and also in the various types of Delaines. But if partial removal be a good thing, why not entire removal be a good thing? In some of the Delaine families wrinkles have been entirely removed, why should they not be entirely removed in all of these? These are pertinent questions and they are reasonable. Will not some of the admirers of the wrinkles lift up the curtain and let in a flood of light upon this question? It would certainly be to their interest as breeders to do so, as many, like the writer, look upon the wrinkles as an unnecessary and troublesome appendage.

I have put the question to individual breeders of the American Merino and also to breeders in convocation, as to why they encouraged wrinkles, and never yet gained but one answer that was satisfactory. That answer was, that wrinkles increased the shearing surface, and consequently the animal furnished a heavier wool clip. This answer will be considered presently. Breeders have defended wrinkles on the ground that their presence indicated much vigor and stamina. Is that true? I will not question the fact that many sheep with abundant wrinkles have shown marked vigor, but I do not question the inference that abundant wrinkles were the cause of such vigor or were in any way inherently associated with it. I can readily trace the relation between a strong heart girth and abundant vigor, but I cannot trace any re-

lation between amplitude of skin to the extent of producing many folds and wrinkles and abundant vigor. If any can reason out clearly such a relation I, at least, will be grateful for the information.

What is the value of the argument that folds and wrinkles increase the weight of fleece? They do increase it, but is the increase worth the cost? Increase in wrinkles is attended first with less of uniformity in the fibres of the wool, second with increased difficulty in shearing, and third with decrease in mutton value. Every one who has judged Merinos has noticed the character of the wool fiber on the crest of the wrinkles as compared with the wool in the depressions between the wrinkles. Uniformity in wool fibres is one of the most valuable characteristics of a fleece. No one will deny the greatly increased difficulty of shearing as the wrinkles increase. This increased cost of shearing is considerable in a large flock. That wrinkles lessen the value of the carcass for mutton is apparent in the fact that skin cannot be eaten as food. The writer also has some doubt as to the completely healthy action of the skin away down in those buried recesses between the crests of the wrinkles.

The breeders of Rambouillets and Delaines evidently had objections to the presence of very abundant wrinkles, hence the partial elimination of the same, and in some instances total elimination. Why did they stop short of total elimination? Breeders of Rambouillets and Delaines, can you answer why? If partial removal is a good thing, why not total elimination be good? On the other hand, if the retention of a few folds and wrinkles is a good thing, why should not the retention of more folds and wrinkles be a better thing?

Of course the elimination of wrinkles, though it should be desired, is not the work of a day. The habit of producing wrinkles in Merinos is doubtless centuries old. Therefore, like all the questionable habits of long continuance, it does not die readily. Generations of breeding will be required to procure the end sought, since, though elimination in selection in breeding should be ever so careful, and persistent atavistic transmission will occasionally produce wrinkles for generations. Notwithstanding, in time they may be as completely removed from Merino sheep, as scurs have been from Galloway cattle.

MORE LIVE STOCK THAN EVER.

The following is a brief synopsis of the principal features of the year's live stock business as told in the Live Stock World of Chicago:

Cattle market was the highest in April.

Combined receipts of all kinds of live stock broke all previous records.

Receipts of Western range cattle for the year were 90,000 head, which was the second largest in the history of the business.

Outside of show cattle at the International, the highest price paid for beef cattle during the year was \$7.

Cattle prices were higher than last year, though the general quality was considered worse.

There was a remarkably good shipping demand all the year for all kinds of live stock and the proportion of cattle, hogs and sheep that was sent out was larger than usual.

Demand for cows throughout the year was unusually good and the markets were more uniform and satisfactory.

The high price of hides was a strong factor in boosting up the market for the common cows.

High price of corn made cattle feeders timid.

Receipts of calves were smashed for the day, the week, the month and the year.

The supply of calves for the year total close to 380,000, which is more than 100,000 in excess of last year.

The high price of milk and butter was responsible for many calves being marketed.

A peculiar feature of the trend of the cattle prices for the year was that they were highest in the spring, while in the previous year they were at the lowest point at that time of the year.

Quality of the Western range cattle was better than in 1904 and prices made a higher average.

More range hay fed cattle were received this year than in any previous year.

The top for range cattle during the year was \$5.15.

Calves reached \$8.50 twice during the year.

There were more feeding sheep shipped out this year than in any previous year.

The hog average for the year will be close to 223 lbs, which was a little heavier than last year, but lighter than in 1903.

Close to 318,000 cattle were forwarded during the year for export. It was the second largest number on record.

The outlet for beef product was good all the year.

All kinds of records were broken in

the horse department.

Receipts of sheep were the largest on record by a large majority, yet prices during the year averaged from \$1@2 higher than in 1904.

It was a great year for the man with the sheep.

About 75 per cent of the ovine stock shipped out for breeding purposes this year consisted of lambs.

An unprecedented number of ewes were shipped out for breeding purposes this year.

The year's receipts of horses at Chicago will total close to 127,000 head, which shows that the automobiles have not yet put the horse raisers out of business.

There were 18,448 horses received in March, which smashed the previous record.

The largest receipts of cattle in one day during the year was December 11, when arrivals were 35,153.

Not as many feeding cattle were sent out this year as last.

Prices of sheep at this end of the line were too high to admit of much business being done in the export line during the year.

All kinds of live stock show a higher average than last year.

Hog prices were about 25 cents higher than last year.

Combined receipts of live stock at Chicago for the year were close to 16,337,000 head and there were 5,000,000 head shipped out.

Inasmuch as all kinds of live stock show higher average prices for the year and there has been so much increase in total volume of receipts, the year's valuation will show an increase of around \$20,000,000 compared with 1904.

TWIN BORN LAMBS.

The twin lambs in an ordinary flock are usually smaller than single lambs. Whether the smaller size is due primarily to the lack of proper nutrition after birth or to the small size at birth or to both these conditions has not been clearly determined.

The difference between the birth weights of twin lambs and single lambs is smaller than is usually supposed. The birth weight of the twin male lambs is greater than the birth weight of the single female lambs. The average birth rate of all twin born lambs is about one-half pound below the general average for all lambs. The single female lambs weighed at birth only eight-tenths of a pound more than the twin-born females.

The smaller size of twin lambs observed in most flocks is undoubtedly more the result of insufficient nutrition while suckling than the inferior size at birth. Very few ewes yield

sufficient milk to properly nourish two thrifty, early maturing lambs. If such lambs are early taught to eat grain and hay the twin lambs will in most cases thrive equally as well as the single lambs of the same birth weight.

With a little attention lambs may be taught to eat at a very early age, and grain fed at this time while the lamb is suckling will produce larger gains than at any later time. If the twin lambs begin early to supplement the milk of the mother by eating corn, oats, clover hay and possibly a little oil meal, they will thrive and in the end become as thrifty as single lambs. A flock of ewes that has been bred for the production of twins may thus become considerably more profitable than a flock producing single lambs only. On the other hand, if the breeder fails to supply the extra feed and care necessary for the twin lambs, it may be, as often stated, that one good single lamb is better than two puny ones.—F. B. Mumford.

TREATMENT OF DISEASES.

The treatment of poultry diseases seldom should concern the farmer. If the healthiest and most vigorous breeding fowls are kept, the chickens reared under satisfactory conditions, fed on wholesome food and not over crowded, and the building kept thoroughly clean and disinfected, there rarely will be disease among them. When disease does appear, it usually will be found more satisfactory to kill and bury the sick birds than to treat the disease.

The poultry houses should be thoroughly cleaned out and disinfected by the use of a spray pump. A good spray mixture may be made from a 2 per cent solution of chloride of lime or creolin or carbolic acid. Spray every square inch of everything inside, roof, walls, roosts, nests, etc. Close up and allow the fumes to act a few hours, then open and ventilate.

The poultry yard if situated so that it cannot be plowed and cropped, should be treated with unslaked lime dust. Scrape the yards clean of manure and refuse, scatter the lime thick on the ground, then sprinkle the lime with water from the spray pump. This will slake the lime and cause it to destroy any germs of parasites in the soil.

Leghorns reach maturity by the consumption of as little food as any breed that produces marketable eggs. But while they are hustlers they are easily affected by draught, and need warm houses, in order to do well. This can be said of any breed. Warm quarters do not necessarily mean expensive ones. Cheap material may be used.

WHY NOT RAISE POULTRY?

The greatest opportunity exists for special development of the poultry and dairy industries in California, says a recent bulletin of the California Promotion Committee. It is urged upon the farming people of the State to look into these industries for profit to be obtained therefrom. California is spending millions of dollars every year for poultry and eggs and Eastern States are reaping the benefit of the laxity of California's citizens. In the past twelve months more than \$3,000,000 were sent East for eggs alone, while the money expended in the Middle West for chickens and turkeys to supply the California market probably exceeded that spent for eggs. California is especially adapted for poultry raising in all parts of the State, and as an adjunct to the income from farms of all kinds, and especially fruit farms, there is nothing that brings in more ready money than chickens. It takes little capital to start when the farm is already going and the profits are certain and constant. Hundreds of people who are now living on small farms of ten acres or less could make a good living if they would turn their attention to the raising of poultry.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

•The Lawrence-Williams Co., Cleveland, O

TO PREVENT TOE DRAGGING.

Alexander Corcoran discusses in the *Horseshoers' Journal* a serious defect in many horses and explains the remedies:

How frequently we find a horse coming into our shop with the toe of his hind foot worn completely off or square. Sometimes both feet are affected, and I have seen one hind and one fore foot come in, in the same way. We must do something with it, or else the foot is ruined. What is to be done? Our first impulse is to place a thick, heavy clip on the toe, filling out the worn off parts with steel or iron, and thus giving the foot double wear on these parts affected. All's good, but watch the ending. In two weeks, perhaps less, we will find the horse back again with the foot in exactly the same condition as before, and he is shod over again in the same way, to again wear off the toe calk, clip and all. Look over the shoe as it comes off; see the heel calks, how high they are; scarcely worn a particle; it's the toe that's gone, and bad, too. What's the cause? Many.

Place a perfect legged horse in the hands of a lady to drive, and unless she is an expert, that horse gets lazy, and the cure in this case is a good driver with a good whip. Again, we find horses driven along at a good rate, that may be affected with the same trouble? What's the cause in this case? In travel, watch such a horse and see if there is not a stiff action of the muscles above the hock joint and below the hip. Veterinary surgeons know the location by its proper name; we know the muscles are stiff and do not perform their natural work. So the horse finds a tremendous task before him in making up for the loss of their power, and with the weight on the extreme end of the limb additional labor devolves on him. The result is, that he has not sufficient power to do his work in a clear way, and he will drag his toe in doing it.

Remedy: First, see a veterinary surgeon and have the limb examined, and let him prescribe; but should he insist on the horse being perfect, just apply a slight blister to the affected parts described above. Use a little blister, too, on the lower tendons, and in a few days, or when the horse is strong, do your shoeing.

First—Have the shoe light
Second—Have the toe calk well set back on the web, and the shoe very full to the toe.

Third—Have the shoe fitted only the length of the foot.

Fourth—And a little lower on the heels.

Fifth—In a plain shoe, have the heels some thinner, and the roll begin one-half inch from the toe.

Sixth—Don't weight the toe with a heavy clip; it's an invitation for the horse to begin dragging again.

Seventh—Keep the heels of the foot low in dressing, and nurse a long toe. Follow these directions, and in nine out of ten cases a cure will be worked for the toe dragging horse.

TUBERCULOSIS IN CATTLE.

Dr. Frederick A. Spafford of the Dakota Board of Regents, a distinguished physician, believes that the State could stamp out tuberculosis in cattle in a few years.

He would have every patient, as soon as symptoms of the disease were discovered, removed to a camp where it would not come in contact with the healthy community, and there, with proper treatment, particularly from the hygienic standpoint, he thinks a surprisingly large number would be restored to health.

He says that the popular impression that tuberculosis is necessarily fatal is entirely mistaken and that there are thousands of recoveries every year. The trouble being entirely a germ disease, the recovery from it depends upon the ability of the white corpuscles of the blood to surround, fight back, eat up and destroy the tubercular bacilli. If the general condition of the patient is good and his hygienic surroundings what they should be, the chances for recovery are very large.

There was a time when farmers were looking for thin animals for feeding purposes. They seemed to think the gap between the "skin and bones" stage and a finished condition must be bridged by the feeder if any profit were to be made, says the *Detroit News-Tribune*. All of this has been changed, however, and now the ex-

perienced feeder no longer looks for thin feeding stock, but prefers that which has been well conditioned in advance of the time when a full grain ration is to be fed. That more grain is required to make the first hundred pounds of gain on a bullock than the last has been repeatedly demonstrated, and experienced feeders prefer to buy steers that are in fair killing condition. There are now many cattle feeders in Michigan who make it a rule to fill their feed yards in February or March with cattle that have been well started by others.

The type of the cow has just as much to do with milk giving capacity in proportion to feed consumed as the form of the horse does in making of him a wasteful or an economical feeder. We have all seen slab-sided, leggy horses that required a barn full of hay and 50 ears of corn a day to fill up. There is the same difference in cows. It pays the farmer to be able to judge of the value of cows by the animal's form—dairy form.

For sale by Mack & Co. Langley & Michaels Co. Oydington & Co., J. O'Kane and J. A. McKerron, all of San Francisco

FOR EXCHANGE

ONE GOOD LOOKING SOUND YOUNG ROAD HORSE, good actor, thoroughly city broken—and ONE CHESTNUT GOLDING sound and a good roader; both guaranteed every way. I want to trade the above horses for a well matched thoroughly broken team something that will do to use for park driving.

Address, H. R. RAND, Fashion Stables, San Francisco.

JACK FOR SALE.

A BLACK JACK WITH LIGHT POINTS; large, heavy boned, prompt and a good handler. Is a good foal getter and his foals are excellent individuals. Price very reasonable for prompt sale. Address for further particulars, S. B. WRIGHT, Santa Rosa.

For Sale

Inquire of H. R. RAND, Fashion Stables, Ellis Street.

BAY GELDING. Five years old, stands 17 hands, weighs 1200. By St. Whips. 1st dam by Daly, 2d dam by Milton Medium. Thoroughly broken single or double. A great actor, a grand road horse and warranted SOUND.

CHESTNUT GELDING. 8 years old, 16 hands high, weighs 1200 lbs. A grand surry or trap horse. Has been driven by a lady in the Park all winter. Without a doubt, this is the best family horse in the country. Guaranteed Sound.

One New Side Bar Stivers (of N. Y.) Buggy. Pneumatic tires, Carmine gear, black body. One Side Spring, High Back, Business or Run-About Buggy.
One New Chicago Road or Breaking Cart. Long shafts. Best one in the city.
One Set New Coach Harness.
One Set New Surry Harness.
Ten Set New Single Harness.
Two Sets of Run-About Harness.
Also Light Road and Track Harness. Some Fancy Halters, Pads, Etc.

FOR SALE OR LEASE.

Two Prince Airlie Stallions.

PORTOLA 37413, a handsome golden bay, 7 years old, 16 hands, weighs 1190 lbs.

MENLO BOY 37401, a magnificent brown with white points, 6 years old, 16.1 hands, weighs 1200 lbs.

These two horses are full brothers, being sired by Prince Airlie 28045; he by Guy Wilkes 2:15¼, sire of Fred Khol 2:07¼, Hulda 2:08¼, Seymour Wilkes 2:08¼; first dam Signal by Del Sur 2:24; second dam Lady Signal 2:35½ by Signal 3327. Both of these horses are very fast for the amount of work, being only a few months last year, showing quarters around :34 and :35.
For further information apply to
P. H. McEVOY, Menlo Park, Cal.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11 1-4

(Reg. No. 22449)

Sire, **ELECTIONEER**, sire of 166 in 2:30 and grandsire of Major Delmar 1:59¼.

Dam, **LOKITA** 2:18½ (dam of Alta Vela 2:11¼ and Falori 2:24¼) by Piedmont 2:17¼; second dam, **Lady Lowell** (dam of Ladywell 2:16¼ and Lorita 2:16½) by St. Clair; third dam, **Laura**, dam of Doe, sire of Occident 2:16¼.

Address all communications to BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

The Standard Bred Stallion

ODANROC FOR SALE.

ODANROC IS A COAL BLACK STALLION; was four years old last September; is handsome. He is stylish and sound as a new dollar, and with less than four months' work has shown a trial mile in 2:28 and quarters at a 2:20 clip. Odanroc is by Coronado 2:12½, he by McKinney 2:11¼. Odanroc's dam is the standard and registered black mare Bessie Rex 2:26¼, sired by Atto Rex 2:21, he by Attorney, he by Harold Bessie Rex's first dam is the black mare Klatta, standard and registered. Odanroc is in every respect a fine individual. Stands 15.3½ hands, weighs 1150 lbs. and is a square and level-headed trotter. Wears no boots, is as kind as a kitten, fears nothing, and any child can drive him with safety. For price and further particulars address

G. W. DEFORD,
P. O. Box 305, National City, Cal.

McKINNEY STALLION FOR SALE.

ONE OF THE GRANDEST LOOKING AND best bred McKinney stallions ever foaled is offered for sale. He is five years old, sired by the great McKinney 2:11¼, dam by Dexter Prince, that sired the dam of Nora McKinney 2:12¼ (trial to wagon 2:09); second dam by a son of Electioneer; third dam by McDonald Chief, sire of the dams of Tom Smith 2:13¼ and Stella 2:15¼. This stallion has never raced and has not been trained, but has trotted miles better than 2:30 and quarters in 35 seconds. Stands 15.3 weighs 1050 pounds, is a beautiful bay with black points and without a pimple. Is an exceptionally handsome horse, fine disposition and has marvelous endurance. No horse living has cleaner, straighter or more perfect legs. A grand prospect to train, and a sure money-maker in the stud. Would make one of the grandest roadsters in America. For further particulars address

QUINN'S OINTMENT
REMOVES

SPRINGS
SPAVINS
WINDPUFFS
CHUBS

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpufts and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Hickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins and all bunches it has no equal. Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

KENNETH C. 2:17

THREE
YEAR
OLD
RECORD

Sired by McKINNEY; dam MOUNTAIN MAID (dam of Tom Carneal 2:08½) by Cresco 4:08 (sire of Allie Cresco 2:13, etc.); next dam by Cloud.

Will make the Season of 1906 at

PLEASANTON, CAL.

KENNETH C. was one of the fastest of an exceptionally good lot of three-year-olds that raced in California in 1905. He is a splendid individual, has size, style and quality, and the grandsons and granddaughters of McKinney through Kenneth C. will be equal to any in the land.

Terms \$30 for the Season.
\$15 for Single Service.

Address

S. K. TREFRY, Pleasanton.

WAYLAND W. 22516. Record 2:12½.

ONE OF THE LEADING SIRES OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06½, leading money earning pacer of season 1905. Sire of Morosco 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:28, dam Lettie (dam of Wayland W. 2:12½, Welcome 2:10½, Maud Singleton 2:20) by Wayland Forrest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Anteeo or any of our great sires, he is the sire of Bolivar 2:06½, Nellie R. 2:10, Arthur W. 2:11½, Morosco 2:12, John A. 2:12½, Forrest W. 2:14½, Leland W. 2:16, Al Sandy 2:19½, Maud Sears 2:21, Bonita Wilkes 2:26½. Wayland W. will make the Season of 1906 at SANTA ROSA, at McGregor & Hockins' Stables.

Terms \$40 for the Season. Pasture \$3.00 per month.

W. C. HELMAN, Owner.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

Read our "ad" on Campbell's Horse Foot Remedy in next issue of this paper.

A TYPICAL MORGAN STALLION

Chestnut Horse, 15 Hands, Weight 1000 Pounds. Owned in Pennsylvania.

\$10 Payments Due February 1, 1906

ON YEARLINGS IN

Pacific Breeders Futurity Stakes No. 5---\$7000 Guaranteed

NOTHING MORE TO PAY BEFORE 1907.

For Foals of Mares covered in 1904. To trot or pace at two and three years old. Entries closed October 15, 1904. Nothing More to Pay Before 1907, when your Foal can start in the Two-Year-Old Division. Stakes divided as follows: \$3250 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

A Chance for Those Who Failed to Enter.

Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for Foals of 1905 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you neglected to name when entries closed, send \$22, with Color, Sex and Breeding of the Foal, on or before February 1st next, which covers payments to February 1, 1907, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

E. P. HEALD, President.

F. W. KELLEY, Sec'y, 36 Geary St., S. F.

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

Running Horse Owners and Trainers

"Save-the-Horse" has proven absolutely unfailling on Bucked Shins. One bottle will cure from five to twenty cases. For strained, injured and broken down tendons, it is marvelously effective.

"LAFE SHAFER," the widely known trainer of Zephyr 2:11, Beausant 2:12 and Terrace Queen 2:06, says:

Terrace Farm, Titusville, Pa.

Troy Chemical Co.:

I used "Save-the-Horse" all the past season. First on a bad splint close up to knee, horse very lame after fast work; could see decided improvement after a few days' use; in a week's time, lameness all disappeared. Used with equal success on a bowed tendon; at present am treating a horse that bowed a tendon 3 years ago—was a bad case, was fired and blistered, but still went lame; have used a bottle and am still using "Save-the-Horse;" the enlargement has gone down almost one-half, horse going sound, and I firmly believe will race again. A friend of mine had a horse that bowed a tendon last spring; by the use of your great remedy, kept him racing all fall, gave him a record better than 2.65. Tendon is straight and sound as it ever was. Think it the great remedy, kept him racing all fall, gave him a record better than 2:05. Tendon is straight and sound as it ever was. Think it the greatest remedy on earth for a bad leg of any description.

Respectfully yours,

L. D. SHAFER, Farm's Trainer.

Box 209.

The fire iron is uncertain; blistering is less effective, and both necessitate laying up the horse from four weeks to two months; mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Windpuff, Weak and Sprained Tendons and all Lameness.

Horse can be worked as usual, it cures without scar, blemish or loss of hair.

\$5.00 Per bottle, written guarantee with every bottle, constructed solely to satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way. The need of second bottle is improbable except in rarest cases. Send for copy of guarantee and booklet. All druggists and dealers or sent express prepaid.

BREEDER AND SPORTSMAN, 36 Geary Street San Francisco, Cal.

THE WEEKLY BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 447.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75 Three Months \$1
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, January 13, 1906

California Stake Payments Due in 1906.

Pacific Breeders' Futurity Stakes.

(Payments should be made to F. W. Kelley, secretary, 36 Geary street, San Francisco.)

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—\$10 due March 1, 1906, and starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 5, \$7000, foals of 1905—\$10 due February 1, 1906.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

A STRONG SENTIMENT against race track gambling has sprung up among the people of Los Angeles and an effort is being made to have the Board of Supervisors pass an ordinance prohibiting betting on all racing events. At the meeting of the Supervisors last Monday a crowd of people headed by a number of preachers marched to the rooms of the Board and submitted their case. Attorneys appeared for the Ascot track managers and after speeches galore from both sides in which many silly and preposterous claims were made for and against the benefits and evils of racing, the matter was postponed for two weeks. Prior to this, however, three of the five Supervisors stated that they were not yet ready to close up the race track, and in all probability they will be besieged during the next two weeks by the partisans of both sides and deluged with "arguments" pro and con on the matter of race legislation. Ascot track is outside the limits of the city of Los Angeles, which already has an anti-betting law, consequently the people who desire to see the race track closed have appealed to the County Supervisors. One significant fact in connection with the petition presented was that it was signed by over fifteen thousand persons and was supported by resolutions passed by the Los Angeles Chamber of Commerce, Merchants and Manufacturers' Association, and other organizations of the leading business men of the southern metropolis. Every Los Angeles daily paper but one is arrayed against the race track and that it will eventually be placed under the ban of the law is pretty certain. It will be in the natural order of things for such a condition to obtain. When a pendulum is swung far to one side it naturally swings back SIXTEEN—Breeder 1-11—M

as far the other way. Neither the Los Angeles people nor the residents of other places on this coast are opposed to horse racing and incidental betting when conducted for short periods, but it is the continuous racing that has given the goody goodies a chance to begin a crusade and secure a very large following of business men who have heretofore seen no particular harm in the sport of horse racing. Now that they are excited to a state of fanaticism they will probably try to secure the passage of laws that will stop betting on races altogether. It will be unfortunate for the horse breeding interests if they succeed.

PROTESTS ARE SO NUMEROUS against the abuses of the privileges of the road by automobilists, that one necessarily concludes that the devil wagon is increasing greatly in popularity with the "pin heads." The writer stood at the railroad station at Niles, Alameda county, a few Sundays ago, and saw at least twenty of the benzine buggies pass within half an hour. The conductor of a waiting train called his attention to the fact that the majority of them were exceeding the speed limit and some of them running as fast as thirty miles an hour. He timed several between two mile-posts and was sure they were running faster than twenty miles. Imagine twenty road drivers passing any point on the road within a half hour, and half of them driving their horses at a three-minute gait. Arrests would follow so quickly that fast road driving would soon be very unpopular in that section. Is it any wonder that accidents are so numerous when the auto owners violate nearly every rule of the road as well as of common sense whenever they go out. A chauffeur who was arrested for fast driving on that road recently stated that he was not running his machine faster than eight miles an hour anywhere between Oakland and San Jose. The distance is forty-five miles. He afterwards boasted to a number of his friends, however, that he made the entire trip in an hour and a half. One thing is certain—he is either a poor mathematician or a good prevaricator.

WHAT ABOUT A CALIFORNIA CIRCUIT? Are things to be allowed to drift along as they have for the past three years, when after lots of hot air about a circuit of eight or ten weeks being assured, it has dwindled to three or four meetings? We hope not. There can be a good circuit arranged, but some one must take the lead in the matter and bring the managers of the different tracks together. Dates will have to be arranged and purses announced. This all takes time and there is no time to lose. The sooner the track managers get together the better for all concerned. Quite a large number of the horse owners in California have stated that this year they propose to wait until a circuit is arranged before they place their horses in actual training. They want to have something in sight before they begin spending their money to get it. It therefore behooves all track managers and all associations intending to hold meetings this year to get a move on and let the horsemen know what to expect.

At the combination sale of trotters and pacers held in the new Coliseum at the Union Stock Yards, Chicago, the week after the close of the International Live Stock Exposition, the highest price was \$3,500 paid for the trotter Axcvill 2:10½, which was purchased by a New England fancier.

Chas. Whitehead is jogging Mr. J. B. Iverson's great gelding North Star 2:13¼ at the Salinas track. The son of Nutwood Wilkes has been turned out since the close of his three-year-old campaign last year, during which he won all the three-year-old trotting stakes in California and earned over \$5000 for his owner.

Star Pointer 1:59¼, besides being the first two-minute horse is the holder of many best records in races. He has the fastest race record, 2:00½; the fastest third heat, 2:00½, and the fastest three-heat race, 2:02½, 2:03½, 2:03½, all to his credit, which shows that his title of champion race horse is well founded. And he is producing speed from all sorts of mares. He now has four in the 2:10 list, headed by Morning Star 2:06¼, that next to Cresceus brought the highest price at the recent Old Glory sale—\$10,500. There was not a handsomer horse in all that 1000 sold than Morning Star.

The Fasig-Tipton Co., who have their offices in the great tower of Madison Square Garden, and who practically sell all the trotters and thoroughbreds which go under the hammer in New York, report the greatest year in the history of the firm. The figures tell the story. At their various sales 5000 horses were sold for a total of \$2,775,000, as against 1904 with \$2,710,000. Their phenomenal time was in November and December, when in thirty days they turned over \$997,980. Their Old Glory sale of trotters and the Rancho del Paso sale of thoroughbreds were both record breakers.

Representatives from every driving club of New Jersey attended a meeting at Newark recently upon the invitation of Adam H. Groel, president of the Road Horse Association of New Jersey. The object of the gathering was to form a state organization of road drivers, and about a dozen different clubs sent delegates. A committee was appointed to draft a constitution and by-laws, the object being to protect their rights upon the highways of the state, and much interest is being manifested for the final outcome.

It is said that Samuel E. Hyde, Fall River, Mass., has refused an offer of \$15,000 for the three-year-old colt Silence by Chimes, out of Whisper 2:08½.

Barney Demarest has sold York Boy 2:08¾ to J. Boyd Thatcher, ex-Mayor of Albany, N. Y., for \$700.

Sidney Dillon is beyond the reach of most California breeders, but they should remember that his full brother, Cupid 2:18, is still here, and for his opportunities is a great sire of speed. He has sired Venus II 2:11¼, Zambia 2:14¼, Psyche 2:16¼ and Lottie Parks 2:16¼, and these are about the only ones of his get that have started in races. Mr. A. B. Spreckels has consigned a number of young Cupids to the sale of Aptos Ranch horses which Fred H. Chase & Co. will hold in this city some time in February. There will also be offered at this sale young trotters and pacers by Dexter Prince and Aptos Wilkes, the latter an own brother to the famous mare Hulda 2:08¼.

Over a dozen horsemen inspected this week the new McMurray Speed Cart just received by the Kenney Manufacturing Company at 531 Valencia street and without exception every one pronounced it "the best yet." It has a low seat, is very light and is so adjusted that all the weight comes on the wheels and not on the horse. Go out and look it over.

When, a year ago, Frank Turner purchased from the estate of Henry Pierce all the mares, stallions, colts and fillies located at the Santa Rosa Stock Farm, he paid \$10,000 for them and took a lease of the farm. He has just sold to Sterling Holt of Indiana, twenty-two head of colts and fillies, getting over \$12,000 for them, and has all the brood mares and several stallions and youngsters left. He has made a nice profit on the deal and every horseman in California will be glad to know that he has done so well.

On the first of January all colts and fillies took on another year in reckoning their age, no matter at what season of the year they were born.

Frank Wire of Davisville has a pair of fine large black driving horses for sale. See advertisement.

Bonnie Steinway, son of Steinway, and the great brood mare Bon Bon 2:26, dam of Bonnie Direct 2:05¼ and Bonsilene 2:14¼, by Simmons, has filled out into one of the grandest looking stallions ever seen at the Pleasanton track. His owner, Mr. C. L. Griffith, expects this horse to take low record this year. He has speed enough to pace a mile below 2:10 and worked miles below 2:12 last summer.

Many horses are being jogged at the different California training tracks, and many colts and fillies are being broken, but none of the trainers are trying to make any speed, and will not until the middle of February.

Geo. A. Kelly of Pleasanton, owner of Bonnie McK., sold a foal of 1905 by him last week for \$200, and \$500 was refused for another foal by the same sire.

C. X. Larrabee is fitting up several carloads of horses bred on his Brook-Nook Ranch, Montana, for the eastern market. Mr. Larrabee breeds about 200 mares every year to his own stallions and last year raised 135 foals.

Members of the Pasadena Tournament of Roses Association, headed by E. D. Neff, are the promoters of the horse show which will be given in Pasadena March 8, 9 and 10. The name of E. A. Ashbrook, the eastern horse show expert, who has announced his willingness to aid in establishing an annual show in Los Angeles, is being considered for the position of manager. With the stables of the 200 millionaire families of Pasadena and the many fine animals in Los Angeles to draw from, the success of the entry list should be complete.

Josie 2:08¼, a member of the 1905 string of the East View Farm, is now in the stable of James Burns, Toronto, Ont. She is a sister to Billy Red 2:10.

Only four stallions have each sired thirty or more performers with records of 2:15 or better. McKinney 2:11¼ by Alcyone 2:27, thirty-nine; Gambetta Wilkes 2:19¼, thirty, three; Alcantara 2:23, thirty-one, and Baron Wilkes 2:18, thirty. All these stallions were got by George Wilkes 2:22. McKinney is the youngest, having been foaled in 1887, Baron Wilkes foaled in 1882, next; Gambetta Wilkes, foaled in 1881, next, and Alcantara, foaled in 1876, the oldest.

HEARD ON THE TELEPHONE.

"Hello, Breeder & Sportsman!"

"Hello!"

"This is Sandy, down at Aptos Ranch. Say; I would like to state through your columns that the 25 horses to be sold by Fred Chase & Co. for Mr. A. B. Spreckels early in February are all looking fine and doing well."

"All right, Sandy, we will so state."

"And say; there is a full sister to Venus II 2:11¼, that is coming six years old, among them, and she is as good or better than Venus; she is a line trotter and has shown quarters in 36 seconds over this half-mile track, which you know is not a fast one. And say! That three-year-old gelding by Dexter Prince out of the Stamboul mare, dam of Zambia 2:14¼, is a sure enough trotter and in good hands can earn a whole lot of money. I think the fellow is lucky who goes to the sale and get these two, as he would have a stable that can win money on any circuit. That's all, just now. Good bye."

"Good bye, Sandy."

MILE OR HALF-MILE TRACK.

San Luis Obispo, Jan. 3, 1906.

Ed. Breeder & Sportsman:—Would you kindly give me your opinion as to which is the best track for a small town like this to build and maintain. We are going to build a track—that is a settled fact. Some want a mile, but the majority are in favor of a half-mile. Do good horses race in California on half-mile tracks? How much land does it take for a half-mile track giving sufficient room for stables, etc.? How much throw-up ought the turns to have? And which is the best way to lay it out? And any other information on the subject would be accepted with the kindest thanks and appreciation.

Very respectfully,

GEO. W. McCABE.

The question as to which is the best track is a question of money and resources. If the people interested in building a track at San Luis Obispo have plenty of money to buy land, build a mile track and keep it in order, then it is the one to choose. The history of the majority of mile tracks in small towns, however, is that they cost too much to build and maintain, and unless a large number of horses can be kept in constant training and successful meetings or fairs given every year, they soon fall into disuse and are elephants on the hands of those who manage them. In the first place thirty or thirty-five acres are sufficient for a good half-mile track, 60 feet in width, and for the stalls, stands and other necessary buildings, while a mile track requires about fifty-five acres at least. A half-mile track only requires half the amount to construct, and one man and team can keep it in good order the year round and the expense of sprinkling (a heavy one in California during the summer months) is but half that required for a mile track. Good horses race over half-mile tracks in California and in every other State in the Union if good purses are offered. Some of the greatest meetings held in the Eastern States are on half-mile rings, and many horses that go east from California every year, race on half-mile circuits.

One of the greatest crowds that gathers anywhere during the year to see harness racing is at Allentown, Pa., where between 80,000 and 100,000 people congregated last year to see the champion, Dan Patch, go against time. A well built half-mile track kept in order, will not lack for horses to train over it, and on the sizes of the purses given, and the ability of the Secretary to rustle, will depend the class of horses that will race over it. We believe there are many towns in California where mile tracks are now in a bad condition and not patronized that would be the centres of considerable training were the tracks but a half-mile in circumference and kept in order. A mile track is the best beyond a doubt, all things being equal, but it is a little more than the majority of associations can properly care for. To lay out a half-mile track:

First—Draw two parallel lines 600 feet long and 452 feet and 5 inches apart.

Second—Drive a stake half way between the extreme ends of these two lines.

Third—Loop a wire around this stake long enough to reach to either side and make a true curve, putting down a stake as often as a fence post is needed.

Fourth—When this operation is finished at both ends of the 600-foot parallel lines, the track is laid out. The inside fence will rest exactly on the lines.

The turns should be thrown up at least an inch to the foot, and if fast time is expected an inch and an eighth to the foot is not too much. Many half-mile tracks are but forty-five feet wide, but one that is sixty feet in width would be a great deal better as it would accommodate a larger field of horses.

A LESSON IN DRAFT HORSE BREEDING.

The last issue of the Breeders Gazette of Chicago contained the following:

One lesson taught once more at the recently held International was that a stallion to beget drafters that will sell for the great sums now so freely paid for high class geldings must have in addition to many other qualities what is known as a "good outlook." Being interpreted this means that a stallion to be a great success as a gelding getter must have a pair of sloping shoulders a long neck and a good head properly set on the thin end of that neck. To look well in harness a gelding must have plenty of his neck in front of his collar and as the collars used in the show ring especially and on the street in general on heavy drafters are large and broad the neck must come out of well laid oblique shoulders which lay the collar well back. If then the neck is of proper length both on top and below the gelding will look well proportioned, whereas if he is short of his neck and his shoulders are straight merely his head will stick out in front of his collar and he will not appear to be well balanced, which will militate against him greatly not only in appearance but in the matter of his action for no one ever knew a straight-shouldered horse to be an elastic goer in front. There is no reason why a stallion cannot be very compact of build and yet have a good long neck and generally good outlook to him and those who are determined to get some of the money that is so freely offered for high-class geldings should make a note of it that they will never attain the top of the ladder if they make use of short-necked low-headed stallions.

Kinney Lou 2:07½, the popular son of the champion sire, is in fine physical condition. He was never so rugged, stout and healthy as at the present time. The 10 to 15 miles he gets every day are hardly sufficient to keep him from performing the antics of a two-year-old.

GETTING A CORNER ON THE SIDNEY DILLONS.

When the millionaire horseman, Mr. Sterling R. Holt of Indianapolis, paid \$9000 at auction in 1904 for Sidney Dillon he made about the best bargain in horse flesh that has been recorded for some time. Before the season of 1905 was over the horse had earned his purchase price for Mr. Holt and his book for 1906 will be filled at an increased fee before the season really opens. Mr. Holt came to California on a business trip last week and visited Frank Turner's Santa Rosa Stock Farm, where he became so enamored of the youngsters by his horse that he purchased twenty-five head of them, or nearly all that were in Sonoma county. He made the purchase with the assistance of Millard Sanders, the well known trainer, who gave Lou Dillon and Dolly Dillon their records and Mr. Sanders will have them all in charge at Pleasanton during the winter and spring and will probably take them to Indianapolis about May 1st. Among those purchased from Mr. Turner are eight yearlings out of the farm's best mares and the following two, three and four year olds: Carrie Dillon 3, Carlocita 4, Clay Dillon 3, Lottie Dillon 3, Adios Dillon 3, Sonoma Dillon 2, Santa Rosa Dillon 2, Ruth Dillon 2, Martha Dillon 2, Sadie Dillon 2, Kate Dillon 2, Miss Sidney Dillon 5, and Rose Dillon 4. Mr. Holt also purchased three Sidney Dillons from Mr. S. B. Wright, and one from Joe Cuicello. The aggregate amount paid for the entire lot was in the neighborhood of \$16,000.

There are many of these colts and fillies with speed enough to trot or pace close to 2:10 this year. Carlocita took a time record last year of 2:24½, and Carrie Dillon one of 2:24½. They could have paced much faster, but were held back so as to just enter the standard list, and not get records that would bar them from class racing. Both worked miles below 2:20 during the season.

Mr. Holt has shown excellent judgment in purchasing these young Sidney Dillons, and under Mr. Sanders' tutelage they will doubtless add much fame to Sidney Dillon as a sire. While there are seven or eight of Sidney Dillon's older foals scattered throughout the State, these youngsters comprise about all the youngsters by him that there are in the State.

Frank Turner still owns three royally bred young stallions by Sidney Dillon, having refused an offer of \$6000 for them made by Mr. Holt. They will be in the stud this year at the Santa Rosa Stock Farm. Besides Sidney Dillon, Mr. Holt owns the young California stallion Sterling McKinney, and the stallion Rex Americus. His farm is known as Maplewood Farm and is one of the show places of Indianapolis.

THE HORGAN FUTURITY STAKE.

The Futurity Stake for yearlings which was inaugurated by Mr. P. J. Horgan of Concord closed January 1st with twelve entries. The entrance money to this stake is \$15, of which \$5 accompanied nominations January 1st. The race is for foals of 1905, bred in Contra Costa county, and will be decided at the Concord track in September, at which time it is hoped a county fair and race meeting will be given, but if not the race will come off anyway. The money is to be divided 50, 35 and 15 per cent, and \$50 is to be added to the stake by Mr. John Ott of Pacheco. The entries for the Horgan Futurity are as follows:

Captain J. E. Durham of Concord—Colt by Dictatus; dam Conductor.

Ray McDonald of Concord—Colt by Dictatus; dam by Jim Mulvaney.

Mr. Lewis of Martinez—Colt by Dictatus; dam by Sidmoor.

George Whitman of Concord—Colt by Dictatus; dam by Steinway.

R. C. Caven of Concord—Colt by Sidmoor; dam by Abbottsford Jr.

H. H. Elworthy of Concord—Colt by Dictatus; dam by Conductor.

J. T. Flemming of Concord—Colt by Sidmoor; dam by Sidney.

H. C. Keller of Concord—Colt by Sidmoor; dam by —.

Jesse Morgan of Clayton—Colt by Sidmoor; dam by son of Direct.

John Ott of Pacheco—Colt by Sidmoor; dam by Aleona.

J. M. Christopher of Pacheco—Colt by Sidmoor; dam by Nevada Chief.

L. R. Palmer of Walnut Creek—Colt by Stam B.; dam by Delwin.

AUCTION SALE AT PHOENIX.

During the recent Arizona Territorial Fair, held at Phoenix, Mr. J. C. Adams, the well known horse breeder, held a sale. A few of the prices paid were as follows:

Boydello 2:14½, bay stallion by Boydell, to Louis Melzer for \$450.

Yedrel Russell, two-year-old by L. W. Russell dam Yedrel by Nutwood, to Mr. Goebel for \$225.

Miss Russell, by L. W. Russell, to S. Easterling for \$235.

Miss McDello, by Boydello, to Ralph Quinn for \$475.

Golden Rose, to Dr. J. C. Norton for \$325.

Black Bird, to Mr. Abrams for \$230.

Miss Nyra, to Mr. Stetson, Los Angeles, for \$300.

"A few years after people gets too old to believe in Santy Claus," said Uncle Eben, "deys apt to stadt in believin' in race-hoss tips."

Of the six horses that won \$10,000 or over during the racing season of 1905 three of them were three year olds.

HOOF BEATS.

Since the death of Dr William Finlaw at Santa Rosa, a number of the horses owned by him at the time of his death have been sold by Mrs. Finlaw, and the sales confirmed by the Superior Court. The sales included a number of yearlings and other horses owned by the estate. Among the sales confirmed were the following: Ten colts to Sam Morris for \$500, one span work horses to Frank Steele for \$155, one yearling to W. H. Sutherland for \$75, two horses to Mrs. C. R. Farmer for \$450, yearling to White for \$60, yearling and colt to W. Dryden for \$65, one horse to Dr Fay for \$75, one mare to C. H. Durand for \$100, yearling to C. W. Jessup for \$65, yearling to John Lavall for \$60, horse to Mrs. E. B. Miller for \$300, six brood mares and one colt to Mrs. Miller for \$825.

Capt. C. H. Williams of Palo Alto owns a sixteen-months-old Searchlight colt that is one of the grandest natural trotters ever seen. He has never been on a track, but to a long shaft breaking cart on the road steps out like a future champion. The captain says he aims to break 'Creseus' record with this fellow.

Capt. C. H. Williams of Palo Alto is very enthusiastic over a Searchlight colt he owns out of Twenty-third dam of Sterling McKinney, trial 2:16 by Director 2:17, second dam Nettie Nutwood, dam of Hillsdale 2:15, by Nutwood 2:18½, and will soon place him in "Jack" Phippen's stable at San Jose. On account of being foaled in September the captain did not enter him in any stakes but intends to give him a little work each year and develop him slowly and safely, hoping and believing he will have a great horse when fully matured. The individuality and breeding of the colt certainly justify his hopes. He is a blocky, strong made fellow, the counterpart of his great sire and while only seventeen months old looks a well developed two-year-old now and is always on a trot, showing no inclination to pace.

The five-year-old mare Helen Keyes by Sidney Dillon, owned by Harry D. Brown of Pleasanton, is one of the good prospects for a fast performer during the present year. She was taken east by Chas. De Ryder last year but was not started. She has trotted a trial in 2:12 and looks a 2:10 per former sure. Mr. Brown recently refused an offer for her made by Millard Sanders.

Mr. Geo. Reed, manager of the Anderson Fruit Company of Suisun, has recently purchased the chestnut pacing stallion Comet Wilkes 2:21 and is driving him on the road. Mr. Reed is one of the best amateur drivers in the state and is very much pleased with his new purchase. Comet Wilkes was bred by the late William Corbitt and is by Guy Wilkes, dam Mamie Comet 2:23½ by Nutwood.

A lawyer owned a horse that always stopped and refused to cross a certain bridge leading out of the town. Neither whipping nor coaxing would move the horse when he approached this bridge. The disciple of Blackstone therefore advertised him for sale in this manner: "Horse for sale; to be sold for no other reason than that the owner wants to get out of town."

That the United States Government is finding the supply of horses short is evidenced by the bids for cavalry and artillery horses which were opened at Seattle on the 5th inst. The Quartermaster's Department advertised for horses suitable for the Philippine service, and the lowest bid was that of Chas. H. Frey of Seattle, who offered to supply 200 head at \$129 each.

Lord Alwin, the pacing three-year-old stallion, own brother to John A. McKerron 2:04½, is in Chas. DeRyder's string at Pleasanton. He is owned by Martin Carter and is not only a very handsome but a very fast colt. An eighth in 15 seconds seemed easy for him. Mr. Carter bred him to two or three of his best mares last year and expects to make a sire of him.

Mr. E. A. Servis of Durham, Butte county, owner of that fast pacer Edwin S. 2:08, is now at Pleasanton and will probably remain there during the rest of the winter season. His time will be occupied with his horses until after the rainy season, when they will be turned over to a regular trainer.

A Shetland pony mare named Belle, owned at the historic Woodburn Farm in Kentucky, produced a living foal when she was thirty years old. The youngster was a mere pigmy when born, but lived about 30 days. Many cases of Shetland mares remaining productive far beyond the usual equine limit are recorded, but this one is among the most remarkable.

Lupe Carillo was at Pleasanton last week and states that Mr. A. W. Shippee will probably send down a string of colts from his Butte county ranch to be worked if stall room for them can be had.

A good stiff price was recently refused by A. Morris Fosdick of Los Angeles for a weanling filly by Kinney Lou, dam Athene by Dexter Prince, second dam Athena 2:15½ by Electioneer, third dam Ashby, dam of two better than 2:17 by Gen. Benton. Mr. Fosdick is so pleased with the filly that he has booked the dam again to the greatest son of McKinney, "Jack" Phippen is now jogging Athene and she will be fitted to take a record this coming season; as she has lots of speed a very fast mark is expected.

THOROUGHBRED DEPARTMENT.

By Ralph H. Tozer.

The bad showing of Bearcatcher last Saturday at Emeryville in the Pollansbee Handicap and the extra good performance of the winner, Barney Schreiber's bay three-year-old colt, Dr. Gardner, with 116 pounds up, are the principal topics discussed in turf circles. It seems that Garnett Ferguson had done little with "the Bear" since he won his three-cornered \$2500 race at Ascot Park, and when he stumbled after going about a quarter it was all over—the horse dropped further and further to the rear and refused to try a yard. As to Dr. Gardner, he took up 116 pounds and ran seven furlongs in the same notch as when carrying 88 pounds, viz., 1:25½, and apparently did it just about as easily with the big weight up as with the feather. Dr. Gardner is a product of Missouri, but his sire and dam (Bannockburn and Uarda) both raced considerably in California. Bannockburn held the mile record at both Emeryville and Tanforan (1:39) for years. Uarda was campaigned here by a tall Tennessean named Brownlow. Previous to coming here Uarda had beaten Martha II (dam of the great Artful) for the Oaks at Oakley (Cincinnati) and had besides won the Kentucky Oaks at Louisville. In California Uarda was a pronounced cripple, and we saw her at her worst, though she was a magnificent bay mare over 16 hands in height and exceedingly "racy-looking." I remember offering the peppery Brownlow \$900 or \$1000 for Uarda (I forget which) on behalf of Prince Poniatowski, "provided she was sound enough to train on." Brownlow would not guarantee that Uarda would stand training, and waxed very wroth over the matter, declaring that "no one could get her for \$5000 if she was sound." Just how much Schreiber paid for her I never heard, but it is safe betting he did not give more than \$1000 for the daughter of Strathmore and Zuhlan that has given to the world the speed marvel, Dr. Gardner.

Speaking of Uarda makes me think what a magnificent collection of stud matrons Schreiber has and how very reasonable in price was each and every one. I can't call to mind a single high priced mare on the place, and yet he has good-lookers bred on the most fashionable lines that produce stake horses right off the reel. He has far and away the best string of race horses at Emeryville.

There are two young mares in this state not owned by breeders that ought to prove wonderful in the producing line when put to the stud. One is Melodius, the big black four-year-old mare by Sir Dixon (leading sire of America a few seasons ago) out of Kentucky Belle (latter an own sister to Hanover (leading sire of America for four successive seasons). More great brood mares figure in the first five generations of Melodius' pedigree than perhaps any mare on this continent, and a host of champion sires as well. The other mare is also bred on "taking" lines, being by the unbeaten Meddler (champion sire of America in 1904 and third in 1905) out of a mare by Russell (winner of \$83,192 and a great sire), he by Eolus (sire of Morello, Diablo, Eole, St. Sav'our, Eon, Knight of Ellerslie, etc.). As Meddler's daughters are superior in the racing line to his sons, doubtless they will also be in the producing line, and therefore breeders should aim to secure the sort of mares spoken of above.

Dr. Leggo's easy victory at seven furlongs in 1:26¼ last Monday makes one believe he is himself again, and that being the case he should prove troublesome in any company from this time forth.

Last Monday was the anniversary of the battle of New Orleans, and it was celebrated properly in the Crescent City. A peculiar thing was that the two stake events (the Old Hickory Handicap at City Park and the Jackson Handicap at the Crescent City track) were won by California bred horses, viz., Alma Du-four (by imp. Artillery) and Phil Finch (by imp. Goldfinch), both natives of Sacramento County.

Waterflower, by imp. Watercross-Pansy by Virgil, and about the best two-year-old filly of 1905 in England, is thought to have a royal chance in the historic Oaks of this year. She was bred at Rancho del Paso.

The leading turf authorities of England are advocating the stoppage of two-year-old racing in Great Britain until June 1st of each year. What a blessing it would be to the breed of racers if our governing turf bodies could be made to see the evil in its true light and act accordingly. Then we would have later foals with stronger mothers that would give their offspring better food and more of it than under the present plan, the two-year-olds would in consequence be better developed and stamina would not be sacrificed at the altar of speed.

Barney Schreiber has won about twice as much as any other owner at the local tracks, his record up to this week being \$15,105, against \$7,760 for W. B. Jennings and \$7,034 for W. W. Elliott. Radtke was in like position among the jockeys, with 52 wins against 35 for McBride and 32 for W. Knapp. Bearcatcher is the best of the older horses, Dr. Gardner in a class by himself as a three-year-old, while the two-year-olds have been see-sawing so much that one is constrained to think they are either a gilt-edged lot or a very mediocre bunch.

The effort of the Los Angeles "goody-goody" to close Ascot Park came to naught last Monday night, and doubtless they will be "good dogs" and "lay dead" for awhile, the Supervisors voting (3 to 2) not to instruct the District Attorney to draw a county ordinance against gambling. The daily newspapers, with one exception, flayed the Ascot people unmercifully, but the hotelkeepers furnished the racing folks figures that showed conclusively and at a glance that the race meeting brought hundreds of people and

thousands of dollars that would not otherwise have been there. As a means of circulating coin scarcely anything excels a racing meeting, and merchants make more out of a racegoer in a week than they would from a psalm-singer or consumptive in three months.

E. Corrigan bought the 272 shares of City Park (New Orleans) stock owned by "Curly" Brown at \$100 per share, and the matter was settled out of court.

Last Tuesday, after Romaine had easily encompassed the defeat of Instructor, the California Jockey Club stewards got together and were not long in deciding that McBride had "pulled" Romaine on the 6th of January, when Instructor had apparently beaten the Brutus horse with ease by one and a half lengths at six furlongs. Romaine, in other words, had shown an improvement in L. Williams' hands of about ten pounds. Of course one hates to see a rider of McBride's ability driven from the turf while "the man behind" goes scot free, but the stewards' decision met with approbation on all sides. It was prompt and right and they made no mistake. P. Phillips was also suspended for his ride on Bell Reed, the gelding opening at 3 to 1 and going to 7 to 1, with the bookies yelling for the coin. Reed's race was run according to "the chalk." The chart shows the speedy fellow to have been off first and winding up seventh in an eight-horse race, beaten a block by horses that he ordinarily can down as badly as they beat him. It was a bad-looking ride, the contrast between this race and the others Phillips rode on Bell Reed being very marked.

The number of jockeys who had mounts in 8011 races last year was 862, of whom 192 rode ten or more winners, 244 rode from one to nine winners, and 426 failed to finish first in any race. Jockeys who rode more than 100 winners each were:

Jockeys—	Mts.	1st.	2d.	3d.	placed.	Pct.
Nicol	857	221	143	136	361	.26
W. Knapp	1021	186	158	139	528	.18
W. Miller	888	178	127	122	451	.20
Radtke	693	177	129	97	290	.25
J. Martin	739	143	119	93	348	.15
Sewell	696	129	110	101	356	.19

Swain	687	103	91	108	305	.15
Hildebrand	523	103	90	85	245	.20

DOPING HARNESS HORSES.

"Doping" harness horses is a theme of discussion just now among those interested in the trotters and pacers, and Dr. J. C. McCoy of Kirkwood, Del., who is an expert in training horses, as well as a physician of wide attainments and a scientific farmer on a large scale, has contributed an interesting paper on the subject to one of the turf journals. "Doping" runners, where the races are all dashes, is comparatively a simple matter, but in the case of trotters there is the necessity of repeating the dose after every heat, so that possibly four or five doses must be administered during an afternoon.

"Pop" Geers, the soul of honesty in all matters, never uses "the dope" but one day, a couple of seasons ago, he was engaged to drive a pacing mare of much speed but noted for faint-heartedness. The nag was trained in another stable, and when she was handed to the Tennessean for the first heat she was glinted up to the last ounce. She scored at a two-minute clip, and when the word was given fairly floated the mile, seeming to touch only the high places. After she had strolled in on the chin strap, in nearly three seconds faster time than anybody thought she could make, Geers dismounted, regarded her attentively, and said: "Well, dog my cats! They told me this mare would stop." Why, she's the gamest thing I ever saw."

That something decisive will have to be done about the use of "dope" on trotters and pacers is clear. There is a rule in the books covering the matter, but it is impossible to prove any particular horse is fixed for a certain race although in the last two seasons there has been at least two instances in classic races where the use of stimulants of an improper character was more than suspected.

In one instance it enabled a horse to go a wonderful fifth heat, and in the other it enabled a trotter to take a record which he since has been unable to equal. The only remedy for the evil thus far proposed is that after a race begins, all horses engaged therein shall be cooled out in an inclosure which shall be open to the public view, and that officers shall see to it that no person other than the men engaged in caring for the horses is admitted. It is doubtful, however, if such an arrangement would in the least hamper the dopers.

That a horse may be rendered temporarily incapable of trotting at anything like its normal speed and the trick done so artfully that even the animal's attendants are not at the time aware of the occurrence has been demonstrated. It is rather more than suspected that on one occasion Lou Dillon was put out of business for a race which Mr. Billings was particularly anxious to win, and for a time there was a possibility the matter would be taken hold of in a way which would have ended the turf career of one or two people, but inasmuch as the people who inspired the act probably could not be brought to book the matter was not followed up, although the conviction as to where the guilt lay was strong.

As to "winning dope" the stuff must be of such character as materially to increase the heart action, and it is not infrequently the result of its adminis-

tration that excessive heart dilation is set up, and during the progress of a heat the animal falls dead on the track.

It often has been asserted that horses were choked to death when they fell and expired on the race track. But the medical authorities agree that no horse can be choked so that it will be dead when it falls, or immediately after. They assert that if a postmortem examination were to be held in each instance of a horse falling dead on the track while going at speed, it would be found that dilation of the heart was the cause, and not choking. To show that this view of the matter is the correct one numerous instances where horses have pulled so hard that they finally fell might be cited. In all such cases, however, the animal was on its feet a minute later and was uninjured.

The men in the harness racing game who use "dope" have been pretty well sifted out by those who have an interest in clean racing, and when the campaign of 1906 opens a careful watch on their operations will be instituted.

Although the plan of those having the matter in charge are not fully formulated, it is understood that, at the principal meetings, there will be in attendance a veterinary surgeon who will, in conjunction with the judges of the day, keep an eye out for possible instances of "doping."

Last summer, the talk goes, there were several occasions where a horse was "doped" just previous to a heat and then backed straight and placed for that particular heat. By not administering the stimulant before the next heat the animal was rendered abnormally sluggish directly after a period of artificial animation and energy, his performances in the two heats thereby being made so inconsistent that an undeserved reputation for "dogging" was the result.—H. T. White in Ky. Stock Farm.

THOROUGHBRED STALLION FEES IN ENGLAND.

English thoroughbred breeders have been advertising their stallions for the past two months. It is interesting, in looking over the columns of the London Sportsman, to note these advertisements and to compare the prices at which these stallions are offered with the prices for which the best of the public stallions stand in America. For instance, Rock Sand, a great race horse but absolutely untried at the stud, is offered at 200 guineas a mare. His book for 1906 is already full and subscriptions are being accepted for 1907. John o' Gaunt is full for 1906 and 1907 both, and subscriptions are now being booked at 39 guineas for 1908. Among the other stallions for which no further subscriptions will be received for next year, but which are advertised for the following year, are Misselthrush, Collar and Robert le Diable. No horse of any prominence is offered at less than 45 or 50 guineas a mare, and many of them are placed at from 30 to 100 guineas a mare, while such horses as Flying Fox and a few others of great fame have had the limited number of outside subscriptions which their owners allowed eagerly taken at as much as 600 guineas the mare.

ANSWERS TO CORRESPONDENTS.

A. D. SMITH, Lindsay—When an animal meets the following requirements it can be registered as a standard bred trotter:

1. The progeny of a registered standard trotting horse and a registered standard trotting mare.

2. A stallion sired by a registered standard trotting horse, provided his dam and grandam were sired by registered standard trotting horses, and he himself has a trotting record of 2:30 and is the sire of three trotters with records of 2:30 from different mares.

3. A mare whose sire is a registered standard trotting horse, and whose dam and grandam were sired by registered standard trotting horses, provided she herself has a trotting record of 2:30 or is the dam of one trotter with a record of 2:30.

4. A mare sired by a registered standard trotting horse, provided she is the dam of two trotters with records of 2:30.

5. A mare sired by a registered standard trotting horse, provided her first, second and third dam are each sired by a registered standard trotting horse.

When an animal meets the following requirements it can be registered as a standard-bred pacer:

1. The progeny of a registered standard pacing horse and a registered standard pacing mare.

2. A stallion sired by a registered standard pacing horse, provided his dam and grandam were sired by registered standard pacing horses, and he himself has a pacing record of 2:25, and is the sire of three pacers with records of 2:25, from different mares.

3. A mare whose sire is a registered standard pacing horse and whose dam and grandam were sired by registered standard pacing horses, provided she herself has a pacing record of 2:25, or is the dam of one pacer with a record of 2:25.

4. A mare sired by a registered standard pacing horse, provided she is the dam of two pacers with records of 2:25.

5. A mare sired by a registered standard pacing horse, provided her first, second and third dams are each sired by a registered standard pacing horse.

6. The progeny of a registered standard trotting horse out of a registered standard pacing mare, or of a registered standard pacing horse out of a registered standard trotting mare.

A half mile track 60 feet wide, can be built on a strip of land 1170 feet long by 572 feet wide, which would make the land within the boundary of the outside oval contain about sixteen acres, but there would be no room for grand stand or other buildings. From 30 to 35 acres are usually required for a public

half mile track, but if built on a farm for private use, room for buildings, etc., would not be needed. There are many half mile tracks in this country that have been in use for a great many years with satisfactory results.

R. Hickingbottom, Seattle.—Glenelg, register number 3183, was by Baymont, 1027, dam Miss Cole by Milwaukee 603, granddam Lady Cole by Williams' Magna Charta, son of Magna Charta 105. We do not know the breeding of Grey Hal. Our Dick 2:10½ is by Gibraltar 1185. Do not know his exact age but he took his record in 1892 and had then been racing three years.

Subscriber, Walla Walla.—Minnie Princess, a chestnut mare, owned for several years by William Corbett, was foaled in 1879. She was bred by Robert Syer of San Jose. Her sire was Nutwood 600, her dam Belle by Paul's Abdullah, her second dam Kate Crockett by Langford, son of Williamson's Belmont, her third dam Fanny by American Boy, Jr., and her fourth dam Puss, said to be by Lance, son of Modoc. Minnie Princess is the dam of Leonora, that trotted in 2:25 at four years, and of Mignonette, that trotted in 2:34 at two years.

F. S. Dashiell, Geyserville.—There is a trotting stallion and also a thoroughbred stallion by the name of Red Wing. If you can give us a little further information about the horse in question, as to whether he is a trotter, pacer or runner, and the name of his sire, we may be able to furnish you with his pedigree.

T. P.—There is no son of Mambrino Patchen 58 that is registered as Mason Chief. The stallion Mason Chief 6583 is by Hull 1239 (son of Belmont 64) and his dam is Mag by Saturn 2605, second dam by Hugh Smith, a son of Sir Charles. Mason Chief has no standard record. He was owned by Samuel D. Mason, Saegertown, Pa. We have no record of either The Baer Horse or Seonchin.

BONNIE DIRECT AT STUD IN PLEASANTON.

In the advertising columns of the Breeder and Sportsman this week Mr. Chas. L. Griffith of Pleasanton announces that his stallion, Bonnie Direct 2:05½, will make the season of 1906 at that place at the same fee as last year—\$100. Bonnie Direct was never looking better than he does at the present time and his popularity as a sire, although thoroughly established, is certain to increase every year. The oldest of his foals in 1905 were three years old, and just two of them were trained. One, the filly Bonalet, won the three-year-old pacing division of the Kentucky Futurity and took the world's record for three-year-old pacing fillies in that race, her fastest heat being 2:09½ and the other two 2:10½ and 2:10½, proving her a great race filly and dead game. The other three-year-old daughter of Bonnie Direct was Bonnie Me, a trotter, and while she got off decidedly and did not win, she trotted a trial mile in 2:11½ and is without doubt one of the fastest green trotters in California. Every one of the foals of Bonnie Direct that has been handled at all shows speed and race horse qualities. The time to breed to a great horse with the most profit is just before he reaches his greatest popularity, and if the opinions of the best posted trainers and horsemen are worth anything Bonnie Direct is destined to be one of the greatest sires of speed and one of the most popular stallions in California, so that the present year is the time to patronize him, as breeders who send their mares this year will have Bonnie Direct foals for sale when everybody wants them.

That Bonnie Direct is producing a very high rate of speed and doing it uniformly is not in the least surprising. On his sire's side he comes from a line of champion race horses, being sired by the champion Direct 2:05½, that was a son of the champion race horse Director 2:17, and he by the great Dictator, own brother to the mighty Dexter. The dam of Bonnie Direct is Bon Bon 2:26, dam also of Bonsilene 2:14½ and the magnificent stallion Bonnie Steinway that worked a mile in 2:11½ last summer and will be raced this year. Bon Bon is by Simmons, one of the best sons of George Wilkes, and in Bonnie Direct are thus united two great race winning and record holding strains, Dictator and Geo. Wilkes. The second dam of Bonnie Direct is Bonnie Wilkes 2:29½ by George Wilkes, giving him another cross of Wilkes blood, while his third dam was by Bob Johnson, a son of the great Boston and his fourth dam a daughter of American Eclipse. As Direct had a cross of Boston blood in his veins through Jack Hawkins, sire of his second dam, it will be seen that Bonnie Direct gets two crosses each of the blood of the greatest American trotting and running sires—George Wilkes and Boston.

Mr. Griffith has recently leased 250 acres of fine rolling land just east of and adjoining Pleasanton and has fenced it into paddocks, erected new barns and sheds and made it an ideal place to care for mares and their foals. He will have lots of green feed, and as the paddocks are all well watered stock should keep in fine condition.

Those desirous of patronizing a high class stallion this year should correspond with Mr. Griffith and secure bookings at once.

Work horses are high. A New York brewery has just placed a \$45,000 contract for 100 head of Percherons.

Macon, Ga., has become a favorite wintering place for trotters and all the available stabling room at that place has been taken up.

PAYMENTS IN OCCIDENT STAKES.

Occident Stake of 1908.

Sixty-six entries were made in the Occident Stake of 1908, which closed for entry of yearlings on January 1st, at \$10 each. The following made entries: John Arnett's blk. c. Sidney Wood by Sidney Arnett-Nellie.

Geo. H. Bixby's b. c. Banquero by Neernut-Alice McKinney.

W. O. Bower's ch. f. Betty Direct by I Direct-Betsy B.

I. L. Borden's ch. f. Juliet B. by Monterey-Le Belle Altamont.

I. L. Borden's ch. c. Belvoir by Monterey-Alice Bell.

I. L. Borden's b. f. Ramona by Prince Robert-Allie Cresco.

Alex. Brown's br. c. by Nushagak-Addie B.

Alex. Brown's gr. c. by Nushagak-Serpolo.

Alex. Brown's b. c. by Prince Ansel-Bonny Derby.

Alex. Brown's b. f. by Prince Ansel-Mayella B.

La Sesta Ranch's b. c. Siesta by Iran Alto-Wanda.

Martin Carter's ch. c. by Kinney Lou-Queen C.

Martin Carter's b. c. by Directum II-Muriel P.

Martin Carter's b. c. by Nutwood Wilkes-Bessie C.

S. Christenson's b. f. by Stam B.-Perza.

James Coffin's b. c. Mercury by Zombro-Ella J.

James Coffin's br. f. Fritz Scheff by Cassian-Carrie Malone.

James Coffin's blk. f. Miss Ethel by Lecco-Rose McKinney.

S. T. Coram's ch. f. Kesrina by Nutwood Wilkes-Petrina.

Geo. A. Cressey's b. c. by Chas. Derby-Elsie.

C. A. Durfee's blk. c. Dr. Lecco by Lecco-Bessie D.

W. G. Durfee's b. c. by Coronado-Lulu Wilkes.

Byron Erkenbrecher's b. f. by Electro McKinney-Wilhelmina.

Ernest A. Gammon's b. f. Cleo Dillon by Sidney Dillon-Cleo G.

Henry Hahn's b. f. Alameda by Lecco-Henrietta.

Fritz Hahn's blk. c. by Chas. Derby-Nellie Emoline.

Ted Hayes' b. f. by Nutwood Wilkes-Ruth Mary.

Mrs. L. J. H. Hastings' br. c. California Boy by Coronado-Lady Gossiper.

C. Z. Herbert's br. c. by Delphi-Altoonita.

S. H. Hoy's b. f. Julia by Jules Verne-Beatrice.

W. H. Hoy's blk. c. Jules by Jules Verne-Camilla.

J. B. Iverson's b. c. Ernest S. by Scott's McKinney-Amy I.

J. B. Iverson's b. c. Star Light by Searchlight-Anita I.

R. Jordan, Jr.'s b. c. El Pronto by Stam B.-Constancia.

J. A. Jones' blk. f. Sacajawea by Capt. Jones-Lady Beach.

J. A. Jones' blk. c. General Jones by Captain Jones-Daisy Q. Hill.

J. A. Jones' blk. f. Alta Jones by Capt. Jones-Alta Norte.

J. A. Jones' blk. c. by Capt. Jones-Amy May.

E. C. Beyt's br. f. Sadie Seal by Red Seal by Scarlet Letter.

Geo. A. Kelly's br. c. by Bonnie McK.-Vantrim.

T. F. Kiernan's ch. f. Dorothy Wilkeswood by Pacheco W.-Daisy Nutwood.

J. W. Marshall's b. c. Julius V. by Jules Verne-Sophia.

W. S. Maben's blk. c. Admiral Togo by Petigru-Dixie W.

H. W. Meek's b. or br. c. by Kinney Lou-Cricket.

H. W. Meek's b. f. by Stam B.-Isabel.

S. U. Mitchell's b. c. by Peter J.-Elsi.

I. C. Mosher's ch. c. Ocean Wave by Tidal Wave-Bessie L.

R. C. McCormick's b. f. by Petigru-Julie Madison.

F. H. Perkins' br. c. Mirvin W. by Wayland W.-Miss Leah.

G. W. Prescott's blk. c. Sun Lock by Zolock-Blondie.

E. D. Roberts' b. c. Arrow Stanley by On Stanley-Emaline.

John H. Sanders' b. c. John S. by Monterey-Zetta.

John J. Sangster's ch. f. Miss Jennie by Monochrome-Jennie S.

E. E. Sherwood's b. f. Daisy Z. by Zombro-Queen Wooley.

Chas. F. Silva's b. c. by Stam B.-Swift Bird.

H. P. Smith's b. f. Finona McKinney by Montesol-Bessie Norfolk.

G. E. Stickle's b. c. Ringgold by Stickle by D'ablo.

Sutherland & Chadbourne's ch. f. Queen Ena by Lecco-Bertie.

J. H. Torrey's br. f. Bessie T. by Zombro-Manilla.

Valencia Stock Farm's br. c. by Direct Heir-La Belle.

Valencia Stock Farm's b. f. by Direct Heir-Rose-drop.

Valencia Stock Farm's blk. c. by Direct Heir-Glen-doveer.

Geo. L. Warlow's b. c. by Athablo-Lustrine.

Mrs. Chas. Whitehead's br. f. Miss Delphi by Delphi-The Mrs.

R. P. Wilson's blk. c. Benton Boul by Peter J.-Little Dot.

J. W. Zibbell's b. f. by Tom Smith-Kate Lumry.

Occident Stake of 1907.

In the Occident Stake of 1907 second payment of \$15 has been made on thirty-eight foals, now two years old. Those making second payment are the following:

John Arnett's b. c. Chas. Schweizer by Sidney Arnett-Miss Bruner.

Thos. H. Brent's b. f. Reina del Norte by Del Norte-Laurelia.

Mrs. S. V. Barstow's br. f. Miss Allright by Greco-Maud J.

Alex. Brown's b. f. Nocha by Nushagak-Pioche.

Alex. Brown's b. f. The Bloom by Nushagak-Red-flower.

Alex. Brown's b. c. Harold M. by Prince Ansel-

Mamie Martin.

W. O. Bowers' ch. c. W. O. B. by Silver Bee-Sadie Benton.

Martin Carter's b. f. by Nutwood Wilkes-Bonny Derby.

Christenson & Thompson's br. f. Beauty Patch by Bonnie Direct-Perza.

W. G. Durfee's b. c. by Petigru-Ida Direct.

W. G. Durfee's ch. f. by Petigru-Johanna Treat.

W. G. Durfee's blk. c. by Coronado-Ashwood.

Mrs. L. J. H. Hastings' blk. f. Lady H. by Coronado-Lady Gossiper.

Martin Carter's b. f. Stambly by Stam B.-Mora Mae.

Jas. E. Berryman's b. c. Monte McKinney by Monterey-Dot McKinney.

H. P. Smith's b. c. Monte Norfolk by Montesol-Bessie Norfolk.

C. L. Griffith's br. or blk. f. by Bonnie Direct-Victoria S.

E. A. Gammon's b. c. Ed Geers by Bayswater Wilkes-Urana.

J. M. Hackett's blk. f. Silver Slipper by Suomi-Lottie H.

E. P. Heald's blk. c. Tommy Murphy by Monterey-Honor.

F. Hahn's blk. f. Gold Leaf by Chas. Derby-Nellie Emmoline.

J. B. Iverson's b. c. Baron Wilhelm by Barondale-Wilhelmina II.

T. F. Kiernan's ch. c. Guywood by Pacheco W.-Daisy Nutwood.

La Sesta Ranch's b. c. Mogolore by Iran Alto-Lady Belle Isle.

M. L. Lusk's b. c. Zeloso by Zombro-Sallie Brooks.

Mrs. C. F. Lutch's b. f. Maytime by Stam B.-Elsie Downs.

Thos. Smith's b. f. Marguerite Hunt by Nutwood Wilkes-Daisy S.

S. Siljan's b. f. Martha H. by Iran Alto-Idabelle.

Dr. J. J. Summerfield's b. c. Lord Dillon by Sidney Dillon-Roblet.

Valencia Stock Farm's b. c. Captain by Direct Heir-Rosedrop.

Geo. L. Warlow's b. c. Gen. Nogi by Athablo-Cora Wickersham.

Geo. L. Warlow's b. c. Soisette by Guy McKinney-Narcola.

R. G. White's blk. c. Gen. Nogi by Strathway-Snow Flake.

Fred Wadham's b. c. Alone Hastings by Petigru-Juliet D.

J. A. Jones' blk. c. Chehalem by Capt. Jones-Daisy Q. Hill.

J. A. Jones' blk. f. Chehalem Maid by Capt. Jones-Amy May.

J. A. Jones' br. c. Admiral Togo by Capt. Jones-Maggie Caution.

L. H. Todhunter's b. c. by Zombro-The Silver Bell.

Occident Stake of 1906.

Third payment of \$25 has been made on twenty-five colts and fillies entered in the Occident Stake for three-year-olds to be trotted at the California State Fair this year. Four of these three-year-olds are by McKinney 2:11½ and four by Sidney Dillon. Five are by sons of McKinney, Zombro 2:11 being represented by two, and Kinney Lou 2:07¾, Guy McKinney and Montesol by one each. Nutwood Wilkes 2:16½ is represented by two, while there is one each to the credit of Chas. Derby, Nushagak, Del Norte, L. W. Barondale, Sutter, and Stam B. The list of those on Russell, Senator, Vesto, Baron Bretto, Barondale, Sutter, and Stam B. The list of those on which third payment has been made follows:

J. N. Anderson's blk. f. Della Derby by Chas. Derby-Nora D.

Alex. Brown's b. f. Kinocha by McKinney-Pioche.

Alex. Brown's b. f. Red Blossom by Nushagak-Red-flower.

T. W. Barstow's br. c. Nearest McKinney by McKinney-Maud J.

Thos. H. Brent's br. f. Magladi by Del Norte-Laurelia.

REVOLUTION IN ROAD MAKING.

The Louisville & Nashville Railroad has recently issued for general free distribution a neat pamphlet embodying the split-log idea of road building and road repairing. No movement of the present day having for its object the material advancement of the agricultural resources and general prosperity of the country, holds so fair a promise of permanent and quick results as the "good roads movement." The need for good wagon roads in rural districts is illustrated by statistics which show that 99 per cent of all farm products must be carried over common roads to reach railroads. That we have so long suffered from inferior roads is to be accounted for by the fact that the question of road improvement has not had a sufficient place in the public mind. This article shows that it is possible to have better roads without any, or at least but small, additional expense. It deals exclusively with dirt roads, not because of any belief that a good dirt road is equal to a macadam road, but because of the fact that a good dirt road is superior to a bad one; and the improvement of dirt roads will be a step in the right direction. Take care of the dirt roads and the macadam will come in time. It is usually the case that the community that will not attempt to keep up a poor road will never keep up a good one.

The split-log idea originated with D. Ward King. He writes of it as follows: Col G. W. Waters, secretary of the Missouri Good Roads Association, said to me:

"If the road commissioners of the state of Missouri could stand here and see what I see, the result would be worth a hundred thousand dollars a year to this commonwealth!"

It is impossible to express in figures even the most general estimate of the value of such a revolution in road making as must result from the general use of this new and "absurdly simple" method. However, it is well to keep in mind the fact that in almost all states the mileage of common dirt roads is many times double that of macadamized, or other expensive roads intended to be permanent.

In a state so long settled, so progressive and prosperous as Ohio, for example, more than fifty per cent of the roads are of earth, and the interest shown by Massachusetts, Pennsylvania, New York and other Eastern states in the work of the split-log drag indicates that the dirt roads of these commonwealths still constitute a very important and perplexing element in the problem of transportation by team. Full ninety-nine per cent of the highways of Missouri and Iowa are earth roads, and a state official of Iowa once said to me that to have fifteen per cent of the main traveled roads of his state macadamized would be to realize the most ambitious dreams of those men of the state especially interested in improving the condition of its highways.

My interests demanded frequent travel over the road between my farmhouse and the village, and I always felt a keen resentment when bad roads made it difficult or impossible to drive to town—a state of things that was altogether too frequent.

A little investigation and experience demonstrated to me that this was by no means the result of indifference or inactivity on the part of our road commissioners. Then I reached the conviction that it was the fate of the farmer to spend \$1500 to \$3000 a mile for macadamized road or else travel in the mud in all periods of continued wet weather—which is to say a very large proportion of the year. This conviction is almost universal among farmers who have really wrestled with the road problem and know from experience its difficulties.

However, this state of doubt and discouragement did not long continue, and I began to investigate and experiment in an irregular sort of a way. Acting under the persistent impulse to experiment, I one day hitched my team to a drag made of a frost-spoiled wooden pump stock and an old post, held parallel to each other by three pieces of fence boards about three feet long. Smooth wire served in place of a chain, and a strip of plank laid between the post and the pump stock gave me a rough platform upon which to stand.

The horses were attached at such a point of the wire as to give the drag a slant of about forty-five degrees in the direction required to force the earth that it would gather from the side of the road up into the center. We had just had a soaking rain, and the earth was in a plastic condition. I had driven this drag but a few rods when I was fully aware that it was serving at least the initial purpose for which it was intended—that of leveling down the wheel rut and pushing the surface dirt into the center of the road.

At my neighbor's gate, toward town, I turned around and took the other side of the road back to my home. The result was simply astonishing. More rain fell upon this road, but it "ran off like water from a duck's back." From that time forward, after every rain or wet spell, I dragged the half mile of the road covered by my original experiment.

At the end of three months the road was better than when it had been dragged for three weeks, and at the end of three years it was immensely improved over its condition at the end of the first year's work. I studied the result of each step in my experiment, and finally learned that three elements are required to make a perfect earth road, and that the lack of one of them is fatal to the result. To be perfect, an earth road must be at one and the same time oval, hard and smooth. All of these indispensables are acquired by the use of the split-log drag in any soil that I have ever come in contact with—and I have worked in the various kinds of clay soil, in the gumbo of the swampy lowlands, and in the black mud of the prairies.

Observation of my experiment taught me that two

weeks of rain would not put this bit of road in bad condition at a time when the highway at either end of it was impassable for a wagon. Of course, it was plain that the reason the road was not bad was that there was no mud in it. But why mud would not collect in it was not clear to me until I was taught my lesson by the very humble means of the hog wallow. One day I chanced to notice that water was standing in one of these wallows long after the ground about it had become dry. Probably I had many times before observed this fact, but not until now had it occurred to me to inquire into its cause. Examining the edges of the wallow, I was impressed with the fact that it was almost as hard as a piece of earthenware. Clearly this was because the wallowing of the hogs had mixed or "puddled" the earth and the water together, forming a kind of cement which dried into a hard and practically waterproof surface.

The next important lesson in my understanding of the real elements of road-making was taught me by studying what we farmers call a "spouty spot" in the side of a clay hill. All who live in a clay country know the unspeakable stickiness of one of these spouty places, and are familiar with the fact that after ten days or two weeks of bright, hot sunshine, you can take an ax and break from one of these spots a clod so hard that with it you can almost drive a tenpenny nail into a pine plank. Naturally, it occurred to me that if this puddled clay soil would stay hard for three months when left in a rough condition, it would surely stay longer if moulded into the form of a smooth roof, so that the water which fell upon it would easily run off.

This original half-mile of road was dragged steadily for four years before I had a single active recruit in my new crusade. At first my neighbors poked good-natured fun at me, probably because the thing was so new and so absurdly simple—and, perhaps, also, because I did the work without pay or any expectation of it.

From the outset of this work, so many questions have been poured in upon me indicating points concerning which the public is prone to go astray in its understanding of how to build and use the split-log drag that I have prepared the following road-dragging "catechism" as covering, with fair completeness, the main working facts in the problem:

Would it not be better to plow the road before dragging?

No. Plowing gives a soft foundation. Plowing the middle of the road is a relic of the old dump-scraper days.

What do you do when there are deep ruts in the road?

Drag them. If you drag when the surface is quite loose and soft, you will be surprised how soon the ruts disappear.

How do you get the dirt to the middle of the road? By hauling the drag slantwise with the end that is toward the center of the road a little to the rear of the other end.

But suppose the road is too narrow?

First drag the wheel tracks. After three or four rains or wet spells plow a shallow furrow just outside the dragged part. Spread this over the road with a drag. Only plow one furrow. You may plow another furrow after the next rain. At each plowing you widen the roadbed two feet.

How many horses do you use?

Two, generally; three if it is just as handy; four when breaking colts—a good solid team in the center and a colt on each side; two men on the drag—one to drive, the other to control the colts.

How do you drain the road?

If the earth is pushed to the middle of the road continually, the road will drain itself.

Why not make the drag out of plank?

You can, and do good work. But the split log is best. The plank drag is not so stiff.

Why not make the drag of heavy sawed timber?

Because drags so made have a tendency to slip over the bumps.

Don't you grade up the road first?

No. The grading is done with the drag, gradually. By so doing, the road is solid all the time and is built on a solid foundation.

What does it cost to drag a mile of road a year? The cost is variously estimated at from one to three dollars.

How do you keep the drag from dodging around sidewise?

By not loading it too heavily. If a drag dodges around the earth you are moving, it is because it is overloaded.

Will the dragged road stand heavy hauling?

Yes and no. A dragged road will stand more heavy hauling than an undragged road, but not so much as a macadamized or well-kept gravel road.

Will a drag help a sand road?

A sand road is a very different proposition from the black soil, clay or gumbo. An entirely different method must be adopted. Three things may be done to a sand road to make it better. First, keep it wet; second, haul clay to it; third, sprinkle it with crude oil, as they do in California and in some parts of Southern Kansas and Texas. The drag will be beneficial in keeping the sand road perfectly flat so that it will absorb moisture and retain it a long time.

To this catechism I would add the following "Don'ts": Don't drive too fast. Don't walk; get on the drag and ride. Don't be particular about material; almost any log will do. Don't try to drag with only one piece; use two.

The Matinee Club of Pittsburg is one of the strongest in the United States, and Pittsburg is today one of the best horse towns in this country.

Jackson's Napa Soda does not tangle the feet.

NEWS FROM THE NORTH.

(Portland Rural Spirit, Jan. 5.)

Senator Helman and wife left here last Saturday for their former home in San Jose, Cal. The Senator will be located at Pleasanton, where he has a stable of horses in training, including Mack Mack 2:12½, which he intends to race East this year. The Senator shipped down from here three of the best youngsters in the State, all sired by Capt. Jones as follows: Vernon Jones, junior champion at the Lewis and Clark fair; Chehalem reserve junior champion, and Chehalem Maid, second prize winner in yearling filly class. The get of Capt. Jones are attracting a great deal of attention now and they are fast coming to the front as speed prospects.

W. B. Linn, local agent for J. Crouch & Son, nas on the way from the Lafayette farm twelve head of imported stallions for this market. The shipment consists of four Belgians, four Percherons and four German Coach. These stallions were selected especially for this market and are the best in their class.

It is reported that Tom Talbot has sold his good green trotters Ounita by Phallamont Boy, out of Beulah to Jasper Reeves.

R. H. Jenkins on J. H. Bennett won the paper chase of the Portland Hunt Club New Years day hands down. E. B. Tongue on Oregon Kid was second.

Dr. J. D. Shaw has purchased a fine three-year-old Zombro filly that he is having wintered at the fair grounds and is a promising one for next year.

Aug. Erickson has registered his fine colt by Searchlight 2:03½, out of Altalena (the dam of speedy Sunny Jim) by Altamont, as The Archlight, No. 42291.

J. A. Jones has sold to Henry Helman the second prize yearling filly, Chehalem Maid, at the Lewis and Clark fair. She is by Capt. Jones, dam Amy May by Alexis 2:18. Second dam Beulah by Altamont; third dam Tecora by C. M. Clay 22, etc.

William Clark of Medford writes he has sold the three-year-old black filly, Fair Maid, to Archie McGill of Medford, an old time race horseman, for \$350. Fair Maid is by Tybault, dam Yreka, by Mt. Vernon by Nutwood; second dam by Director.

J. Crouch & Son of Lafayette, Ind., through their agent here, W. B. Linn, purchased this week from J. A. Jones of Springbrook, Ore., the good two-year-old colt Vernon Jones by Capt. Jones, dam May Belle Vernon (dam of Col. Mayberry, trial 2:16) by Mt. Vernon, son of Nutwood, etc. Vernon Jones is without question the best individual in the state and was pronounced by the judge in the Lewis and Clark show ring as being one of the best two-year-olds he ever saw. Vernon Jones, together with the full brother to his sire, Kinney Mc., will be shipped to Lafayette, Ind., their future home.

The directors of the Walla Walla Fair Association, under a called meeting, elected a new board of directors a few weeks ago, and since their induction into office have gone to work with a determination of putting the affairs of the association on a good sound footing.

Mr. William Hogoboom, the veteran trainer and driver, is still one of us, with his son, Elmer, the boy with the best disposition in the county, his assistant, and some of the wise ones say Elmer can give the "old man" pointers. Billy don't talk very much about what he has that is good in the winter time, but I am going to say this much for him, that he has a great horse in Caution by Electioneer. This horse is the greatest broodmare sire that this country has ever seen. Remember that he is the sire of the dam of Helen Norte 2:09½, trotting, this year. She was only beaten a neck the other day by John Caldwell in 2:08½ at Los Angeles, Cal. Billy is also training a few colts by his young stallion Teddy by Diablo. Strange to say a few of these colts show fast at the trot; they all have good legs and in conformation are beauties.

GOOD BECAUSE IT DOES GOOD.

That is the brief but significant comment made in a recent testimonial about Kendall's Spavin Cure. The writer of it put much in little. He expressed no new ideas; he did not concern himself with the way, the how, or the why, but in expressive form the great fact that is testified to by so many thousands of people, namely: That Kendall's Spavin Cure is the standard dependable remedy for the commonest ailments of horses.

The common ailments of horses are not many. But while few, they are liable to come at any time. The best kept horses and the ones with least care are alike subject to these common ailments, among which might be mentioned spavins, ring-bone, lameness, splints and curbs. It is a happy circumstance that these ailments on all horse flesh, no matter in what country, require no variation in the treatment. And it is also a happy circumstance for horse owners that they may have always at hand so inexpensive and so dependable a remedy for just these characteristic ailments as is Kendall's Spavin Cure. Even the most stubborn cases yield to it. It is worthy of note that everyone who has ever used it commends it. At any rate, we have yet to hear of a user in all the years Kendall's Spavin Cure has been in use who will contend that it is not all it is represented to be. It is to be had at any drug store and we certainly think horse owners who do not have it always on hand ready for lameness, or any other emergency that may come, are not consulting their own best interests.

Strike—if they don't give you Jackson's Napa Soda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
April 1-Sept. 15—Oct. 15-Feb. 1—Open season for taking steelhead in tidewater.
Sept. 10-Oct. 15—Close season in tidewater for steelhead.
Sept. 10-Oct. 15—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 15-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above the water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Jan. 4, 6—Southern Ohio Kennel Club. Hamilton, O.
Jan. 10, 11—Bay State Co-operative Bench Show Association. Fall River, Mass. Walter E. Stone, Clerk.
Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary. Entries close Jan. 20.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburgh, Pa. F. S. Steadman, Secretary.
March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
May 23, 30—Long Island Kennel Club. J. M. Dale, Secretary.
June 1-2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.
Sept. 3-6—Taunton Kennel Club. Taunton, Mass. A. J. Lee, Secretary.
Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary.

Field Trials.

Jan. 6—Pacific Coast Field Trials Club, 23d annual trials. Bakerfield, Cal. Albert Betz, Secretary, 301 Parrott Bldg., San Francisco.
Jan. 8—Texas Field Trial Club. 4th annual trials. Kansas City, Tex.
Jan. 9—Georgia Field Trial Association. 4th annual trials. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. 15—United States Field Trial Club. 17th annual trials. Grand Junction, Tenn. W. B. Stafford, Secretary.
Jan. —National Championship Field Trial Club. 10th annual trials. Following: U. S. All Age State. W. B. Stafford, Secretary, Trenton, Tenn.

BEARS IN THE YELLOWSTONE PARK.

"I would advise you not to go into the woods," said a corporal of cavalry to a ruddy faced Englishman who was about to explore a piece of heavily timbered forest just back of the Lake Hotel in the Yellowstone Park. A party had just arrived from the Old Faithful Inn in which were this venturesome subject of King Edward and the writer.

"What's the 'arm'?" he asked in some surprise.

"There are two bear colonies not far from the edge of the clearing, and they might make it unpleasant for you if you happened to get too near them," replied the corporal.

"Really? 'Ow exciting! Shall we 'ave a shot at them before leaving?" and the visitor from the other side called attention to a 7x9 kodak that swung from his left shoulder.

"No trouble about that," replied Uncle Sam's guardian. "Be at the dump near sunset and you'll catch a bear or two."

The eyes of the Englishman snapped with delight as he carefully inspected his picture taking plant to assure himself that it was in good working order.

Next to the thermic displays and the canyon of the Yellowstone come the bears, in point of interest, to nine-tenths of the visitors to the park. Immediately after registering the visitor asks if there are any bears in the neighborhood. He has seen specimens of these animals in menageries and zoological gardens, yet he has an intense interest to have a look at Bruin in his native environment. If told that the region about the hotel is numerous inhabited by bears he overruns with delight and becomes impatient to see them. Not less interested are the women.

Perhaps the finest exhibition of these wild beasts is given at the Lake Hotel. They are to be seen at the Canyon Hotel and at other points in the park, but the greatest variety and the largest number visit the region contiguous to the first named location. It is their custom to come out of the pine woods and the thickets twice a day, their first appearance being soon after sunrise and the second half an hour before sunset.

Six hundred feet back of the Lake Hotel is a clearing of about a dozen acres, in the center of which is a dump, a place where all the refuse from the kitchen and the tables is deposited. It is taken away once each day, a tip cart being used for the purpose. Before the load is started every guest at the hotel is on the show ground. Kodaks and field glasses are

numerous. Owners of the former are desirous of taking away indisputable evidence of their near association with the wild beasts of the park in order to give a thrilling flavor to their experiences when related to friends at home. It establishes the fact that the taker of the picture saw a number of real live bears, and that he or she, in order to get the snap shot, must have been in their near vicinity.

After Bruin's evening meal has been loaded into the tip cart its coming is impatiently waited by the assembled guests. The driver starts his horse on an easy trot, and the load is rattled out to the dump. The clatter has been heard by the shaggy denizens of the forest, and before the cart has been emptied they may be seen slowly emerging from the shadowy depths of the great trees and the clumps of bushes to the right and to the left of the open space.

"There they come!" whisper the excited and interested spectators, as with straining eyes they behold the handsome beasts come into the clearing. Their movements are slow and graceful, and occasionally they lift their heads and look from right to left as if inspecting the semi-circular line of invaders of their domain. Seated with the tourists are always two cavalymen, with revolvers loaded and ready for use in case the animals should take it into their heads to attack the curious crowd.

The bolder of the animals come straight to their meal, and the more timid ones can be seen poking their heads out from behind the trees and the bushes. Those first at the banquet begin operations without the loss of time, and the fact that they have the pick of all the "good things" makes them a little particular as to what they shall select.

The first movement is an inspection of what has been offered. Their great, broad forepaws are employed to reveal the various ingredients of the conglomerate mass, and carefully they turn it over and over until they discover some toothsome morsel, which is pulled out by their sharp claws and conveyed to their mouths. While in the act of mastication they ease their bodies upon their hindquarters, and, with every evidence of supreme satisfaction, leisurely dispose of the tidbit.

The first comers on the occasion in question were three with coats of glossy black, and all were of enormous size. Shortly after their appearance came one with a coat of brown. He also was of mammoth proportions. After this quartet had feasted for ten minutes they appear disturbed by a noise that came out of the woods over to the left of the clearing. All suspended operations and turned their heads in the direction from whence came the sound.

Presently there came into view a procession of five silver tips, the handsomest specimens of the bear species to be found in the park. Leading the line was an enormous female, with two beautiful cubs, one on each side of their ponderous mother. In this latter exhibition the spectators became deeply interested, and gave frequent vent to their delight. The ladies said: "Look at those dear little things," while the men, with more robustness, exclaimed, "By George, are they not dandies?"

The so-called silver tip has a mixture of gray in his coat and a line, nearly white, running the entire length of his back, while his head is decidedly gray. The group in question was sleek, and gave evidence of having been well fed. They were in possession of all their activities and natural beauties, which were in strong contradistinction to the kind that live in captivity.

When this last aggregation reached the scene of the banquet the first comers turned about and retreated slowly to the edge of the woods. This was interpreted as meaning that differences existed between the colonies, and that in a test of strength the silver tips had shown themselves superior to both the blacks and the browns. The cubs were given the right to go where they pleased, and in their wanderings found many a tender morsel that was just to their liking. The old fellows who had fallen back showed that they did not intend to return, as they finally disappeared in the deepening shadows of the forest.

After the silver tips had been feeding for fifteen minutes or more, the mother of the cubs, either from some movement that she interpreted as threatening danger to her offspring or from annoyance at seeing so many strangers present, made a sudden dash at the left wing of the circle. The stampede that followed defies description.

Skirts fluttered and female voices screamed at their top notch. All of the men became panic-stricken, and hurried as fast as their legs could carry them toward the hotel. One of the sterner sex, evidently blinded with fear, ran against a small pine tree and fell senseless from the contact. Worst of all, the two cavalymen, who were supposed to be present for the protection of the guests, joined in the retreat. It was afterward explained in extenuation of their action that their revolvers were not loaded on this particular occasion.

A report followed the tourists the next day that the pugnacious old beast had been killed when next she came to the dump to appease her hunger.

Many stories have been told about the cunning tricks played by the bears at the Lake Hotel. Some of these are highly flavored with imagination and others may be set down as pure fiction; but there was an incident which occurred on the night the writer

was at the hotel that gives substantial evidence that Bruin is possessed of no little perspicacity and downright cleverness.

A display of these qualities was brought out by the arrival of a box of hams at the hotel, after dark, the hour being so late that it was decided not to place them in the storage-room until morning. This was an oversight, as, when the box was seen the next day, it was found to have been ripped open during the night and its contents more or less disturbed. Two of the hams, partly consumed, were picked up near the splintered top, while a census of the consignment showed that five others had disappeared entirely.

The question arose as to how the purloiners had managed to carry off their spoils, but this was later explained by one who was acquainted with the tricks and the habits of these sagacious beasts. He affirmed that after the hams had been released the shaggy thieves had taken a prize under each forepaw, and, rising upon their hind legs, had walked off with the smoked viand. Even a weak imagination could picture the humor of this scene, and the fact that the incident was frequently referred to during the remainder of the journey showed that the grotesqueness of the situation had made a deep impression.

There is another colony of bears in the wooded hills back of the Canyon Hotel, and they exhibit exactly the same characteristics as do those at the Lake Hotel. They come down a rather steep incline to the feeding ground, which is in a slight depression and affords an excellent opportunity for seeing the bears when at their meals.

WONDERFUL COURAGE OF A MOOSE COW.

One of the most remarkable moose hunts ever reported terminated last fall at Talbot Station, on the line of the Quebec and Lake St. John railway, about sixty-five miles north of this city.

P. McCall and J. Carter of Grand Mere discovered a bull moose recently, after following his tracks for a considerable distance. Then they saw that he was accompanied by a female almost as large as himself.

Often, before getting within good safe rifle shot of the bull the hunters could have easily killed the cow. It would almost have seemed that she was aware of the fact that she was protected by the law of the land, which imposes a fine of \$100 upon anyone killing a female moose, so dangerously close did she remain to the hunters and so constantly did she harass them during the chase.

After following the pair for a considerable distance the hunters succeeded in placing a bullet in the body of the bull, but without striking any vital part of the animal's anatomy, though for some time his course was marked by a stream of blood. Probably because he was not alone, but had the safety of his mate to consider, as well as his own, or it may be because he did not care to face two assailants at the same time, the wounded moose did not turn upon his foes, as so many of these animals do when wounded at close quarters.

Both moose made off at first at a very rapid rate, but finally came upon a locality where the snow was so deep that their course was greatly impeded. The hunters found no difficulty whatever in following the two moose, but whenever they approached them the cow, as if fully understanding the wounded condition of her mate, would turn upon the hunters and keep them at a safe distance until the weakened bull had been able to gain another start. She simply stood in their path and barred the way.

This happened not once or twice, but was several times repeated. Many miles were covered in this manner, the chase lasting all day.

At nightfall, when the hunters were no longer able to maintain it for want of ability to follow the trail in the dark, they were obliged to camp out in the open air. Fearing to make a fire lest the moose should be driven away, the hunters suffered so much from the extreme cold that they had but little sleep, and had to keep moving about to maintain circulation.

As soon as the first glimmer of daylight enabled them to see the tracks of the moose they were off again in hot pursuit. At one time the trail led them across the Batiscan river, but they were fortunate enough to pick it up again near the opposite shore, and shortly before nightfall on the following day they had the satisfaction of having their persistency rewarded by a glimpse of the animals still traveling together, the bull evidently very much exhausted from loss of blood.

As they lessened the distance between them and their quarry the plucky cow again placed herself in the breach to save her lord and master. The hunters separated so that the cow could not cover the fire from both of them, and one more shot brought the handsomely antlered moose lifeless to the ground.

Then, and not till then, did the courageous survivor of the pair plunge into the woods and beat a hasty retreat. The hunters estimate that the moose must have led a chase of at least from thirty to forty miles.

A meeting of the active spirits who have been engaged for some time past in the formation of a club, the object of which is to provide its membership with facilities for hunting bear in the high Sierra Nevada mountains, was held at Hanford recently. At that time preliminary steps were taken to perfect permanent organization. A committee was appointed to draft the necessary constitution and by-laws. Captain Brown left for Plumas county to perfect arrangements for holding club bear hunts in the future. The club already has excellent preserves in Plumas county and surrounding country. The membership will embrace a number of San Francisco sportsmen, who will co-operate with the Nevada and Northern California members of the club in making the hunting meets of the members notable in the annals of sporting events in the United States.

THE SCENTING POWERS OF SPORTING DOGS.

Occasionally, apparently in the most inexplicable way, a dog seems to lose the greater part of its smelling powers, and without searching further those in charge at once say that scent is bad, ascribing the cause to some mysterious state of the ground, its dryness, soaked state, etc. And thus they are content to leave the matter. It is an undoubted fact that the scent of game does appear to lie better on a warm, light soil than on a cold, clay one, and if the latter becomes dry scent is sure to be very faint indeed. Why this should be is hard to explain, but the truth of it cannot be denied. Those who are about to purchase Retrievers, Pointers or Setters should profit by this knowledge and always endeavor to procure such dogs from a district noted for its heavy soil. These animals have been accustomed to dealing with a much fainter scent, and consequently succeed splendidly when transferred to a district noted for its warm, light staple. To obtain dogs from a light soil and expect them to work as well on clay as animals accustomed to it is utter folly, and bound to end in disappointment. They may get used to the fainter scent in time, but during that period are likely to be condemned as more or less useless. Therefore it is wise to make an effort to procure all sporting dogs for use with the gun from a locality known to possess a heavy soil.

Even with the cleverest of dogs, and under the most favorable conditions, the mystery of a sudden failing of scent is hard to fathom, and as this is a puzzle which perplexes many sportsmen during every shooting season it is proposed to offer a few explanations which may be of assistance in solving the secret.

The nostrils of a dog are very delicate organs, and this is especially the case with reference to dogs kept in a total or partial state of domestication. It is probable, from what we hear, that the smelling powers of wolves and dingoes, which are asserted to be the wild congeners of our present dogs, never deteriorate, and they always seem able to hunt and run down their prey by scent. If this is the case it is only reasonable to suppose that a lack of usual scenting powers in our dogs is in some degree attributable to the conditions under which they live. And it can be proved easily that this is actually the case.

I should be the last to decry the use of disinfectants in kennels, for the employment of one or other of these well known preparations is often the only means of keeping such places healthy and in a proper sanitary state; but they should be used with due discretion. Too often a kennelman will scatter a disinfectant freely for the sole purpose of concealing unpleasant evidence of his own neglect, and where this occurs he should be at once forbidden to use it at all. A disinfectant should be employed to assist cleanliness, and not as an apology for it. The knowledge that all bad smells may be drowned by the free use of powerful disinfectant often causes a kennelman to be neglectful of removing the cause of those smells.

It is the usual thing to cleanse kennels early in the morning, and immediately operations are complete to sprinkle every part liberally with disinfectant. The result is the place is reeking with the smell of this disinfectant for several hours. This all-pervading odor has serious effect on the olfactory senses of the dogs, and when they leave the kennel to work a little later their noses for a time are absolutely useless. This is the true explanation of the reason dogs often work very badly during the early part of the day and afterward perform more brilliantly; although the ordinary doggy man will tell one that the improvement is owing to the ground getting warmer. It is perfectly correct to clean out a kennel as early as possible in the day, but a disinfectant should not be used directly afterward till it is known whether the dogs will be required. Should they be wanted a little later defer the disinfecting till they have left the kennel, for its effects will have disappeared by the time the dogs return, and if the services of the animals are not needed use the disinfectant sparingly. Personally, I prefer to see it used for flushing the drains of kennels only.

A dirty kennel impregnated with filth and bad smells acts just as harmfully on a dog's olfactory powers as a place reeking with the smell of a strong disinfectant. For this reason a kennel should be maintained in as cleanly a state as possible.

There are other reasons besides these already explained for a dog's nose being at fault. Scent is generally expected to be very faint on a dry soil—that is, a harsh, dry soil—and this fact admits of easy explanation. As the dog progresses over the surface of the ground a certain amount of dust is raised, and it is this which interferes with the animal's nose. No dog can work accurately when dust is flying, as Norfolk keepers, who have had experience in the dust storms so often blowing on the light lands of that county, will be able to testify.

Another thing which seriously handicaps a Retriever especially is the smell of flowers. Such a dog may be seen to follow a running partridge beautifully to a fence, and then be at an utter loss owing to the bottom of that fence being a mass of flowers. Pointers and Setters may also be observed in like difficulty in a field of seeding clover, which is always a mass of flowers during September. It is never safe to trust to the dogs having found every head of game in such a crop, as a careful and close walk through after they have passed over it will often prove. The same remarks apply to dogs working in heather, although they are not often at serious fault in this except on very dry days, when the pollen is flying freely in the air.

Dressings of manure upon land also greatly handicap dogs, although game is not fond of resorting to fields recently treated, unless it be partridges seeking food in winter. I have noticed that superphosphate of lime, which is about the strongest smelling of all

artificial manures, is one of the worst for affecting dogs. The smell seems to linger on the ground for weeks after the manure has been distributed that length of time, and is lost to human detection, and directly dogs get upon an area treated with it they are at fault.

The extreme variation so often remarked in the scent left by running birds is sometimes attributable to the extent of their injuries. It stands to reason that a bird badly wounded leaves a stronger scent behind than one which is only slightly hurt; and the speed with which a dog follows some of its game and the certainty with which it sticks to the trail are frequently explained by the fact that a spot of blood is left on the ground here and there.

A tired Retriever can never follow game with accuracy, for a little exercise sets it panting badly, and then the animal is not making proper use of its nose. Should it be breathing heavily through the mouth to cool itself and get its wind, only an occasional sniff takes place through the nose, and this is hardly sufficient to form a correct guide. Some people assert that dogs, especially Pointers and Setters, can taste the scent on the air, but this is open to doubt.

Readers will be able to gather from this that there are other reasons for the failure of a dog's scenting powers than the state of the atmosphere and condition of the soil. Generally a little research will solve the mystery, and in the majority of cases it will be discovered that the dog itself is not to blame.—Dalton.

COMMENDABLE ACTION OF THE PACIFIC ADVISORY COMMITTEE.

At a meeting of the Pacific Advisory Committee on the 2nd inst., a resolution was adopted annulling the disqualification of a number of northern fanciers. The right course was adopted, as has been the general belief would be followed, for eradicating the last smouldering sparks of jurisdictional antagonism. Secretary Norman states: "It is believed that an end has now been achieved to all dissension in kennel matters on the Coast, and this committee congratulates the members of the American Kennel Club in its jurisdiction on the unprecedented prospects for a harmonious and successful show season."

The resolution adopted is the following:

"Pacific Advisory Committee of the American Kennel Club, January 2nd, 1906.

Whereas, all organizations other than the American Kennel Club claiming jurisdiction in kennel matters on the Pacific Coast have ceased to exist by reason of the action of the officers and members of the Seattle Kennel Club and of the Western Kennel League in applying for membership in the Seattle Dog Fanciers' Association, a member of the American Kennel Club, and their consequent election to membership therein, and

Whereas, such action marks the end of dissension on the Pacific Coast in matters affecting kennel interests, and

Whereas, the Seattle Dog Fanciers' Association has petitioned this committee for the reinstatement of all individuals disqualified for participation in shows held on the Pacific Coast under rules other than those of the American Kennel Club; therefore be it

Resolved, That this committee, in order to promote harmony and the best interests of dogdom on the Pacific Coast, do hereby assent to the petition of the Seattle Dog Fanciers' Association, and be it therefore

Resolved, That all persons disqualified for participation in shows held on the Pacific Coast under rules other than those of the American Kennel Club, in accordance with the resolutions of this committee, passed respectively on July 23, 190, March 18 and 27, and June 9, 1905, be and hereby are reinstated to good standing in the American Kennel Club.

Attest: J. P. NORMAN,
Secretary Pacific Advisory Committee, American Kennel Club."

Pneumonia in Dogs.

The normal temperature of a dog (and this applies to the ox and the goat—all three being the same) is 101.4 degrees F. If the clinical thermometer shows the temperature as being lower than this, it indicates that the dog is in a low, weak state, and needs stimulants; if, on the other hand, the temperature is in excess of 101.4 degrees, that points to feverishness, and any considerable excess, such, for instance, as a temperature of 104 or 106 degrees, must be regarded as very serious, indeed. Now, coming to the subject of pneumonia—when a dog breathes heavily and has a high degree of temperature, it will be pretty safe to conclude that there is serious lung trouble, and it will be wise to call in the aid of a qualified veterinary surgeon.

Pending the arrival of that gentleman, treatment may be proceeded with as follows: Remove the animal to a warm apartment, the air in which is rendered humid by the agency of a bronchitis kettle. Moist warmth is absolutely essential to the treatment of all cases of lung complaints. Moist warmth should also be applied externally on flannel to the region of the lungs, and will be found of great benefit. Flannel dipped in hot water and rung out, and then sprinkled with a few drops of turpentine is the best possible thing to apply. For medicine, a little of the following mixture may be given. Take a solution of acetate of ammonia, two drachms; camphor water, two ounces. Dose: A teaspoonful for a twenty pound dog every three hours. More or less in proportion for dogs of other sizes. The important thing we wish to emphasize, however, is that a veterinary surgeon should be called in.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

COURSING NOTES.

The officials of the American Coursing Board have looked a long way ahead and have already allotted next year's American Waterloo and also the Mississippi Valley Futurity.

These two important events will be run at Hot Springs, South Dakota, a summer resort in the Black Hills. The club at that place bid \$1000 for each event. The Futurity has been growing in popularity from year to year. There was a record entry of 144 this year when D. K. Cartter, formerly of Kansas but who is claimed as a Californian by his friends here, had the last three dogs in the stake. These were Great Northern, Bartagus and The Flight. These three won \$800, the first prize being \$450.

The Christmas number of the Outdoor News has a profusely illustrated article on "The Greyhound's Proud Place in English Sport." The opening paragraph says:

"Coursing in England is so ancient and honorable a sport that its traditions fill books, and its present high place in popularity is impressively demonstrated by the vast interest shown in the running of the Waterloo Cup and other prominent fixtures of the season. A winner of this 'blue ribbon' of the coursing world is worth, if not his weight in gold, at least very near it, when more than \$5000 has been paid for a champion, and when his stake winnings have more than once passed the \$5000 mark during his coursing career."

This article should prove interesting reading to the coursing officials on this Coast who are charged with keeping the sport honorable and on a high plane. Some day they will realize that running it year in, year out, without giving its followers a breathing spell, is not the wisest policy.

Union Coursing Park, which is located at Colma, in San Mateo county, has been closed indefinitely. Early last month a delegation of citizens of Colma appeared before the County Board of Supervisors of San Mateo, backing a petition that the board reconsider the action taken at its last meeting, when an ordinance was passed that prohibits the selling of pools and betting on the racing of dogs within the county limits.

The petitioners were represented by Herbert I. Choyinski, a San Francisco attorney, who made a lengthy argument in favor of the petition, contending that the sport was legitimate and clean, and that many citizens of the county made a living through caring for the dogs and doing other work in connection with the sport.

After listening to the arguments advanced by Choyinski, the board took immediate action, denying the petition by a unanimous vote. The Menlo Park Improvement Association, having heard of the petition to be presented, was represented at the hearing, and its representatives had a counter-petition with them. The Supervisors denied the petition for reconsideration without reference to the Menlo Park people, but afterwards heard them in reference to the question. The association, in its petition, commended the board for its recent action.

The coursing people based their plea for reconsideration of the ordinance passed against them on the double ground that they have large sums of money invested here and that many citizens of the county make their living through the sport. They attribute the responsibility for the adverse ordinance to Supervisor Elkenhotter; but, as a matter of fact, he was in no wise more responsible for the action than any other Supervisor. The Supervisors and the legitimate residents of the county are practically a unit in condemning the coursing game as inhuman, crooked and highly brutal, and so far as the matter of earning of livelihoods is concerned they contend that the men who take care of the dogs and work about the coursing parks are not legitimate citizens of the county and are here only because the sport is permitted here. It was maintained that the minute the sport is stopped they will migrate back to San Francisco county, whence they came.

Enclosed coursing is now conducted at Ingleside Park, on Saturdays and Sundays. There is always a large attendance of visitors and leshmen. Divers attempts have been made to stop the sport in San Francisco county, but without avail.

The allegations of cruelty and brutality have been usually made by well meaning, but over enthusiastic and uninformed people.

Where the particular colored individual is located in the Colma woodpile we are not at present advised; it is probable that some time in the future he will be located and sent his way, after which the well appointed Union Park will be reopened.

This Decision Is Porous.

A case in Tezwell county, Ill., will attract wide attention. It settled the unique point that a dog is not property, and except as to ownership is not subject to levy and cannot be classed as an asset in estates. It is neither a wild nor a domestic animal, and yet partakes of the quality of both. It is not an animal making its owner liable for trespass, as in the case of swine, horses or cows, and, in fact, has no standard of consequence in court.

William King of Bloomington was arrested, charged with the theft of a bulldog. His counsel raised the point that a dog is not property and therefore cannot be stolen. He was sustained by the statutes, and Judge Worthington ordered King's release.

Lots of Ducks.

Ten members of the Del Paso Gun Club found the shooting good recently, each man getting the limit. That means 500 birds from that reserve near Sacramento.

GOSSIP FOR SPORTSMEN.

Fair Sex Are Crack Shots.

Signs of the times indicate that another field of sportsman's supremacy is threatened by woman. There has been much talk of fine shooting by members of the gentler sex, but the genuine nature of the rivalry has not been hitherto realized.

Among the ladies of this city who may be mentioned as skillful with the modern breechloader are: Mrs. W. W. Richards, Mrs. A. N. Shields, Mrs. C. L. Griffiths, Mrs. H. P. Jacobson, Mrs. John B. Hauer, Mrs. Bert Wyman, Mrs. Al. M. Cumming and numerous other Dianias who can bring down a good bag of either ducks or quail.

Not long since a woman duck hunter, Mrs. Nellie Bennett, astonished some of the Portland, Or., sportsmen by going out on the marsh with them and bagging the limit in workmanlike style with her shotgun, which is of the repeating type. The achievement was heralded as remarkable, and without a parallel, which is in no sense true.

Minneapolis boasts of two splendid women shots, Mrs. W. P. Shattuck and Mrs. Sumner S. Johnston, both of whom accompany their husbands each fall, and generally manage to hold up their end of the trigger work very ably. Both ladies are accomplished trapshots as well.

Any woman of good eye and plenty of nerve can learn to handle a light shotgun almost as quickly as a man. It is a noteworthy fact there are women, when at all proficient in the use of firearms, who are apt to become very good shots if given practice.

A glance at the shooting record of the Duchess of Bedford would be a surprise to many men who feel themselves secure from feminine competition. Her grace's record of 3427 head of game in a single season shows that the supremacy of man at the sport is no longer a thing undisputed.

Wild duck shooting in February is no childish sport. Patience, endurance, and skill are needed to bring down twenty-nine birds with fifty-six shots, as the duchess has done.

Of all forms of shooting, this sportswoman prefers that at driven grouse. She shoots with a sixteen bore gun, and of course dispenses with the services of a loader. Indeed, there is nothing of the modern "mechanical" shot about the Duchess of Bedford.

She claims, without enthusiasm, to have brought down more than 200 "tame" pheasants in a day, and seventy at one stand, while her predilection for snipe shooting by herself, which she places only second to grouse driving, shows that she shoots for the sport rather than the bag. Nevertheless, she has shot as many as 115 partridges in a single day's driving.

Until her marriage and return to England the duchess had never fired a shot in her life, but that the instinct for sport was born in her is proved by her rapid advance to a proficiency as that to which the figures bear witness.

Another noblewoman whose prowess with the gun is well known is Lady Vivian. Although her record cannot be said to rival that of the Duchess of Bedford, her shooting is far better than that of many male experts.

Slaughter of Caribou.

Probably never again in Alaska, and certainly not in Tanana, will there be a repetition of the scenes that accompanied the biggest run of caribou ever seen in Alaska during October. Several thousand of the animals passed through the heart of the settled portion of Tanana valley. Miners shot from their cabin doors. They were killed from decks of steamers and for days the surrounding hills reverberated with the sound of firearms. Frightened by the shots of the hunters, the caribou stampeded across the creek in bands of hundreds, trampling over sluice boxes and getting tangled in the works. In view of the many hunters and the fact that the hills have been alive with game, it would naturally be supposed that the mortality would be great, but there is only one instance recorded where one man has killed more than twenty. The greatest number were slaughtered by miners and will serve for their winter's meat. Very few of those who flocked from the town to the hills secured any game, and at no time has caribou meat sold in Fairbanks for less than 25 cents a pound.

An Ingenious Angler.

W. C. Swain is an enthusiastic duck hunter and member of the Montezuma Gun Club. As to being an angler, he has never made any claim, until last Saturday, when Black Jack Lemmer and the Dook of Ayden proudly displayed 15 fine steelhead to the admiring gaze of students at the "symposium." Lemmer's remark, "Why don't you go up to Russian river, Bill?" elicited the following answer:

"My first trip into the mountains was made with most any purpose other than fishing in view, for that was something which held no interest whatever for me. I even listened indifferently to the wonderful tales of fishing luck and misfortune told by the other fellows while we sat around a blazing fire of spruce boughs during the cool evenings. Our camp was on one of the many little streams flowing into the Bear river, near Steamboat Springs, and the trout were very plentiful.

One day I had strolled up the creek much further than usual and had got to a little canyon that I had never heard of before, where the pools were so small and clear that the fish could be plainly seen in great numbers darting to and fro, but not when they saw you, for then they would lie perfectly quiet, close to the bottom and blending with the sand and rocks so that they could hardly be distinguished. Having a piece of string in my pocket I thought I would have some fun with the fish, so, catching a nice grasshopper and tying it to the end of the line with a couple of knots, and cutting a branch, I went up behind

a rock and threw the hopper into a pool in which there were several trout. Then they all made a move for it, the largest caught it and made off, trying to swallow it, but I gave a quick jerk and succeeded in jerking him out of the water onto the bank and caught him before he flopped back. Cutting a V-shaped branch I strung him on it and then went back to try again, but only succeeded in scaring the rest, as my bait was torn and not much more than a knot. So, catching another hopper, I tried the next pool and after several attempts jerked another nice fish out. It was only when the fish was headed from me and the bait would catch in the corner of the fish's mouth that they could be jerked out, half the time they being merely jerked above the water, but by keeping at it I got my branch full and then went back to camp to show my first string of trout and to try to explain how it happened, but the fellows declared that I deserved the medal for fish stories. After that there were none more enthusiastic for fishing and fish stories than I."

Verdi Hatchery Abandoned.

The State of California will hatch no more fish in the State of Nevada. The California Fish Commission recently informed the Nevada Commissioners that the hatchery at Verdi would be abandoned and that the troughs there would be presented to Washoe county for similar use. The Commission has procured a supply of Nevada rainbow trout sufficient for its use for the present.

For three years the California Commission has been taking half a million to a million rainbow trout from the Truckee every year. Ten per cent of these have been turned back into the river after they have reached the swimming stage in return for the privilege. The Washoe county commissioners figured that under natural conditions no greater per cent of the spawn would hatch and grow to the swimming stage.

J. B. COLEMAN AND DAVE HAREFIELD
Field and Tule Club

owing to the alleged poisonous condition of the water caused by the paper mills at Floriston.

Morrill & Elliott, who operate a large trout preserve in the Sierras, southwest of Reno, asked for the contract of the California Commission and it was extended to them. Their hatchery is in Nevada.

Geese Are Plentiful.

Reports from many sections note the presence of thousands upon thousands of wild geese. In the vicinity of Willows, Frank Burgi, a well-known trap shot, has established his headquarters and has been doing a land office business in pulling off successful goose hunts.

The season for his kind of sport has now commenced in earnest; and many prominent sportsmen from different points along the Pacific Coast, as well as in the East, will be guests of Mr. Burgi, who has every facility to give them the shoot of their lives.

Mr. Burgi is thoroughly familiar with the favorite feeding grounds of the birds; he uses live decoys, and he and assistants know how to call the geese to them. This expert goose calling is quite an art in itself. For two shooters to bring down over 300 birds is not considered at all extraordinary for a morning shoot—and yet the visiting sportsmen hardly believe it until it is proved to them.

Frank takes his guests to the grounds in his comfortable, large automobile; the live decoys are there ready for business; the "calls" go out to the wild birds—and the "men behind the guns" do the rest. It is sport with a big S, and enthusiastic sportsmen come again.

How Gun Barrels Are Proved.

The method of proving gun barrels at the Birmingham and London proof-houses are exactly the same. Each barrel is handed in with a label bearing a number only; this prevents the workmen knowing from whom the barrel came, and they have no oppor-

tunity, if so willed, to damage the article out of spite against the maker. The barrel is then passed on to a man who ascertains the bore of same, and stamps it with a number, so the next man, who is a loader, knows exactly what charge to put in it. The barrels are then passed on to the loading-room. Here everything is done to prevent fraud and insure safety, the floors being kept well dampened and clean. The loading-room is divided into three compartments. In the first the barrels are loaded; in the second the charges are rammed home with special rods kept for the purpose; in the third they are primed and "made ready" for firing, and then sent to the firing-room.

The firing-room is a large building made of sheet-iron, and arranged like a Venetian blind. The lathes, as it were, are closed when ready for firing, and opened to allow for ventilation after. The barrels are laid along grooved racks and fired with a train of gunpowder which connects the breech vents with each other. There are heaps of sand both before and behind the barrels, to catch the charge in front and barrels behind. The force of the explosion, of course, shoots them backwards. Any barrels which may have missed fire are reprimed and put back on the racks again. Then comes the hot-water test. This means that the barrels are filled with hot water and covered with a plug, and then struck heavily on top; so that if there happens to be any flaw or pinhole, the water at once escapes. When common barrels are proved, they have to stand for a day before undergoing the hot-water test, so that the acid in the powder will eat into any flaw and make it more readily observed.

Now the process of "provisional proof" is done, they are made ready for "definite proof." The breech actions are now fitted, and the barrels are proved with cartridges. This prevents cheap and dangerous breech actions being used. In some cases the breech actions are blown to pieces or bulged by the force of the ex-

plosion, and then have to be rehardened and reproofed until found to be sound. If a man's gun bursts, let him ask himself why, as he certainly cannot blame the proof-house authorities.

Large Take of Salmon Eggs.

Tehama county is deeply interested in the success of the government fishery at Tehama, and the record-breaking catch of salmon eggs means much to that section. The fishing industry is still in its infancy, and facts and figures relating to this government enterprise should prove interesting reading.

The United States Fish Commission and the California Fish Commission act in conjunction in this work, the first named securing the eggs and preparing them for shipment, and the latter hatching and distributing them.

Under the management of the present State Board, consisting of W. W. Van Arsdale, W. E. Gerber and J. W. Birmingham, with their efficient Chief Deputy, Charles A. Vogelsang, the work has been more successfully prosecuted than heretofore, and it is today one of the most valuable industries on the Coast.

The work has now reached such proportions and proved of such value that additional facilities will be necessary at the Sisson station in order to accommodate the demands made to successfully handle the constantly increasing supply of eggs and their proper distribution.

Captain G. H. Lambson, who is employed by the government, has liberal allowances of money to successfully prosecute his work, and the Sisson station of the California State Commission, under the management of Superintendent W. H. Shebley, should not be hampered, it is argued, for a lack of facilities to successfully hatch and distribute the fish furnished by the government stations; besides keeping up and improving the hatch of game fish for the lakes and streams of the state.

Mr. Shebley has been engaged in fish culture for the past twenty-three years. He is a conscientious, hard-working man, with heart and soul in his duties,

and it is much to his credit that the California State Commission, at least the Sisson station, has reached the importance it now sustains in fish culture on the Coast.

Reduction of Bag Limits.

Quite an agitation is being stirred up among Southern California sportsmen relative to reducing the bag limit on ducks to twenty-five birds a day.

No attempt at securing a state law to this effect is likely to be made for some time at least, as the San Francisco clubmen are united against it, and their bad example has injured the cause of game protection elsewhere. Locally several of the clubs, notably the Bolsa Chica, have settled the thing for themselves by making twenty-five bird limits.

It is generally conceded by far-seeing sportsmen that protection of ducks during the breeding season, both in the United States and in Alaska, is the sanest scheme of saving the waterfowl, but the twenty-five bird limit, if made general throughout the country, would be of great service.

The clubs, which of their own volition limit their bags to twenty-five, which after all is all any man wants—enough for himself and half a dozen friends—give proof conclusive of their sportsmanship and are wholly to be commended by all, but at present the matter seems to be one for individual regulation.

Coyote Hunting.

After several sheep had been killed belonging to Senator B. F. Rush and Claire Morrill in the Potrero hills, near Suisun, a reward of \$5 each from the above two gentlemen and Peter Mortensen was offered for the coyote that was supposed to be in that neighborhood. Sherman Reams was asked to bring his three deer hounds to the Rush ranch to make a chase. He started out Wednesday morning, accompanied by Ben Reams and John Oliver, and later was joined by Mr. Morrill. A large coyote was started at the east end of the ranch and after a chase of several miles was killed by Ben Reams. In addition to the amount subscribed above, \$20 will be paid by the Solano County Sheepmen's Association. Messrs. Reams and Oliver received \$35 for their day's work. Sherman

Reams has run down two coyotes in upper Suisun valley during the past two weeks.

Can Fish Hear?

In a German scientific paper the often-discussed question has been raised: Can fish hear? and the answer seems, as usual, to be in the negative. It is believed that many fish are conscious of rapid vibrations communicating with the water; but it is not thought probable that this is perceived by the auditory organs. Single loud explosions in water are found to be totally disregarded by fish. It is, therefore, not finally proved that all fish cannot hear; but the consensus of the opinion of the zoologists seems to favor the idea that fish, like bees, are deaf.

Bulk Powders Win the High Averages.

At the tournament held at Phoenix, Arizona, December 28, 29, 30, 31, 1905, the three highest professional averages were made with DuPont Smokeless; also the first and third amateur averages. Second amateur average was made with Hazard Smokeless.

PACIFIC COAST TRIALS.

Quite a large attendance of club members and visiting sportsmen are in Bakersfield this week watching the progress of the twenty-third annual trials of the Pacific Coast Field Trials Club.

The Derby was finished this forenoon, the winners were: Jos E. Terry's English Setter bitch Bessie Mortimer (Kilgariff-Maggie F.) first; Hugh Hopkins' English Setter bitch Aunt Marie (Uncle B. Sport's Belle) second, and Frank Schumacher's Pointer bitch Lady Belle (Teddy Kent-Jack's Fashion) third.

With W. J. Baughn were associate judges Henry L. Betten and J. H. Schumacher. There were 22 starters in the Derby, 11 English Setters and 11 Pointers. Much was expected of the Derby puppies, particularly so, because last year's Derby was run over practically the same ground upon which there were enough birds to, it was hoped, give the dogs a chance to show some of the brilliant work remembered by many who were present last year.

In this there was something of a disappointment, for two reasons: the class of the dogs was not of the high standard of the previous year, with of course some exceptions, and weather and ground conditions were such as to preclude, except at odd times, anything like bird work. The weather was warm and the ground dry and dusty, in many places the alkali was as thick on the surface of the ground as if the field had been whitewashed. Nose work was out of the question. On the first day dogs repeatedly ran over birds and flushed small bevies. In one heat, that between Aunt Marie and Hickorywood, the dogs worked in low cover on scattered birds. For ten minutes the dogs failed to locate a single bird. Birds, however, were flushed from the tumble weed that the dogs had gone over twenty times. On Tuesday Don and Senator Jack got into a large bevy, Jack finally flushing them, to the surprise of everybody who witnessed the occurrence. The dogs were finally given credit for working under most disadvantageous conditions.

The first five braces of the All-Age were started today in different cover, open ground and sparse willow thickets on section 25 of the Stockdale ranch. Jose E. Terry's Kilgariff was put down on open ground and after making two wide casts and working the ground grandly, made a bee line for cover near the railroad track. When the handler came up he was on point. Here he was credited with six singles and a bevy points. McCloud Boy was a bit unsteady.

The heat between Belle Fontaine and Policy Girl was full of action and work. Many birds were found. Belle made two bevy points and several singles. Girl located a bevy and was credited with several points.

The class of the All-Age dogs is good and on the new ground it is not going too far to say that some splendid results will develop before the final heat of the stake.

The All-Age will probably be concluded on Friday morning. The championship stake will follow and the members' stake will close the running.

J. X. DeWITT.

Bakersfield, January 10.

TO PREVENT DEGENERATION.

Dr. A. S. Alexander says: "There is a tendency in all pure bred animals to degenerate or retrogress towards original and less perfect types and nothing will more surely and speedily stimulate this tendency than the lack of nutritious food.

"In the absence of sufficient nutrition, or complete nutrition, the possibilities of perfection, inherited from pure bred sires or dams but partially materialize or wholly fail to assert themselves. The well born, but incompletely nourished colt fails to develop and at maturity is no less a "weed" than the ordinary scrub or native animal. On the other hand, if the dam is adequately nourished on complete rations during pregnancy and when nursing, and the colt, from weaning time forward, is as perfectly and fully fed, it will, in all probability, develop to the high standard of size, power, quality and character made possible by its breeding.

"In addition to proper feeding it is likewise necessary to protect the young developing animal against every possible cause of debility, discomfort and unhealth that would tend to retard its growth. Shelter must therefore be sufficient, disease must be fought against, vermin must be prevented from sapping the constitution, and fresh air, sunlight adequate exercise and kindly care must take a full part in perfecting the development of the animal."

VITAL, FERTILE EGGS.

The most important problem in hatching is that of securing fertile eggs; in fact they are the one thing absolutely required. The percentage hatched will depend upon the fertility and vitality of the eggs placed in the incubator or under hens, and the fertility of the eggs will depend chiefly upon the vigor of the parent stock. The conditions necessary to the fertilization of eggs are simply those which will secure good health to the parent stock from which the eggs are secured.

There are a number of conditions which will determine the health and vigor of the parent stock, and the percentage of eggs that will hatch. Free range for laying stock will conduce health and vigor, as it develops a strong muscular system. Eggs from such stock will hatch exceptionally well and will hatch strong, healthy and vigorous chicks. The percentage of such eggs hatched will often run as high as ninety.

In order to secure the best conditions of laying stock, wholesome food and good, clean houses are absolutely essential. Every poultryman under-

stands this perfectly. No matter how good the incubator is, the results will be disappointing if the houses are reeking with filth, or if the fowls are improperly fed.

Eggs also, as is well known, become lower in vitality with age and after a time become worthless for hatching purposes. Eggs will often hatch after they are a month old, but the chicks will be less vigorous and many of them utterly worthless. Such weak chicks are often attributed to the failure of the incubator, but there could be no greater injustice.—E. G. Wyckoff in American Fancier.

TEETH OF SWINE.

The hog has more teeth than any other farm animal. When it has its set complete it possesses in all forty-four teeth. The horse has forty teeth, while cattle and sheep have thirty-two each. The forty-four teeth of the pig consists of six incisors, two canine, eight remolar and six molar teeth in each jaw. Another peculiar fact about the dentition of the pig is that while the incisors or front teeth in the upper jaw bear a close resemblance to those of the horse, the corresponding teeth in the lower jaw closely resemble those of a dog. It is also worthy of note that the molars of the pig gradually increase in size from the front to the rear, the most backward of these grinders being several times larger than those in front.

Good milkers are reported in all the English and Scotch beef breeds just as they are bred to improve the milk yields or the reverse. The English papers tell us of good milkers and milking families in the Herefords, Angus and Galloways. Some cows give more milk than the calf wants and some have good records in the dairy. The Shorthorn in England is the leading beef and dairy breed; a Shorthorn cow 15 years old took the champion prize at the recent London Dairy Show. Breed and handle your cows for milk. They raise better calves and make better cattle.

When you find an animal is unprofitable to keep, whether it is a steer that will not fatten or a dairy cow that fattens too easily, you cannot sell it too soon. The butcher should get all such animals, not your neighbor, who raises breeding stock. The sooner cattle, hogs and sheep that are not just right are slaughtered, the better it is for the country.

Now is an excellent time to get a general culling of studs of either pure breeds or grades, says Breeder's Gazette. If two can be matched up in a

pair they may be sold as such and will probably return a better figure than if sold singly. The young and unworthy males there is more question about. Whether to sell or to hold in the hope of future improvement is always a matter of the gravest moment. In general, however, it will be found to be good reasoning that the first cost is always the least, and if the material is not promising to work on there are indeed few men who can take cull colts and make great horses of them. There is notwithstanding a place for every horse foaled, and if properly placed he will fulfill his destiny in life.

Over forty different sorts of Babcock testers are manufactured but the essential principle is the same in all. It was invented by Dr. Babcock and given without price to the public, therefore none of the forty or more can be patented. In their eagerness to get something that would sell, a number of manufacturers have gotten up cheap testers which are inaccurate and unsafe, to the serious detriment of the tester. Properly made and rightly handled, this instrument is of infinite value. In buying a tester—and every owner of a herd should have one—go to a trustworthy house, pay a fair price and not be put off with some cheap Christmas toy.

It is possible to raise calves profitably on warm separator milk by substituting whole oats for the cream removed. One of the advantages of hand raising is that after the calf is grown sufficiently to go on dry feed it does better than a calf raised by the cow. Early maturity no doubt is hindered by the hand feeding, but it made up fully or nearly so by educating the calf to hustle for itself to a certain extent.

The dairy cow is rarely a mortgage lifter in this section. Why? Because the man who has wrestled long with a burdensome mortgage is not the type of farmer to call on the cow for help. He hopes "to get out" next year by planting more cotton.

Charcoal is an excellent thing for fowls whether in confinement or running at large. It is inexpensive and so easily provided that no flock should be permitted to be without it. Let it be granulated and placed where the birds can readily have access to it.

The top notch of quality in the demand for good poultry has never been reached. The demand for the best has never been supplied. There is no danger of getting it too good, but it often suffers from being off in quality.

Probably in no country in the world has farming reached greater perfection than in Denmark, where almost every available foot of land is precious and well utilized, but where consumption and production are more evenly balanced. Co-operation among farmers is said to be the key to their successful operations. There is a co-operative dairy at Esbjerg which has a membership of 230 farmers, milking 1,500 cows, almost the entire output of the milk being turned into butter and shipped to England. The milk is paid for by weight and quality.

The dairyman who caters to city trade knows better than any other how often complaint is made about cream that will not whip. The richness of per cent of fat and the temperature have more to do with this quality in cream than any other factor. It is well to remember that cream containing 35 to 40 per cent fat will whip at 55 to 60 degrees; 30 per cent fat at 45 degrees; 20 per cent fat at about 33 degrees. Cream sold to city trade usually contains 18 to 25 per cent fat, and therefore must be cooled to a lower temperature than it is customary to whip cream.

The best estimate as to possible profit from poultry can be gained from the actual results attained by careful people. A man in New Hampshire shows from carefully kept records that he made from 450 hens during 1904, \$747.67. These same hens consumed \$779.91 worth of all kinds of grain supplies. This is a very good showing, and the same results can be gained by every careful person. The poultryman referred to started in 1887 with ninety—not necessary to have summer weather, four hens, and now keeps about 500. Those who succeed best, in handling poultry begin in a small way and work up.—Country Gentleman.

The story comes from the Philippine Islands of the untimely end of a prize Jersey cow valued at over \$1000. The cow was to be shipped to the interior together with another cow of no special value intended for beef. When the time came for fresh meat the cook of the transport ship went to slaughter the ordinary cow. He looked both beasts over, the prize winner was the best looking, and the cook killed the prize Jersey before those who knew which was which could enter, and the ordinary cow is still alive and happy.

Young fowls are the ones that form bad habits. If they are not formed at that time, they never will become troublesome. They can be kept from flying by clipping both wings, if clipping one will not do it.

THE NEW GUERNSEY CHAMPION.

The Guernsey cow, Yeksa Sunbeam 15439, owned by Mr. Fred Rietbrock, Athens, Wis., has completed the largest year's record of any cow in the world, made under public supervision, that of an Advanced Register and agricultural experiment station. This record is as follows: Total, October, 1904, and September, 1905, inclusive, 14920.8 pounds milk, 5.74 average per cent., butter fat, 857.15 pounds butter fat. This was made under the rules and regulations of the Advanced Register of Guernsey Cattle and supervised by the Wisconsin Experiment Station. Adding one-sixth to the butter fat to cover the weight of salt and water found in butter in addition to the butter fat, we have one thousand pounds of butter for the year's work of this cow.

Yeksa Sunbeam 15439 was bred by the late W. D. Richardson of Garden City, Minn. She was dropped April 2, 1895, making her about nine and one-half years old when commencing her record. She calved Sept. 11, 1904, and was not in calf at the end of the year's record.

Feed of Yeksa Sunbeam during the test was as follows:

October, silage and hay 25 pounds, with 15 pounds grain mixture composed of one part oilmeal, two parts ground oats, two parts gluten feed and four parts bran. November, corn silage 30 pounds, with grain mixture the same as October.

December, same as November. January, silage 30 pounds, rutabagas 10 pounds, 15 pounds grain mixture composed of one part ground oats, 10 parts gluten feed, two parts bran, one part oilmeal, and alfalfa, hay, ad. lib. February, silage 30 pounds, rutabagas 10 pounds, 14 pounds grain mixture composed of four parts wheat bran, two parts gluten feed, one part corn meal and as much alfalfa as she would eat. March, April and May, same as February.

June, pasture, mixed clover hay and 6 pounds above grain mixture. July 10 pounds mixed grain ration composed of 300 pounds bran, 1200 pounds oats, 200 pounds gluten feed and 100 pounds oilmeal. Pasture. August, 10 pounds above grain mixture, 8 pounds green clover at noon and pasture. September, clover pasture, green corn, clover hay, and 2 pounds gluten, 6 pounds bran, 4 pounds ground oats, 2 pounds oilmeal.

If you will figure the matter over and care to make a statement, you will find that her largest milk production for one day was August 19, 1905, upon the basis of our composite three-day test, her butter fat production for that day, based upon 5.9 per cent fat and 52 pounds milk, was 3.07 pounds fat. Her best week was from August 17 to August 23, inclusive, during which period she made 352 pounds of milk, our home test reported, having been based upon her production of Aug. 17, 18 and 19. 5.09 per cent, would make 20.77 pounds fat in that week. Her largest monthly production of butter fat was August, 1905, when she made 81.26 pounds fat, while her largest milk production for one month was August, 1905, when she made 1463 pounds milk. During the first 120 days, commencing October, 1904, she made 300.53 pounds fat, while during the first 187 days she made 451.49 pounds fat. Her lowest per cent of butter fat during the twelve months in question was June, 1905, when the percentage was 5.25; while her highest per cent of fat, 6.08, was in December. In three different months, to-wit: December, January and March, her per cent of fat was a trifle over six, while during the other nine months, the per cent was over five and under six. Her average weight during the year has been about 1150 pounds. Her best work during the year has been made on pasture, supplemented during the hot weather and fly time with soiling crop composed of oats and peas. For the size of the cow and the amount of her production, I think the grain ration has been comparatively small. She has always had a good appetite for roughage, and, of course, has had plenty of it.

This record is not only a great credit to Mr. Rietbrock and his herd, but of estimable value to the interests of the Guernsey breed, as it shows in an indisputable manner the capability of a Guernsey cow.—Corr. Mass. Ploughman.

Sponges—S. Adderley, 307 Market St.

HOGS AND SHEEP AS MORTGAGE LIFTERS.

It requires a comparatively small amount of capital to start in the business of raising either sheep or hogs. Who has not seen a single ewe lamb lay the foundation of a profitable flock, or one old sow become the progenitor of a herd able to lift the mortgage off a farm?

The second point we make in favor of choosing sheep and hogs as the animals to be kept is the fact that expensive buildings are not essential. A straw stack, some rails or poles, and a little work and ingenuity will supply the rest.

Hogs and sheep are desirable because of quick returns. It takes five years to grow a horse to maturity, and he needs some education before he is marketable. The mortgage might mature and be foreclosed during that period. On the other hand, pigs and lambs can be brought to a marketable age in as many months—and no education is needed.

We recommend these animals as mortgage lifters because both experience and observation have shown them to be (in proper hands) admirably adapted to that purpose.

A few common mistakes of the inexperienced with sheep and hogs are:

1. Starting on a large scale on a booming market; e. g., sheep at the present time.

2. Lack of proper care in the selection of foundation stock. Good breeding is not enough. Must have good individuality.

3. Careless handling likely to engender and promote diseases.

4. Feeding beyond the profitable period.

Among the things much desired are: First, high-class foundation stock; second, vigorous growth; third, continuous growth; fourth, early maturity; fifth, prompt marketing; sixth, get stock ready for market a month in advance of the general supply.

METHODS OF SKIMMING MILK.

Professor Farrington of the Wisconsin Dairy School, sums up the different methods of skimming in the following brief manner:

"These methods are the shallow pans, the deep setting of cans of milk in cold water, the water or aquatic separator and the centrifugal separator.

"The water separator is so inferior a method that it is not used by the best dairymen at the present time; the other three methods are still in use but the centrifugal separator is the most efficient of them all. The losses of butter-fat in the skim-milk are greatest when milk is set in shallow pans. Deep setting in cold water is a little better, but the centrifugal separator may be run so as to leave only one-tenth per cent butterfat in the skim-milk.

"It has been estimated that the losses of butter-fat by the different methods of skimming the milk of 20 cows in a year amounting to \$120 by the shallow pan setting, \$60 by the deep setting and \$15 by centrifugal separator. This is based on a price of 20 cents per pound for butter and an average loss of fat in the skim-milk by each method."

In their natural state fowls are heavy consumers of vegetable matter and insects. This teaches that under artificial conditions fowls should have substitutes for their natural food. In the way of vegetable matter cabbage leaves or a whole head suspended where the fowls can get at it at will, by reaching well up for it, are hard to get; though finely cut clover hay is excellent, and beet tops, or whole beets, are beneficial. Meat scraps substitute the insects nicely, and cut bone supplies much needed material in winter that fowls get out of the earth in summer. Imitate nature closely as possible in feeding.

In selecting hens to be kept for breeders, take those with small, smooth and neat heads, well developed combs, bright eyes, and nice tapering necks, long and deep bodies, active movements, vigorous in constitution, and good layers, advises N. J. Shepherd in Kansas Farmer.

In an egg-laying contest the White Leghorn laid more eggs, on less feed, than any other breed, although they are not the best all around fowls.

FEEDING LAMBS.

Everything that is raised on the farm should be marketed in its fully developed form when possible. There is no reason why a middleman should have the profits that he requires if he handles the stock.

This applies to the sheep business. Many farmers have conveniences for raising a carload of lambs, but they raise some short of that number and sell them to the dealer, who resells them to the feeder who finishes them for market, says the Wisconsin Agriculturist. Then the farmer who sold the lambs sometimes sells his corn to the same feeder who bought his lambs. The dealer expects to make a profit or he would not have bought the lambs, and the feeder would not have bought them, or the corn, if he had not expected to make a profit on both. The original producer may make money on the lambs, but he has let three possible profits slip by that he might as well have had.

The lamb should be started on feed while young, and the feeding continued and gradually increased during the fall. This should prevent any of the setbacks that might occur in August or later in the fall when grass gets short. A young lamb will make larger gains for the feed consumed than older ones hence the advisability of starting early.

The bunch of lambs should be as even as possible for the best results in feeding and the highest price on the market. Any planning to feed a carload of lambs or more next year can arrange this to a certain extent this fall, by using a strong, vigorous ram and seeing that all the ewes are bred at as near the same time as possible.

The farmer should consider himself a manufacturer, and make the most money out of his works by marketing a finished product instead of the raw material. The farmer is better able to do this than many manufacturers because he can use the waste product—the manure—to better advantage than most manufacturers the waste from their factories. Every load of manure put back on the land is like putting capital stock into the business.

POULTRY POINTERS.

The lime which goes into the shells of the eggs will not be lacking if the food is varied, as nearly all foods contain lime in some form. Experiments in that direction show that the use of oyster shells does not insure a sufficiency of lime, though oyster shells will serve the purpose to a limited extent if the food does not provide the necessary lime.

It is claimed that a hen may be confined on a board floor, allowed only flint gravel for the gizzard, fed liberally on plenty of green food, with a small allowance of grain, having ample opportunity for scratching in litter of some kind, and she will lay perfect eggs with proper shells, without even the least proportion of oyster shells or lime near by her. The lime will be derived from the food, and in a proper condition so as to be easily digested and assimilated and in a state in which it becomes immediately available as a constituency of the egg.

There are hens in some sections that are far from the sources of supply of oyster shells, yet they equal those in other localities as egg producers. Nature prompts the fowls to select the food best adapted for their purpose, and if given a variety, they will balance the supply so necessary for the production of eggs as well as provide for their bodily wants.—Farm and Fireside.

When the weather is cold a good feed late in the afternoon is plenty of corn, so that the fowls may go to roost with a full crop of heat-giving food. No more should be given than will be picked up clean.

Where fowls are confined and grass is scarce, it is well to let part on the grass for a half day or a few hours, and let the others on for a few hours in this way all get some green stuff.

No fence has proven so good and so economical as woven wire for poultry fences. It is sometimes necessary to put wide boards at the bottom to keep the fowls from fighting through the fence.

It is exceedingly difficult to maintain grass in a yard where there are many fowls. It is best managed by fencing off one portion, and keeping the fowls off it until the grass grows.

GOOD DRAFT HORSES.

By means of about 2,000 measurements in Columbus, O., of draft horses classed as extra heavy, medium good heavy, extra good light and medium good light, A. H. Snyder reached these conclusions among others:

The extra good heavy draft horse compared with his less valuable brother is not so high for his weight, is deeper in the chest, shorter from the chest to the ground, larger in the chest girth, but slightly smaller in bone. Compared with the length of the head, the shoulder is longer, the back shorter, and the hock closer to the ground; the chest and hips are slightly wider, while the length of the croup is slightly less.

Regarding the fifty-five horses considered extra good heavy draft, their weight in working condition varied from 1,385 to 1,930 pounds, the height varied from 15½ to 17 hands 1½ inches; the girth varied from 84 to 99½ inches, while the circumference of the cannon midway between the knee and the fetlock varied from 8¼ to 10¾ inches. Of the 101 horses measured only two measured more than 98 inches around the girth and only five measured over 94 inches.

The composite of an extra good draft horse as found in use on the streets of Columbus was a horse weighing a little more than 1,600 pounds, 16½ hands high, measuring 90 inches around the girth and 9¼ inches around the cannon at its center.

The annual question concerning the disposition of the stable-made manure comes up as the pile begins to assume formidable proportions. By far the best way of taking care of it is to spread it on the fields where it will go down into the soil and be in readiness for the crop which is to be sown in the spring. If it is to be stored the ideal place is the pit with cement bottom, which will hold the liquid excrement. If this cannot be done then store it under a shed, placing it in layers, and let the hogs root it over. If even this is not feasible, put it in piles not very high and cover with any old rough boards—almost anything that will keep out the rain which causes the liquid portions to leach away. An excellent plan is to choose a place where the soil is of a clay nature, and dig a trench all around the space where the pile is to be and in this way save some of the liquid, which may be scooped up and poured back on the pile. Use the pile as a receiver for the slop from the house, and see that it is forked over several times during the winter. But the main thing is to see that it is protected from the elements as much as possible.

The best of foods do not give the best results when fed in excess. Live stock and the human family are alike in this. We tire of the food we like the best if we have too much of it too often. It is economy to feed most of the feeds produced the cheapest and the best for the purpose, as corn for fattening hogs, but something must be fed for variety. The more different feeds that can be used in this way the better.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

CASEIN THE NEW PRODUCT.

One of the by-products of the dairy which is less common than some of the rest is dry casein, a granular, yellowish-white substance, derived from the casein of milk by a process resembling cheese making in several respects.

Casein is a vegetable substance which is found in both the vegetable and animal kingdoms. In the vegetable kingdom it is found more or less abundantly in the seeds of certain plants. In the animal kingdom it is chiefly found in milk and constitutes the main part of the curd. In the dry form it is used in considerable quantities in manufactured goods, for the arts, in making glue for furniture dealers and in a number of other ways. It promises to be a commercial product of some importance.

The process of manufacturing casein is briefly described as follows:

The separator milk is run into a number of cheese vats; a "starter" of whey, saved from the previous day, is added, and the milk is raised to a temperature of 80 degrees F. By the time the milk has been in the vats a couple of hours, usually about 11 a. m., a small quantity of rennet is added—about 1½ ounces per 6000-pound vat of milk. The renneted milk is cooked for a couple of hours to 102 degrees, the curd being thoroughly raked meantime. The whey is then run off, leaving the casein curd in matted cakes. Any frothy stuff which may have gathered is rejected, and the curd is then pressed, remaining in the hoops over night. Next morning it is removed and ground into pieces, varying from powder to bits as big as a grain of corn. In this form it is taken to the drying room, which is a separate apartment, specially designed for the purpose. On each side of a central passage is a tier of metal pans, shelf fashion. Blasts of hot air from the pipes along the walls pour over the pans, on which the casein is spread. The drying requires some four hours, after which the product is conveyed to the store room floor and bagged.—Farm Folks

Whenever a warm spell comes in the winter it can be noticed that more eggs are obtained and that as soon as the weather becomes cold again the supply falls off. This shows that warmth is a factor in the production of eggs. It is not necessary to have summer weather. It is when the hens escape the extreme cold of winter that they begin to lay. If the change of weather make a difference in laying, then a warm poultry house should also have an influence. When poultry must resort to the tree-tops, and be exposed to snow, rain, hail and wind, they can only keep alive, being unable to assist the farmer by producing eggs. If you want eggs in winter, you must provide a good, warm house for them, as well as provide pure, nourishing food.

Idle horses can subsist largely on good bright straw, as they have ample time for mastication and digestion, while hard worked animals or those which are required to move rapidly can make use of only little. It is a notable fact that horses are often fed on costly hay for roughage when cheaper straw or corn fodder could be used to advantage.—Farm Journal.

FOR SALE.

Fine Span of Black Driving Horses

VERY SPANISH STAND 16-1 AND 16-1½; weight 1155 and 1175; five and seven years old; well bred and sound. Apply or address

FRANK WIRE, Davisville, Cal.

WANTED.

SADDLE ANIMAL, 15 HANDS, WEIGHING from 1000 to 1050 pounds. Must be sound and gentle, with heavy body and short legs; a good fast walker, and able to single-foot or rack six miles an hour. Address, with description and price, S. A., care of Breeder and Sportsman, 38 Geary Street, San Francisco.

FOR SALE OR LEASE.

Two Prince Airlie Stallions.

PORTOLA 37413, a handsome golden bay, 7 years old, 16 hands, weighs 1190 lbs.
MENLO BOY 37401, a magnificent brown with white points, 6 years old, 16.1 hands, weighs 1200 lbs.

These two horses are full brothers, being sired by Prince Airlie 28045; he by Guy Wilkes 2:15¼, sire of Fred Khol 2:07¾, Hulda 2:08¾, Seymour Wilkes 2:08¾; first dam Signal by Del Sur 2:24; second dam Lady Signal 2:35½ by Signal 3327. Both of these horses are very fast for the amount of work, being only a few months last year, showing quarters around :34 and :35.
For further information apply to
P. H. McEVROY, Menlo Park, Cal.

VETERINARY

FREE

Dr. S. A. Tuttle, a veterinary surgeon of long experience has written a book entitled "Veterinary Experience" on the diseases of horses, giving symptoms and treatment in plain terms. It is fully illustrated with diagrams showing the skeleton and circulatory and digestive systems with references that make them plain. Tells how to buy a horse and how to care for him. Every horse owner should have one. It is sent to any one.

TUTTLE'S ELIXIR

is the only guaranteed cure for Colic, Curb, recent Shoe Blisters and Callous. It locates lameness, relieves and cures Spavin, Ring Bone, Cockle Joint, Crossed Heel, Scratches, Catter, etc. Send today and get the book free and information about Dr. Tuttle's specifics. Tuttle's Elixir Co., 52 Beverly St., Boston, Mass. Mack & Co., San Francisco and F. W. Braun, Los Angeles, California Agents.

For Sale

Inquire of H. R. RAND, Fashion Stables, Ellis Street.

BAY GELDING. Five years old, stands 17 hands, weighs 1200. By St. Whips. 1st dam by Daly, 2d dam by Milton Medium. Thoroughly broken single or double. A great actor, a grand road horse and warranted SOUND.

CHESTNUT GELDING. 8 years old, 16 hands high, weighs 1200 lbs. A grand surry or trap horse. Has been driven by a lady in the Park all winter. Without a doubt, this is the best family horse in the country. Guaranteed Sound.

One New Side Bar Stivers (of N. Y.) Buggy. Pneumatic tires, Carmine gear, black body. One Side Spring, High Back, Business or Run-about Buggy.

One New Chicago Road or Breaking Cart. Long shafts. Best one in the city.
One Set New Coach Harness.
One Set New Surry Harness.
Ten Set New Single Harness.
Two Sets of Run-about Harness.
Also Light Road and Track Harness. Some Fancy Halters, Pads, Etc.

For Sale.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11 1-4

(Reg. No. 22449)

Sire, **ELECTIONEER**, sire of 166 in 2:30 and grandsire of Major Delmar 1:59¾.
Dam, **LORITA 2:18¾** (dam of Alta Vela 2:11¼ and Palori 2:24¼) by Piedmont 2:17¾; second dam, **Lady Lowell** (dam of Ladywell 2:16¼ and Lorita 2:18¾) by St. Clair; third dam, **Laura**, dam of Doc, sire of Occident 2:16¼.
Address all communications to BREEDER AND SPORTSMAN, 38 Geary St., San Francisco.

FOR SALE—MUST BE SOLD.

Bay Filly, foaled May 9, 1904, by Alta Vela 2:11¼ and out of Grace Lowry by Diablo 2:09¾.
Chestnut Colt, foaled 1902, by Nutwood Wilkes 2:16¼ and out of Lily Langtry, dam of Dudley 2:14, of Ed. B. Young 2:11½, of Lily Direct 2:21½ and of Estelle 2:24¼.
Bay Colt, foaled May 31, 1904, by Bonnie Direct 2:05¼ and out of Aliz B 2:24¼ by Nutwood Wilkes 2:16¼.

Bay Filly (thoroughbred), Reg. No. 32793 foaled May, 1902, by Abalanzar and out of Flambeauette by Flambeau.
Address all communications to CARLTON W. GREENE, Sixth Floor, Union Trust Building, San Francisco, Cal.

McKINNEY-SIDNEY FILLY FOR SALE

4 YEARS OLD; SOUND AND A GOOD INDIVIDUAL. Sired by McKinney; dam by Count Valensin's Sidney; second dam by Anderson's Abdallah or as he was better known, Paul's Abdallah, he by Rysdyk's Hambletonian, dam by imported Roebuck, granddam by the great thoroughbred Henry. I am not prepared to keep this mare and will sell her right. Address Box 447, Breeder and Sportsman, San Francisco, Cal.

FOR SALE.

A FIVE-YEAR-OLD COLT, 14.2 hands high; weighs 900 pounds; bright sorrel in color; perfectly sound and can run a quarter of a mile in 23 seconds or better. He is one of the most beautiful and best bred sprinters in the State. Suitable for a polo pony. Will sell at a reasonable price. Address

SOL SHOCKLEY, Merced, Cal.

SURREY HORSE WANTED.

Season of 1906 at Pleasanton--Fee \$100

WITH RETURN PRIVILEGE. Should horse die or be sold the service fee for mares not proving in foal will be returned.

The facilities for care of mare or mares and foals is unsurpassed.

C. L. GRIFFITH, Pleasanton, Cal.

THE HORSES of the celebrated ROSE DALE STOCK FARM, belonging to the late DR. WILLIAM FINLAW of Santa Rosa, are being sold at private sale by the administratrix of his estate. These comprise the well-known stallions, WASHINGTON McKINNEY and ST. WHIPS, and two three-year-old Stallions, Colts, Yearlings and Brood Mares, mostly of the McKinnery and St. Whips stock.

Address ANNA L. FINLAW, Santa Rosa, Cal.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, spint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deep and cause less pain than any blister I ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, spint, spavins, windfalls, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

WAYLAND W. 2:25.16. Record 2:12½.

ONE OF THE LEADING Sires OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06½, leading money earning pacer of season 1905. Sire of Morosco 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:28, dam Lottie (dam of Wayland W. 2:12½, Welcome 2:10½, Maud Singleton 2:28) by Wayland Forrest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Antee or any of our great sires, he is the sire of Bolivar 2:06½, Nellie R. 2:10, Arthur W. 2:11½, Morosco 2:12, John A. 2:12½, Forrest W. 2:14½, Leland W. 2:16, Al Sandy 2:19½, Maud Sears 2:21, Bonita Wilkes 2:26½. Wayland W. will make the Season of 1906 at SANTA ROSA, at McGregor & Hookins' Stables.

W. C. HELMAN, Owner.

Terms \$40 for the Season. Pasture \$3.00 per month.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

BOOKS FOR STALLION OWNERS

1. Hoover's Stallion Service Record.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding, description, dates of service, dates of foaling, etc., with index, complete, size 10x7½. Each book is handsomely and substantially bound. \$2.00

2. The Standard Stallion Service Book.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, date of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherette, suitable for pocket use. \$1.00

3. Breeder's Note and Certificate Book and Stallion Service Book Combined.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. \$1.00

C. P. KERTELL, Manager.

A GAME GETTER doesn't allow rust on his gun—neither does "3-in-one." Heavy oils and greases cannot prevent rust because they simply coat the surface and dry out.
3-in-One sinks into the pores of the metal, forming a delicate, imperceptible overcoat that prevents rust or tarnish on the barrel, in the bore, at any and every action point. Lubricates the magazine, triggers, etc. Our booklet tells—a sample proves—both free.

ON YEARLINGS IN

Pacific Breeders Futurity Stakes No. 5---\$7000 Guaranteed

NOTHING MORE TO PAY BEFORE 1907.

For Foals of Mares covered in 1904. To trot or pace at two and three years old. Entries closed October 15, 1904. **Nothing More to Pay Before 1907**, when your foal can start in the Two-Year-Old Division. Stakes divided as follows: \$3250 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

A Chance for Those Who Failed to Enter.

Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for Foals of 1905 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you neglected to name when entries closed, send \$22, with Color, Sex and Breeding of the foal, on or before February 1st next, which covers payments to February 1, 1907, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—\$10 due March 1, 1906, and starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 5, \$7000, foals of 1905—\$10 due February 1, 1906.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

FROM MAYWOOD STOCK FARM, Indianapolis, Indiana, we have received a very handsome catalogue for 1906, and a beautiful reproduction in colors from Robert L. Dickey's painting of the farm's premier stallion Sidney Dillon, sire of the world's champion trotter, Lou Dillon 1:58½. The catalogue contains the pedigrees of the five stallions (Sidney Dillon, Rex Americus 2:11¼, Sterling McKinney, Prince Tudor, and Wait a Moment, besides those of over sixty brood mares. Mr. Sterling Holt, proprietor of Maywood Farm, has certainly made a splendid collection of stallions and mares to breed champions from. Among the matrons on the farm are Earalma, dam of Boralma 2:07, nd Pn Michael 2:03; Pique, dam of Chain Shot 2:06½ and three more in the list; Molly O. H. L., a sister to Cresceus 2:02¼; Hildren, a sister to Early Reaper 2:09¼ and Ilive 2:11¼, besides many other noted mares with records made on the track and in the brood mare ranks. Mr. Holt's purchase in California recently of twenty-five young colts and fillies by Sidney Dillon, and placing them in Millard Sanders' hands to train, shows that he is not one of those owners who is content to allow the patrons of his great horse to expend all the money in the training and racing of his get, but that he is ready with his own money and enterprise to make Sidney Dillon the greatest sire known to the trotting world if such a thing is possible. We congratulate Mr. Holt on his enterprise and hope he will realize the pleasure of being the breeder of several two-minute trotters as well as owning the sire of the world's champion. Maywood Farm consists of seven hundred and sixty-five acres of fine land situated but two miles from Indianapolis and is especially adapted for a horse-breeding farm.

RACING CIRCUITS have already been formed by Montana associations, which will give ten meetings, and the North Pacific Fair Associations, which have arranged for seven. Dates have been chosen for both these circuits and will be found elsewhere in this issue. California, as usual, is behind with her announcements, with the exception of the Los Angeles association, which has announced a first class meeting for June, and another at the close of the season in the fall. If there is any association outside Los Angeles and the State Fair that actually intends to give a meeting in 1906 will it please make the intent

known and state the date that will suit it best. Now please, gentlemen, don't all speak at once, as the two sudden announcement of a real live California circuit might shock the horse owners and trainers so that there would be a very large number of deaths result from heart failure.

THOSE WHO MADE THIRD PAYMENT in Breeders' Futurity No. 5, for the foals of mares bred in 1904, and whose mares failed to have a foal, should not forget that the fourth payment in this stake is due February 1st. By notifying Secretary Kelley immediately of the fact that their mares have no living foals, owners have an opportunity to sell or transfer their nominations to other parties, and thus get their money back. The fourth payment is \$10, and after February 1st will be delinquent and if not paid all previous payments will be forfeited.

KINNEY LOU IN THE LEAD.

One of the most life-like and best race pictures ever made with a camera is the one of Kinney Lou in the lead of Billy Buck and Hawthorn, which is shown in the new advertisement of Budd Doble's great stallion which appears in this issue. The likeness of the horse and his famous owner and driver are both excellent, and shows them in a position both have maintained in the racing world. Kinney Lou is to make the season of 1906 at San Jose. This will be his third regular season in the stud. Before Mr. Doble purchased and raced him he was bred to a few mares, but the season of 1904 was Kinney Lou's first advertised stud season, and since then he has received at court as choice a collection of highly bred mares as has been sent to any stallion on the coast. That these mares are owned by progressive owners who will train and race the produce is evident from the fact that in the Pacific Breeders' Futurity Stakes for mares bred in 1904 and 1905, those bred to Kinney Lou are more numerous than the mares bred to any other stallion. Such a showing for a comparatively young horse shows that the breeders who have patronized him have faith in the theory that the fastest trotting son of the great McKinney will be a producer of early and extreme speed. It is a good theory to tie to. Horses cannot transmit qualities which they do not possess, and while stallions and mares without records have and may produce record breakers and race winners, they doubtless possessed speed and stamina, although the fact may not have been known. In Kinney Lou's case it is known, however, and he has the distinction of being the fastest green stallion that ever started in a campaign without a standard record. His mark of 2:07¼ was made in the second heat of a winning race in which he met twelve of the best trotters on the Grand Circuit. It proved that he was possessed not only of great speed but of great stamina, and in spite of the fact that he was a sick horse, he finished the last inch of each mile as gamely and with as much determination to keep in the lead as he exhibited at the start.

Kinney Lou has shown to the world that he is the fastest entire trotting son of McKinney. All know that McKinney is the greatest son of Alcione, who was in turn the greatest son of George Wilkes, and he the greatest of all the many sons of Hambletonian 10. Here is an unbroken line of greatness. On his dam's side he comes from another great line, that is strongly endowed with the blood of the Morgan, that family of handsome horses, whose representatives could out pull, out trot, out run and out show all the horses at the old New England county fairs. Kinney Lou's dam was Mary Lou 2:17, a mare whose speed and gameness made her a favorite with everybody who witnessed the trotting events on the California circuit twelve or fifteen years ago. She was the very personification of grit and determination, and never gave up the struggle from the time the word was given until the wire was reached and passed, and no matter how many heats were required to finish the race, was always there at the end and doing everything within her power to win. Mary Lou's dam, Brown Jenny, gave to the world three game standard performers and race winners, Ned Winslow 2:12¾, Shyluck 2:15½ and Mary Lou 2:17. Brown Jenny's blood lines represent the very choicest combination of blood to build the foundation of a trotting family on. Her sire was David Hill Jr., son of David Hill 857, and a St. Lawrence mare. The elder David Hill was a grandson of Black Hawk 5, beyond any question one of the greatest of the Morgans. Brown Jenny's dam was by Black Hawk 767, a son of Black Hawk 5, out of a running bred mare. So we have in Kinney Lou's dam a combination of thoroughbred, Morgan, Geo. M. Patchen Jr. and Gen. Benton, a great brood mare sire. This blood united with that of McKinney produced Kinney Lou 2:07¼, a horse that has not yet reached the limit of his speed, but is believed to have the world's stallion record within his reach. When it is recalled that Sweet Marie 2:04¼, the greatest of all race mares, was produced by a similar combination of blood—McKinney, Morgan and thoroughbred—the potency of it is evident. It produces not only speed, but size, stamina and handsome proportions. These are the qualities that bring the big prices in the salesring and elsewhere in every country under the sun.

William K. Dickerson, for several years superintendent of Parkway Farm, Goshen, N. Y., has leased the place from the estate of the Hon. John McCarty, together with the stallions Joe Patchen 2:01¼ and Fred Kohl 2:07¼.

ANSWERS TO CORRESPONDENTS.

GEO. NEVINS, Stockton Race Track—We cannot find either Lady Booth or Susie Hooker registered in the American Stud Book, consequently do not think your colt can be.

H. M. GARCIA, San Jose—There are more than a dozen mares registered under the name of Camilla. If you can give the sire and dam of this mare we will be able to tell you whether she is registered or not.

C. B. R., Santa Rosa—Escort is by Guide 2:16. His record is 2:23. He is not registered.

Subscriber.—Menlo Belle, or "Our Belle" is by Menlo 13028, dam Molly, pedigree not traced. Her record is 2:28¼, made at Salinas in 1896. She was foaled in 1892, and bred by P. L. Nash of Hollister. Her name appears in Volume 15 of the Year Book, but she is not registered. There is another mare called Menlo Belle registered in Volume XIII of the American Trotting Register. This mare was bred by W. Z. Price of San Mateo, passed to William Corbett and then to the Santa Rosa Stock Farm. She is also by Menlo 13028, but her dam is San Mateo Belle by Speculation, second dam Young Lady Vernon by David Hill 857, third dam Lady Vernon 2:29½, pedigree not traced. This Menlo Belle has a record of 2:30. Unless Westmont by Western is registered and the mare by Muldoon registered, the mare you refer to could not be. We cannot find that a horse called Westmont by Western is registered.

THE GRAND CIRCUIT FOR 1906.

The Grand Circuit stewards met at the Hoffman House, New York, on Tuesday, January 9, in order to arrange the itinerary and assign dates for 1906. Three of the six stewards were present, namely, D. J. Campan, C. K. G. Billings and James Butler, as well as A. H. Moone, secretary Narragansett Park, Providence, R. I., who acts as secretary of the Grand Circuit. Among the other tracks' representatives on hand were C. M. Jewett, of Readville, DeForrest Settle, a member of the State Fair Board, Syracuse, and A. J. Welch, of the Hartford and Cincinnati tracks.

Cleveland did not apply for dates, but Detroit was assigned two weeks at the opening of the Circuit, which undoubtedly means that if favorable legislation is enacted in Ohio this winter one of the two weeks assigned Detroit will be assumed by the Cleveland Driving Park Co. It was generally supposed that the Albany, N. Y. track would apply for dates but that association was not represented. The following are the dates assigned:

Detroit, Mich., July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

Lexington will follow Cincinnati with its usual two weeks meeting, and although not technically a member of the Circuit, its meeting is really a continuation of the same. The fact that Mr. Billings was present gives occasion to hope that there is still a chance for the Memphis Association again being able to give a meeting, following that at Lexington. The first contest against the recently enacted anti-betting law was a positive victory for the horsemen and it is to be hoped that the Supreme Court will sustain the decision already rendered.

The plan of having a uniform system of racing through the entire Circuit was also discussed, as was the selection of a presiding judge and starter. These matters were referred to a committee consisting of Messrs. Settle, Jewett and Moone for final decision, and the latter met again in New York on Monday, January 15, and selected Mr. George Hayt for the first position. The fact that Readville has applied for the usual dates makes it appear as if the difficulties encountered by that association in 1905 by having speculation made impossible also seem to be solved.

The producing stallion William Harold 2:13¼ is offered for sale or lease by his owner, Mr. H. W. Meek of San Lorenzo. The Meek estate of 3,000 acres, of which Mr. Meek has been the manager for several years, has been partitioned and divided among the heirs, and there will be no more horse breeding done on this large estate. Consequently William Harold is for sale or lease to a responsible party during the coming season. This stallion took his record in a race. He is by the great Sidney 2:19¼ out of Cricket 2:10 by Steinway. Cricket was the first mare to pace in 2:10, and is one of the great brood mares of California, having five in the list, and three more that will be given records this year. William Harold has had but the most limited opportunities, yet is the sire of Janice 2:08¼, Dan Burns 2:15, and others, and all his get have size, good color and are round bodied, nicely turned horses. In any good horse breeding community William Harold will attract a good class of mares and be a profitable stallion if well managed.

Before the knife was used on Clipper 2:06, the fast son of Diablo 2:09¼, he was bred by his then owner and breeder Geo. C. Peterman, and became the sire of a fine filly out of an Anteo Jr. mare. This filly has now grown into a handsome mare, seven years old, that is a sound and high class animal and an A 1 roadster. She trots and paces and could be trained to go fast at either gait, but her owner has no time to devote to this work, so offers her for sale. See advertisement.

JOTTINGS.

GOVERNOR PARDEE has written a letter to the State Board of Agriculture which has been given to the press, in which he severely criticizes the past management of the California State Fair and suggests that unless a better financial showing is made this year, the days of the Fair are doomed. He objects seriously to the association again running in debt so soon after it had been extricated from its previous indebtedness by the State, and states that with the necessary work to be done on the State Fair grounds, there is a prospective indebtedness of \$26,283, which will be owing by the Society on June 30th, the end of the fiscal year. The Governor, however, expresses his willingness to permit the use of State funds to pay off this indebtedness, which he intimates was all created in good (if careless) faith, and warns the members of the Board that the Fair of 1906 will determine or not whether the Legislature will make appropriations for another one. He will allow the money already appropriated to be expended in paying the bills of the Society if there is submitted to him a detailed statement of the bills now owing, together with a careful estimate of the amount necessary to prepare for the Fair of 1906 and insure its success, not as simply a Fair, but as a State Fair, on the lines laid down in his letter. Governor Pardee's letter is too long for reproduction (it would make about two pages of our type), but it shows that the State's Governor is following President Roosevelt's example and trying to act in a legislative and judicial capacity as well as filling the office of chief executive. That the California State Fair has been badly managed in the past is known to every taxpayer and citizen of the State that has visited it. The main object for which it was inaugurated, the encouragement and development of all the State's resources, has been sidetracked for the making of an annual two-weeks harvest for a lot of bookmakers. To this end, the harness horses and all other livestock that are of real value to the State have been put in the background and the Fair given over principally to the running horses and those who lay odds on them in their races. The sale of the old grounds and the erection of the splendid new property of the Society in 1905 promised a new order of things and, although the Society was handicapped by Governor Pardee requiring it to be satisfied with only a part of the money appropriated by the Legislature for buildings, etc., it made a vast improvement over former Fairs in many respects. The trail of the serpent was over it, however, and although several members of the Board fought hard to have the Society obey the law and allow no bookmaking on the races, the syndicate had enough friends at court to override all objections and the main portion of the racing program was devoted to cheap runners. An enclosure was built immediately adjoining the Fair grounds, to which free ingress and egress were obtained by removing the Society's fence, and in this pen the syndicate book was run as usual. It is stated on good authority that \$8,000 was paid into the Society's treasury for this privilege by the syndicate and that the entire sum and more was given in purses for running races on which the public could be induced to bet. One of the big days at the Fair was Governor's Day, on which Gov. Pardee and his staff were the guests of the Board of Directors. If the Governor saw the law of the State being violated there and then (and it would be accusing him of being totally blind to say that he did not), he had the opportunity to make a vast improvement in the management of the State Fair by directing that the betting ring be closed. He did not do it, but complimented the Directors in many ways on their management of the Fair and their improvement over the old methods.

Now all former Fairs given by the State Agricultural Society are things of the past. The future welfare of this important and useful State institution is to be looked after, and if California is to have a State Fair that is one in reality as well as name, it lies within the power of Governor Pardee to start it out right this year. The terms of four of the Directors of this society have already expired, and the terms of three more will end on February 1st. This is a majority of the Board. Governor Pardee has only to select seven men who will see that a Fair is given according to law, and the thing will be done. Every harness horse owner and breeder who has the State's interest at heart will give his support to any Board of Directors that will try to make the Fair what it should be. The breeders of cattle, sheep, hogs, and draft horses, the growers of all sorts of agricultural, viticultural and horticultural products, the men who dig from the earth the many valuable ores and metals that have made California famous, the merchants and the manufacturers, all deserve more liberal treatment from the State Agricultural Society than they have heretofore received. It is neither right nor just to offer but \$30 as first premium to the person who exhibits a \$5,000 bull at the fair, and then hang up ten times that amount for a lot of skate runners to race for. Let the premium list be revised, the State Fair made as grand an exhibition of the State's products as can be got together, and then if rightly managed it will pay, and the money annually appropriated be one of the best investments made by the State. If Governor Pardee can reform the State Fair, he will be entitled to the thanks of every citizen and taxpayer in California. That such a reformation lies within his power there is not a particle of doubt. He has the appointment of a majority of the Board of Directors within the next

two weeks. He should certainly be able to find seven men in the State of California who will do as he wishes in this matter. The lecturing of a Board of Directors, the majority of which are about to go out of office, will not accomplish as much in the way of needed reforms as the simple act of selecting a new Board that will devote its time to acting in accordance with the wishes and views of the appointing power. Whether the California State Fair of 1906 is to be "a decided improvement on the last one" will depend upon the men who Governor Pardee shall select to act on the Board of Directors. It is now "up to the Governor" to find the men who will run a fair on the lines he has laid down.

H. R. WARD, who has been training Daedalion 2:08½ for A. Ottinger the past two seasons, called at the office of the Breeder and Sportsman one day last week and told me a number of interesting things about the Arizona Territorial Fair and race meeting held during the last week of 1905. Mr. Ward was one of the California trainers who raced at Phoenix and says they had a good time and good racing after they reached the Arizona capital, though the trip from Los Angeles was made a little strenuous by reason of a big storm and washout which kept them on a sidetrack at Yuma for several days. The Phoenix Fair Ground he states is the most complete in every way of any fair ground in the Pacific Coast district. There are two fine tracks, one a mile and the other a half mile ring both kept in first class condition and very fast. Mr. J. C. Adams, president of the association, and Mr. Tiffany, the secretary, are active, hustling and painstaking officials, who did everything to make the visit of the horsemen pleasant. A strange feature of the Arizona fair is that while in the city of Phoenix everything seemed to be wide open, all sorts of gambling games running at all hours of the day and night, at the track there was no gambling, not even bookmaking or pools of any sort sold on the races, and no liquor was permitted to be sold on the grounds. The attendance on the poorest day was not less than 5000, while on the principal day it was estimated that 12,000 persons witnessed the races. Of all places in the United States where we would expect betting and drinking to be rather prevalent at a race meeting, Arizona would naturally be suggested first, but the people of that section doubtless thought that the tabooing of those things would be a novelty and a drawing card, and it worked.

Mr. Ward started Daedalion twice at the meeting, getting second money in the race won by Stranger O. 2:08½, and fourth in the race in which Hazel Patch, Zolock and Custer were the other starters. Being asked his opinion about Mr. Adams's gelding Custer by Sidney Dillon, Mr. Ward stated that in his opinion Custer is a two-minute horse. In the second heat of this race, Hazel Patch won in 2:07½. Before the start in this heat, the judges announced that Custer, who had the fourth position, would trail. Ward says he did so, and at the half was at least fifty yards behind Daedalion, who was third. Custer's driver then took his gelding to the outside of the track and at the three-quarters he was fully a distance behind as he swung around the turn on the outside. From that point to the wire Custer finished like a whirlwind and was right up close to Hazel Patch and Zolock at the wire in 2:07½. Custer will doubtless be started on the Grand Circuit next season and should nothing befall him in the way of accidents or sickness he will surely join the small but very select family of extremely fast performers sired by Sidney Dillon.

Up to a week ago last Tuesday, the manager of every track in California where a few horses are being worked was getting ready to advertise his track as possessing every advantage for winter training. Up to that time there had been every evidence of a dry winter, and nearly all the tracks were dusty and dry. The rain that started falling on that day, however, continued during the entire week with few intervals and the "winter tracks" are fewer than they were, while the horses have been kicking the doors down in their anxiety to get out and do a few turns on the ovals. Road jogging has been resorted to in most sections and the using of the tracks given up for the time being. There was never a rain that received a warmer welcome from everybody than this one. Feed was short in the majority of pastures and all sorts of stock had to be fed hay, something very unusual in California at this time of the year. The grass is growing very fast, however, and there is every prospect of a season of splendid crops in every section of the State.

A correspondent of the Trotter and Pacer says: One of the fastest roadsters in Richmond is the bay gelding McNey 7 by McZeus 2:13, dam May Blossom by Glenmore, son of Marshal Ney. He is owned by Dr. H. R. Scott, who purchased him a few months back from his breeder, Thomas S. Winn of this city. McNey has worked quarters in 33 seconds with very little handling and seems good enough to prepare for the races if Dr. Scott would consent to have him trained. McZeus, the sire of McNey, is a full brother to the lightning sprinter Coney 2:02, and was kept in the stud here for some years, but left very few of his get behind.

Tommy Murphy of New York visited Cleveland a few days ago and purchased there, from "Doc" Tanner and Vance Nuckols, her owners, the stout trotting mare Miss Brock 2:13½, by Stranger, for a price reported as \$2500. Her new owner is L. M. Borden of New York. She will probably be bred to Mr. Borden's great stallion Locanda 2:02 in the spring and then raced and given a lower record by Murphy.

NEW STOCK FARM AT SANTA ROSA.

One of our subscribers at the City of Roses writes: Santa Rosa is to have another stock farm devoted to the breeding of high class animals. About one year ago Mrs. B. E. Miller purchased the Illingsworth farm of several hundred acres, paying therefore \$100,000 and proceeded to stock it with pure bred Percherons and Durham cattle. This season she decided to add harness horses and with that end in view has just purchased from the Rosedale Stock Farm six brood mares, one filly and one stallion as a nucleus for a high grade stable.

Illingsworth Farm is beautifully situated on the Laguna some six miles from Santa Rosa City and with its rolling hillside, meadow and living streams, is ideally adapted to its owner's purpose. The farm will be exclusively controlled by Mrs. Miller and her sons who have been engaged in stock raising for many years. A track for training purposes will be laid out and all the equipment necessary to the breeding and care of high class animals will be provided. The owner will devote attention primarily to carriage horses rather than racers, although breeding horses adapted to both purposes. As Mrs. Miller has ample means and is determined to make a success of the venture, there is no doubt that in a few years Illingsworth ranch will become well and favorably known as the home of well bred carriage and draft horses.

The horses purchased from the Rosedale Farm are as follows:

Donalell, stallion by Washington McKinney, dam Dalia by Daly 2:15.

Darien, mare by Daly 2:15, dam Signet by Steinway.

Spry, by Daly 2:15, dam Aggie G. by Ansel 2:20.

Macarosa, full sister to the last named

Two mares by St. Whips.

Brown filly by Daly 2:15, dam Molly by Eugene Casserley.

At the same time J. E. Durand purchased the broodmare Aggie G. by Ansel 2:20, he by Electioneer. The dam of Aggie G. is Gypsy by Paul's Abdallah. Aggie G. is now in foal to Washington McKinney, son of the great McKinney out of Lady Washington. Aggie G. is a pacing mare and was bred at Palo Alto. She has never been given a record but is the dam of St. Whips and several standard performers

SEVEN PLACES TO BE FILLED.

The terms of four Directors of the California State Agricultural Society have expired as follows:

Benjamin Rush, Feb. 1, 1904; L. J. Rose, Jr., Feb. 1, 1904; C. W. Paine, Feb. 1, 1905; E. W. Howard, Feb. 1, 1905.

These directors are holding over because they proved satisfactory to the Governor, and no successors were appointed.

The terms of other Directors will expire in a fortnight, as follows:

Thomas Fox, Feb. 1, 1906; William Land, Feb. 1, 1906; James Whitaker, Feb. 1, 1906.

This will give seven places to be filled at once.

The other directors who have longer tenure date expirations of term of office as follows:

J. W. Wilson, Feb. 1, 1907; Frank H. Burke, Feb. 1, 1907; H. A. Jastro, Feb. 1, 1907; G. W. Kingsbury, Feb. 1, 1908; H. P. Stabler, Feb. 1, 1909.

Of the seven Directors whose terms are out or are about to expire, all except William Land are understood to be willing to serve again if requested so to do, but it is not yet known what turn the Governor's mind may take in this regard. Mr. Land says frankly that he has had all that he wants of the trouble and worry of trying to make a success of the State Fair, and he is willing to retire in favor of some one with more enthusiasm to spare. Rumor has it that Mr. Whitaker will be reappointed and may be chosen President of the Board, though Senator Rush, the present President, may again fill that position if he cares to retain his place on the Board—Sacramento Union.

MONTANA CIRCUIT ORGANIZED.

Editor Breeder and Sportsman: As I told you in my last letter that there was a possibility of a Montana Circuit being formed, I will now make it good by telling you the extent of it. At a meeting on January 5th an organization known as the Montana Racing and Fair Circuit was organized with the following officers: President, R. D. Steel of Bozeman; secretary-treasurer, Dr. A. D. Galbraith of Butte; executive committee, W. B. George of Billings, John W. Pace of Helena and O. W. Belden of Lewiston.

The following towns and dates form the circuit: July 30, Butte, ten days; August 13, Anaconda, six days; August 20, Lewiston, four days; August 27, Livingston, four days; September 3, Big Timber, four days; September 10, Billings, four days; September 17, Bozeman, five days; September 24, Great Falls, five days; October 1, Helena, five days; October 8, Missoula, four days; October 15, Kalispell.

The purses and stakes of the circuit will aggregate \$120,000 with about ten weeks' racing. A complete announcement of early closing stakes will be sent you as soon as the different secretaries notify me of the classes for which they wish to offer stakes. Every town on the list has a good track and first-class accommodations and Montana expects not only to give first-class racing but also plenty of opportunities for the betting element.

A. D. GALBRAITH, Secretary-Treasurer.

The Iowa State Fair for 1906 will be held in Des Moines, August 24 to 31. This puts Iowa as the first of the state fairs in the west for the coming year.

Jackson's Napa Soda does not tangle the feet.

THOROUGHBRED DEPARTMENT.

By Ralph H. Tozer.

The sires of gallopers from California made a most excellent showing on the winning list of 1905. The figures are now all in, and Hamburg headed the list with \$158,160 to the credit of his progeny; Melton was second with \$147,565, of which Sysonby won \$144,990; imp. Meddler, third, with \$133,701; Sir Dixon fourth, with \$99,905; imp. Ben Strome fifth, with but \$94,035, even though his progeny won the largest number of races; Hastings sixth, with \$86,263; then comes the two Rancho del Paso horses, imp. Watercress and imp. Star Ruby, with \$74,274 and \$63,830, respectively. Other stallions from this State whose get won \$10,000 or more were: Imp. Ormonde (now dead), \$50,115; imp. Goldfinch, \$45,240; imp. Golden Garter, \$44,480; imp. Brutus, \$25,695; imp. St. Gatien (sire of imp. Meddler), \$25,472; Orsini, \$23,150; St. Carlo, \$22,520; imp. Prestonpans, \$20,825; Montana (by Ban Fox), \$20,280; Puryear D., \$17,705; imp. Sir Modred, \$16,410; Maxio, \$14,770; imp. Bassetlaw, \$14,680; Racine (bred here), \$13,755; imp. Artillery, \$13,720; Eddie Jones, \$11,765; Indio, \$10,625; Rey El Santa Anita, \$10,260.

In England there was a close fight for honors among the "winning stallions," for both first and second positions. Isinglass, by Isonomy, finished first with £24,642; Gallinule, by Isonomy, second with £24,436; St. Frusquin, by St. Simon, was third, with £21,733; Cyllene, by Bona Vista, fourth with £21,555; then followed Persimmon, by St. Simon, £16,375; Florizel II (Persimmon's own brother), £15,549; St. Simon (who had the honor of heading the list for eight seasons), £12,546. Melton's progeny in England only won £5,578. Cherry Tree (imp. Matt Byrnes when owned in this country by the late Marcus Daly), begot eight winners of fourteen races, worth £2,255. Of the American-bred horses that had representatives in England, Kingston's get won £1,673; Octagon's, £1,489; Diakka's, £1,093; Americus', £720; Chorister's, £823; and Dobbins', £729. The get of the imported horses The Sailor Prince, Watercress and Galore won £1,675, £1,585 and £908, respectively, and the New Zealand celebrities, Carbine and Trenton, begot winners of £5,426 and £1,772, respectively.

Up to and including January 13th, Barney Schreiber's horses had won \$20,915 at Emeryville and Ingleside, this being more than twice the sum won by any other owner. W. B. Jennings was second with \$8,191, then follow W. W. Elliott, with \$7,484; T. G. Ferguson, \$6,386; Keene Bros., \$6,330, and P. Ryan, \$5,010. These were the only winners of \$5,000 or upward. Radtke, who left for New Orleans last Tuesday, headed the list of winning jockeys with 53 winning mounts; McBride second with 39 wins, Knapp third with 37, Fountain 26, L. Williams 20.

The year 1905 was a great one for the sale of great horses at big prices. The last one sold was Diamond Jubilee for 30,000 guineas (or \$151,250) to the Argentine breeder, Senor I. Correas, this following closely the sale of Cyllene, the great young English sire, for a similar sum to William Bass. Imp. Watercress brought \$71,000 at auction in New York last December, and Hamburg brought \$70,000 at auction early in the year.

W. Gabriel, who owned Toupee for quite a while in 1905, bid the horse up \$1100 and secured him when he defeated Cloudlight last Monday at Emeryville—the "boost" being from \$1900 to \$3000.

Thomas A. Davies purchased Jim Pendergast from Barney Schreiber after the Sain gelding had gotten away on the fly and won the second race from a better colt—Capt. Bennett.

Radtke was allowed to stay the week out, Owner Jack Keene deciding to try Red Leaf in the Lissak Handicap this afternoon.

A recent arrival is Ed Sheridan, the popular sporting editor of the Chicago Tribune. Mr. S. expects to spend a couple of months in "the land by the sunset sea."

There is a strong clamor against the present system of standing starts, and it is to be hoped the popular "walk-up" system used by Mars Cassidy will take the place of the undesirable plan now in vogue. Just to show the need of a change of system I will give a few recent vexatious occurrences that could scarcely have happened under the walk-up plan: January 9th, Instructor, a heavily played horse, off eighth and last to a poor start, finished second. January 10th, Marion Rose off second flying, in first race, while Native Son, away seventh, flat footed, though perhaps a better horse, was beaten by two and one-half lengths; in the third race the same day, Grasscutter, played down from 5 to 1 to 13 to 5, had little chance to win with the send-off she received. January 11th, Ray, the heavily played favorite, held at the post by an assistant starter, finally being beaten a neck by Angelica; that the holding-on at the post cost Ray the race there can be little doubt. Ed Sheridan, favorite in the next race, was also held, and only won his race by a severe effort and unusual display of gameness. January 12th, Mafalda, the favorite. Radtke up, virtually left at the post in the second race, finished fifth to horses that she can beat off, ordinarily. In the fourth race, Forerunner, favorite, off last to a rather poor start, finished second. January 13th, Marion Rose, favorite in the first race, off fifth to what the chartist calls a "fair start," but not considered by very many onlookers as "fair." In the fourth race,

the Adam Andrew Selling Stake, Bob Ragon, a well-played second choice, virtually left at the post, as he made up over four lengths in the last half mile, Ragon would almost surely have won with an even send-off. In the last race of January 13th, Hammeraway had little chance to win after getting away ninth and flatfooted, but did finish third. January 15th, Prosperity had no chance to win with the start received in the first race, though finishing a good fourth. In the second race the same afternoon Jim Pendergast, from the Schreiber stable, got away flying, and through the undue advantage received, managed to stagger in a neck before Capt. Bennett, which was much the best horse, though he did not win. In the fifth race that day Bird of Passage was off last to a bad start, making up ground, but finishing fourth only. These comments are made only because I believe the system of standing starts used here is wrong, and that Starter Holtman could give much better satisfaction under the walk-up plan I have not the faintest doubt. Of course, if jockeys would act fairly and not try to "beat the gate," the standing start would be all right, and horses would have to be schooled to the tape better than they are, or the "hold-on Jimmies" would have some excuse for holding heavily-played horses until the others were well on their way. The jockey club folks should give the proposed plan a trial anyhow. If it is any worse or causes more dissatisfaction than the present system it would indeed be "a pippin."

Last Tuesday Frisco Hoag claimed Fulletta out of the fourth race (in which she was favorite) for \$825. Tam O'Shanter was bid up from \$400 to \$700 and secured by C. C. McCafferty. Robinson rode three winners, Fountain two and Goodchild one.

A New Orleans dispatch is as follows:

"The officials at both local tracks were given a scare a few days ago when B. A. Chilson and his colored partner, Wilson, of 'ringing' fame, put in an appearance here. The pair have been keeping under cover, however, and have not been seen about the tracks during the afternoons. About a week ago Wilson appeared at the old track, looking after some mail which had been sent him. About the same time Chilson was seen at City Park during the early morning hours, and acted in such a suspicious manner that detectives were put on his track. He was traced to a cottage near the old track. Chilson got wind that he was being followed, packed his traps and skipped out of town, but it is said that he came back again last night. There have been rumors of 'ringers' at both tracks this winter, and a close watch is being kept to prevent them from going through. It is known that the Chilson outfit shipped the mare Useful Lady from New York to Charlestown by boat and from Charlestown to New Orleans by train. She is here somewhere, but as yet has not been located.

FULLY AS HONEST.

I have always believed that the impression that has prevailed among a certain class of people that to be a dealer in horseflesh is proof positive of a lack of appreciation of the high standard of moral ethics which the same class believes prevails in many other walks of life, and after a good many years' experience, I have come to the conclusion that the average horseman is fully as honest, much more generous, and equally as truthful as the average merchant, banker or farmer, equally as jealous of his reputation as the lawyer, physician, and infinitely superior in each of these to the average politician. Horsemen in general have the reputation among a certain class of people of being ever ready to disguise the fact that the horse which they are trying to dispose of is blemished or unsound, and yet I think if one of these somewhat bigoted and narrow minded critics would take the trouble to attend a sale of horses conducted by a reputable firm, visit any one of the well known stock farms throughout America, or deal directly with the owners who are to be met at any first-class trotting meeting, he would change his opinion and instead of belittling the horse business, would give it precedence over many of the callings, which he now considers preferable. The code of laws governing the horse business deals more harshly with offenders than does that which controls the conduct of insurance companies or the many corporations which have come into disrepute quite recently. The American republic is indeed jealous of its rights as far as the horse business is concerned, and eagerly demands that the man who has attempted to defraud it in a race should meet with the fullest punishment, and yet the public calmly and patiently allows itself to be robbed by the greedy wolves who infest the great speculative marts of this country and rushes confidently into the arms of promoters who offer untold wealth from an investment in their industrial enterprises.—Exchange.

The supreme court of Missouri has declared constitutional the law passed in that state a year ago against "pool-selling." It is expected that the decision will lead to the Delmar Jockey Club losing its franchise. Governor Folk of Missouri is quoted as being in favor of a law permitting racing if it be carried on in a similar manner to that in New York State, and the breeders of the harness horse in Missouri will aim to secure a law with the aid of the Governor. The present anti-pool law was aimed at the runners.

The track being built by R. J. Mackenzie, Winnipeg, Manitoba, owner of Harold H. 2:03½, etc., is the only track a mile in circumference in the entire Canadian Northwest.

Frank Howe, the brother of Murray Howe, died week before last at Memphis, from Bright's disease.

DEFECTS IN HANDICAPPING THE TROTTER.

(Chicago Horseman.)

Handicapping the trotter has been more or less discussed for several years and practically all the critics agree that the present system is far from ideal. The fact is forcibly brought to public attention by the record made in Europe the last year by the American trotting stallion Kirkwood, Jr. This horse was purchased at the last Memphis meeting and was immediately shipped to Bologna, Italy. Since then he has been raced at the important meetings in Italy, Germany, Austria and France, and very successfully, too, having won nineteen out of thirty races in which he started.

His owner, in a recent letter to John Splan, who purchased the horse, says that there is no horse in Europe capable of defeating him and he doubts if there is one in all America. This of itself is surprising, as there were not many who had an exalted idea of Kirkwood's ability to defeat the American bred horses already owned on the European continent. The horse proved to be all that the veteran American trainer had predicted, "a better horse than most people give him credit for being and peculiarly well adapted to the European tracks."

The fact that Kirkwood, Jr., has been so successful has not so much to do with the question of handicapping as the fact that has enabled one trotter to start in thirty races in one season. The best horses in America start nowhere near that number of times. If in this country a horse starts at the commencement of the Grand Circuit and races at every meeting down the line he has done all that any one would expect of him. In fact the majority of the horses in training are not able to do this. If the horse is successful it means that he has started ten or a dozen times during the season.

A racing system that allows of a horse starting thirty times in a season, or twice or thrice as many times as it would be possible for the horse to do in this country, must have elements of merit which should not be overlooked. Under present conditions campaigning a stable of trotters and pacers is not a remunerative pursuit. Even although the horses win a goodly percentage of the races the average owner will find that instead of being in receipt of money from his trainer at the end of the season he really has to make out a good sized check for the purpose of squaring the account.

Now if it were possible to race a horse as frequently as was Kirkwood, Jr., there would be two or three times as many chances to make the campaign a profitable one. Under the present three-in-five system the average horse receives work enough which if utilized in racing would make a creditable showing before our present racing season really commences. The Grand Circuit trainers in the middle of last season awoke to the fact that the present system kills the horses physically and the patience of the average spectator. They declared for shorter races, but it is doubtful if they accomplish their purpose unless they adopt different methods.

The fact that when a good horse reaches the zenith of his power he is of no value as a race horse is another indictment against the present system. The last season that Dan Patch was trained for the races he was good for nothing but an exhibition horse after two races. Having won those two events his record barred him from all the classes. Major Delmar was never so good a horse as when his record was such as to render him ineligible to any class event. Under a proper system of handicapping he should have been worth twenty-five thousand dollars as a race horse, as it was he was worth just what a rich man was willing to pay for him as a fun horse. These are but two striking instances of a large number.

Under present conditions the best American trotters are handicapped out of all class races when at their best; the earning capacity of all horses is curtailed to one-half of their value because of the inability of trainers to get them ready for twenty-five or thirty races a year; the system is such that horses are too frequently broken down before the racing season arrives; the long drawn out contests prohibits racing from being as popular as it should be. These are indictments enough against the present system and are so glaring that the best thought in the country should seek to remedy existing conditions. Owners of horses and secretaries of racing associations should seek some mutual ground whereby race horses would be made more valuable and racing more attractive.

Frank Work of New York, who has loved driving horses ever since he was a boy in Ohio, and who is now close to the ninety mark, has for more than thirty years provided in his will for the disposition of his roadsters after he dies, says an exchange. Mr. Work has a magnificent stable, with a glass dome in the roof, so that his horses may have all the sunlight there is going, and alongside of the main structure there is a ninety-foot covered runway with tanbark footing for exercise on winter days when no driving is done. As soon as Mr. Work has tried a horse sufficiently to know that it will suit him he adds a codicil to his will, naming the horse and providing that in case of his death the animal shall be taken to his Long Island farm and given the best of care for the balance of its days, never being harnessed. Mr. Work never, in the days when his stable was filled with champion road horses, invited anybody to go driving with him. "It's no pleasure," he said to me, "to have another man in the wagon—I just want myself and the horses. I keep a good trotter or two for the use of my friends when they call, but the horses I drive are for no one else, now or hereafter."

Sober up on Jackson's Napa Soda.

NOTES AND NEWS.

Some of the largest draying firms in San Francisco are advertising in the country papers for horses suitable for their business. This shows how scarce heavy horses are in California.

Millard Sanders reached Pleasanton last week with two car loads of young Sidney Dillons that Mr. Sterling R. Holt of Indianapolis had purchased the week previous from Santa Rosa parties. Mr. Sanders will begin work on them as soon as the weather permits and will have them in fine shape to ship east about May 1st.

Kinney Lou 2:07½ has led the list of stallions whose get were nominated in the Breeders' Futurity for the past two years, and is starting out to keep the lead another year. Mr. Doble states that more mares have been booked to this great trotter up to this time than in any previous season.

In the article about Bonnie Direct which appeared in the Breeder and Sportsman last week, his dam Bon Bon by Simmons was not given credit for all that is her due. It stated that Bon Bon was the sire of Bonnie Direct 2:05½ and Bonsilene 2:14½, but failed to give the fact that she is also the dam of Rector 2:10½, that took his record in 1905 at the pacing gait. This gives Bon Bon three in the 2:15 list. Her son Bonnie Steinway actually worked a mile in 2:08¼ and a half in 1:02½ last year at Pleasanton, consequently the statement in the same article that he had paced a mile in 2:11¼ lacked three seconds of being a correct one. The writer of the article was present when he worked the mile in 2:11¼ and had forgotten about the faster trial.

Can any of our readers give us the pedigree or any other information about a stallion called Red Wings, now supposed to be 16 or 18 years old, that was shipped from Kentucky about twelve years ago to some person in Humboldt county, California. The stallion is said to be trotting bred and is a bay with black points. Any information that will lead to the identification of this horse will be thankfully received.

The three yearlings by Sidney Dillon sold by Mr. S. B. Wright of Santa Rosa to Sterling R. Holt of Indianapolis, and now in Millard Sanders' charge at Pleasanton, are bred in producing lines. One is a bay filly out of the great brood mare Eveline by Nutwood, dam of Ole 2:10½, Roblet 2:12 (dam of Bonalet (3) 2:09¼), Tietam 2:19 and Maud Fowler 2:21½, another is a bay filly out of Maud Fowler by Anteeo, dam of Dumont S. 2:20, Sonoma May 2:29¼, Sonoma Queen (3) 2:26, and Sonoma Girl, trial 2:15, and the third is a chestnut colt out of the untied mare Hattie Fowler by Robin 2:37, out of Maud Fowler 2:21½. These are three royally bred youngsters and have been named Eveline Dillon, Maud Dillon and Fowler Dillon, respectively. Mr. Wright still owns another Sidney Dillon filly that he calls Olive Dillon. This filly was foaled in 1904 and has been registered as Sonoma Lady, but he has made application for a change of name. She is a large, beautifully gaited filly and has trotted a quarter in 48 seconds. She has been turned out for some time, however, and will not be handled for speed until fall.

Peralta, the son of Nutwood Wilkes and Rose McKinney that is now owned by Mr. H. J. Tasker of Christchurch, New Zealand, is reported in fine condition. He is doing stud duty at the present time and is getting some well bred mares. The New Zealanders should not miss the opportunity to breed to this grandly bred horse.

Geers has a green pacing mare in his stable that he is counting a great deal on. She is a five-year-old by The Earl 2:17 trotting, 2:14½ pacing, the fast son of Mambrino King now owned by J. N. Compton of Augusta, Ill., and out of Bessie Hal, the dam of the famous unbeaten Direct Hal 2:04¼. In her work at Memphis she stepped a half in 1:03½ some time ago, and did it like the real thing. She is so "old fashioned," both in looks and manners, that the railbirds have dubbed her "Grandma."

The mare Ronie G., owned by Mr. D. S. Matthews of Ryde, foaled January 8th a fine colt sired by Edward B., son of Stam B. 2:11¼. The colt has been named Socoro M. He is 41 inches high and well proportioned.

Secretary Gocher announces that a biennial meeting or congress of members will be held at the Murray Hill Hotel, New York, at noon, Wednesday, February 14, 1906, in accordance with Article 7, Section 1 of the by-laws. In accordance with a resolution adopted by the congress, the committee on credentials will meet at the Murray Hill Hotel, at 9 o'clock a. m., on Wednesday, February 14, 1906, to receive credentials from delegates to the Twenty-third congress of members of the National Trotting Association. Any proposed changes in the rules should be sent to the secretary to be submitted to the rule committee.

Budd Doble, of San Jose, has just had printed through this office a handsome little pamphlet giving the extended pedigree of his great trotter, Kinney Lou 2:07½, together with some pointers about the horse and the family from which he comes. The cover contains a very handsome production of Hills picture, Kinney Lou and his famous owner.

In the list printed in the Breeder and Sportsman last week of the yearlings entered in the Occident Stake of 1908, Henry Hahn's filly Alameda was given as by Lecco 2:09¾. This was an error. The filly, which is a bay and very promising, is by Stam B. 2:11¼ and is marked very much like her sire. Her dam, Henrietta by Boodle 2:12½, is now in foal to Lecco, however, and is due some time in March. Henrietta is a well bred mare, being by Boodle out of Flora H., dam of Thompson 2:14¼ and Bonetti, trial 2:18¼, by Jim Mulvanna 2:19, third dam Thomas mare by Bonner, son of Hambletonian 725, fourth dam La Belle by Bellfounder 62, fifth dam Ida Belle by Leather Stocking, thoroughbred.

At a Chicago auction sale recently Walter Cummings of Denver purchased the seven-year-old bay gelding Bonner 2:11½ by Jayhawker 2:14¼, dam Lida Stevens by Speed for \$900.

E. T. Barnett, a millionaire mine owner of Fairbanks, Alaska, has purchased the noted Woodlawn farm in Kentucky and the place will be operated by him as a breeding establishment for trotters. The farm contains 300 acres and brought \$62,000.

The Colorado pacing stallion Winfield Stratton 2:05¼ has been sold by George H. Estabrook to James Walker of Coldwater, Mich., acting for European purchasers, who intend to race the horse and then retire him to the stud. Stratton has had several campaigns in Colorado and over the grand circuit, his mark of 2:05¼ having been made during the year just closed.

Reports from everywhere outside this state indicate that 1906 will be a banner year for light-harness horse racing. It should be the same in California.

Tom Sharkey of New York has sent his handsome five-year-old black stallion Kingthorpe by May King out of Crucible by Onward to Charles Longbotham's farm, Chester, Pa., to be trained for next season's races.

The ailing leg of the gray warrior Dr. Strong 2:05¼ has been fired by Dr. M. W. Sprengle of Cleveland, O. The son of Strong Boy 2:11¼ is now in winter quarters at Locust Grove Farm, Newcastle, Pa.

The skeleton of Lord Russell, full brother to Maud S. 2:08¼, will be mounted and placed in the museum of the Ohio State University at Columbus.

Secretary E. W. Randall has issued a report of the financial statement of the Minnesota State Agricultural Society for 1905. It is vouched by the board of audit and shows the society to be in an unprecedentedly prosperous condition. The receipts from all sources were \$241,574.89, and disbursements \$166,297.24, leaving a balance on hand of \$75,277.65, against \$48,680.10 on hand December 10, 1904. The ticket sales for the state fair of 1905 amounted to \$134,736.85, and there was paid out in speed purses \$22,720.75, receipts from entries, stall rent, etc., being \$19,828.90. We also note there was expended in permanent improvements and repairs \$32,967.55, of which the tracks got a good share. With the handsome balance on hand, the society is well prepared for added speed attractions for the state fair of 1906.

From all that can be learned, managers of the circuit tracks are lending an ear to the demand for richer purses for the fast record horses, says an eastern writer. In the past the trotters with records of 2:08 or better have had to race for the ordinary purse, as have the pacers in the 2:07 list, while green and slow record steeds have had unlimited opportunities to race for \$5000 and \$10,000 prizes. A \$5000 purse for a 2:05 or a 2:06 pace all the way down the line would furnish a series of turf battles the like of which has never been seen, and which would fill every grandstand on the circuit. The fast trotters should be looked after as well. There are now enough of these fast record horses to make rich early closing events for them as profitable for the association from an entrance money point of view as those of the slower classes.

Arizona parties have bought of Charley Dean, Palatine, Ill., the chestnut stallion Allerton Boy 2:22¼, for \$1500.

The Montana boarding stable in Seattle was burned on Christmas day, destroying thirty head of horses.

Jack Crabtree, who owns Nutboy 2:15¼ and Jennie Scott 2:14¼, is a brother of the famous actress, Lotta.

During the last season three pacers out of the same dam entered the 2:15 list—something that is unprecedented. The three are Regina 2:10¼, Judex 2:10¼, and King Claire 2:13¼, the first named being the pacer Red Wing C. 2:13¼, and the latter by the trotter Redwood 2:21½. The dam of the trio is the former well known performer, Nelly O. 2:13½, by Bald Chief Jr., out of Bernice by Hailstorm. When it is recollected that the first mare to have two of her produce enter the 2:10 list in one season is Emma T., by Socrates, dam of Miss Abdell 2:09¼, and Emma Brook 2:09¼, the value of developed mares as matrons is again strongly emphasized. All three of Nelly O.'s performers made their records in races, and two of them did so over half-mile tracks.

The Montana Circuit has been organized and will consist of ten weeks racing, opening July 30th at Butte and closing October 8th at Kalispell. Good sized purses will be offered both harness horses and runners.

California horse dealers are making frequent visits to Oregon these days in search of horses that will do for express and farm work. There is a big demand for pairs suitable for work in the vineyards and orchards.

The Rural Spirit advocates a winter track for Oregon and expresses the opinion that there are several locations near Portland that would make splendid training grounds. The Rural Spirit is right. If a sandy clay or sediment soil can be found, the proper construction of the track will do the rest. Perfect drainage will make good winter tracks out of many that are now thought to be unfit to work horses on during the rainy season. There is no reason why good winter tracks should not be built in Oregon, and if they were the number of horses in training there would be greatly increased to the great benefit of the horse business.

Nearly every large city in America is having difficulty in obtaining horses suitable for its fire department. The prices for good engine and truck horses have been raised considerably during the past few years, but the demand is still greater than the supply. Here in San Francisco at the present time there are so many disabled and aged horses in the fire department that something must be done to relieve the condition. An appropriation is to be made to purchase a number of suitable horses, but they will not be readily obtained at the present prices.

L. E. Clement notes in his correspondence to Colman's Rural World, the death at his home in Illinois of F. J. Grigsby. Mr. Grigsby was a breeder of live stock and at one time owned the California bred horse Callaway, by Sterling, out of a mare by Bay Rose. This stallion was used as a saddle horse sire with considerable success. He was purchased in this State by Mr. Grigsby.

As a sire of producing dams, Nutwood 2:18¼, keeps far in the lead of all other sires. His daughters have produced 268 standard performers, as against 191 produced by the daughters of George Wilkes, his nearest competitor. When it comes to producing extreme speed Nutwood's daughters are still in the lead, as they have 53 in the 2:15 list. The daughters of Red Wilkes comes next with 37 to their credit.

The Indian Territory is just beginning to find out what good things she has, and how many different kinds of them. A colored man down there the other day sold to an Indiana man for \$3500 the horse Red Ash, which was given to him when a colt because its white owner did not know the qualities of the youngster. While still in the possession of its dusky owner, Red Ash did the mile in 2:16 at Checotah, and has since lowered the time to 2:11, which is expected to come still lower to 2:05. And the Territory in its development is keeping up with the pace set by the horse.

Mr. W. J. Carter, of Richmond, Va., has been chosen as a member of the rules committee for the coming congress of the National Trotting Association, which will convene in New York next month. Mr. Carter is reported to be a well posted and well informed man on trotting legislation, and will, no doubt, prove a valuable member of the committee.

The New York Road Drivers have elected the following for the year: President, H. D. Gill; Vice-President, Walter M. Jermyn; Second Vice-President, N. L. Ely; Third Vice-President, George A. Coleman; Secretary, W. J. Clark; Treasurer, L. W. Boynton. Before the meeting was over the following offered cups to be competed for during the season: Miss Morosini, W. M. Jermyn, George Huber, E. J. La Place, and C. S. Rice. Cups will also be offered by the Executive Committee and the Board of Governors.

Judge Hart of the Davidson County Criminal Court sitting at Nashville, Tenn., has declared the Tennessee anti-betting law unconstitutional. William H. Hayes and William Gerst, Jr., were indicted under the Rice-Lighon law and on trial their counsel moved to quash the indictments. It took Judge Hart just one minute to render his decision which follows: "I sustain the motion to quash the indictments against the defendants. The law conflicts with the constitution of the State of Tennessee and is therefore void."

M. H. Tichenor & Co. are building a new stable in Chicago that will stable 250 head. They will open the new building with a big sale of high-grade heavy harness horses in April.

Barney Simpson will stand his fast stallion Arner 2:17¼, own brother to Diablo 2:09¼, Don Derby 2:04¼, Demonio 2:11¼, etc., at Chico again this year. Arner's colts are fine individuals and very promising. The opportunity Butte county breeders have to breed their mares to such a high-class horse as Arner should not be neglected.

That good mare Lottie Loraine 2:05¼ died of colic recently at Harrodsburg, Ky. She was owned by C. T. Worthington, and was with foal by Oratorio 2:13. Lottie Loraine was a bay mare, foaled 1890, by Gambetta Wilkes 2:19¼, dam Lady Yeiser by Garrard Chief, grandam Jewell by Vermont, and was bred by G. & C. P. Cecil, Danville, Ky. She made her record in 1897.

There is a prospect that criminal proceedings may be brought against J. W. Brothers and Geo. E. Whitney, the Des Moines, Ia., men caught ringing Cuprum 2:13¼. It is a penitentiary offense to ring a horse in Iowa, and it is understood a charge will be brought against Brothers and Whitney by the Iowa authorities.

HOW THE FAST ONES ARE SHOD.

A table of unusual interest showing the style of shoe, weight, etc., which the famous trotters and pacers have carried, was recently given by a well known horseshoer, C. A. Cole, in the *Horseshoers' Journal*. It is as follows:

Trotters.			Front weight and style.	Hind weight.
Major Delmar 1:59 1/4	7	open shoe.	3 1/2 oz.	
Sweet Marie 2:04 1/4	9	bar shoe.	5 1/2 oz.	
Dr. Strong 2:05 1/2	8	bar shoe.	5 1/2 oz.	
McKinley 2:06	6	open shoe.	5 oz.	
Wentworth 2:04 1/2	7	bar shoe.	4 oz.	
Sadie Mac 2:06 1/4	7	bar shoe.	3 oz.	
Norman B. 2:06 1/4	9	bar shoe.	4 oz.	
Rediac 2:07 1/4	8 1/2	open shoe.	4 1/2 oz.	
Lord Derby 2:05 1/4	5	open shoe.	4 oz.	
Robert Mc 2:08 1/2	7	open shoe.	3 1/2 oz.	
Mainsheet 2:08 1/4	8	bar shoe.	3 oz.

Some of the comments Mr. Cole makes on shoeing trotters and pacers are quite as interesting as his table of shoes. From them the following excerpts are taken:

"In all my experience I don't know as I have ever shod two horses the same way. You know, what will suit one will not suit another—so many different things come up in shoeing horses that are not going right. You must find the cause and then try and remedy it.

"A lot of people believe in long toes—they are another kind of horses that don't last long. A long pastern horse wants a fair foot, and the lighter the shoe the better for the horse, and you will find they will go farther; the thinner the shoe the lighter the footfall, and it takes away concussion.

"Two things must be strenuously insisted upon for the shoe; one is, that the shoe be as light as possible, and the other is that it be made or molded on its foot bearing surface to an exact counterpart of the hoof to which it is applied. Bearing in mind that the original and legitimate design of the shoe is for the preservation and defense of the hoof from undue wear, we should not misconceive this purpose by attaching to our horses' feet any uncalled for weight. Light shoes proportioned to the weight of the animal and the nature of his work are infinitely preferable to heavy ones, for these latter are a burden at best and a constant tax on the energies of a horse, as is meaningfully implied by the familiar saying, 'An ounce at the toe means a pound at the withers.'

"There may be differences of opinion among authorities as to minor details in shoeing, but there is one practice not open to argument, and which all alike severely condemn, and that is the utterly senseless and atrocious custom so characteristic of many of every day horse shoers of thinning out the sole and trimming or mutilating the frog. No man has ever been able to assign a reason for acting contrary to the first principles of his own work by destroying that which he should aim to preserve, and yet this has been and is the most frequent procedure of so called farriers in their treatment of the frog and sole. They persist with an obstinacy which sets common sense at defiance in paring and hollowing out the sole even to the quick, and to forming an exact 'fine frog,' regardless of consequences, though these are of the most serious nature, and affect the vitals of the living animal.

"The pacer Morning Star, the largest money winner in 1904, wore in front a three calk shoe of seven ounces, with a hoof angle of 48 degrees, and a 3 1/2 toe, and behind a 3 1/2 ounce hoof, angle of 52 degrees—toe 3 1/2.

"Sweet Marie wore a nine ounce plain, square toe bar shoe, with 3 3/4 toe, and at an angle of 48 degrees in front; and behind a 5 1/2 ounce square toe swedge shoe, with heel calks and 3 1/2 toe and angle of 52 degrees.

"Sadie Mac, one of the greatest trotters the world ever saw, was different from most horses. As a rule, they have their off days, but she always had her speed, and never made but two breaks in her life—she made a break at Boston and did not know what to do. She wore a seven ounce swedge bar shoe, with square toe and a little heel calk to take the jar off, in front 3 3/4 toe and angle of 47 1/2 degrees, and a three ounce hind shoe, swedged with a 3 1/2 toe and an angle of 52 degrees. The outside of her hind shoes was 1 1/2 inches longer than the inside. This was the only way to keep her from speed cutting."

LIKE PRODUCES LIKE.

Breeders of the light harness horse have had many valuable lessons during the past few years which are likely to result in a very radical change from the methods by which the American trotter has been bred in the past. Only a few years ago a visit to any one of the great breeding farms in this country would show that little or no attention was paid to individuality, especially as regarded the brood mares on the place, and in many instances the leading stallions would be found not only to be without a record and without the ability to get one, but also from an ancestry in which there were few, if any, public performers. It was not in the least uncommon twenty years ago to find a breeder's ambitions centered in a stallion unknown on the trotting courses of this country, and whose every ancestor, paternal and maternal, were alike without reputation in this respect.

Twenty years ago the so-called "development" theory attracted very little attention, and the breeders of those days scoffed at the idea that the easiest and surest way to breed race horses was by using only those animals who had distinguished themselves in this particular. A record of 2:30 made against time was deemed sufficient evidence that the holder possessed speed enough to make him valuable for breeding purposes, and even if the stallion was unable to trot a mile in three minutes, his limitations were not regarded as a bar to future stud honors. It is probably safe to say that 90 per cent of the stallions doing service at that period were incapable of trotting faster than the average road horse of to-day, yet the breeders never once thought of the effect this lack of capacity must have on posterity. Fortunately, as is always the case in the reproduction of animal life, the fittest survived, and the great race horses of their day accomplished so much more in the stud than did their contemporaries who were lacking in speed and racing ability, that the thoughtful students of breeding and the practical horsemen awakened to the realization that a well-bred, well-formed, high class race horse was much more likely to reproduce himself and sire horses of great capacity than those with nothing to transmit of their own and dependent on their blood lines, their inheritance, to overcome their own failings.

George Wilkes, the mightiest stallion of his day and the one whose speed compared favorably with the fleetest stallions of this generation, after a series of campaigns that would have ruined any but the soundest of constitutions, was retired to the stud in Kentucky with conditions decidedly against him. His success was more pronounced than that of any other stallion of his time, and in fact was never approached by any other stallion in this country, for, in addition to having given to the world several of the highest class trotters of their day, he became through his descendants the founder of the greatest trotting family in the register. Yet the fact that George Wilkes was a very great race horse and an equally great sire did not convince all the men engaged in breeding the light harness horse that the two had any connection with each other; they did not see any logic in the argument that because he was a great race horse, possessed of marvelous speed, he should be any more likely to become a success in the stud than had he lacked his great qualities.

To-day breeders are of a different opinion, and few indeed are they who would select a stallion of no racing ability, in preference to one who had demonstrated his worth, with which to begin the foundation of a breeding farm. Owners of valuable mares to-day seek the fastest and gamest race horses, fully aware of the fact that the best is none too good; that, even with every law of heredity obeyed as nearly as possible, the chances of failure are greater than those of success, and that unless they use mares and stallions rich in trotting inheritance, full of producing blood, individuality as nearly perfect as possible, and withal possessed of demonstrated racing ability, they will find themselves groping in the dark, and can only hope to accomplish anything as the result of an accident. It has been clearly shown that the great colt trotters of this day, the ones whose speed was natural and whose ability to race was shown at an early age, became the great sires of succeeding generations, and that the breeder who discards from his stud an animal, no matter how well bred, who is totally lacking in speed, is wiser than he who undertakes to produce great race horses from animals who have nothing to transmit.

The Futurity winners, and, in fact, the winners of most of the classic events of to-day are by stallions who were themselves possessed of some degree of racing ability. Miss Adbell, last year's Futurity winner, is by a stallion who is in some respects the most wonderful colt trotter ever foaled; Lightsome, the crack two-year-old trotter of the year, is by Constantine, gamest and greatest trotter of his day; Ethel's Pride, the victor in this year's Transylvania, is by Directum, the peer of any trotting stallion the world has ever seen; Angle, this year's M. & M. winner, is by Axtell, the greatest colt trotter ever seen up to his time, and excelled by few since; Sadie Mac, probably the greatest race mare of her division and one of the best of all time, was by a Futurity winner, a stallion equal to the best of his or any other period; Sweet Marie, the champion of the all-aged division, is by McKinney, who was in the days of his racing career a tremendously high class horse. The history of the past clearly proves that the surest way to breed race horses is to breed to stallions who were possessed of great ability in this respect. A trotting failure is more than likely to reproduce himself; so is a great race horse—A. G. Leonard in Kentucky Farm and Breeder.

Strike—if they don't give you Jackson's Napa Soda when you ask for it.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle	Sept. 3 to 8
Salem	Sept. 10 to 15
North Yakima	Sept. 17 to 22
Spokane	Sept. 24 to 29
Walla Walla	Oct. 1 to 6
Lewiston	Oct. 8 to 13

Everett was given the privilege to select such dates as they may decide on.

DRAFTERS IN BIG DEMAND.

The Breeders' Gazette of Chicago says: Very high prices and a most active demand have characterized the horse market in the initial days of 1906. Desire to buy high class draft horses has been almost feverish in its intensity and last week a three-year-old grade Percheron gelding shipped in from Iowa sold at auction in Chicago for \$320. It is announced that this precocious youngster pulled up 2020 pounds on the scale beam. Of course he was marketed far too young, at least two years before his proper time, and he is not fit to go into active use on city streets, no matter how well developed he may be nor how large. With his immaturity and his year of dentition troubles before him it looks as though a tremendous price had been paid for him, but that if he goes on as he promises he will sell for a very long price when he is a five-year-old. However, the payment of such a tremendous price for a colt that must be called virtually a feeder merely explains the lengths to which buyers will go to provide themselves with good draft material for use in the great cities. A very easily obtained price indeed is \$250, and that that and still longer prices are not oftener paid is simply because the animals good enough to command them are not presented in large numbers. It is rare that a gelding commands such a price without being of high grade in breeding, that is, possessing several crosses of pure blood. Why, then, will it not pay farmers to go to the fountain head at once and buy the cheaper grade of pure-bred mares for the sole purpose of breeding geldings from them? In certain breeds, in fact in all breeds, mares may be procured for prices ranging from \$250 to \$400, and what would pay better than the mating of these with really good stallions, the emasculation of the males and their sale as geldings when well advanced toward maturity? Like hot cakes on a cold winter's day would be but a poor illustration of the way the resulting geldings would sell if it was known where they were to be had.

JAPANESE HORSES.

From the report of an American Consul in Japan it is learned that the Japanese horse is an undersized animal, not weighing over 900 or 1,000 pounds, stands under 14 hands high, and is entirely inadequate to the demands made upon him. It is no uncommon sight to see a small horse hitched to the ordinary Japanese four-wheeled dray, pulling with evident effort a load consisting of four or five bales of cotton, each weighing 500 pounds or over. This heavy strain is evident in the sprung hock joints and generally stiffened condition of comparatively young horses. Stallions and mares are commonly used for draft purposes, while geldings are seldom ever seen. The Japanese dray weighs about 900 to 1,200 pounds, and has small front wheels measuring about 15 inches in diameter with rear wheels nearly 40 inches in height. The pull of the load comes from a height of seven or eight inches from the ground; is indirect and necessitates greater effort than would be the case if it were made more direct.

The government has been engaged for some years past in the improvement of the quality of the Japanese horse and has recently imported from England thirty-three horses, including sixteen thoroughbreds, ten trotters, six hackneys and one saddle horse. These have been distributed to the various stud farms, situated in different parts of the empire. Many of the best horses purchased for the army have been distributed to the government farms for stud purposes. Quite a number have also been purchased in the United States.

There is a scarcity of horses in Japan, as all serviceable animals were commanded by the authorities, and farmers and others have been put to much inconvenience. A good opportunity for the introduction of horses suitable for draft and farm purposes is now presented, and American breeders should avail themselves of it by sending representatives to Japan to acquaint the authorities with their stock.

TWO CALIFORNIA BRED STALLIONS DEAD.

The last mail from New Zealand brought the news that the two California bred trotting stallions, Wildwood and Electioneer, recently died there.

Wildwood was bred at the Palo Alto Stock Farm and was sent to New Zealand in 1894. He was by Good Gift, the stallion presented to the Czar of Russia by Senator Stanford, and was out of Amulet by Fallis. He had a four-year-old record of 2:24 2-5 and a two-mile record of 4:55. In the Colonies he sired Rib-bonwood 2:09, the champion harness horse of Australasia, and several other good winners.

Electioneer was bred at Rancho del Paso and was by Albert W. 2:20 (son of Electioneer 125) out of Silica by Algona, second dam Galena by Nutwood. He won several important races after reaching the Antipodes, and in the stud sired Elector 2:18, The Member 2:19 and many other good winners.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
April 1-Sept. 1. Oct. 15-Feb. 1—Open season for taking steelhead in tidewater.
Sept. 10-Oct. 10—Closed season in tidewater for steelhead.
Sept. 10-Oct. 15—Closed season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 15-Nov. 15—Closed season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above the water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and age hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Jan. 10, 11—Bay State Co-operative Bench Show Association Fall River, Mass. Walter E. Stone, Clerk.
Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Jan. 18, 19—Lynn Kennel Club. Lynn, Mass. Tom B. Middlebrooke, Superintendent. Entries closed Jan. 6.
Jan. 24, 27—Southern Kennel Club. Memphis, Tenn. Harry W. Clapham, Secretary. Entries closed Jan. 10.
Feb. 13, 15—Westchester Kennel Club. New York. Robt. V. McKim, Secretary. Entries close Jan. 25.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emory, Secretary. Entries close Jan. 30.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary. Entries close Feb. 22.
March 1, 3—Southern Ohio Kennel Club. Hamilton, Ohio. Thos. Boll, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary. Entries close Feb. 25.
March 8, 10—Colorado Kennel Club. Denver, Col. T. W. Bartels, Secretary.
March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
May —San Francisco Kennel Club. 10th annual bench show. Fred P. Butler, Secretary.
May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary. Brighton Beach, L. I.
June 1-2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.
Sept. 3, 6—Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary.
Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary.

Field Trials.

Jan 8—Pacific Coast Field Trials Club, 23d annual trials Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.
Jan 8—Texas Field Trial Club. 4th annual trials. Kansas City, Tex.
Jan. 9—Georgia Field Trial Association. 4th annual trials. Waynesboro, Ga. P. M. Essig, Secretary. Atlanta, Ga.
Jan. 15—United States Field Trial Club. 17th annual trials. Grand Junction, Tenn. W. B. Stafford, Secretary.
Jan. —National Championship Field Trial Club. 10th annual trials. Following U. S. All Age Stake. W. B. Stafford, Secretary, Trenton, Tenn.

PACIFIC COAST FIELD TRIALS.

The twenty-third annual trial of the Pacific Field Trials Club were run near Bakersfield, Kern county, commencing Monday, January 8th and concluded on Saturday, the 13th.

Taken as a whole the trials were successful in most respects. The Derby, to the regret of many present, did not begin to compare with the stake of 1905. The dry conditions of the grounds and unfavorable weather prevailing the first two days of the meeting was a handicap which the young dogs could not overcome. Towards the end of the week weather conditions were a bit more favorable.

Mr. J. W. Baughn of Ridgeville, Indiana, judged each stake, his decisions being favorably received. In the Derby the associate judges were Henry L. Betten and John H. Schumacher. Mr. Schumacher gave way to Mr. W. Dormer in the All Age as he had his dog, Sir Roderick, among the starters.

Bessie Mootimer, the Derby winner, is a stylish and merry worker and a remarkably good looking English Setter. The daughter of Kilgarif, out of Lady F., showed the class expected of her, notwithstanding the limited opportunities offered.

Aunt Marie, winner of second in the Derby, is a well built medium sized liver and white English Setter bitch that is a painstaking and persistent worker. It was the opinion of a number of sportsmen who saw her work her heat in the first series that had ground and scent conditions been right a most interesting race would have been put up.

Lady Belle, a clean, racy built white and liver ticked Pointer bitch, showed class to a degree. Frank Schumacher, her owner, came up from Los Angeles with a broken arm in a sling. He had faith in his dog and his gameness in following the cavalcade each day "entitled him to win," as one of the enthusiasts put it.

The All-Age stake was of a more pleasing texture, the dogs running in this stake being more or less seasoned field trial workers.

Kilgarif, the winner, easily sustained his reputation as a consistent performer. He is a stylish, strong-

ly built, upstanding white, black and tan dog. He has endurance and speed, is a wide goer and is endowed with lots of bird sense. Orion, his sire, was a winner at one of the Coast trials. Kilgarif's field trial career began with the Coast Derby in 1903, which he won. He also won second in the Coast All-Age event in 1904, third in the Independent trials All-Age in 1905. Policy Girl is a handsome little bitch, whose stature belies her classy qualities, for she possesses speed and stamina that is surprising. She is a bird hunter and field trial worker that, considering her size, is rather surprising. She won third in the Pacific Northwest All-Age in 1904, first in the British Columbia All-Age in 1905 (beating Kilgarif) and second in the Pacific Northwest All-Age in 1905. Avalon is a good type of a Setter and is a promising dog. He ran unplaced last year in the All-Age. His work in the second series of the All-Age and later in the Championship stake stamps him as a class dog.

Raffles, winner of the Members' Stake, notwithstanding the lamentable showing he made in the Derby, when he found birds, on Friday redeemed the promise of his breeding. Elsie second, was not in the best condition for the long heat she had, but she proved herself a game one and is a painstaking and stylish bird finder. Betsey, third, is a handsomely built liver and white bitch full of class.

The Champion Stake was clearly Policy Girls' until the last 15 minutes of the two hour heat when she stopped. Cuba Jr. showed far better form in this race than in the All-Age. Avalon, the runner up, had also got into better going.

At the annual meeting of the club Wednesday the following officers were elected: Hon. H. W. Keller, Santa Monica, President; John H. Schumacher, Los Angeles, First Vice-President; Joseph E. Terry, Sacramento, Second Vice-President; Albert Betz, San Francisco, Secretary-treasurer; Messrs. Elmer E. Cox, Madera; W. W. Van Arsdale, Frank W. Jermyn, San Francisco; W. S. Tevis, Bakersfield, and Charles N. Post, Sacramento, Executive Committee.

The Executive Committee were authorized to select the grounds for the next annual trials of the club which will be held in the last full week of January, 1907.

The Committee of Ways and Means, composed of Messrs. W. W. Van Arsdale, Joseph E. Terry, H. W. Keller, Elmer C. Cox, Dr. C. W. Hibbard and F. H. Jermyn, were invested with power to acquire a club preserve either by lease or purchase.

The following new members were elected: J. G. Roberts, Madera; John Erikson, Seattle; Lloyd Tevis, Bakersfield, Rube Louis, San Francisco; Dr. J. M. Dunn, San Francisco; A. B. Spreckels, San Francisco; Victor Caglieri, San Francisco; F. D. Ross, Hanford; William Yeadon, Eldorado; Judge W. J. Baughn was elected an honorary member of the club.

A note of thanks was extended by the club to Mr. W. S. Tevis for many courtesies extended.

Among those present during the trials were W. W. Van Arsdale, Clinton E. Worden, E. N. Briggs, Dr. J. M. Dunn, Andrew Jackson, Dr. C. W. Hibbard, H. T. Payne, Frank Mayer, J. X. DeWitt, Victor Caglieri, S. Christenson, Frank H. Jermyn, Rube Louis, R. A. Smyth, J. W. Flynn of San Francisco; John Erikson, Seattle; Mr. and Mrs. W. S. Tevis, Mr. and Mrs. Captain Taylor, Masters Lloyd, Willie, Gordon and Lansing Tevis, Mr. T. Hopkins, H. E. Packard, Clem Wilson and Ed. King, Bakersfield; A. F. Jilson, Jas. E. Terry and Hon. Chas. N. Post, Sacramento; Elmer E. Cox and J. G. Roberts, Madera; J. M. McDaniels, Paso Robles; Hon. H. W. Keller, Santa Monica; John H. Schumacher, Frank G. Schumacher, Percy Schumacher and Gen. C. F. A. Last, Los Angeles; Dr. C. E. Wilson, Albert Betz, H. L. Betten, Alameda, Wm. Dormer, Oakland; R. E. Galloway, Bakersfield; Wm. Yeadon, El Dorado county; W. L. Whelpley, F. D. Ross, Hanford; Milton Donley, Fresno; Manager R. M. Dodge and Handler S. N. Carlisle, Stockdale Kennels; W. B. Coultts, Chas. and Fred Coultts, Kenwood Kennels; Chas. H. Babcock and Mrs. Babcock, Del Rey Kennels; John E. Lucas, Mount Clemente Kennels; THE DERBY.

The drawing for the Derby took place Sunday evening, January 7th, twenty-two entries paying the starting fee—11 English Setters and 11 Pointers. The starters and detailed order of running in the first series being as follows:

Monday, January 8, 1906—A cool, fairly bracing morning tempered by a light frost the night before promised well for the day's running. The sanguine expectations of those in attendance were not realized except in a few instances, for the results during the first day of the trials were disappointing, particularly to those who had been present during the Derby of 1905, which event was from start to finish a procession of stylish performances.

The general quality of the eight braces of young dogs running to-day was not up to the standard looked for, not that they were a bad lot by any means. Nearly all of the heats in the first series were blank on birds. The impression prevailed with some sportsmen present that it was the intention to run the dogs in open ground as a trial of speed and endurance, hunting and ranging qualities and attention to the course, and that consequently no particular efforts would be made to get among birds. This impression was erroneous, for while the tryout of the qualities mentioned was much desired, when birds were located

every opportunity was given the puppies to show their abilities. There were, now and then, some neat bits of work, but almost every dog in the sixteen smirched the bright colors in his heat with a veneering of subsequent faulty work that ordinarily should have put him out of the running.

The general opinion finally prevailed that the dry condition of the ground, particularly so on several fields where the alkali dust was alike disagreeable to man and dog, was the principal reason for many instances of apparently wretched nose work. Dogs ran close by birds a number of times, finally flushing the quail when they galloped almost over them. The birds favored by the weather, were enabled to hold scent apparently to a baffling degree.

Tod Sloan—Misfit—At 9:30 a. m. the first brace were put down at the northeast corner of Section 16, 7 miles from Bakersfield, in open ground covered with low dry weeds. The course was southwest. Tod Sloan, Chas. Coultts, handler, and Misfit in charge of Lucas, set off at a merry clip but did not range far enough out to locate a small bevy, which was seen in some dry weeds to the left. Shortly afterwards Misfit found fur chasing to her liking and failed to show up for ten minutes. The circuit of the field was made, but no birds were found. Ordered up at 10 o'clock. All heats in the first series were not less than 30 minutes duration.

Merry Duchess—Sonoma—The next brace down at 10:15. Merry Duchess, Fred Coultts handler, with Sonoma, Chas. B. Babcock handler. This pair were cast off at the starting point and drew a blank after the second trip around the mile square section. Sonoma has speed and good ranging qualities and showed a bird hunting disposition that won the good opinion of the spectators.

Madera—Goliath—Were cast off at 11:03. Madera in charge of Babcock, and Goliath with Coultts Sr. as handler. The two Setters started in a field in section 17, west of the first ground, drew blank and were again put down in a field further west, beyond a wide irrigation ditch. The course was north and shortly birds were located in a patch of sparse low cover studded with cottonwoods. Goliath shortly found and made the first point of the day. Both dogs showed a fancy for rabbit running at times. In fact, this penchant, varied by flushing and chasing back, was of too frequent occurrence. This heat was the best of the forenoon, both dogs were speedy, ranged wide and hunted well. Goliath for a large dog is an easy paced, quick mover and covers a deal of ground well. Up at 11:33.

Mishap—Navajo—At 11:50 Mishap, Lucas handler, and Navajo, Chas. Coultts, were put down in a field further west and tarted on a southerly course, dogs' handlers, judges and the cavalcade of spectators followed across the road on to a pasture field of the Fraser ranch. Birds were seen flying into the trees ahead, a few shots were fired to scatter them when suddenly a large bevy flushed, scattering in every direction, principally to the tree tops. The dogs repeatedly ran by birds, bird scent was a hard problem for young dogs working over ground rooted up by hogs. Finally in the southeast corner of the field little Mishap, a merry worker all throughout the heat, located and pointed nicely after flushing a bird. Lucas claimed the point, followed up, flushed and fired a black cartridge. Mishap was staunch to wing and shot. Up at 12:30. Birds were so plentiful any time during the heat that they were pelted out of the tree tops by the spectators. Many were marked down afterwards, but when the spot was worked it was found the birds had sprinted to different localities for the time being.

After luncheon at the Gosford ranch house the fifth brace was cast off 'two miles away on what is known as the "mule field," west of the Canfield schoolhouse, eleven miles from Bakersfield.

Aunt Marie—Hickorywood—At 1:55 p. m., in a northerly direction, Aunt Marie, Coultts Sr. handler, and Hickorywood, handled by Dodge, were cast off. Marie proved to be a swift, wide going ranger and merry worker. Her style elicited the favorable comment of many. Hickorywood seemed to like to linger near his handler. The pair finally located a bunch of scattered birds, but neither seemed to use the nose, for not a point was made. A number of birds were flushed by both dogs. Up at 2:37.

Senator Don—Senator Jack—Two sons of ch. Senator P., were put down at 2:43 in an adjoining alfalfa field. Don with W. B. Coultts, and Jack in charge of Chas. Coultts. Both dogs ran by birds. Jack pointed and then flushed two birds, dropping to wing. Don seemed to be unable to find. Both dogs were working a patch of dry weeds, Jack distinguished himself by galloping into and flushing a large bevy. Up at 3:15.

Oakwood—Dollie—Cast off at 3:30 in Section 25, opposite the schoolhouse. Dodge handled Oakwood and W. B. Coultts handled Dollie. Both dogs were fast wide goers. Dollie made the first find near the road. Oakwood honored just as the bird flushed. Dollie again pointed, backed nicely by Oakwood, no bird was found, probably a runner. Oakwood had a fancy for fur chasing in this heat. Up at 4.

Uncle Dudley—Raffles—Cast off at 4:10 in the same field and on a similar course. Chas. Coultts handled Raffles, Lucas handled Uncle D. This pair was considered the class of the day and much was expected of them. Over the same ground as the preceding brace they drew blank. The judges then ordered the dogs put down, across the road, in the field north of the schoolhouse, where birds were known to be lying. Birds were soon located. Both dogs were speedy and stylish workers. Each made wide casts and quartered in well. Nose work and scent would not assimilate for numerous birds were flushed. Dudley finally settled on a point and was steady to gun-fire and flush. Up at 4:52.

Tuesday, January 10th—Morning cool, with a slight southerly breeze. The character of the heats run

to-day, while showing at odd times, some excellent individual exhibitions, was practically colorless, for almost every heat was barren of bird work. The general failure of the young dogs to discover birds was no doubt caused by the dry and dusty state of the ground gone over. The rather warm day and lack of scent wafting wind also militated against the desired showing on birds.

Most of the grounds gone over were the same as were worked the day before, save a vineyard on the Canfield ranch, opposite the schoolhouse. Birds were fairly plentiful, but it was very difficult to get them in favorable cover. Several times the quail were routed out of trees with clods and sticks, efforts were made to scatter bevs and to drive the birds into open ground, these attempts proved futile in most cases.

Encinal-Baywood—Cast off at 9:15, in Section 16, practically the same ground and course over which the initial brace of the Derby started. Baywood, handled by Dodge, found first, a small scattered bevy in open cover, the Pointer was steady and nicely backed by Encinal. After this there was several flushes, both should have done more work. The Setter also had a fancy for fur. Up at 9:55.

Senator-Montauk J.—Cast off at 10, in same field. Senator, in charge of W. B. Coutts, here showed pace and range that took him into the second series. The field drew blank and the pair were taken into Section 17, to the west, going south after a large bevy had been flushed by a rider. Senator found twice and was steady to shot and wing. Both dogs were off in nose. Up at 10:45.

Bessie Mortimer-Lady Belle—Cast off at 10:55, westerly over good ground in Section 17. A large bevy was discovered an eighth of a mile away in the open. These birds were flushed by a rider, who vainly tried to turn them to advantageous cover. Enough single birds were left for the dogs to hunt after. Both dogs were stylish and classy workers. The heat was the only errorless one of the series. The single opportunity for a point was taken advantage of by Bessie, in charge of Fred Coutts, who was steady to wing when the bird flushed. Belle had no chance on birds, she was handled by W. B. Coutts. Up at 11:25. This ended the first series, during which there were no bevy points.

After lunch at the Gosford ranch, the judges announced the following dogs carried into the second series: Senator with Mishap, Goliath with Sonoma, Lady Belle with Encinal, Bessie Mortimer with Aunt Marie, Uncle Dudley with Baywood were the reserve brace.

Senator-Mishap—Cast off at 2:32 in a vineyard on the Canfield ranch. Birds were seen shortly after, but they were wild and took to the trees. Senator's nose was not up to expectations; several points were claimed, but no birds were found. Mishap failed to honor on one occasion.

Goliath-Sonoma—This brace was run on the installment plan. Sonoma and Handler Babcock were absent. Goliath was put down at 3:15 in a field north of the schoolhouse and ran fifteen minutes with Tod Sloan as a work mate. Babcock drove up shortly afterward and then ran his charge for fifteen minutes, after which both dogs ran together for about twenty minutes. Scattered birds were discovered several times, but neither dogs located birds nor made any points. Up at 4:28. Mr. Van Arsdale afterwards withdrew Sonoma, deciding to abide by the rules. This action was in accordance with the ethics of sport, for Babcock's absence was unavoidable and the abeyance of the rule was satisfactory to all. Sonoma was looked upon as having an excellent chance for a place.

Encinal-Lady Belle—Down at 4:52, south of the last field worked, in Section 17. Birds were marked out in alkali woods cover, to which they had flown from the high cottonwoods alongside the county road. Encinal pointed once and showed good bird hunting qualities. The brace were called in at 5:30.

Wednesday, January 10—The ground selected for the Derby finals was near Gosford Station, six miles southwest of Bakersfield.

Bessie Mortimer-Aunt Marie—Cast off at 9:25 in Section 20. Birds were soon found in scattered willows and a wide bottom swale. Marie scored a single and was steady to flush, Bessie backing stanchly. Both dogs did satisfactory bird work during the ten minutes they were down.

Goliath-Encinal—Cast off at 10, on the same ground. After ten minutes work on a few scattered birds they were taken up. Goliath chased a rabbit in this heat. Encinal did not show up as strong as previously.

Lady Belle, a bye—Put down at 10:30, on the same ground. Belle cut out a merry clip and covered ground closely in search of birds, but drew blank. Up at 10:40.

The judges then announced the winners as follows: Bessie Mortimer first, Aunt Marie second, Lady Belle third.

ALL-AGE STAKE.

The All-Age Stake was started Wednesday morning, after the Derby. The route taken was towards the Gosford ranch. The drawing took place Tuesday night, with 21 starters named, run in the following order:

Kilgarif-McCloud Boy—Put down at 10:50, in open, weedy country. Kilgarif, handled by W. B. Coutts, McCloud Boy handled by Babcock. Kilgarif swept away in a wide cast and worked ground closely and with great speed. He seemed to intuitively understand that birds were not in that locality. Then, making another cast, he brought up in cover across the railroad track, where he was found dropped to a bevy point. Following this up, he quickly pointed six singles in a snappy manner that was an exhibition of work on quail that was believed would not be excelled or possibly approached by any other dog in the stake. This episode was the first showing of the

kind of work the enthusiasts were so anxious to see, and was a rift in the clouds of prior disappointment. McCloud Boy backed Kilgarif steadily, but did not get a point credit, he failing to locate a bird. Both dogs have pace, range, and are merry workers. The heat, however, was Kilgarif's by a wide margin.

Kenwood-Count's Gift—Cast off at 11:25 in the same field, no opportunity for bird work offered, ordered up after a run of 30 minutes.

After lunch at the Gosford ranch a drive of three miles southeast to Section 21, where birds were known to be.

Cuba Jr.-Chiquita—Chiquita, Lucas handler, was substituted in this heat for Uncle Jimmie Whitestone, withdrawn by Lucas, because he was too sick to run. Chiquita had drawn a bye. Cast off in the southeast corner of Section 21 at 2:20. The course was over an open dry-weed covered field. After a wide cast northerly a lot of birds were flushed from trees. Cuba pointed several of the high perching birds and was steady both to shot and wing. Chiquita came to a stanch point just as the birds flushed. Both dogs showed good speed, range and endurance. Up at 2:53.

Belle Fontaine-Policy Girl—Cast off at 2:58, they worked over open ground to scattered cottonwoods and willows in the western section of the field. Belle, Chas. Coutts handler, found two bevs and made four singles. Girl, in charge of Lucas, did some good work off to the south while on a long cast. She located a bevy and made several singles, she seemed to be a little unsteady in backing at times. She showed a shade greater range and speed than Belle. Both dogs were stanch to shot and wing. Up at 3:16.

Checkmate-Romp—Put down at 3:40. Checkmate in charge of Dodge found twice, as did Romp, who was handled by Fred Coutts. Both were steady to shot and wing. The Pointer, however, refused to honor Romp's point. Up at 4:15.

Thursday, January 11th—A blustering sandstorm with all the up-to-date discomforts for man and beast such as only the Mojave desert can produce, put a quietus on the sport to-day. Weather conditions were very unfavorable when the start was made early in the morning for the locality the judges had selected for the opening heat, Section 16, a district that had been gone over by the Derby dogs. A southeast wind was working up and the air was laden with infinitesimal particles of sand. The weather prophets present were kind enough to outline what was in store for man, horse and dog, nor were they, as after events proved, wrong in their forecast.

As the day advanced the wind grew stronger and the irritation from the alkali dust increased. The dogs sent away over the fields were all apparently willing to work honestly, but the best of them were repeatedly at fault. Nose was secondary to sight, and the latter quality was handicapped by burning particles of alkali dust. Birds were found rather plentifully. Notwithstanding the dogs often ran over ground where birds were lying close without locating them. Many birds were afterwards flushed by those following the dogs. In several instances birds held so close to cover that they were approached almost within reaching distance before flushing. Nose was at a discount and scent was a tradition. Every time birds and rabbits were disturbed it was noticeable that they left a lee side shelter.

Calaveras-Star's Rod—Cast off at 9:09, the route was west over an open field full of bunches of tumble weed and alkali spots. Both dogs were speedy rangers and showed bird hunting qualities to a degree. After a run of forty-three minutes, during which birds were an unknown quantity, the dogs were taken up. Babcock handled Calaveras, Dr. Wilson looked after Star's Rod.

Del Rey Belle-Ivywood—Cast off at 10:07, Dodge handling Ivywood and Chas. Coutts in charge of Belle, in the same field. After a ten-minute run they were sent off in promising ground on Section 15. After a run through scattered willows and cottonwoods some pretty bird work took place in open ground south. Belle received credit for a bevy point and three singles. She was steady under gunfire and to wing. Ivywood did the proper honors in backing. This brace ran thirty minutes.

Sabine's Mollie-Cuba's Japan—Cast off in the same section at 10:31. This heat was an eye-sore and heart-breaker to those following the dogs. Single birds were often flushed after the Pointers had worked over the ground and several small bevs were stirred up. The wind and dust was too strong a factor for any dog, no matter how classy. A number of points were claimed, but not allowed. Birds were nowhere on investigation. The dogs worked as well as they knew how, but they were up against a hard proposition.

Avalon-Countess Lou—A change of ground was taken to the northwest corner of Section 17, fairly open country with scattered cottonwood trees. Here at 11:35 Avalon, Babcock handler, and Countess Lou, W. B. Coutts handler, were sent away at a merry clip. Both dogs soon struck open country. Countess making an especially wide cast. A large bevy of quail flushed some distance ahead of the advancing horsemen. When the dogs came to the same ground they failed to locate birds. Single birds were repeatedly flushed afterwards. It was conceded by everybody present that under the conditions the dogs were not at fault.

After lunch at the Gosford ranch, the whole party drove to Section 21, three miles southeast, where birds could be found.

Sir Roderick-Keepsake—Cast off at 2, in open ground skirted by poplars and cottonwoods. Babcock handled Keepsake, W. B. Coutts handled Sir Roderick. Two minutes after the dogs started a bevy of at least 100 quail was flushed by the riders. The dogs were working well out to each side. Here birds were found in plenty and the ground was quartered back and forth. Many birds were flushed by people after

the dogs had gone over. The wind was blowing so fiercely at this time that it was often difficult to tell whether a running object in the open was one of the dogs or a bunch of tumble weed. Keepsake finally came to a stanch point and was steady to the flush and shot. Rod was not within distance to honor.

At 2:35 the dogs were ordered up and it was decided to start a-fresh on Friday morning. Indications for rain during the night raised hopes with the sportsmen for the possibility of observing better work during the running of the second series.

Friday, January 12th—The dogs selected by the judges for the second series were Countess Lou with Calaveras, Star's Rod with Avalon, Keepsake with Policy Girl, Belle Fontaine with Kilgarif.

The overcast sky promised rain and the storm of Thursday served to clear and cool the atmosphere, thus making weather conditions somewhat more favorable.

Countess Lou-Calaveras—Cast off at 9:20 in the northeast corner of Section 21. The dogs made a straightaway cast to the south and in a very short time a large number of birds were located, but neither dog made a point. They were clearly off in nose, and from this it was thought that the experience of the prior two days was to be repeated. Up at 9:40.

Star's Rod-Avalon—Cast off at 9:45 on the same ground. In a very short time Avalon located a bevy, following with two singles, Star's Rod failed to find, but he backed prettily. Both dogs developed fine pace and range.

Keepsake-Policy Girl—Birds being plentiful here and the cover being all that could be desired, it was decided to complete the series on the same ground, and the next brace. Keepsake (Babcock) and Policy Girl (Lucas), were cast off from the south side of the field at 10:15. A northerly course was taken along the knoll, on which was some likely cover. The dogs worked the ground rapidly and thoroughly, both showing remarkable speed and range, but they failed to locate any birds. The heat clearly belonged to Policy Girl. She was on the outside all the time.

Kilgarif-Belle Fontaine—The next and final heat of the second series was between Kilgarif (Charles Coutts) and Belle Fontaine (W. B. Coutts). Down fifteen minutes to a blank.

Kilgarif-Policy Girl—After the dogs were ordered up the judges called for Kilgarif and Policy Girl to run a heat together to determine the respective merits of the two favorites. They were down about thirty minutes, but again failed to locate any birds and, after being taken up, Judge Baughn announced the winners as follows: Kilgarif first, Policy Girl second, and Avalon third.

MEMBERS' STAKE.

After the usual appetizing lunch provided by the club and served daily at the Gosford ranch, under the supervision of Fred Tegeler, of the Southern Hotel, Bakersfield, who was most painstaking during the week to make everybody comfortable and well provided for, the Members' Stake was drawn with eight starters—two English Setters and six Pointers. This event was not without several comedy flashes, for among the spectators were a number of quick-witted geniuses who were not averse to offering the amateur handlers more or less pertinent advice at critical times. How palatable this may have been can easily be understood when several of the gentlemen in charge of their shooting dogs were well supplied with adipose tissue and the going was not as smooth as body Brussels. Taken altogether the event was of much interest. The weather conditions, ground and birds were all favorable to an excellent showing.

The entries and order of running were as follows:

Lloyd Tevis' Pointer Elsie with W. S. Tevis' Pointer Stella.

J. McDaniels' English Setter Cloudlight with S. Christenson's Pointer Raffles.

J. M. Donley's English Setter Monterey with Clinton E. Worden's Pointer Betsey.

F. D. Ross' Pointer Swede with Howard B. Smith's Pointer Lottie Ripstone.

Elsie-Stella—Cast off at 1:25 in the field east of the Canfield schoolhouse. Dry weeds, cornstalks and open alfalfa stubble was the variety of cover worked through. The heat was a pleasing exhibition between two superior hunting dogs. Elsie, in charge of Master Lloyd Tevis, had a shade in pace and range over Stella. No birds were found. Up at 1:35.

Raffles-Cloudlight—Cast off at 1:38, over the same ground. Cloudlight (McDaniels) came to a point fifteen feet from the starting point. The find was not given credit and a bird was flushed by the advancing handlers and judges. A bevy was shortly flushed. Raffles cut away on a long cast to the left through the cornfield. He found and was steady on his singles. Cloudlight also located several singles. Up at 2.

Monterey-Betsey—Put down at 2:10, for thirty minutes. Off in open ground on east side near a large haystack. Betsey made one bevy point and three singles. Monterey found a bevy and came to point on a single bird. Both dogs worked nicely. The Pointer, in charge of Mr. Worden, and H. W. Keller handled the Setter. This was clearly an individual heat, the dogs were too far apart to honor each other on point. Both were steady to wing.

Lottie Ripstone-Swede—Down for twenty minutes in the same field. Both had fair range and speed. Swede worked out a find on a single bird in close cover. Opportunity for extended work did not arise.

Raffles-Elsie—The final heat of the stake was of one hour and eight minutes duration. Cast off at 3:15 in the field opposite the schoolhouse on open ground, the brace worked westerly into the vineyard. Birds were plentiful. Both dogs found single birds, each honored the other consistently and were steady to shot and wing. Raffles was the fastest and had the most range.

The judges announced the winners as follows: First, Raffles; second, Elsie; third, Betsey.

CHAMPIONSHIP STAKE.

Saturday, January 13, 1906. A morning with a light southeast breeze and the atmosphere faintly humid, overhanging heavy clouds and a downpour of rain in the distant southwest were all more pleasing features for the running of the Championship Stake than had ensued during any of the previous days. There were four starters, Stockdale Kennels Pointer (Cuba Jr. (Dodge, handler), W. W. Van Arsdale's English Setter McCloud Boy (Babcock), W. W. Van Arsdale's English Setter Policy Girl (Lucas), and W. W. Van Arsdale's English Setter Avalon.

Cuba Jr.-McCloud Boy—Cast off at 9:10 at the northeast corner of Section 16, down for a two-hour heat. The course was southwest. Both dogs went away at a lively pace. From the start the range and speed were clearly Cuba's, and this pace he maintained throughout the entire two-hour heat and also in the final half-hour heat. Cuba cut away on several wide ranging casts and in fifteen minutes located birds in the low weedy cover of the open field. He made a bevy point following with a snappy nose to a single. Shortly afterwards he located birds in dry willows and was steady to gun fire and wing. McCloud Boy was by no means idle; several points and backs were made by him. Both dogs did some pretty work in heavy brush after which they were taken eastward into Section 15. A detour of the field drew blank. Both again found birds in Section 16. Cuba was busy after birds all the time and never let up in speed or quartering his ground. Up at 11:10. During this run Mrs. Tevis was an interested spectator. She arrived on the field driving a handsome pair of matched ponies to a phaeton.

Policy Girl-Avalon—Cast off at 11:35 in the northeast corner of Section 17. The route was west and south in an open pasture field with scraggy cottonwoods here and there. A slight drizzle at this time helped matters considerably. Both dogs shot away with the speed of coursing hounds. Birds were soon found close to the west fence line, and then the fun began. Girl located the bevy and had a shade in speed and range. Both dogs were classy and covered their ground in the merry fashion so dear to the hearts of sportsmen. Scattered birds gave opportunity for each dog to score points. Each honored the other in backing and both were steady to gun-flash and the birds' flight. A pretty double back then took place in the open field half a mile to the southeast. Girl came to a point after a wide cast off to the south, McCloud was a quarter of a mile away and came sailing down the line into steady position, while Girl wheeled into a back to the visiting Setter. Further on, beyond a wide ditch, a large bevy was flushed by the following rigs. The birds laid so close that the wagons approached within ten feet before they flushed. Here both dogs worked merrily, each found birds and every phase of a dog's performance with a scattered covey was vividly shown to the greatly pleased spectators. These two half-hours compensated for all the previous blanks and mediocre work of the trials. The course led away to the northeast into heavy ground, interspersed with alkali patches. This locality was the Waterloo for Policy Girl. She had so far shown the class, speed, range, attention to course, nose and bird work that put the race to her credit, but the clever little Setter here succumbed to the pace that was too strong a test for her endurance and within fifteen minutes of victory she came to heel and refused to face the finishing touches of the race. Gallant as was her work throughout, she quit and was counted out, for dogs, like horses, must finish under the wire. The fact that she was in season, had been served by Avalon the day before, and scoured repeatedly during the heat may be taken into consideration as strong factors in inducing her to let up.

Cuba Jr.-Avalon—This unexpected situation prompted the announcement by the judges, after consultation, that Cuba Jr. and Avalon would be put down at three o'clock for a thirty minute heat to try for first and second places. The brace were put down at the center post on section 21. The heat was not of an overly exciting nature, for but few birds were found. Cuba showed that he had a reserve fund of endurance throughout the run. Avalon kept up to his performance in the previous heat. The dogs were ordered up at 3:33 p. m. and the judges announced the winners: Cuba Jr. first, Avalon runner up.

Summaries.

Bakersfield, January 8, 1906—Pacific Coast Field Trials Club's twenty-third annual trials. Derby, for Setters and Pointers whelped on or after January 1st, 1904. Purse \$640, 3 moneys, 50, 30 and 20 per cent and trophy to each winner. \$5 to nominate, \$5 second forfeit. \$10 additional to start. 46 nominations, 38 paid second forfeit, 22 starters (11 English Setters, 11 Pointers). W. J. Baughn, Ridgeville, Ind.; H. L. Betten, Alameda, Cal., and John H. Schumacher, Los Angeles, judges.

First Series.

W. B. Coutts' (Kenwood, Cal.) liver and white Pointer dog Ted Sack (Ch. Cuba of Kenwood-Petronella), whelped July 19, 1904. Owner, breeder; Fred Coutts, handler.

J. W. Considine's (Seattle) white and black English Setter bitch Misdit (Count Rowdy-Roxane), whelped September 23, 1904. Owner, breeder; J. E. Lucas, handler.

Jos. E. Terry's (Sacramento) white and orange English Setter bitch Merry Duchess (Fairland Dude-Merry Heart), whelped July 30, 1904. Chas. N. Post, Sacramento, breeder; Fred Coutts, handler.

W. W. Van Arsdale's white and liver Pointer bitch Sonoma (Dr. Daniels-Babe Jingo), whelped January 13, 1905. Owner, breeder; C. H. Babcock, handler.

W. W. Van Arsdale's (San Francisco) white and orange English Setter bitch Madera (Uncle B.-Count's Gift), whelped August 24, 1904. Owner, breeder; C. H. Babcock, handler.

With

S. Christenson's (San Francisco) black white and tan English Setter Goliath (Kilgarif-Maggie F.), whelped April 3, 1904. P. D. Linville, breeder; W. B. Coutts, handler.

J. W. Considine's blue belton English Setter bitch Mishap (Count Rowdy-Roxane), whelped September 23, 1904. Owner, breeder; J. E. Lucas, handler.

With

W. J. Morris' (Los Angeles) white, liver and ticked Pointer bitch Navajo (Teddy Kent-Jack's Fashion), whelped May 20, 1904. Owner, breeder; Chas. Coutts, handler.

Stockdale Kennels' (Bakersfield) white and liver Pointer dog Hickorywood (Ch. Cuba of Kenwood-Petronella), whelped May 1, 1904. Owner, breeder; R. M. Dodge, handler.

With

Hugh Hopkins' (Minturn, Cal.) chestnut and white English Setter bitch Aunt Marie (Uncle B.-Sport's Belle), whelped January 3, 1904. H. R. Edwards, breeder; W. B. Coutts, handler.

John Erikson's (Seattle) white and black Pointer dog Senator Jack (Ch. Senator P.-Miss Rap), whelped July 23, 1904. J. W. Flynn, breeder; Chas. Coutts, handler.

With

J. W. Flynn's (San Francisco) white and orange Pointer dog Senator Don (Ch. Senator P.-Flynn's Dolly Jingo), whelped May 13, 1904. Owner, breeder; W. B. Coutts, handler.

Stockdale Kennels' liver and tan Pointer dog Oakwood (Ch. Cuba of Kenwood-Petronella), whelped May 1, 1904. Owner, breeder; R. M. Dodge, handler.

With

J. W. Flynn's white and lemon Pointer bitch Dollie (Ch. Senator P.-Flynn's Dolly Jingo). Owner, breeder; W. B. Coutts, handler.

J. E. Lucas' (San Rafael, Cal.) black, white and tan English Setter dog Uncle Dudley (Count Whitestone-Count's May Belle), whelped May 17, 1904. White and Peebles (Seattle), breeders; Lucis, handler.

With

F. H. Jermyn's (Scranton, Pa.) white and black Pointer dog Raffles (Ch. Senator P.-Miss Rap). J. W. Flynn, breeder; Chas. Coutts, handler.

Stockdale Kennels' white and liver Pointer dog Baywood (Ch. Cuba of Kenwood-Petronella), whelped May 1, 1904. Owner, breeder; R. M. Dodge, handler.

With

Mrs. C. E. Wilson's (Ross, Cal.) white, black and tan English Setter Enchinal (Clipper W.-Rod's Sylvia), whelped September 8, 1904. Dr. C. E. Wilson (Ross), breeder and handler.

J. W. Flynn's Pointer dog Senator (Ch. Senator P.-Flynn's Dolly Jingo), whelped May 13, 1904. Owner, breeder; W. B. Coutts, handler.

With

H. A. Jones' (Eureka, Cal.) white, black and tan English Setter dog Montauk J. (Bruce-Juna H.), whelped April 10, 1904. Owner, breeder; S. N. Carille, handler.

Jos. E. Terry's white and orange English Setter bitch Bessie Mortimer (Fairland Dude-Merry Heart), whelped July 30, 1904. Chas. N. Post, breeder; Fred Coutts, handler.

With

Frank G. Schumacher's (Los Angeles) white, liver and ticked Pointer bitch Lady Belle (Teddy Kent-Jack's Fashion), whelped May 20, 1904. W. J. Morris (Los Angeles), breeder; W. B. Coutts, handler.

Second Series.

Senator with Mishap.
Goliath with Sonoma.
Lady Belle with Enchinal.

Bessie Mortimer with Aunt Marie.

Third Series.

Goliath with Enchinal.
Lady Belle, a bye.

Result.

First, Bessie Mortimer; second, Aunt Marie; third, Lady Belle.

Bakersfield, January 10, 1906—Pacific Coast Field Trials Club's twenty-third annual All-Age Stake. Open to all Pointers and Setters not winners of first in any prior All-Age Stake. Purse \$440, 3 moneys, 50, 30 and 20 per cent and trophy to each winner. Entrance \$10, \$10 additional to start. 24 nominations (17 Setters, 7 Pointers). 20 starters (14 English Setters, 6 Pointers). W. J. Baughn, H. L. Betten and William Dorrmer, judges.

First Series.

Jos. E. Terry's (Sacramento) white, black and tan English Setter dog Kilgarif (Orion-Mary Lou), whelped July 28, 1901. Owner, breeder; W. B. Coutts, handler.

With

W. W. Van Arsdale's white, black and tan English Setter dog McCloud Boy (Tony Boy-Sadie Hopkins), whelped December 25, 1900. H. Hopkins, breeder; C. H. Babcock, handler.

Jos. E. Terry's white, black and tan English Setter dog Kenwood (Kilgarif-Iona S.), whelped June 22, 1903. Owner, breeder; Fred Coutts, handler.

With

W. W. Van Arsdale's white and orange English Setter bitch Count's Gift (Count's Mark-Verona Schoolgirl), whelped April 10, 1902. Owner, breeder; C. H. Babcock, handler.

Stockdale Kennels' liver and white Pointer dog Cuba Jr. (Ch. Cuba of Kenwood-Florida), whelped March 13, 1899. Owner, breeder; R. M. Dodge, handler.

With

J. E. Lucas' (San Rafael, Cal.) liver and white Pointer bitch Chiquita (Dr. Daniels-Pan Goo), whelped May 1, 1903. Mount View Kennels, breeder; Lucas, handler.

S. Christenson's (San Francisco) white, black and tan English Setter bitch Belle Fontaine (Count White-Stone-Grace Gladstone), whelped May, 1902. Frank Jacque, Humboldt, Iowa, breeder; Chas. Coutts, handler.

With

J. W. Considine's (Seattle) white, black and tan English Setter bitch Policy Girl (Dave Earl-Top's Queen). J. E. Lucas, handler.

Stockdale Kennels' white and liver Pointer dog Checkmate (Cuba Jr.-Bow's Daughter), whelped August 1, 1903. Owner, breeder; R. M. Dodge, handler.

With

Jos. E. Terry's white and orange English Setter dog Romp (Orion-Terry's Lady), whelped July 25, 1903. Owner, breeder; Fred Coutts, handler.

W. W. Van Arsdale's white, black and tan English Setter dog Calaveras (California Bell Boy-Peach Blossom), whelped August 22, 1902. Owner, breeder; C. H. Babcock, handler.

With

J. J. Watson's (San Francisco) orange and white English Setter dog Star's Rod (Starlight W.-Rod's Silver), whelped April 18, 1902. B. J. Baum, San Francisco, breeder; Dr. C. E. Wilson, handler.

Stockdale Kennels' liver and white and tan Pointer bitch Ivywood (Ch. Cuba of Kenwood-Petronella), whelped January 22, 1903. Owner, breeder; R. M. Dodge, handler.

With

W. H. Estabrook's white, black and tan English Setter bitch Del Rey Belle (California Bell Boy-Countess Mark), whelped October 21, 1903. W. W. Van Arsdale, breeder; Chas. Coutts, handler.

J. W. Flynn's (San Francisco) liver and white Pointer bitch Sabine's Molly (Sabine's Rip Rap-Fannie Coin), whelped April 26, 1903. George Demers, breeder; W. B. Coutts, handler.

With

Stockdale Kennels' black and white Pointer dog Cuba's Japan (Ch. Cuba of Kenwood-Winnipeg Fly), whelped May 13, 1903. Owner, breeder; R. M. Dodge, handler.

W. W. Van Arsdale's white, black and tan English Setter dog Avalon (California Bell Boy-Peach Blossom), whelped August 22, 1902. Owner, breeder; C. H. Babcock, handler.

With

E. H. Cox's (Madera, Cal.) white, black and tan English Setter bitch Countess Lou (Count's Mark-Mary Lou), whelped September 4, 1902. J. E. Terry, Sacramento, breeder; W. B. Coutts, handler.

John H. Schumacher's (Los Angeles) black and white English Setter dog Sir Roderick (Detroit Joe-Dolores), whelped May 19, 1903. Owner, breeder; W. B. Coutts, handler.

With

W. W. Van Arsdale's white, black and tan English Setter bitch Keepsake (California Bell Boy-Peach Blossom), whelped August 22, 1902. Owner, breeder; C. H. Babcock, handler.

Second Series.

Countess Lou with Calaveras.
Star's Rod with Avalon.
Keepsake with Policy Girl.
Belle Fontaine with Kilgarif.

Third Series.

Kilgarif with Policy Girl.

Result.

First, Kilgarif; second, Policy Girl; third, Avalon.

Bakersfield, January 12, 1906—Pacific Coast Field Trials Club Members' Stake. No dog eligible that was placed in any event other than the Pacific Coast Members' Stake or that was a starter in any open stake of this meeting. Trophy to each winner. Entrance \$10. 8 starters (2 English Setters, 6 Pointers). Messrs. Baughn and Betten, judges.

First Series.

Lloyd Tevis (Stockdale) black, white and ticked Pointer bitch Elsie (Ch. Cuba of Kenwood-Jingo's Bagpipe). Stockdale Kennels, breeder, owner, handler.

With

W. S. Tevis' (Stockdale) Pointer bitch Stella (Cuba Jr.-Winnipeg Fly). Stockdale Kennels, breeder, owner, handler.

J. McDaniels' (Paso Robles) white and liver English Setter Cloudlight (Bonner N.-White Wings). W. W. Van Arsdale, breeder, owner, handler.

With

S. Christenson's white and black Pointer dog Raffles (Ch. Senator P.-Miss Rap), whelped July 23, 1904. J. W. Flynn, San Francisco, breeder, owner, handler.

J. M. Donley's (Fresno) white and orange belton English Setter Monterey (Llewellyn Drake-Shadow). W. W. Van Arsdale, breeder; H. W. Keller, handler.

With

Clinton E. Worden's (San Francisco) white and liver Pointer bitch Betsey (Dr. Daniels-Nellie Bang). Owner, handler.

F. D. Ross' (Hanford) black, white and ticked Pointer dog Swede (Fitz—). Owner, handler.

With

Howard B. Smith's (Colton) white and liver Pointer bitch Lottie Ripstone. Owner, handler.

Second Series.

Raffles with Elsie.

Result.

First, Raffles; second, Elsie; third, Betsey.

Bakersfield, January 13, 1906—Pacific Coast Field Trials Club Championship Stake, open to all. \$10 to start. 50 per cent to first, 25 per cent to runner up, trophy to each. Two-hour heats. 4 starters (3 English Setters, 1 Pointer). J. W. Baughn, judge.

First Series.

W. W. Van Arsdale's white, black and tan dog McCloud Boy (Tony Boy-Sadie Hopkins), whelped December 25, 1900. Hugh Hopkins, Minturn, Cal., breeder; C. H. Babcock, handler.

With

Stockdale Kennels' (Bakersfield, Cal.) liver and white dog Cuba Jr. (Ch. Cuba of Kenwood-Florida), whelped March 13, 1899. Owner, breeder; R. M. Dodge, handler.

W. W. Van Arsdale's white, black and tan English Setter bitch Policy Girl (Dave Earl-Top's Queen). J. E. Lucas, handler.

With

W. W. Van Arsdale's white, black and tan dog Avalon (California Bell Boy-Peach Blossom). Owner, breeder; C. H. Babcock, handler.

Second Series.

Cuba Jr. with Avalon.

Result.

First, Cuba Jr.; runner up Avalon.

Points.

The prizes for the winners in each of the events were donated by various members of the club, and were elegant in design. It is an observed custom that the intrinsic value of trophies shall not be more than an understood nominal sum, in this the selections were of substantial value.

The prizes were taken by selection, the winner of first place having first choice, etc.

A list of the donors and trophies follows:

Derby—W. S. Tevis, Bakersfield, beautifully designed silver goblet; Joseph E. Terry, Sacramento, large silver ornamented beaten copper cup; Charles N. Post, Sacramento, silver mounted leather stein.

All-Age—Howard B. Smith, Colton, antique silver ornamented oak cigar box; W. W. Van Arsdale, San Francisco, heavy silver mounted cut-glass decanter; Frank H. Jermyn, Scranton, Pa., silver covered decanter, demijohn design.

Members' Stake—Tudor J. A. Tiedemann, San Francisco, elegant silver mounted leather cup, fashioned after the old-time "Black Jack ale mugs"; Bohm Bristol Company, San Francisco, silver mounted black jack mug; Southern Hotel, Bakersfield, silver mounted cut-glass loving cup.

Champion Stake—W. S. Tevis challenge cup to winner; J. B. Kerckhoff, Los Angeles, silver cup to runner-up.

Handlers' Prize—Western Field silver cup trophy.

Judge Baughn reached Bakersfield a few days prior

to the trials. During this time he inspected the trial grounds and also tried out the style and mettle of the California valley quail, a bird heretofore somewhat unfamiliar to him, both with younger dogs and some of the veteran field trial workers of the Stockdale Kennels. The judge is a good field shot, but the birds baffled his aim at first. He soon acquired the proper eye and showed the members of the surveying party some pretty singles and doubles over point work by the dogs.

Stockdale Kennels were unfortunate in the loss of Combination Boy, a Derby entry, that died recently. Midget, entered in the All-Age, was withdrawn; a badly cut foot was the reason.

W. W. Van Arsdale purchased Policy Girl on Wednesday. The next day she was served by Avalon. It is expected the nick will be a good one, it being desired to bring together several crosses represented by the two.

P. D. Linville, we regret to note, was unable to attend the trials by reason of illness. He had made his headquarters at Ashe ranch and had a string of dogs there for a month or more. Ill health confined him to bed nearly all of this time. Our latest reports are that he is somewhat better.

S. Christenson's win with Raffles was a popular one. His becoming the owner of the dog is, to a certain extent, amusing. By reason of his unsatisfactory Derby debut Mr. Jermyn felt indifferent to Mr. Raffles. Tuesday evening a jolly crowd were at dinner, joking and bantering each other about their respective dogs. Mr. Erickson's dog was equally in disgrace. Jermyn picked up a hnaadful of nuts from a dish and suggested to Erickson that they should go "odd or even" for both dogs. Erikson won and afterwards presented the Pointer to Christenson, who now thinks highly of him, for he is far from being an ordinary dog.

Ducks and quail were daily on the menu served at the club tables in the hotel. Hon. H. W. Keller, Frank Mayer, Dr. C. W. Hibbard and others provided the game.

Shooting parties had fine sport in the quail coverts and along the irrigation ditches after ducks, towards the end of the week.

Master Lloyd Tevis was awarded the handlers' prize by unanimous vote.

Master Tevis is a graceful youth behind a bird dog in the field and won many compliments for the skillful manner in which he handled his charge during a run of one hour and eight minutes.

Last Saturday Jermyn, Erikson and Christenson each bagged the quail limit in a very short time. Dr. Daniels was with the party. He is a grand dog with the gun.

Henry Betten also enjoyed the quail shooting available.

Mr. W. S. Tevis has won the championship cup three times now. Under the original conditions the

trophy would be retired to an honored place in a cabinet at Stockdale. Mr. Tevis, instead, has generously returned the cup to the club for future competition in the stake.

Jos. E. Terry presented to W. W. Van Arsdale a handsome puppy by Kilgarif-Terry's Lady. The young Setter was named Judge Baughn in honor of the presiding judge. The puppy was chosen because he most resembled his sire, by Judge Baughn, from two, the choice of which was offered Mr. Van Arsdale.

Absentees were remembered in various ways by those in attendance last week. When Section 17 was first visited "one of the boys" remarked: "This is the place where Richards fell in the ditch."

HENRY E. SKINNER.

On Thursday, January 11th, Mr. Henry E. Skinner passed away at his late residence in Berkeley.

Mr. Skinner was known to and esteemed by hundreds of sportsmen, during the past thirty years, for many genial qualities prompted by a generous disposition and a sterling character.

Among sportsmen he was recognized as a whole-

THE LATE HENRY E. SKINNER

souled fellow sportsman. With the angling fraternity, latterly with the Shreve-Barber Company, in particular, he stood high as an authority and as a practical and skillful angler.

For over a quarter of a century Mr. Skinner was identified with the sporting goods trade, being successively connected with Liddle and Kaeding, the E.

T. Allen Company, the H. E. Skinner Company, and

Coast anglers are much indebted to Mr. Skinner for many innovations in tackle. Through his extensive experience and knowledge of the art he was for years the introducer, to local and Coast anglers, of many articles and fashions in up-to-date tackle.

Mr. Skinner had been in failing health for a year and several weeks ago he was compelled to give up active attention to business. The effort for regaining health was unavailing, and after an illness of several weeks' duration he succumbed to the inevitable.

His demise was a sorrowful shock to a large circle of friends and business associates.

TRADE NOTES.

A Grand Showing for Winchester Shells.

Sporting Life's trap shooting review for 1906 tells the same old story, only in different language, that it has told for the last six consecutive years. That is, that the Winchester "Leader" and Winchester "Repeater" shells stand first in records, first in popularity and first in shooting qualities. The two leaders for 1905, Mr. Fred Gilbert and Mr. W. R. Crosby, shot Winchester "Leader" shells exclusively last year. The former's average for the year was 95.6 per cent and the latter's 95.5 per cent, both gentlemen having shot at over 16,000 inanimate targets during the year. There were forty-six professionals and amateurs that shot at least 3,000 targets during the year of 1905 and made over 90 per cent averages, and of this number more used Winchester shells than all other makes combined. Of the first fifteen leaders, ten used Winchester shells exclusively. Such an array of facts is indisputable evidence as to which shells are the first choice among the shooters throughout the United States and Canada, and further is a testimonial by the masters of the art as to the superior qualities of the Winchester shells. In 1900, 1901, 1902, 1903, 1904 and 1905 Winchester "Leader" and Winchester "Repeater" shot gun shells won the highest averages of the world for the year, an unbroken chain of evidence of merit and popularity that speaks for itself. Last year the shooters that used Winchester shells carried off every honor, and captured the Grand American Handicap, the Grand Canadian Handicap, the Grand Preliminary Handicap at Indianapolis, the Amateur Championship of the United States, the longest straight run on record, all the championship trophies of any importance, as well as all the state championships, the Grand Pacific Coast Interstate Championship Trophy, and any number of other prizes, which to numerate would fill a good sized book. When such stars as W. R. Crosby, Fred Gilbert, C. G. Spencer, J. W. Akard, R. R. Barber, H. C. Hirschy, C. M. Powers, J. M. Hawkins, John W. Garrett, John S. Boa, Jack Fanning, J. A. R. Elliott, Harold Money, Frank Faurote, Neaf Apgar, J. L. D. Morrison, W. F. Sheard, David Elliott, C. F. Confarr, E. E. Ellis, W. J. Rand, C. Bulwer and other notable trap shots shoot the Winchester make of shells, making and breaking records, winning the highest honors obtainable, it is indisputable evidence that these stars know that the Winchester shells are the only shells to shoot.

STOCK POINTS.

There is a difference of opinion in regard to using blinders on horses. Some think that they shy without them, others believe that they are more easily frightened with them.

If stockmen only would remember that every time they neglect or abuse their stock, it is injurious to themselves, it may be that they would be more kind.

If a combine can be made with the cow, the hen and the horse, almost anyone can pay debts, lift mortgages and lay up money in the bank.

Skim milk fed to calves should have a temperature of 95 degrees. There should be no variation. Lack of care in this is very detrimental.

The no-purpose farmer with no-purpose poultry and live stock turns out to be a no-profit farmer. Definite aims are essential to success.

All kinds of stock should have their salt within easy reach where they can get it whenever they desire to do so.

In breaking horses, too much should not be attempted at once. Go slow, teach one thing at a time.

Oats is the best feed for colts at meaning time. No other feed will do as well.

DARE, DEVIL.

Thos. W. Lawson's Trotting Bred Stallion

If you have choice dairy products, dispose of them to select consumers. The proper search will find those who are willing to pay good prices for good goods.

Avoid dirt in the dairy just as much as you would avoid failure. The one will cause the other.

There is at least one good advantage in keeping cows, and that is if the milk cannot be turned into butter or cheese profitably it can in nearly all cases be fed to pigs and calves with profit.

Ten hens will eat an ounce of bone daily.

There is no doubt about poultry being a source of profit if it is intelligently handled. If it is not intelligently handled, it is likely to be a source of disappointment and loss.

Don't throw away any sour milk; the chicks are fond of it, and it is good for them.

Norman Stallion For Sale.

DARK IRON GRAY NORMAN STALLION; weighs about 1600; 16 hands high; 4 years old. Is blockily built and a sure foal getter. Colts can be seen at San Jose. For further particulars address **W. H. WILLIAMS,** 1120 Alameda Ave., San Jose, Cal.

HOW TO HAVE HEALTHY HOGS.

One of the first essentials to obtain a healthy, vigorous offspring is the necessity of having strong, active parentage, and if this is a hereditary trait intensified through several generations, so much the better. Not long ago the owner of a herd of hogs was requested by the owner to examine the hogs thereon and give some estimates of the price of certain animals. This farmer had several very good brood sows, which were undoubtedly hardy and vigorous, as the large litters they had farrowed distinctly showed. The young pigs were also in excellent condition and growing rapidly. The farmer seemed to have a high appreciation of these brood sows, and said they were valuable animals, and that he disliked to part with any of them. It is true they were only grades, but nevertheless they were possessed of those qualities valuable in the brood sow. Imagine what a surprise it was to see the male kept on this farm. He was a veritable scrub, long and lanky, and without any of the qualities one would seek in an animal, at least half of which are supposed to be transmitted to the offspring. This sire was narrow in the chest and tucked up in the quarter, and certainly did not show any evidence of being a healthy animal, possessed of a good constitution. The example quoted is too often met with and is one of the contributing causes to the outbreaks of hog cholera which frequently occur. It is of the utmost importance that the parents, both male and female, possess every evidence of health, for they are bound to transmit their qualities to the offspring, and if naturally weak and lacking in constitution disease will take hold of them easier and its ravages will be more complete.

The management of the parent is another matter of great concern. Too often they are confined in narrow lots, which prevent their taking the exercise necessary to the proper development of the lungs and all the other organs of the body. The hog naturally is of a roving disposition, and if given his liberty he hunts around over the fields and through the forest growth, gathering various leaves and herbs that suit his taste. At the same time he is taking exercise which is vital to his well being; and if the breeding animals, whether pure-bred or grade, were given more liberty they would keep in better health at all times, reproduce more freely, and the offspring would be harder and possessed of better constitutions. It is often a wonder that hog cholera is not a more frequent visitor than proves to be the case, for the hog is frequently expected to live in a filthy, wet pen, cleaned out as a matter of convenience two or three times a year, and rarely, if ever, properly supplied with bedding, and even disinfected so as to ward off disease. This is an old, old story, and it is a condition too commonly met with, even in this enlightened day when proper sanitation for farm animals is recognized as a matter of the utmost importance and one of the surest ways of keeping the animals healthy and preventing disease.

Another reason why hogs are so subject to attacks of cholera and other troubles is due to the fact that the males used at the head of the grade herds are generally purchased from men who deem it advisable to keep their animals in show condition, so they will sell to better advantage. It is truly an interesting sight to visit one of these breeding establishments, where the animals are kept so fat they can scarcely walk, and are thus perfect models of what a hog should be. But it is needless to say that animals so fed and pampered from the time they are young have their constitutions undermined, and have not that vigor and ability to throw off disease which animals allowed to rough it a little more possess.—Prof. A. M. Soule in National Stockman.

Milk may be cooled by pouring from one vessel to another, by setting in cold water or placing on ice. The more rapidly it is cooled the more cream rises.

Always churn just as soon as there is cream enough and sufficient acidity develops. If cream is held beyond this it will be injured.

It is not always the breeder who has the worst pronouncement who has the worst cattle.

FOOD FOR POULTRY IN CHINA.

Consul-General Rodgers, of Shanghai, in reply to inquiries as to whether China offered a market for the sale of food for poultry, responds in the negative, and furnishes interesting information in regard to the raising of poultry by the Chinese. He writes: While the Chinese are perhaps the most successful poultry raisers in the world, according to natural methods, they are also undoubtedly the most economical in the business. The foreigner, seeing the immense numbers of ducks, chickens, and geese of the countryside, naturally assumes that large amounts of grain or other poultry food must be consumed. Yet investigation reveals the fact that the Chinese consider the fowl perfectly able to pick up a living without much assistance on their part, and as a consequence herding is practiced, each flock being kept on the move, as sheep are on a range. It is true that at some periods of the year the fowls are fed, but the food given them would be considered chaff in other countries, and is practically worthless. The natural result of this is very poor poultry, but that is the rule and standard in nearly all China. It is an absolute fact, moreover, that the gleanings of the paddy fields by the flocks of duck, which often contain several hundred, is a distinct benefit to the Chinese farmer. As in all other methods of life, the poultry raising process is another wonderful exhibition of the marvelous economy of the Chinese. Indeed, it may be said that the frugality of the Chinese in such industry, as compared with the prodigality of others, is an excellent illustration by which to measure the radical difference between the Chinese and all other races in the production of wealth. In view of these statements China can not be considered a promising field for the exploitation of American poultry foods, unless there should come a great increase in the value of the product and a reversal of established custom, neither of which is likely to occur.

PRIZE FAT STEERS.

Blackrock, the grand champion of the 1905 International Stock Show at Chicago, exhibited by the Iowa Agricultural College, Ames, Ia., sold at \$25 per hundred weight. Blackrock was sired by a pure-bred Angus bull, and his dam was a grade Shorthorn cow and a good milker that gave to this steer his great quality. He was bred by Ed Hall, Mechanicsburg, Ia. He was bought by the college a year ago from a load that was sold to the packers. No special ration was fed the champion steer. He was kept in moderate flesh on a light ration until about three months ago, when the forcing period began. During the fore part of the summer he ran in blue grass pasture. "Billy" Burlton, the college herdsman, says that his ration during the forcing period consisted of two-thirds ground corn and one-third bran and ground oats; about one pound of oilmeal and flaxseed meal were also fed per day. He was given one cooked feed per day, which consisted of corn and oats cooked together.

In the slaughter test of the steers shown in the fat classes at the International, which sold at auction, the highest priced steer, Star Tablet, an Aberdeen-Angus two-year-old, dressed out 70.31 per cent. He was bought by L. Pfaeizer, along with two others which dressed out 62.45 and 65.18 per cent, respectively.

Read current dairy literature and keep posted on new ideas. Observe and enforce utmost cleanliness about the cattle in grooming, bedding and care of stables. Animals suffering from any disease or those that have been exposed to a contagious disease must be kept isolated from all other cows in the herd. Keep dairy cattle in a room or stable by themselves. The best of ventilation and drainage should be provided. Buildings should have tight walls and be plainly constructed. Do not use musty or dried litter for bedding.

If it is necessary in order to keep the cows' quarters dry, raise the floor with clay pounded in hard and let it slope back from the manger so as to carry off water.

While scrub stock is expensive at any price, there are some who find thoroughbreds more expensive, so they have to get along the best they can.

CALIFORNIA DAIRY STATISTICS.

The California Promotion Committee reports the following synopsis of the State Dairy Bureau's compilation of dairy statistics for California for the year ending October 1, 1905. This report is especially interesting in the matter of butter production. Such an advance has been made in the production of this article that it places California well to the front as a dairy state. The production is given by counties in the following table, the figures representing the number of pounds:

Alameda 886,315, Alpine 26,060, Amador 266,656, Butte 166,652, Calaveras 153,241, Colusa 234,819, Contra Costa 557,114, Del Norte 644,112, El Dorado 251,584, Fresno 2,166,048, Glenn 178,456, Humboldt 4,289,739, Inyo 137,442, Kern 232,363, Kings 1,444,218, Lake 124,942, Lassen 359,821, Los Angeles 1,431,045, Madera 75,424, Marin 3,959,641, Mariposa 14,628, Mendocino 793,122, Merced 1,786,082, Modoc 136,444, Mono 22,648, Monterey 534,241, Napa 738,983, Nevada 139,623, Orange 585,268, Placer 253,544, Plumas 380,941, Riverside 411,148, Sacramento 1,578,751, San Benito 141,155, San Bernardino 181,216, San Diego 759,111, San Joaquin 1,468,991, San Luis Obispo 1,309,831, San Mateo 206,261, Santa Barbara 687,204, Santa Clara 545,778, Shasta 11,312, Sierra 113,123, Siskiyou 486,692, Solano 675,714, Sonoma 4,156,759, Stanislaus 2,006,171, Sutter 683,684, Trinity 15,686, Tehama 133,053, Tulare 1,735,888, Tuolumne 29,468, Ventura 199,632, Yolo 1,124,907, Yuba 83,648. Total 41,961,047.

There was an increase of 17 per cent over the production of the previous year. Among the counties which show remarkable gains are Colusa, 28 per cent; Fresno, 25 per cent; Humboldt, 11 per cent; Kern, 37 per cent; Kings, 24 per cent; San Joaquin, 30 per cent; San Luis Obispo, 25 per cent; Sonoma 45 per cent; Stanislaus, 22 per cent; Sutter, 101 per cent; Tulare, 15 per cent; Yolo, 25 per cent. The growth of butter output shows a gain in the state in five years of 211 per cent.

When a warm spell comes in winter it can be noticed that more eggs are obtained and that as soon as the weather becomes cold again the supply falls off. This shows that warmth is a factor in the production of eggs. It is not necessary to have summer weather. It is when the hens escape the extreme cold of winter that they begin to lay. If the changes of weather makes a difference in laying, then a warm poultry house should also have an influence. When poultry must resort to the tree-tops, and be exposed to snow, rain, hail and wind, they can only keep alive, being unable to assist the farmer by producing eggs. If you want eggs in winter, you must provide a good, warm house for them, as well as provide pure, nourishing food.

Fine chaff and dry leaves gathered in the fall are to be preferred to hay, for litter in the scratching pen. The hens eat the hay and the winter rarely passes without several becoming crop-bound, with a disagreeable operation or death as the result. If you have lots of alfalfa leaves in your hay-mow, they are the best litter of all for scratching hens, for it is not only good for them to scratch but is a valuable addition to the feed necessary for producing eggs.

Never add any substance to prevent milk souring. Cleanliness and cold are the only preventives needed. Milk should be delivered in good condition. When cans are hauled far they should be full and carried in a spring wagon. Utensils for farm use should be made of metal and have all joints smoothly soldered and never allow them to become rough inside.

The farm is the place to produce turkeys cheaply. No other class of poultry will pick up more of its food that would go to waste if not so picked up. Insects particularly are eaten in large quantities, and the crops of the farm are better off by their absence.

With a little effort, anyone can keep his horses' hoofs in good condition, and he should do it.

Calves dropped in the fall are not worried when young by flies and mosquitoes.

Have such drainage in and about the cows' quarters that water cannot stand there.

SCRUB HOGS DIFFICULT TO FATTEN.

Thousands of dollars are wasted every year by feeding scrub or low grade hogs. Some farmers buy anything that is a pig and feed it good feed for months, with a much less percentage of gain in pork than if the same feed were given to a good, high-grade hog. Good breeding counts for gain not only with cattle, but with hogs, says the Texas Stockman and Farmer.

The extra feed is more than wasted, for the loss of quality in the pork is another important consideration. I know farmers who are careful to breed cows to a good thoroughbred bull, and at the same time are using a scrub boar. A grade or mixed blood male should never be used. Poor sows bred to a thoroughbred boar will often produce good pigs, but the rule will not work the other way.

I know some farmers turn up their noses at a pedigree, and a pedigree without the hog in front of it is worthless; so is the hog without a pedigree behind him for breeding purposes. The pedigree shows he is able to reproduce his own characteristics in his offspring.

Suppose a good thoroughbred boar does cost \$15 to \$20 more than a scrub, he ought to sire 200 or more pigs, which would be only a few cents on each. The better the sire the better the pigs, both in gain in feeding and in quality of pork. Now that thoroughbred stock is so cheap, comparatively, any farmer can soon work into it. By co-operating, farmers need not be to any great expense for new blood to keep up their stock. I would rather pay \$5 for a good thoroughbred pig to feed than \$2 for an ordinary scrub, no matter how good looking he is as a pig.

The grinding of all kinds of stock feed increases the amount digested. But experiments show that if horses are young and have good teeth there is little difference between the ground and the unground.

Dairy cows have the ability to make pretty good milk when drinking pretty bad water. They would drink more water and make more milk if they had better water to drink. Try it.

The tail is an indication of breed. A short heavy tail at the top and tapering to a small brush does not indicate a purebred. But a long heavy tail with a large brush indicates a good dairy type.

If possible every farm should have a milk house in which the milk can be kept, the churning done, the milk vessels kept and plenty of water with which to cool the milk and wash the vessels.

It seems impossible to obtain milk absolutely free from bacteria. This is probably right, as the presence of the bacteria causes it to clabber and the cream to rise.

Sponges—S. Adderley, 307 Market St.

Warranted to Give Satisfaction.

Gombault's
Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. (Send for descriptive circulars, testimonials, etc. Address)

•The Lawrence-Williams Co., Cleveland, O

Fowls of all classes enjoy a meal early in the morning. If delayed, they become restless.

The farmer has the largest profit in poultry raising, because he has the least outlay for food.

Don't be discouraged by a few failures. They seem to be a necessary part of the poultry-raiser's education.

If you intend to run an incubator next season, plan now to have enough to supply eggs to keep it running.

Great Horse Remedy.

The legs and feet need watching and care. Ready for treating the common ailments saves many a valuable animal. Begin in time and Kendall's Spavin Cure is a positive, permanent cure for 99% of all cases of Spavin, Ringbone, Splint, Curb or Lameness. Keep it on the shelf.

USED FOR YEARS.

Northumberland, Pa., Dec. 29, 1904.
Dr. B. J. Kendall Co., Enosburg Falls, Vt.
Gentlemen:—Please send me a copy of your "Treatise on the Horse and his Diseases." I have been a user of your Kendall's Spavin Cure for years and recommend it for man or beast wherever I have an opportunity. I have great confidence in its use; have cured three different cases where a horse doctor failed.
H. J. STANNERT

Price \$1.60 for \$5. Greatest liniment known for family use. All druggists sell it. Accept no substitute. The great book, "A Treatise on the Horse," free from druggists or Dr. B. J. KENDALL CO., Enosburg Falls, Vt.

WILLIAM HAROLD 2:13 1/4 FOR SALE

THE MEEK ESTATE HAVING BEEN PARTITIONED, and the breeding of horses discontinued, the stallion WILLIAM HAROLD 2:13 1/4 is offered for sale or lease to a responsible party. William Harold is by Sidney 2:19 1/4, and his dam is Cricket 2:10 by Steinway. Cricket is one of the great producing mares of California, being already the dam of five in the list and has three more foals that will be given records. William Harold has had the most limited opportunities in the stud, yet is the sire of Janice 2:08 1/4 trotting Dan Burns 2:15 and Judith 2:25 and several others in the list. He is in excellent condition, and as his get are all large, well made and nicely turned horses he should be a good money earner in the stud if in good hands. Apply to or address H. W. MEEK, San Lorenzo, Cal.

Just Enough
and just as they want it. The right way to salt animals is to let them help themselves.

Compressed Pure-Salt Bricks
In our Patent Feeders, supply refined dairy salt. They mean animal health. They cost but little. Convenient for you and your animals suffer no neglect. Ask your dealer and write us for booklet.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

Running Horse Owners and Trainers

"Save-the-Horse" has proven absolutely unfailling on Bucked Shins. One bottle will cure from five to twenty cases. For strained, injured and broken down tendons, it is marvelously effective.

"LAFE SHAFFER," the widely known trainer of Zephyr 2:11, Beausant 2:12 and Terrace Queen 2:06, says:

Troy Chemical Co.:

Terrace Farm, Titusville, Pa.

I used "Save-the-Horse" all the past season. First on a bad splint close up to knee, horse very lame after fast work; could see decided improvement after a few days' use; in a week's time, lameness all disappeared. Used with equal success on a bowed tendon; at present am treating a horse that bowed a tendon 3 years ago—was a bad case, was fired and blistered, but still went lame; have used a bottle and am still using "Save-the-Horse;" the enlargement has gone down almost one-half, horse going sound, and I firmly believe will race again. A friend of mine had a horse that bowed a tendon last spring; by the use of your great remedy, kept him racing all fall, gave him a record better than 2.65. Tendon is straight and sound as it ever was. Think it the great remedy, kept him racing all fall gave him a record better than 2:05. Tendon is straight and sound as it ever was. Think it the greatest remedy on earth for a bad leg of any description.

Respectfully yours,

L. D. SHAFER, Farm's Trainer.

Box 209.

The fire iron is uncertain; blistering is less effective, and both necessitate laying up the horse from four weeks to two months; mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Wind puff, Weak and Sprained Tendons and all Lameness.

Horse can be worked as usual, it cures without scar, blemish or loss of hair.

\$5.00 Per bottle, written guarantee with every bottle, constructed solely to satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way. The need of second bottle is improbable except in rarest cases. Send for copy of guarantee and booklet. All druggists and dealers or sent express prepaid.

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

Read our "ad" on Campbell's Horse Foot Remedy in next issue of this paper.

JAS. B. CAMPBELL & CO., Mfrs., 412 W. Madison St., Chicago, Ill.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Sprains, Cuts, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

SUBSCRIPTION
THREE DOLLARS A YEAR

\$10 Payments Due February 1, 1906

ON YEARLINGS IN

Pacific Breeders Futurity Stakes No. 5---\$7000 Guaranteed

NOTHING MORE TO PAY BEFORE 1907.

For Foals of Mares covered in 1904. To trot or pace at two and three years old. Entries closed October 15, 1904. **Nothing More to Pay Before 1907**, when your Foal can start in the Two-Year-Old Division. Stakes divided as follows: \$3250 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

A Chance for Those Who Failed to Enter.

Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for Foals of 1905 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you neglected to name when entries closed, send \$22, with Color, Sex and Breeding of the Foal, on or before February 1st next, which covers payments to February 1, 1907, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

THE STANDARD-BRED TROTTING STALLION

UNIMAK 40936

y McKINNEY 2:11¹/₄; dam TWENTY-THIRD by Director 2:17; second dam Nettie Nutwood (dam of Hillsdale 2:15¹/₄) by Nutwood 600.

Will Make the Season of 1906 at PALO ALTO, Cal.

Usual return privileges or money refunded at the option of the owner of the mare.

Terms, \$40 for the Season.

To Close June 1st

Address or apply to

Excellent Pasturage at Reasonable Rates. No barbed wire. Best of care taken of Mares, in any manner Owners may desire.

CAPT. C. H. WILLIAMS,
Box 161, PALO ALTO, CAL.

WAYLAND W. 22516. Record 2:12¹/₂.

ONE OF THE LEADING SIREs OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06¹/₄, leading money earning pacer of season 1905. Sire of Morosco 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:28, dam Lettie (dam of Wayland W. 2:12¹/₂, Welcome 2:10¹/₂, Maud Singleton 2:28) by Wayland Forrest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Anteeo or any of our great sires, he is the sire of Bolivar 2:06¹/₄, Nellie R. 2:10, Arthur W. 2:11¹/₂, Morosco 2:12, John A. 2:12¹/₂, Forrest W. 2:14¹/₂, Leland W. 2:16, Al Sandy 2:19¹/₂, Maud Sears 2:21, Bonita Wilkes 2:26¹/₂. Wayland W. will make the Season of 1906 at SANTA ROSA, at McGregor & Hockins' Stables.

Terms \$40 for the Season. Pasture \$3.00 per month.

W. C. HELMAN, Owner.

Bon Voyage

Champion 2 y.o. Stallion of 1904
Champion 3 y.o. Stallion of 1905

Two-year-old Record....2:15
Three-year-old Record....2:12¹/₂
Trial in a Race.....2:10¹/₂

WINNER OF HARTFORD FUTURITY (\$8500) FOR 1905.

BON VOYAGE (3) 2:12¹/₂ is by Expedition 2:15¹/₄ by Electioneer 125; dam Bon Mot by Erin 2:24¹/₂; second dam Farce 2:29¹/₄ by Princeps 530; third dam Roma by Goldust 150. For breeding, individuality and racing qualities he is unsurpassed.

Season of 1906 at AGRICULTURAL PARK, LOS ANGELES,
where he will serve a limited number of mares.

\$50 for the Season. USUAL RETURN PRIVILEGES, or money refunded should mare not prove in foal. A rare chance to breed good mares to an exceptionally high-class and highly bred young stallion. For further information address

J. O. GERRITY, 4607 Agricultural Ave., Los Angeles, Cal.

The McKinney Stallion

KENNETH C. 2:17 {THREE YEAR OLD RECORD}

Sired by McKINNEY: dam MOUNTAIN MAID (dam of Tom Carneal 2:08¹/₄) by Cresco 4908 (sire of Allie Cresco 2:13, etc.); next dam by Cloud.

Will make the Season of 1906 at

PLEASANTON, CAL.

KENNETH C. was one of the fastest of an exceptionally good lot of three-year-olds that raced in California in 1905. He is a splendid individual, has size, style and quality, and the grandsons and granddaughters of McKinney through Kenneth C. will be equal to any in the land.

Terms \$30 for the Season.
\$15 for Single Service.

California Stake Payments Due in 1906.

Pacific Breeders' Futurity Stakes.

(Payments should be made to F. W. Kelley, secretary, 36 Geary street, San Francisco.)

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—\$10 due March 1, 1906, and starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 5, \$7000, foals of 1905—\$10 due February 1, 1906.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

EASTERN HORSEMEN and managers of the Grand Circuit meetings are again discussing the question of shortening races, but while all are agreed that the old three-in-five system must be abolished, there seems to be much difference of opinion as to the best system to replace it with. The Grand Circuit stewards failed to agree upon a plan that would be uniform all through the circuit, and each association will adopt the plan that in its opinion promises the largest list of entries. The action of the drivers and trainers last year in agreeing to refuse entries to all races advertised on the three-in-five plan has compelled the associations to shorten their races, and the probability is that within a year or two a system will develop that will be popular with horsemen and the public as well and be generally adopted. Out here on the Pacific Coast there is but little talk of changing from the old three-in-five rule, but there is no doubt but owners and trainers would welcome a change. The very limited racing season here makes the old racing plan less objectionable than it would be if there were a circuit of three or four months' duration. Seven or eight years ago there was quite a demand for shorter races, and several of the plans now heralded as new in the east were tried, but none

proved popular and the old three-in-five plan was resumed at the Breeders' and other important meetings. The California State Fair has for years had a rule, however, which sends all horses to the stable at the end of three heats that have not won a heat. This has been the rule in all the State Fair harness races except the Occident and Stanford Stakes, and this year it was extended to them, such a condition having been added to those governing the renewals of those stakes closing for entry this year. It would doubtless meet with the approbation of a majority of horsemen were something like the Buffalo plan adopted by the California associations. In this plan there are but three heats and each heat is a race, with four moneys in each heat. Faster time and shorter races would be popular and doubtless draw a larger attendance.

PLEASANTON TRACK has never had as many horses working over it as are now stabled there. A few days since Mr. Ronan, the owner of this favorite training place, completed a new building containing fifty box stalls and all were occupied as soon as the last nail was driven. There are now over two hundred horses stabled at the track, and fifty or more that get their work over it find quarters in private stables in the neighborhood. The heavy rain of two weeks ago, which lasted eight days, did not keep the horses off the track an hour after the rain ceased, although there was a precipitation of eight inches at that point. It is a wonderfully well drained track, and the soil is different from that found anywhere else in California.

THE BLOOD OF CHAMPIONS.

On the front page of this paper appears this week a half tone reproduction of a photograph taken last Monday at Pleasanton, which is a fair portrait of a remarkably well bred stallion. Greco is his name; he is owned by Mr. H. Brace of Humboldt county, and he will make a season at Pleasanton this year under the management of Chas. De Ryder.

There is not another stallion in the world bred like him. His sire is McKinney, champion sire of extreme speed, with seven 2:10 trotters to his credit, and thirty-nine 2:15 performers, all with race records. The dam of Greco is Aileen 2:26 by Anteeo 2:16½, one of Electioneer's best sons, and his second dam is the famous mare Lou Milton, dam of the world's champion trotter, Lou Dillon 1:58½. Lou Dillon is by Milton Medium, son of Happy Medium, sire of Nancy Hanks 2:04. Greco is a trotter himself and a good one. He never started in but one race, which he won, taking a mark of 2:32 over a poor track in Humboldt county, but he has a very high rate of speed and worked a mile in 2:20 at Pleasanton with but little work. Greco will, while in Mr. De Ryder's care, be given sufficient training to take a low record, which he is certainly capable of doing. Greco has sired a few colts but has heretofore made but very limited seasons in the stud. He has proven himself not only a sure foal getter, but a sire of speed as well, every colt that has been broken showing speed at the trot. Two of his yearlings, the oldest of his get, were started last year in races of half mile heats at the Humboldt county fair, and both won in good time.

Greco is a very handsome individual, well matched and well proportioned, with fine style and action. He is a square gaited trotter and has shown quarters already in 31 seconds. He is a glossy black, with excellent disposition and every quality that denotes high breeding and race horse speed.

A horse whose sire is the champion sire of fast trotters and whose grandam produced the world's champion is well enough bred to attract the best mares in any country. Greco's dam, Aileen 2:26 by Anteeo, is a great brood mare. She has produced two with standard records—Mowitza 2:20½, and Sister 2:20, and the latter is the dam of that fast pacing mare Sally Pointer 2:11. It will be seen that on both sides of his pedigree Greco has producing blood that is most fashionable. Look over his advertisement in this issue, and write to Mr. De Ryder at Pleasanton in regard to him.

A GOOD SON OF SIDNEY.

Until Lou Dillon set the world's trotting record at 1:58½, sons of Sidney were not as popular in this State as their merits justified. Sidney was a most remarkable horse and had Count Valensin lived his list of standard performers would have probably been nearer the 200 mark than any stallion has yet reached. A son of Sidney that was a wonderful colt trotter, has a record of 2:17¾ and is one of the sweetest gaited pacers ever foaled is Sidmoor, whose dam was by the Grand Moor and grandam by Echo 462, thus representing a combination of great race blood. Sidmoor is owned by Mr. John Ott of Pacheco. He has had but very limited opportunities in the stud, but has sired Enoch 2:12½, General 2:14½, Teddy the Roan 2:17¾, Little Miss 2:17¾, and that fast green pacer Tip Oquando that has paced a trial mile in 2:09½. There are several others of Sidmoor's get with standard records and fast trials. At the Pleasanton track at the present time are three without records that can show 2:10 speed, and all are good sized, stoutly built and level headed horses. Sidmoor seems to sire speed from everything he is bred to and he is "the poor man's horse" as his service fee is but \$30 for the season and his colts sell readily at good prices. Look over his advertisement.

THE DILLON FAMILY AT PLEASANTON.

Since the palmy days of Palo Alto Stock Farm there has probably never been twenty-five colts and fillies by one horse put into the hands of a trainer at the same time in California until Sterling R. Holt came here from Indiana a few weeks ago, purchased that many Sidney Dillons and put them in Millard Sanders' charge. They are now at Pleasanton and if this famous two-minute trainer and driver don't give Sidney Dillon a boom with them this year it will be because sickness or accident prevents. The eight yearlings and some of the two-year-olds are quartered at the old Valensin place, now owned by Mr. F. H. Jermyn, a wealthy coal operator of Pennsylvania, who has purchased it for a country home and is fitting it up in first-class shape. Sanders feels quite at home when he is on this farm, for nearly all the barns and box stalls were constructed under his supervision when he was making fame and money for Count Valensin with the young Sidneys. No trainer has ever beaten his record for giving colts and fillies champion records. He is putting the young Sidney Dillons in order to ship to Indianapolis about May 1st. The little fellows are given a run in the rich new grass every day, and put in box stalls at night, two in each stall for company. They are fed crushed grain and alfalfa hay, and are already beginning to take on flesh, and the men who take care of them say they can almost see them grow over night. At the Pleasanton track nearly a dozen of the older ones are stabled and are being jogged and put in shape for fast miles they will be asked to go later on. The full list of those purchased from the Santa Rosa Stock Farm by Mr. Holt is as follows:

Carlocita, bay filly, foaled 1902, pacer with a record of 2:24¾. Her dam is Carlotta Wilkes, dam of three in the list. Mr. Turner stepped Carlocita a mile in 2:14¾, a half in 1:05¾, a quarter in 30¾, and an eighth in 14¾ seconds, a 1:54 gait.

Carrie Dillon 2:24½, chestnut filly foaled 1903, dam Biscari, dam of seven in the list by Director. Mr. Turner drove her a mile in 2:16½, half in 1:06¾, and quarter in 31½ seconds.

Kate Dillon, chestnut filly, foaled 1903, dam Roblet 2:12 by Robin, dam of Bonale 2:09¾, champion three-year-old pacing filly. Kate Dillon has been a mile in 2:21½, a half in 1:08, a quarter in 31½ and an eighth in 15½ seconds.

Lollie Dillon, chestnut filly, foaled 1903, dam Carlotta Wilkes. Has shown a mile in 2:38, and a quarter in 37 seconds. Is paid upon in the Occident Stake and Turner says is the best gaited and best headed one he ever saw.

Clay Dillon, bay gelding foaled 1903, dam Pansy, dam of four in the list, by Cassius M. Clay Jr. Clay Dillon has trotted a mile in 2:45¾ and a quarter in 38 seconds.

Rose Dillon, bay filly foaled 1902, dam Russie Russell by L. W. Russell. Has shown a quarter in 40 seconds.

Miss Sidney Dillon, chestnut filly foaled 1902, dam Pansy, dam of four, has been a mile in 2:35, and quarter in 51 seconds.

The following five foals of 1904:

Santa Rosa Dillon, bay colt, dam Stamboulita 2:27 by Stamboul.

Sonoma Dillon, chestnut colt, dam By By by Nutwood.

Adioo Dillon, bay filly, dam Adioo by Guy Wilkes.

Routh Dillon, bay filly, dam Russie Russell by L. W. Russell.

Sadie Dillon, bay filly, dam Biscari by Director.

Chestnut filly, dam By Guy by Guy Wilkes, second dam By By by Nutwood.

The following eight foals of 1905: Chestnut filly, dam By By; chestnut filly, dam Carlotta Wilkes; chestnut colt, dam Mildred Russell; bay colt, dam Adioo; bay colt, dam Guycara; bay filly, dam Viola; chestnut filly, dam Russie Russell.

ANSWERS TO CORRESPONDENTS.

O. J.—Altmont is a registered horse. His number is 985, and he is by Almont 33, out of Belle Miller by Blackwood 74, grandam by Mambrino Chief 11. He is the sire of the dam of Jasper Ayers 2:09. San Francisco Patchen was by Geo. M. Patchen Jr. 31, but we have no record of his breeding any further. He is not registered, nor had he a standard record. The mare you refer to can be registered under rule 4, which reads as follows. "A mare sired by a registered standard trotting horse can be registered provided she is the dam of two trotters with records of 2:30.

A. Rosa, Morgan Hill.—Vohicer is a bay horse foaled 1897, by imported St. George, dam Fanfare by imported King Ernest. He was bred by Mrs. J. B. Ferguson, Kingston Stud, Kentucky. He won seven races as a two-year-old, two as a three-year-old, two as a four-year-old, five as a five-year-old. He was second and third many times and was a good race horse. As a six-year-old he started three times and was second in one race and unplaced in the others.

Subscriber, Davisville.—Jenny D. is not registered, and as her sire is not registered it will be impossible to register her.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle.....Sept. 3 to 8
Salem.....Sept. 10 to 15
North Yakima.....Sept. 17 to 22
Spokane.....Sept. 24 to 29
Walla Walla.....Oct. 1 to 6
Lewiston.....Oct. 8 to 13

Everett was given the privilege to select such dates as they may decide on.

CAREER OF STAR POINTER.

Star Pointer 1:59½, the first horse to beat two minutes, is holding levees every day at Pleasanton. Every horseman who visits the track has to have a look at the champion, and Bert Webster, who has taken charge of him for Chas. DeRyder, never led out a horse that he was prouder of. Star Pointer is a walking—we should say, pacing—advertisement of the glorious climate of California. He looks and feels like a two-year-old, his coat shines like satin, while he is in perfect condition. As the regular announcement of this grand horse appears in this issue of the Breeder and Sportsman, a short account of his career will be of interest at this time. He was bred by H. P. Pointer of Spring Hill, Tennessee, and foaled in 1889. He was purchased from Mr. Pointer by Mr. J. W. Titley of Chicora, Pa., when a colt and placed in E. F. Geer's hands for training and made his debut on the turf in 1894, starting in two races that year. His first race was on August 20, at Washington Park, Chicago, where he defeated a field of eleven starters in straight heats, time 2:12½, 2:11½ and 2:12. He next started at Fort Wayne, Ind., just one week from that date, winning the first two heats in 2:13½ and 2:12½, but in the third heat threw a shoe and was distanced.

In 1896 he was sold at W. B. Fasig's sale at Cleveland, Ohio, being purchased by Smith & Mills, of Boston, Mass., for \$5,000, and was placed in the hands of Dave J. McClary, but owing to his being with a trainer not familiar with him, and not being properly balanced during the early part of the season, he did not race very well in his first few races that year, but toward the later part of the season came into form and displayed the phenomenal speed and race-horse qualities that earned for him the world's championship later. At Medford, Mass., he paced three heats in a winning race in 2:02½, 2:03½ and 2:03½, which still stands as the world's race record for three consecutive heats. At Readville, Mass., he won in 2:04½, 2:04½ and 2:05½. At Lexington he won in 2:03, 2:04½ and 2:06½, also at Philadelphia in 2:04½, 2:05½ and 2:06. He started in eight races in 1896, winning four of them.

In March, 1897, he again passed under the hammer at W. B. Fasig & Co.'s Madison Square Garden, New York, being purchased by James A. Murphy, of Chicago, Ill., for \$15,600. He was again trained and driven by Mr. McClary, starting in public sixteen times during that season, ten of which were races and of which he won eight, six being exhibition miles. He won races at Hartford, Chicago, Cleveland, Medford, Mass., Indianapolis, Springfield, Ill., Hartford, Conn., and Chicago. He started at Buffalo to reduce his record of 2:02½ and succeeded in cutting it to 2:01½. On August 28, he started at Readville, Mass., against that time and paced a mile in 1:59½, the world's record for a harness horse, and marked Star Pointer as the first horse that ever trotted or paced a mile in less than two minutes. The quarters of that mile were paced as follows: 30 seconds, 59½ seconds, 1:29, 1:59½.

It was Mr. Murphy's intention to have Star Pointer used exclusively for the purpose of reducing his own record in 1898, as well as the wagon record, and there is not a particle of doubt that the great stallion could have accomplished all that was expected of him if he had been favored with ordinary advantages. There must be no disturbing factors for record breaking performances. The condition of the track, atmospheric conditions, etc., must all be satisfactory.

On six occasions in 1898 set for trials against time, were the weather conditions unfavorable, but notwithstanding this fact Star Pointer made a wonderful showing. At Peoria, Ill., on July 14th, he started to break the track record of 2:05 and reduced it to 2:02½. At Detroit, on July 22d, he reduced the track record from 2:02½ to 2:01½. At Columbus, on August 6th, he equaled his own world's record of 1:59½, on a track conceded by all to be more than a second slow. At Joliet, Ill., August 8th, he reduced the track record from 2:02½ to 1:59½, on a cold, windy day. At Readville, on September 1st, he paced a mile in 1:59½, finishing in the rain. September 9th, at Hartford, he reduced the track record from 2:03½ to 2:00½, and at Philadelphia, Pa., September 17th, he set the track record at 1:59½.

He paced seven public miles in 1898 in the average time of two minutes.

Mr. Murphy becoming disgusted with the fact that the fates seemed determined not to favor him even with one favorable opportunity of giving Star Pointer a fair chance of performing under conditions conducive to pacing a mile to his real limit, consigned him to Fasig-Tipton Co.'s New York sale that fall and he was purchased by Mr. White of Cleveland, Ohio, in November for \$15,000.

Mr. White placed him in the stud at his farm and Star Pointer is now the sire of fourteen standard performers, of which four have records below 2:09, the fastest being Morning Star that has a regular race record of 2:04½, and a matinee wagon record of 2:03 made in 1905. Morning Star was sold for \$10,500 at the Old Glory sale last month. As a sire that will give the California pacing families the ability to carry the great speed some of them possess to the end of the mile and the end of the race no matter how long drawn out it may be, Star Pointer will fill the bill. The Hal family of which he is the greatest member, is filled with thoroughbred blood and has wonderful speed, great power and extreme endurance. He will be bred to some of the best bred mares in California during the two years he is to be kept in this State.

The State Agricultural Society of Iowa has a surplus of \$45,000 in the treasury. And Iowa gives one of those old-fashioned fairs, with races on a half mile track, and caters to the farmers and breeders of the State and not to the bookmakers.

THEY ARE ALIVE UP NORTH.

The members of the North Pacific Fair Circuit are very much alive. They are not sitting down and waiting for something to turn up, but are doing the turning themselves. From the Rural Spirit of last week we take the following:

At the annual meeting of the North Pacific Fair Association held in the Rural Spirit office, Portland, Ore., on Wednesday, January 10th, 1906, the following members were represented: Oregon State Fair by W. H. Downing; King County Fair, A. T. Van De Vanter; Snohomish Agricultural Association, Dan Currie; Washington State Fair, G. A. Graham; Spokane Interstate Fair, Robert H. Cosgrove; Lewiston-Clarkston Fair, C. W. Mounts; Walla Walla County Fair, A. C. Vandevanter.

A. T. Van De Vanter called the meeting to order in the absence of the president, W. H. Wehrung, who came in later. Upon motion the following committees were appointed upon dates: Downing, Van De Vanter, Currie, Graham, Cosgrove, Mounts and Vandevanter. After the usual arguments the following dates were agreed upon:

Seattle, September 3d to 8th; Salem, September 10th to 15th; North Yakima, September 17th to 22d; Spokane, September 24th to 29th; Walla Walla, October 1st to 6th; Lewiston, October 8th to 13th. Spokane was given the privilege to continue their fair and running races one week longer, but without harness events and live stock. Everett was granted the right to select such dates as they see fit without violating any rules of the association.

The committee appointed on early closing stakes reported the following list, which were authorized by the representatives present and confirmed by the meeting as a whole:

Salem.	
Two-year-old pace	\$ 400.00
Three-year-old pace	500.00
2:25 pace	1000.00
2:15 pace	2000.00
2:10 pace	700.00
2-year trot	400.00
3-year trot	500.00
2:27 trot	1000.00
2:17 trot	2000.00
2:12 trot	700.00
Seattle.	
2:20 trot	\$1000.00
2:20 pace	1000.00
North Yakima.	
2:15 trot	\$1000.00
2:10 pace	1000.00
Spokane.	
2:16 trot	\$1000.00
2:10 pace	1000.00
Walla Walla.	
2:17 trot	\$1000.00
2:15 pace	1000.00
Lewiston.	
2:15 trot	\$ 500.00
2:10 pace	500.00
Everett.	
2:40 trot	\$ 500.00
2:25 trot	500.00
2:25 pace	500.00
2:10 pace	800.00

The secretary was authorized to advertise the above stakes to close May 15th, 1906, and to publish the same in pamphlet form as "A Stake Book," to use his best efforts to secure entries for same. He was further ordered to visit training stables in California in the interest of this circuit, and to pro rata the expense of such advertising and traveling expense among the present members.

The rule barring hobbles on colts that race on this circuit was abolished.

The secretary was authorized to appoint a judge for the entire circuit, and W. E. Wood of Norborne, Mo., was recommended, if terms are right.

The following amendments were made to the by-laws: That no member of this association shall be allotted dates for a longer period than one week for harness events and live stock shows without the consent of a two-thirds vote of the members present at the regular annual meeting.

That every member of this association shall advertise at least two harness events for each day's racing.

JOHN BRADBURN'S BOOK COMPLETED.

Mr. John Bradburn, superintendent at Village Farm, East Aurora, N. Y., for the last twenty-five years of its existence, and now superintendent of the Ideal Stock Farm of the same place, has completed his long-promised book—"Breeding and Developing the Trotter." Mr. Bradburn commenced writing his book several years ago, but had to cease work owing to ill health. Because of the wide and varied experience of its author, Mr. Bradburn's work will doubtless become an authority on its subject. The book will be published in March or April. Arthur Caton Thomas, New York representative of the American Horse Breeder, was selected by Mr. Bradburn to edit his volume. The subjects treated are: "The Village Farm Theory of Breeding," "Founding a Stock Farm," "Purchase and Care of Stallion," "Purchase and Care of Brood Mare," "Breaking and Training Colts," "Developing Speed," "Care of Feet," "Management of a Stock Farm," etc.

The long shaft, low seat, pneumatic speed cart that has been designed especially for track use by S. Toomey & Co., the world renowned sulky and cart builders, can be seen at O'Brien & Sons, Golden Gate avenue and Polk street, who are Coast agents for these excellent vehicles.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

ZOLOCK 2:05¼ AT SAN JOSE.

The beautiful Agricultural Park, San Jose, is to have the distinction of being the headquarters during the breeding season of 1906, of the two fastest entire sons of the great McKinney. Kinney Lou 2:07¼, the fastest trotting son of McKinney, is at home there, Budd Doble having located his champion there over two years ago, and now Henry Delaney announces that the pacing stallion Zolock 2:05¼ will be located there during the season of 1906.

Zolock is as well known to the breeders of the Pacific Coast as any stallion in the country and is admired by one and all not only for his grand conformation and great speed, but also for his blood lines and he is one of the best bred McKinneys living. His dam is that great mare Gazelle, whose trotting record is 2:11½, and who has not only produced Zolock 2:05¼ but is the dam of that great trotter Zephyr 2:07¼, winner of \$8000 on the Grand Circuit last season. Gazelle is by Gossiper 2:14¼, and her dam is Gipsey, dam of Gazelle 2:11½, the three-year-old pacing whirlwind Delilah 2:14¼, the good trotter Ed. Winship 2:15, Willets 2:17 matinee record, and Dixie S. 2:27. Gipsey is by Gen. Booth 2:30½, son of old Geo. M. Patchen 30, and her dam was Echo Belle, a daughter of Echo 462, the next dam being a daughter of the Oregon running horse Lummox, and the next a daughter of old Gray Eagle. Anyone who will study the blood lines of Zolock cannot help being impressed with the lines of producing blood that come to him through channels noted for gameness and endurance, as well as from families that are noted for good looks and great race horse qualities.

Zolock has six in the list, Ambush (3) 2:14¼, Delilah (3) 2:14¼, Bystander 2:14¼, Sherlock Holmes 2:15¼, Dixie S. 2:27 and Conchita 2:29. In addition these three-year-olds by him have made the following "ne in trials: Lillian Zolock 2:14, Kinney Wood 2:15, Cleopatra 2:15, Red Lock 2:18, Zolite 2:18, Inauguretta 2:22, Hylock 2:25, Majella 2:25, Adalante 2:26, Bolock 2:27. Two-year-olds that have been given trials are Wenja 2:24, Bonnie June 2:27, Isalco 2:30, and twelve others now in training that can step quarters from 33 to 36 seconds. All his colts are good headed and there has never been one that went lame. Every colt by him that has been trained has shown speed without one exception. Zolock stands 16 hands high and is a grand individual in every way. Those who attended the meetings at Fresno, Santa Rosa and Sacramento last summer know how he could play with the high class field of pacers he met at these meetings. His two heats at Fresno in 2:05¼ are proof that he has gameness as well as speed. His service fee will be \$75 for the season.

Mr. Delaney will also have Isalco, a son of Zolock, in the stud at \$25. This colt is a full brother to that great three-year-old filly Delilah 2:14¼. He is now three years old and the picture of his sire in every way except he is not as large. His dam is Gipsey, referred to above, who has five standard performers to her credit, three of which have records of 2:15 or better. Gipsey is also the granddam of that wonderfully fast colt Col. Green that has a trial record of 2:10½.

Mr. Delaney's address will be at the Race Track, San Jose, where he invites breeders to call and see his horses.

INTERESTING ITEMS FROM MONTANA.

The Montana Circuit, as announced in the Breeder and Sportsman last week, appeals directly to the harness horse owners and trainers of California, and many of them have already expressed the intention of visiting the copper country during the coming summer and starting their horses for the many big purses that will be offered. From the Stockman and Farmer, published at Helena, we take the following items of interest in regard to this circuit of ten weeks and other matters of news to horsemen:

Every association represented at the conference of secretaries pledged at least two stakes of \$1000 each, and the larger ones, Butte, Helena, Bozeman and Missoula, will give one each day. Butte has promised eight at least, and possibly ten in the harness division alone.

The classes adopted will be uniform, so far as possible. Butte, Bozeman and the State Fair have decided upon 2:14 and 2:18 pacing stakes, 2:16 and 2:20 trotting stakes, and these three tracks and probably some others will give stakes for three-year-old trotters and pacers.

Miles City wants a date, although their fair has not as yet been organized. If possible they will get one, when they get further along.

Havre is also making arrangements for a summer meeting.

The early closing stakes for the Montana Circuit will be announced February 1st, or before.

Dr. Galbraith says Butte is ready for a big meeting and that the business men are taking much interest in the matter. A number of Butte men are buying harness horses, and the summer's matinee meetings will be interesting.

There will be a spring sale of young standard-bred horses in Butte in April, in which several Montana breeding plants will be represented.

W. B. George says Billings will have the greatest fair in her history. Farmers, stockmen and the entire business interests of the valley are taking an interest, and a great showing will be made of products.

Lewistown people are planning a fair this year, for the reason that there is greater inquiry about the possibilities of the Judith Basin than ever before.

Great Falls people are closing arrangements for the mile track belonging to the Couch estate, and Mr. Jensen says the matter has been practically closed. It is claimed that Great Falls was not able to offer good racing for the lack of a good track.

THOROUGHBRED DEPARTMENT.

(By Ralph H. Tozer.)

Walter Jennings certainly did change his brand of luck on the 1st day of January, 1906, putting that labeled "bad" away back in the darkest part of the store-room and taking out a bright, brand-new package marked "good," and using it right away. The result need not be told. He won the New Year's Handicap with Proper and follows January 20th with a win by the same horse in the Lissak Handicap, worth \$2820 to the youthful turfman from "Show Me" State. That Proper was a good horse last Saturday was shown by his glossy coat, his coltish and kickish ways and his evident desire to break all previous running records. He landed a solar plexus blow on Bearcatcher at the post, and "the Bear" didn't look any too good anyhow. Well, Proper got away "on the fly," Red Leaf flatfooted, Bearcatcher tangled up. Jake Sanders came pretty close to not getting off at all, and Proper won by a Fitzsimmons head in the hardest kind of a drive with Red Leaf, while Jake Sanders, clearly the best horse in the race, was third, about half a length further away. Bearcatcher needs a rest or a claw-sharpening, winding up a poor fourth. The track was deep and at about its heaviest stage, and Lubin ought to have made a better showing, even though he likes a lengthier journey.

Up to last Monday Barney Schreiber led the winning owners with \$21,650 on the right side of the ledger, W. B. Jennings was second with \$11,331, then came W. W. Elliott with \$7,516, the Keene Brothers with \$6,730, T. G. Ferguson with \$6,436 and P. Ryan with \$5,012. These were the only owners that had reached or gone over the \$5,000 mark.

Jockey Herman Radtke remained over to ride Red Leaf in the Lissak Handicap last Saturday, and piloted six winners during the week, Robinson leading with seven winners in the six days, Bill Knapp tying with six. The record up to last Monday of those boys with ten or more wins to their record, was:

Jockey—	Won.	Second.	Third.	Un-placed.
Radtke	59	37	38	115
Knapp	43	33	27	99
McBride	39	27	20	99
Fountain	30	33	32	88
T. Clark	23	14	21	118
L. Williams	20	19	17	77
Robinson	20	26	24	123
Loague	16	23	25	99
Schade	10	4	4	53

The Trojan, a recent purchase by Barney Schreiber, broke a leg in the last race on Monday last, and had to be destroyed. He was by the excellent Bend Or horse, Golden Garter, out of Troyene, and would probably have been used at the stud by Mr. S. Bend Or blood being close to the top in both this country and England just now. Radtke was badly shaken up by the fall, but proved not to have been seriously injured. Goodchild also had a narrow escape on Elhel Thatcher.

C. T. Henshall's horses won twice on Monday and on Tuesday also, and as Mr. H. is quite a bettor, the bookies had very unpleasant afternoons of it.

The weights for the Burns Handicap, to be run this afternoon, were given out last Monday by Handicapper Egbert, and are as follows, only the ones considered to have a chance of winning being included in this list:

Proper	122	Andrew Mack	108
Eugenia Burch	120	Ginette	108
Lubin	119	Neva Lee	107
W. R. Condon	117	D'Arkle	107
Bearcatcher	116	Lord Badge	106
Dr. Leggo	114	Corn Blossom	106
San Nicolas	114	Sir Brillar	106
Reservation	111	Beknighted	106
Orchan	110	Lady Goodrich	106
Dr. Gardner	110	Elie	105
Gregor K.	109	Good Luck	105
Rubric	109	Gorgalette	105
Graziallo	109	Red Leaf	100
Jake Sanders	109	Geranium	100
Soufriere	108	Memories	100
True Wing	108	W. H. Carey	100
Bragg	108		

Should the weather and track be fast it should be a great race between Eugenia Burch, Proper, Dr. Leggo, Rubric, Soufriere, True Wing, Ginette, Neva Lee, Lord Badge, Corn Blossom, Lady Goodrich, Good Luck and Memories. If the track is heavy Lubin, Jake Sanders, Orchan, Gregor K. and Red Leaf would have a good chance of winning, while Eugenia Burch is not a "mudder," neither is San Nicolas. W. R. Condon has not started this season, and may cut quite a figure in the stake, which he won last year. Bearcatcher appears to have completely lost his form, and Graziallo's last few races were anything but impressive. The distance seems a little far for Dr. Gardner, who is just about thirty-six months old now. Dr. Leggo and Soufriere can "go the route," and can be counted upon to give a good account of themselves. Neva Lee is an extremely fleet mare, Corn Blossom is very speedy, Beknighted is a much improved horse, Lady Goodrich is fast and game, Elie was good enough a year ago to beat Dr. Leggo in record time, Good Luck won "five straight" at Los Angeles, Red Leaf ran a winning race last Saturday with Proper, while Memories, at 100 pounds, should be a keen contender, no matter what the condition of the track may be. Andrew Mack was a sweet horse over a soft track last season, and Sir Brillar, who has now rounded into his best form, was good enough to finish fourth in the Brooklyn Handicap of 1905, when he was a three-year-old. All in all, it looks, "on paper," to be

an equitable handicap indeed, and as a good field is certain to contest for the \$10,000 hung up, an interesting race is sure to result.

Starter "Dick" Dwyer ought to be a very proud man over the reception accorded him upon his return to Emeryville. His popularity, as a man as well as racing official, seems to be unbounded, and I believe he richly merits it. Dwyer was a good jockey, and when he became too heavy to ride came to be regarded as a clever trainer of race horses. In fact, he has tried to excel in any branch of the race horse business in which he was engaged, and has the entire confidence of the public, his employers and the riders that come up to the barrier. May the genial "Dick" live to lift the webbing for many years to come.

Seattle is to have a new race track, the cost of which will be \$500,000, 'tis said. The owners of the fine plant in use for the past four or five years have offered the principal owners of the new place a handsome sum not to build, but they won't "come off the perch." It is claimed the new track will have unsurpassed transportation facilities and can be reached by several lines of cars in much less time than can the King County course.

Elmer Laurence writes the Chronicle that there is no chance of holding a meeting for the gallopers only at Butte. It seems the driving club folks have a lease on the Daly track at Butte and are not disposed to give up the course to the runners for any length of time. Butte's most successful meetings in the past were of the "mixed" order, so that it might be well to give a meeting that would suit all the factions. Laurence seems to believe it "no cinch" that Denver will have a meeting in 1906, but she generally has a mixed one.

MEDIUM SIZED SADDLE HORSE IS BEST.

Mr. S. M. Yager, one of the leading saddle horse breeders and experts of Paris, Missouri, recently wrote as follows in regard to this breed of horses for the Kentucky Farmer and Breeder:

The ideal saddle horse, the kind that has been bred up to the art of perfection, possessing a smooth, neat form and fine features, nice, trim set of limbs, well muscled, good feet, fine head and neck, mane and tail, fine coat of hair, pleasant, kind disposition and noble countenance, with the style he puts on in the show ring and the pride he takes in showing his airy, graceful movements and his bold, dashing rack, is the grandest performer and the most beautiful horse that walks the face of the earth. The saddle horse, like all other breeds of horses, has its established size and type. The most successful show horse, as a rule, is the medium sized, medium boned horse. He possesses more quality, style, action and stamina, which makes him the best of show horses. The medium sized saddle horse ranges in height from 15.1 to 15.3 hands high. There are very few extra show horses over 15.3 hands high, the large majority ranging from 15.1 to 15.2½ hands high. Though some few reach 16 hands, they are overgrown saddle horses and very few of them ever carry the fine features and form, style and action with that height. On the other hand, they generally become big, coarse, rough, big-boned fellows, gross and beefy, which knocks out their action and unfits them for the show ring. Other horses, 16 hands or over, are narrow, contracted, their front legs nearly together at the breast, no room for lungs, weak constitution, body a little larger around than a half bushel measure, and not a model or a uniform saddle horse by any means.

Some may think that all of my horses are medium-boned horses, but I have both the medium and the large boned, both of which won more premiums last season than any other horses of their respective ages in the State of Missouri. Still I say there are very few big horses that will measure up to the proper standards of excellence. An over-grown horse is like an overgrown man—he generally grows all out of shape and loses his beauty of form and action. The medium sized horse is generally healthier, tougher and is not subject to the many ailments that the overgrown horse is. He is big enough to do any ordinary farm work, can go over more roads in less time and with less fatigue, either in the harness or under the saddle, than the overgrown horse. He is handier for man, woman or child to harness or saddle, to mount or dismount, and the average sized man looks better on a medium sized horse. Imagine the looks of a low, chubby man on a big 16-hand horse.

Any breed of horses, from the Shetland pony to the draft horse, will lose the desired qualities after they reach the extreme height of their respective breeds. The thoroughbreds, the trotters and the pacers are all medium sized breeds, and the most prominent horses of each breed scarcely ever go above the average height of their respective breed. These three breeds constitute the foundation of our American saddle horses, which, like their ancestors, are not extra large horses. Thus it is that road mares generally make good crosses with the saddle horse, but the more good top crosses one can get combined in one animal from horses of show ring quality, the better prospects are for future success. The medium sized horse is plenty large, and if people would drop the idea that they must breed to the inferior, big-boned, overgrown horse, and put their best efforts forth to breed to the horse of show ring quality, with style, action and conformation, there would be hundreds of saddle horses of show ring quality where there is not one as it is.

The management of Charter Oak Park, Hartford, Conn., proposes opening a futurity for three-year-olds, foals of 1906, to be raced in 1909, nominating fee one dollar per mare. Conditions and date of closing will be announced later.

A UNIFORM RACING SYSTEM.

The disagreement of the committee appointed by the Grand Circuit stewards, to devise and recommend a uniform system of racing, is a great disappointment to trotting horsemen. The Grand Circuit programs of last season were so much at variance in the matter of some distinct racing plan that the question of forcing a uniform system on the track managers became absolutely necessary. Consequently the prominent trainers, drivers and owners affixed their signatures to what was known as the "Syracuse Compact."

They are now on record as opposed to any plan which calls for longer racing than best two in three, and in conformity with that agreement will make no entries to long-drawn-out contests. While it was signed and made public during the State Fair races at Syracuse, yet the signers decided to make an exception in the case of the Oakley Park meeting where the purses had already been announced. It was understood then that the agreement will be in force the coming season and thereafter.

The action of the Grand Circuit stewards at their meeting showed that the track managers had deemed it advisable to notice the drivers' agreement and comply with their demands in some suitable form.

There is some plausible reason to believe that the majority of the tracks will adopt the heat plan of racing, which was the system at Buffalo, Detroit and partly at Columbus. The immediate announcement of the future plans of the Readville track, the secretary of which was a member of the committee, gives this idea some good foundation. The system received the approval of horsemen with the exception of the unjust method of deducting the regulation five per cent from winners, which was required by the Buffalo plan.

Secretary Jewett's plan as formulated for Readville modifies this, much to the satisfaction of racing men, and appears to be upon a fair basis. The cry among trotting horsemen will from now on be either the Readville system of no five per cent deduction, or if any, then on the basis of each division of the purse. The "Jewett plan," which the system will hereafter be called, calls for a straight five per cent entrance fee and nothing more, while at Buffalo last year, some of the winners paid back to the association as high as thirty-seven and one-half per cent, which was a direct imposition on horsemen who raced at that track, but who are much wiser now.

The important question now is whether the rest of the Grand Circuit members will adopt this plan, giving what horsemen have wished, asked and, as a last resort, demanded, namely, a uniform system of racing throughout the season. Even if the East did adopt the heat plan for their meetings, the question will still be, how many of them will be generous enough to offer the same liberal terms as the Readville management has done.

Each association appears to have its own favorite system, as was evidenced from the varied programs of last season when every system known to harness racing was in vogue with the exception of the dash racing. The mixup was general each week. As has been stated, Detroit and Buffalo adhered strictly to the "heat system" and no race required more than three heats to decide the result.

The Poughkeepsie system, which is still heartily endorsed, not only by Secretary Bain of that track, but by many other prominent horsemen, called for either two-in-three or three-in-five, with the provision that horses not standing for any portion of the purse at the finish of the second and third heats, respectively, were ruled out, with the result that of the fifteen races on the card only one was a four and another a five-heat event.

Hartford had the straight best three-in-five with the exception of both divisions of the futurity and the free-for-all trot and pace, consequently the competition of the sixteen races required sixty-two heats. The stakes and purses at Providence were almost equally divided, and the eighteen events were finished in fifty-eight heats. The result at Syracuse was about the same as that at Poughkeepsie, while at Columbus there was a general mix-up of heat racing, two-in-three, three-in-five and in every race three or more heats were trotted or paced.

The system at Oakley Park, Cincinnati, was straight three-in-five—with one exception, the free-for-all trot, and it took sixty-five heats to finish the eighteen races. It is not surprising, therefore, that this question is considered of vital importance.

Whatever disagreement the circuit managers may have in the matter, it looks almost certain that there will be either none of the "1812" system of elongated racing, or, if any, very few in number. When the "Syracuse Compact" was made public, A. J. Welch, owner and manager of the Hartford and Cincinnati tracks, announced his intention of doing away with the old-style of three-in-five and shorten the races, if others did the same. It was on this declaration mainly that horsemen made concessions in favor of Oakley Park track and entered their horses in spite of the agreement already signed.

The only obstacle now apparently in the way of shorter racing is the abolishment of the comparatively few events on other tracks, which call for the five-heat plan. Even if these few be allowed, under the distinct condition that they be raced on the Poughkeepsie plan, they will do no harm, provided horsemen will agree to make entries for such events. With Detroit, Buffalo, Readville, Hartford and Cincinnati in favor of either the three-heat or shorter plan, and horsemen firm in their signed agreement, the old system looks practically doomed.—Kentucky Stock Farm.

Chas. Marvin, who has been very ill with pneumonia, is reported as much better, but in such a weakened condition that it is doubtful if he will be able to train any horses this year.

NOTES AND NEWS.

It is rumored that Tom Sharkey will have a string of horses on the Grand Circuit this year.

Bert Webster has entered the employ of Chas. De Ryder and has Star Pointer 1:59½ and the McKinney stallion Greco in charge at Pleasanton.

Coney 2:02 by McKinney is to be sold at the Splan auction sale at Chicago.

Stewards of the Great Western Circuit will meet in Chicago next month to arrange dates and announce early closing stakes.

Strathway 2:19 has two trotters with records better than 2:10. Every mare bred to him last year is said to be in foal.

James Marshall of Dixon visited Pleasanton last week and made arrangements to breed his mare Trix by Nutwood Wilkes to Star Pointer 1:59½. Trix is the dam of Mona Wilkes 2:11½, winner of the three-year-old pacing division of the Breeders' Futurity of 1905. Mr. Marshall has as fine a collection of young brood mares as there is in California. They are numerous, but they are bred in producing lines.

J. G. Thomas, of Eau Claire, Wisconsin, has sent a string of eleven trotters and pacers to Denver to be trained by Al Russell. The fastest one in the string is Castlewood 2:09½, a pacer by Birchwood.

H. S. Hogoboom of Woodland, Cal., has heard of the pacing stallion Frank Marriott 2:12½, owned by a Pennsylvania doctor, who claims him to be the largest pacing horse in the world, Frank Marriott being 17 hands high and weighing 1200 pounds. Mr. Hogoboom thinks his stallion Arthur W. beats the horse from the Keystone State a little, as his record is a full second faster and he weighs 1400 pounds.

Information comes from Cleveland, O., that the well-known trainer, Vance Nuckols, has sold to Thomas W. Murphy of Glen Cove, L. I., the thirteen-year-old trotting mare Miss Brock 2:13½ by Stranger, dam Brooch (dam of Broomal 2:15) by Jay Gould 2:12½, at a reported price of \$2500. The deal was closed on the 3d inst., and it is stated that Mr. Murphy's purpose in buying Miss Brock was to breed her to Laconda 2:02. In the four years that Vance Nuckols and "Doc" Tanner have owned the mare she has started in forty-eight races, finishing first twenty-seven times, taking second money once, and was only unplaced twice, a very creditable record. Miss Brock is bred just like Boodie 2:12½, although not a full sister, as she is by Stranger, dam by Jay Gould and grandam by Ethan Allen 43.

Those who know of the horses bred by Mr. C. X. Larrabee at his celebrated Brook Nook Stock Ranch, in Montana, are aware of the fact that his mares and stallions carry the Morgan blood in their veins, combined with the best Hambletonian strains, and that he raises very handsome and stylish horses that are endowed with speed. In this issue of the Breeder and Sportsman Mr. Larrabee advertises three fine animals for sale that are now located at Pasadena. Particulars as to their breeding, etc., are given in the advertisement, which will be found on another page.

Both Dan Patch and Cresceus are to have an opportunity next fall of making new world's records at Lexington, Ky. M. W. Savage, owner of this sensational pair, has written a letter to Secretary H. W. Wilson, of the Kentucky Trotting Horse Breeders' Association, saying that he expected to give both Cresceus and Dan Patch the best of training this season and try to lower their present records. He said he believed the feat could be accomplished over the Lexington track, and Secretary Wilson has promised to have the track put in the best of condition, with this end in view. There are many horsemen here who believe that Cresceus will be able to reduce his present mark considerably.

Charles A. Durfee came into the office of this journal last Tuesday, and hunting up the editor implored him to make an item to the effect that all the McKinney mares he advertised have been sold, and he has nothing left but the two young stallions, Galindo and Almaden 2:22½, the former by McKinney and the latter by Direct 2:05½. Although he has sold the mares, nearly every mail brings him in letters from persons who want to buy, and as Mr. Durfee does not take to letter writing with as much pleasure as he does driving a trotter, he wants the public to know that his supply of McKinney mares is exhausted. In this connection he stated, however, that his neighbor, Mr. R. P. M. Greeley of Oakland, has a three-year-old filly by McKinney out of Winnie Wilkes 2:17½, that is such a sweet going one he is almost tempted to break his resolution and get back into the horse business every time he sees her. Mr. Greeley's filly is for sale, too, and Durfee says he don't know what people are thinking of who want a good prospect for the track or the breeding ranks, in allowing Mr. Greeley to retain possession of her. Mr. Durfee is confident that McKinney will be the greatest brood mare sire in the world, as everything out of his daughters that has been trained shows racing speed. Very few of the McKinney mares have produced old enough to race, yet they have produced Irish 2:08½, Tidal Wave 2:09, Silver Coin 2:10, Sally Pointer 2:11 and Eaglella 2:11½, besides several others.

The Kansas State Breeders' Association will offer a \$1000 purse for two-year-old trotters and one of the same size for three-year-olds to be trotted at the Topeka Fair next September.

State Veterinarian Charles Keane announces that the season for shipping cattle on inspection from points below the quarantine line of the State to points outside will close January 31, 1906.

There will be two \$2000 stakes at the Oregon State Fair this year—one for 2:15 pacers, the other for 2:17 trotters. This is good news to California owners.

The Yreka News of January 18th says: Frank Adams, a horse breeder of Siskiyou and Klamath counties, who lives just over the line, was in Yreka Tuesday on business, having shipped 150 head of horses and 30 head of mules from Montague to San Francisco. He was accompanied by E. Stewart, the San Francisco dealer, who paid him good prices for the animals—\$104 a head for 100 of the horses, \$125 a head for 50, and \$75 a head for the mules. Mr. Adams reports that the horse market is better for the breeder than it has been for years. He deals only in draft horses and has 500 head on his farm which he is breaking for the market.

A western writer, in commenting on the frequently made statement that carriage and other classes of light harness horses are too high in the country to admit of their being bought for eastern trade at a profit says: "The trouble largely rests with buyers of horses suitable for drivers, carriage animals, heavy harness horses and high actors. Prices offered in the country are generally lower than the same grade of horses are selling right at home to neighbors and local dealers. Horses are much higher throughout the agricultural portions of the west than at central markets, and local consumption has made a market right at home for a majority of the horses bred in the Missouri valley. At a number of places the past year the writer has found driving horses selling at \$200 per head, when, from experience, it was known that the same horses would not bring over \$150 per head if sold to a shipper. We have in mind several sales made within the past four months where horses brought from \$500 to \$1500, and we are in a po-

Monroe Salisbury is superintending the training of about twenty-five head of horses at Pleasanton track that are owned by James Butler of New York. Mr. Salisbury was confined to the house with a severe cold two weeks ago, but we are pleased to state that he is himself again, and able to be at the track every day.

While the boom is on with the Sidney Dillons it is just as well to remember that Cupid 2:18, trotting, still owned in this State, is a full brother to the sire of Lou Dillon. He is owned by Mr. A. B. Spreckels and has been kept as a private stallion, yet he has sired four trotters with records below 2:17. There will be several of his get offered at the sale of horses from Aptos Farm, to be held in this city soon.

One of the most admired horses at Pleasanton is Barney Simpson's brown stallion Arner 2:17½, own brother to Diablo. Arner weighs very close to 1200 pounds and is one of the best bodied stallions in California, while his legs and feet are about perfection. He is siring speed, too, as all his colts that are old enough to break are moving out like race horses. Mr. Simpson has been importuned to stand Arner at several points in California, but will take him back to Chico on the first of February. Arner served over forty mares there last year and all but three are in foal.

The North Pacific Circuit and the Montana Circuit deserve big entry lists. We hope Californians will visit them in large numbers.

Walter Cummings of Denver purchased the trotter Bonner 2:11½ by Jayhawker at a recent Chicago sale.

We are pleased to state that while the plans and other particulars are not ready for publication, arrangements are under way for the erection in this city of a large pavilion or Tattersall, where horse shows and sales can be conducted as they should be. Fred H. Chase & Co. will be the managers, and the new pavilion will contain a tan bark ring of such dimensions that horses can be shown in harness as they are at the leading sales in the Eastern cities, and spectators will be provided with all the comforts of a theater. The first sale to be held in this pro-

STATE AGRICULTURAL SOCIETY'S TRACK AT SACRAMENTO

Secretary Al Lindley reports that the day after the recent heavy rains this track was in fine condition to work horses on. Owing to its perfect drainage it bids fair to be a very popular track for winter training.

sition to know that several buyers from eastern markets had looked at the same horses and that their offers were far below the prices obtained. * * * Dealers tell you that they cannot afford to pay more for horses suitable for drivers, carriage, coupe, tandem, four-in-hand or show purposes than \$200 to \$250 per head. They affirm that it requires great expense in preparing these horses for market. The fact is, that it does not cost one-tenth as much to prepare a horse for market, as it does to educate one for the track. If eastern dealers are to continue buying western bred horses, they must jar loose from their old ideas and leave more of their money in the country." In view of this statement from a man who is in position to know absolutely what he is talking about, it would be interesting to hear what some of the buyers for the eastern markets have to say about his observations.

Mr. J. B. Iverson of Salinas, spent a couple of days in the city this week. He reports fine prospects for the Salinas Valley, the recent rains putting a fine aspect on the entire country. His good gelding North Star 2:13½, winner of all the principal trotting stakes for three-year-olds in California last year, is being jogged by Trainer Charles Whitehead, and is in fine shape. Mr. Iverson does not intend to race North Star this year, but will have him out in 1907 if he still owns him. Princess 2:13½ is better and faster than ever, and Mr. Whitehead thinks she will beat 2:10 this year. Mr. Iverson's trotter Prince Gift 2:12 has been running out for some time and will probably be taken up and raced again, as his owner believes he can lower his record when he is in condition. Whitehead has eight of Mr. Iverson's horses in training, besides quite a number of his own. Salinas will give a good fair and race meeting this fall.

The Breeders' meeting will probably be held in San Jose this year.

Santa Rosa horsemen will organize and give a meeting this year. Dates and purses will be announced soon, it is said.

posed new pavilion will be the horses from Mr. A. B. Spreckels' Aptos Farm, one of the choicest collections of trotting bred horses ever offered in San Francisco. The date of the sale cannot be definitely fixed as yet, but will be very close to the first of March.

Frank S. Turner of the Santa Rosa Stock Farm, who recently sold twenty-one head of young Sidney Dillons to Sterling R. Holt of Indianapolis, says he predicts that three of them will soon be in the 2:10 list under Millard Sanders' instruction. The three he marks for this early distinction are Carlocita, that he thinks will pace in 2:04; Carrie Dillon that will shade 2:09, and Kate Dillon, that should take a mark of 2:07 or 2:08. He expects Sanders to mark all these fillies this year. Mr. Holt evidently thinks mighty well of Carlocita, as he has stated that he intends changing her name to Mary Dillon, the Mary in honor of his wife.

EXPRESSIVE MAC AT SACRAMENTO.

Mr. Philip C. Byrne of Grass Valley will stand the McKinney-Wilkes-Electioneer stallion, Expressive Mac 4:52½, at Sacramento this year. He expects to be located there by February 1st. Expressive Mac is sired by McKinney 2:11½, dam Expressive 2:12½ (at three years old) by Electioneer 125. He is a fine individual, stands over 16 hands high and weighs about 1200 pounds. In color he is a dark bay. With very little training he has shown that he inherits the speed that he is entitled to by his breeding. He is a horse of good disposition, and his presence in Sacramento will be a chance for owners of good brood mares to patronize one of the best young McKinneys in the state. Mr. Byrne has made a good selection in securing this young stallion. It is his intention to enter him in this season's races and as he is perfectly sound and shows great speed he expects to give him a low mark. The well bred sons of McKinney will be in big demand this year and those who wish to breed mares to Expressive Mac will do well to make arrangements with Mr. Byrne without delay. Address Philip C. Byrne, care Willard Gardiner, 418 J St., Sacramento, Cal. *

THE DEMAND FOR HARNESS HORSES.

Henry T. White of the Chicago Inter-Ocean, who is one of the closest observers of conditions in the horse breeding industry, says:

"I cannot see where the supply is to come from to meet the demand of the next five or six years at least. No one will deny the fact that prices and demand are better than at any time in the past ten years, and it would appear as though, if the horses are in the country, owners would be anxious to take advantage of the situation and realize the high dollar on their holdings.

"In conversation with the head of the leading auction sale business in Kentucky the past week he informed me that, in spite of their best efforts, the number of horses consigned to their coming sale was far less than he had a right to expect, considering the favorable conditions of the market and that the low average of three horses to a consignor told the story. He also called attention to the significant fact that there were but three or four of the big stock farms left in the blue grass region, farms where they bred twenty-five mares or more per year, and that the smaller breeders had curtailed their operations in proportion.

"Looking over a copy of a leading turf journal published the past week I find a total of thirteen pages of advertising, seven and three-quarters of which was used by individuals or firms who make a specialty of selling horses, and six pages of this in the interest of combination auction sales, events of this character being held at regular intervals. The list embraces at least one sale a week from the last of January to the first of May, and in some cases several sales conflict. These firms are scouring the country for stock, and having a hard time to make a showing. Of course, there are a few well established firms having their regular following that will continue to send their offerings, although the number of horses may be less than in the past. The balance, in their efforts to secure business, will offer inducements in the way of cutting commissions, taking conditional entries, and permitting by-bidding that will lose them the support of the buyers, and as their consignors gradually realize they are suffering in consequence, and these firms must drop by the wayside. Certain it is there never was a more favorable opportunity for a man to realize on good horses if he has any to sell than by consigning to a first class combination sale, and the man who has money to invest, who desires to engage in business for the future, would have a hard job to figure out a safer, surer way of realizing on his time, labor, and money than by purchasing foundation stock of the right kind and engaging in the breeding of the light harness horse."

FROM A GREAT BROOD MARE LINE.

James A. Smith of Vallejo, announces that his grandly bred and handsome McKinney stallion Constructor 39,569 will make the season of 1906 at the above named town. Constructor is an own brother to that fast stallion Tom Smith 2:13½, and like him is a good gaited trotter. He stands 15½ hands over the withers and 15½ hands over the loins. He weighs 1100 pounds and is the model of a modern, high class trotting sire. There are many McKinneys in the stud in California, but outside of his full brothers there are none bred like Constructor. His dam, Daisy S., dam of four in the list, is by McDonald Chief 3583, a horse that did much to improve the size, style and endurance of the trotting bred stock of Solano and adjoining counties. McDonald Chief was a son of Clark Chief 89, out of a mare by thoroughbred Berthune. The dam of Daisy S. was also a great brood mare—Fanny Rose by Ethan Allen Jr. She produced Columbs S. 2:17, and George Washington 2:16¾, both large handsome trotters and the latter the sire of Stella 2:15½ and several others in the list. Fanny Rose also produced Fanny, dam of Scotty 2:19½ and Trilby 2:21¾, showing that on his dam's side Constructor inherits blood that produces speed uniformly. With the McKinney cross Constructor can be said to be "as well bred as anybody's horse," and a prospective sire of speed from all classes of mares. At the low service fee of \$25 he should receive an extensive patronage, as such a fee is paid readily for services of the most ordinary stallions. A perusal of Constructor's advertisement on another page is worth your time.

HOW THE NEWS WAS RECEIVED AT HOME.

[Western Horseman, Jan. 12.]

For some time The Western Horseman has been "next" to a proposed business venture of Hon. Sterling R. Holt, owner of Sidney Dillon. A couple of weeks ago Mr. Holt left for California, and the following telegram received from him at Santa Rosa, Cal., January 6, tells a lot in a few words: "Have bought twenty-five Sidney Dillons, the best ones in California, and they will be trained at the Indianapolis track by Millard Sanders." Whe-ew! Twenty-five Sidney Dillons, the best in the land, to be "trained out" by Millard Sanders! And Millard Sanders trained and marked Lou Dillon 1:58½, the fastest trotter in the world, and Lou Dillon is by Sidney Dillon! But Mr. Holt "does things"—and the Sidney Dillons "do things"—and there will be "great doings" at the Indianapolis track the coming season, for there will be other great things there besides the Sidney Dillons.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

A TOUT STORY.

"Marque" of the Horse Review tells the following good one:

I was in the betting ring at Columbus, last fall, when I saw a stylishly dressed young man tackle an elderly gentleman who was evidently a local horse admirer. Feeling certain that it was a case of tout-ing, I drew near, so as to catch as much of the conversation as possible. Sure enough, it was the stereotyped song and dance about having seen the wisest man on the ground stringing several thousand along in the various books on Wentworth for the last heat. The black gelding had just won his memorable second heat in 2:04½, Dr. Strong being a close second. There was a strong feeling among the talent that Dr. Strong would take the final and his price was 2 to 1, while Wentworth was quoted at 4 to 1. The tout soon had his man interested, and I finally saw the gentleman unbelt his roll. He skinned off a couple of twenties and a ten, while the tout's eyes glistened with anticipation. However, the gentleman upon being importuned to let the tout bet the money for him, refused and, advancing to the bookmaker, bet it himself on Wentworth. A look of disappointment flashed over the tout's face, but he came back with a plea that he was broke and thought it only right, since he had given his "extra special," that he be presented with a five to put on for himself. The gentleman loosened and an instant later I saw the tout bet the money on Dr. Strong. Well, Wentworth won the heat handily and while I didn't see him afterwards, I'll bet that if ever there was a tout who felt whip-sawed and double-crossed it was this one who had marked the cards on himself.

STALLION LAW IN CALIFORNIA.

The stallion service law of this State was amended at the last session of the Legislature and is now as follows:

Every owner or person having in charge any stallion, jack or bull used for propagating purposes has a lien for the agreed price of its service upon any mare or cow and upon the offspring of such service, unless some wilfully false representation concerning the breeding or pedigree of such stallion, jack or bull has been made or published by the owner or person in charge thereof, or by some other person, at the request or instigation of such owner or person in charge.

Every claimant of a lien provided for in the preceding section must within 90 days after the service on account of which the lien is claimed, file in the office of the county recorder of the county where the mare or cow subject thereto is left, a verified claim containing a particular description of the mare or cow, the date and place of service, the name of the owner or reputed owner of such mare or cow, a description by name, or otherwise, of the stallion, jack or bull performing the service, the name of the owner or person in charge thereof, and the amount of lien claimed. Such claim, so filed, is notice to subsequent purchasers and incumbrancers of such mare or cow and of the offspring of such service for one year after such filing.

Action to enforce this lien may be brought in any county wherein any property subject to the lien may be found.

R. AMBUSH 2:14 AT STUD AT REDLANDS.

That slashing young trotter Aumbush 2:14½, whose name for registration purchases has been changed to R. Ambush, will make the season of 1906 at the ranch of his owner, Mr. G. W. Bonnell of Redlands, at the low fee of \$30. R. Ambush made a two-year-old record of 2:20 in 1904 and last year reduced it to 2:14½ in a winning race at San Jose. He is a royally bred colt, his sire being Zolock 2:05¼, his dam May Kinney by Silkwood 2:07, and his grandam Satinette by McKinney 2:11½. As an individual Ambush is about all that one could wish, and he has a fine disposition and has proven himself a good race horse. He is now four years old and will sire early and extreme speed to a certainty.

JUDGES FOR PASADENA HORSE SHOW.

Officials for the Pasadena horse show, to be held March 18th, 19th and 20th, have been appointed and from now on preparations for the show will be rushed to completion.

The judges are among the best-known horsemen in the country. W. D. Woolwine, Los Angeles; Robert Lee Betner, Riverside, and Walter S. Newhall, Los Angeles, will judge the saddle classes.

Milo M. Potter of Santa Barbara, Walter S. Newhall and Captain J. C. Newton of South Pasadena will judge the roadster classes.

Francis C. Underhill of New York has consented to take charge of the heavy harness classes.

Another wanderer that has come back to the fold is Crit Davis, who after a long time with the bang-tails will train for the Cecils of Danville, Ky.

BE ABLE TO CURE THESE DISEASES.

The stock owner who has gone through an epidemic of distemper, epizootic, pinkeye, etc., is in position to know the value of a remedy that will positively cure these ailments. Still better is it to be able to prevent them. There is no question that Dr. Craft's Distemper & Cough Cure, advertised in another column, is effective both as a preventive and a cure. It has been on the market many years. It is invariably sold under a guarantee to refund the money if it fails. It has been used by two hundred thousand horsemen and stockmen. It is equally effective on horses, sheep and dogs. It is worth while to be familiar with the merits of such a remedy and we advise our readers to at once send to the manufacturers, The Wells Medicine Co., 13 Third St., Lafayette, Ind., for a copy of their valuable pamphlet, "Veterinary Pointers." It is free.

BEST RECORDS.

The racing season of 1905 now being at an end the presentation of a table of the best records of the year is in order, and it is herewith appended.

Trotters.

Two-year-olds—

Colt—Ed Custer by Baronmore 2:14½, dam Marble 2:14 by Clay King.....2:16½
Filly—Lightsome by Constantine 2:12½, dam Bourbonlight 2:18¼ by Bourbon Wilkes...2:14½
Gelding—Bud Bonner by Prodigal 2:16, dam by Bourbon Wilkes 2:19¾

Three-year-olds—

Colt—Bon Voyage by Expedition 2:15½, dam Bon Mot by Erin 2:12¾
Filly—Susie N. by Moko, dam Gipsev Dark by Wiltwood 2:09¾
Gelding—North Star by Nutwood Wilkes 2:16½, dam by Eugeneer.....2:13¾

Four-year-olds—

Colt—Fatty Felix by Constantine 2:12½, dam by Ponce de Leon 2:13.....2:14
Mare—Gramattan by Grattan 2:13, dam Zylpha 2:13¾, by Greystone.....2:11¾

Aged—

Stallion—Admiral Dewey by Bingen 2:06¼, dam Nancy Hanks 2:04 by Happy Medium...2:04½
Mare—Sweet Marie by McKinney 2:11¼, dam Lady Rivers by Carr's Mambrino.....2:04½

Green—

Stallion—Boreazelle by Boreal 2:15½, dam Luzelle 2:15½ by Patron.....2:09¼
Mare—Deloree by Delmarch 2:11½, dam Hindee by Allerton 2:09¼
Gelding—Albert C. by Bellini 2:13½, dam Libby Sweet by Highland Gray.....2:09½

Pacers.

Two-year-olds—

Colt—Manager H. by Manager 2:06¾.....2:20
Colt—Rockaway by Stoneway 2:23¾, dam unknown 2:15½
McFayden by Diablo 2:09¼, dam Bee by Gelding—Kelly by Baronmore 2:14¼, dam Miss Van Tassel 2:29¾ by Don Wilkes....2:19½

Three-year-olds—

Filly—Bonalet by Bonnie Direct 2:05¼, dam Roblet 2:12 by Robin.....2:09¼
Matilda 2:30 by Nutwood.....2:13¾

Four-year-olds—

Stallion—Echo Jr. by Echo, dam Sis Havoc by Havoc 2:07¼
Mare—Doris B. by Grattan 2:13, dam Edith Zell by Strathroy 2:07¼
Colt—John Kirby by Allerton 2:09¼, dam Sterling 2:15½
Gelding—Directwood by Direct 2:06½, dam Dolly Fort 2:28¾ by Lee Wood.....2:08¼

Aged—

Stallion—Dan Patch by Joe Patchen 2:01¼, dam Zelica by Wilkesberry 1:55¼
Mare—The Broncho by Stormcliffe, dam Luxora by Autocrat Jr.....2:03¼
Gelding—Nathan Straus by Director 2:17, dam Mary Marshall 2:12¾ by Billy Wilkes...2:03½

Green—

Stallion—Walter Direct by Direct Hal 2:04¼, dam Ella Brown 2:11½ by Prince Pulaski Jr.2:05¾
Mare—Lillian by Adrian Wilkes, dam Abdallah Lightfoot by Mambrino Abdallah...2:08½
Gelding—Bolivar by Wayland W. 2:12½, dam by Harry Wilkes 2:06¼

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich, July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

An eastern exchange says: "The New England Trotting Horse Breeders' Association has decided that the entire program for the Grand Circuit meeting at Readville will be made up of dash races. This is a surprise to the horsemen, as the association has been inclined to be conservative in the matter of adopting new ideas. It is the idea of the directors that everything possible should be done to attract the sport-loving public to their races. It has been claimed that the public demands shorter races and also racing upon a plan that will do away with postponed races. To illustrate the new Readville plan, the following sample race is given: The Massachusetts, for 2:10 trotters. An event of three races of one mile, \$3000 each race, divided as follows: First horse, \$2000; second horse, \$600; third horse, \$300; fourth horse, \$100. Nothing to be deducted from money winners; horses to be named at the time of closing of entries. Forfeits of \$40, \$65, \$90, \$120, \$135 would be due in sequence on April 10th, May 10th, June 9th, July 10th, and August 8th. Additional horses in the same stable may be named and a forfeit of \$9 will be due on each of the above-named dates. Nominators will not be held for forfeit after they have been declared out in writing. In this event horses will draw for positions in the first heat, but will start in the second heat as they finished in the first, and in the third as they finished in the second. By this plan the problem of long drawn out races will be solved. Any horse that secures a record will be recompensed by winning the first division of the purse, and every horse in the race will be called upon to race to his limit every heat. When the plan is tried some objections to it may be developed, but it is certainly worthy of a fair trial."

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
April 1-Sept. 1. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above the water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Jan. 18, 19—Lynn Kennel Club. Lynn, Mass. Tom B. Middlebrooke, Superintendent. Entries closed Jan. 6.
Jan. 24, 27—Southern Kennel Club. Memphis, Tenn. Harry W. Clapham, Secretary. Entries closed Jan. 10.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary. Entries close Jan. 25.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary. Entries close Jan. 30.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary. Entries close Feb. 22.
March 1, 3—Southern Ohio Kennel Club. Hamilton, Ohio. Thos. Boli, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary. Entries close Feb. 25.
March 8, 10—Colorado Kennel Club. Denver, Col. T. W. Bartels, Secretary.
March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
May —San Francisco Kennel Club. 10th annual bench show, Fred P. Butler, Secretary.
May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary, Brighton Beach, L. I.
June 1 2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.
Sept. 3, 6—Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary.
Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary.

Field Trials.

Jan. 15—United States Field Trial Club. 17th annual trials. Grand Junction, Tenn. W. B. Stafford, Secretary.
Jan. —National Championship Field Trial Club 10th annual trials. Followed by U. S. All Age Stake. W. B. Stafford, Secretary, Trenton, Tenn.

THE DENNY PHEASANT.

Twenty years ago the late Judge Denny imported from China eighteen China ring-neck or Torquatus pheasants and gave them their liberty in the Willamette valley some fifteen miles from Corvallis. Shortly after state laws were enacted protecting these birds and they are today the game bird of Oregon. The grouse and native pheasant, once so plentiful in that section, are a thing of the past, at least so far as the Willamette valley is concerned. The latter no doubt have been driven back to "tall timber" in the foothills by the pugnacious China cock birds, who are always on the war path against anything that wears feathers.

A few years ago the State Legislature in recognition of Judge Denny's generous act gave these birds the name of "Denny pheasants," but they are most commonly known as the China pheasant. They are, beyond a doubt, the most prolific game bird in existence today. Thousands have been killed by "pot hunters" and others every year, both in and out of season; eggs and young destroyed by ground vermin, and in many seasons the late rains totally destroy the early broods. The pheasant hen frequently selects the open field or meadow for a nesting place, and will often stick to the nest until run over and invariably crippled by the mower.

When plowing summer fallow, nests are frequently run into, and the farmer, not wishing to plow the eggs under, sets nest and all out onto the plowed ground, only to be devoured by the hungry crow. The crow is one of their worst enemies, and, strangely enough, they seldom molest the pheasants' nests until the eggs are almost ready to hatch, at which time they will attack a nest in great numbers. The pheasant will make a brave effort to protect her property, but while one or two crows manage to engage her in a combat a few feet from the nest, the others dive down and destroy the eggs. However, in the face of all this, each hen will bring off three or four broods of from thirteen to seventeen young in a season, and they have spread over the state and increased in numbers almost beyond belief. It is no uncommon thing to see them mingle with the domestic fowls around the barnyard. This is true, however, more with the male birds, who have been known to mate with Leghorn or Bantam hens, producing a hybrid that neither crows, cackles, lays eggs or takes any apparent interest in life whatever. When a China male and the common dung-hill "cock of the walk" meet in mortal combat, as they frequently do on the country farms, the latter invariably gets worsted.

The great cartoonist, Homer Davenport, whose old

home is at Silverton, Ore., is a devoted pheasant fancier and has a collection exceeding that of the largest zoological garden in the world. He is the authority for the statement that Oregon now contains more China pheasants than their native country, China, regardless of the fact that 50,000 were killed in one day last season in that state.

The destructive forest fires that caused the dense smoke to hang over the Willamette Valley for so long a time last summer served the illegal hunters a double purpose. It enabled them to come nearer their game, and at the same time shield them from the farmers, who are, for the most part, trying to protect the game.

As the pheasants feed principally upon insects, the farmer does not begrudge the little grain they eat, most of which would otherwise be wasted. Some claim that they will rid a garden of cut-worms without doing any material damage.

It is a safe estimate to say that four-fifths of the farmers in the part of the valley where these birds were first liberated, have at some time attempted to rear and domesticate them. Several instances are authoritatively noted where good-sized broods have been hatched out and allowed to run around the barnyard with a common hen for a mother, but as soon as they were of any age they would disappear to the fields.

A recent article on pheasant-rearing in an eastern journal says they cannot be reared in captivity unless fed on maggots. This is a mistake, according to Gene Simpson, who states: "I find that young pheasants do remarkably well on hard-boiled eggs chopped fine, and fresh ground meat, combined with corn meal. I keep them in tight, covered runs, in a dry place, with plenty of sunlight, and have this season lost fewer pheasants than young chicks, in proportion to the number hatched. Among the poultry fanciers there are those who are continually striving to create new breeds, and the wonder is that more do not take up pheasants. There is certainly no bird living more beautiful than a male pheasant in full plumage. They can be raised at about the same cost as the smaller varieties of chickens, and a financial point in their favor is that there will be no culls. With proper care and close attention they are even harder than young chicks and, strange to say, stand close confinement better." Mr. Simpson has been a breeder of fancy poultry for several years, but owing to the great demand for China pheasants for breeding purposes, the latter will take up his entire attention and be raised exclusively. The possibilities of the pheasant industry are unlimited and may become one of the industries of the Willamette.

Adult China pheasants need no roosting house, for the lightest and most open portion of the yard will be selected for a roosting place, their wild nature thus placing them on guard against any approach of intruders. One section of yards on Mr. Simpson's place is divided into runs, 12 by 28 feet, covered overhead and boarded up full height around the entire outside to avoid the possibility of the birds being disturbed during the laying season. Pheasants rarely ever set in captivity, and when they do they make very poor mothers. In fact, they seldom make a nest at all, laying their eggs promiscuously around the runs. Bantam hens make the best mothers for pheasants. Each run is planted with shrubbery as a protection against the rays of the hot sun, and at the same time affording a hiding place when suddenly approached by strangers. If extra male birds and separate runs are not available, one male may be mated with about three hens with good results, but where birds are liberated for stocking purposes an equal number of males and females should be liberated together. In their wild state these birds mate off in pairs and the male has been known to take the first brood, at a few weeks old, while the female prepares for another, and in this way it is claimed that a single pair of pheasants has been watched and known to have reared two and three broods, all flocking together at the end of the season.

In the State of Washington hunters are required to pay a license and the money thus obtained is turned over to the County Commissioners of the various counties, who, the law states, are to expend the same toward protecting and propagating game birds. The County Commissioners of Yakima County have placed an order, through Game Warden S. H. Dills, for fifty-three Chinese pheasants, which will be liberated in the Yakima Valley. China pheasants were imported into that valley last year and are reported greatly increased in number this season in some localities. Commissioners of other counties have signified their intentions of doing likewise. Of all the pheasant family the China is the best species for stocking this country for game purposes and private reserves, and is the game bird of them all.

With them, the male wears all the finery, a brilliant plumage, comprising all the colors of the rainbow. While the plumage of the female is very dull, it is a graceful bird nevertheless. The general make-up of its color is such that when approached by the hunter it is enabled to apparently turn into a clod or rock, and one might walk within a few feet without observing it, but once your back is turned the bird is up and gone before you have time to realize what has happened. Another dodge is when in the open field to make for a dead furrow and run so close to the ground as to be completely obscured from sight until out of range. Again they will get a tree, bush or fence post between themselves and the hunter, get up and keep so accurately behind the obstruction that a shot will be impossible.

The English ring-neck pheasant, a hybrid between the Torquatus and the old English black-neck pheasant, and the China pheasant are distinct and different, although they resemble each other very much. The English ring-neck is a short, chunky bird, while the China tapers off more gracefully at either extremity, and the latter has the distinct half-moon in gray over the eyes. The English ring-neck, is the standard sporting pheasant of England.

Many attempts have been made to introduce this grand game bird in California, with the exception of a few favored localities each experiment has failed, the birds would be liberated and would rarely be seen again. Generally speaking, favorable environment for protection and propagation of the Denny pheasant, is not available for any great showing in introducing the birds throughout our State.

Noted Trap Shot a Hermit.

Capt. John L. Brewer, who suddenly disappeared from public view with the honor of the world's champion wing shot, is living a hermit's life at Hammononton, N. J. Capt. Brewer, when he was in the field, made some of the greatest of the world's records, and became especially celebrated for his record in shooting blue rock pigeons in England.

Brewer is now living in a small house on the Hammononton and Batsto road, thirty miles from Camden, and is eking a livelihood by trapping and shooting game birds and animals.

When visited recently by an old-time friend, Capt. Brewer was found in a modest, plainly furnished cottage enjoying a dinner of fresh fish. A dozen hounds and field dogs kept guard outside the cottage and barked with eagerness for the hunt when their master appeared, though the hounds had had a twelve hours' chase the day before.

"The best dogs in the country, but noisy ones," the old-time wing shot declared.

"Trapping pays when you know how to do it, but you must be an expert to make the business a success," he said. "Have I been successful? Well, there's a statement from New York for my last shipment," and he exhibited an account of more than a hundred dollars, forty of which was paid for four otter hides recently trapped.

"The biggest otter ever captured in South Jersey and the cutest little baby otter were among those," he said. "That big otter was 6 feet 9 inches in length and as jet black as any you ever saw. I captured him just as he was biting off the last toe that held him in the trap. Fight? Well I guess he did. I had to shoot him in the head to prevent his escape and save the pelt."

"When I got him the chain that held the trap was severed, and had he known this he could have easily escaped. I caught those four otters in three days, and half a dozen others escaped by leaving their toes in the traps. The puppy otter was so tame after I had scratched his back and throat that he allowed me to carry him under my arm, and 'snuggled up' against my breast, but I had to kill him to get the big fellow out of the trap."

"One of the escaped otters had had a fight with a coon that was in a trap beside it. I usually set two or three traps close together, so that if the game escapes one it is likely to be caught in another. One of these otters had each of its hind legs in separate traps when I found it. Near an old log that lay across a creek I found a great pile of brush over a spot where I had planted my traps. Upon investigation I found a coon in one of the traps. The animal was more dead than alive. Its ears were sliced like a shredded tobacco leaf, and it was cut badly about the body."

"In a nearby trap lay half an otter's foot, and otter fur covered the brush pile that had been gathered by the trap chains, thus showing what a desperate struggle had been the result of the double trapping."

Capt. Brewer said he had captured ten otters last winter and trapped and shot over fifty foxes, besides a large number of minks, raccoons, and other fur animals. He has lost the surplus flesh that was his when he carried the championship belt, but he is very wiry and muscular, while his flesh is as hard as leather and his eyes are as bright and penetrating as in the days when he wrestled the belt from Dr. Carver and Capt. Bogardus in this country and showed shots across the sea that they weren't in it with a Jerseyman.

Washington's Birthday Trap Shoot.

Following the usual custom, the initial trap shoot for the local season of 1906 will take place at Ingleside on February 22nd, under the combined auspices of the Golden Gate and Union Gun Clubs. An attractive program will be arranged.

Englewood Kennels' New Stud Dog.

Glen Tana Bounder (ch. Parabold Piccolo-Braehed Beauty II) has been leased to Mr. W. C. Bogen by Glen Tana Kennels of Spokane, Wash., and is now located in his new home at Campbells, Santa Clara county.

Bounder has a record of seventy-five prizes won and has been a producing sire of winners. He is a full litter brother to Ch. Anfield Model, who is said to be the greatest living Collie sire of the present day.

San Jose Show.

At a recent meeting of the Santa Clara Kennel Club the proposition of holding a bench show during April or May received much encouragement. A sentiment favoring Harry Lacy for judge, should the club be able to secure the Boston gentleman's services, was strong with those present at the meeting.

The officers of the club are: President, W. H. Carmichael; vice-president, Norman J. Stewart; secretary, Charles Harker; treasurer, M. Perry.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

GLORIES OF CALIFORNIA LAKES.

California is justly famous for the number and excellence of its fishing waters—lakes, streams and the ocean.

Along the great Sierra Nevada mountains are scattered a number of beautiful lakes. One of the best known and most popular of these magnificent little bodies of crystal ice-cold waters is the famous Webber lake. This beautiful lake lies in Sierra county, California.

In fact three lakes—Webber, Donner and Independence—are all located near one another. The waters of these lakes are clear, cold and very deep, and abound in the same varieties of both native and introduced trout.

During the spring, summer and autumn, Webber Lake is visited by great crowds who go thither to fish and enjoy a season of rest and recreation.

All three of the lakes named lie in the very heart of the vast Sierra range—overshadowed by the towering, brooding mountains, whose rugged sides and summits are reflected in their transparent depths. Hidden streams and snow furnish an unfailing source of water supply the year round.

Sage Hen creek flows out from Webber lake, and pours into Prosser creek, and so finally reaches the famous Truckee river, whose name is as wide as the American continent among the great "fishing fraternity."

Fly-fishing is very fine all along the devious zig-zaggings of Hen creek, and a great many magnificent trout are caught in Webber lake.

Really, there is but small variance between the three named lakes as to the result of angling.

As to Webber lake in particular: There are four varieties of trout found in this lake—the Cutthroat (so called from a peculiar red line under the throat), the Loch Leven, or Scotch trout; the Von Behr, or German golden trout, and the Eastern red speckled trout.

The most authentic records show that the finest lot of Loch Leven trout (2500 in number), each measuring from 6 to 8 inches long, were released in Webber lake in 1895. They have increased very rapidly, and specimens weighing 6½ pounds have been frequently caught with rod and fly.

These fish are all game—very fierce fighters—even to the death. They will snap at a fly very readily, and when fairly hooked will leap out of the water so long as there is a spring left in them. As a general rule they are harder and longer fighters than the famed rainbow.

In this lake (Webber) the cut-throats have a peculiar habit. They seldom leap, but do most, if not all, of their fighting in and under water. When the temperature rises from 60 to 70 degrees they forsake the surface and insects, real and fraudulent, for the cooler water along the bottom of the lake and subsist on different pabulum.

These fish will remain down until the water cools, say to about 50 degrees, which it does with the first of the frosty fall nights; then Mr. Cut-throat again feeds near, or upon the surface.

Royal sport is provided all anglers in all the lakes mentioned during June, July and September. The rainbow trout differs from the cut-throat in this respect. The changes of temperature have no effect on them. Not unlike the pirates of old, they are free rovers and free feeders, frequently remaining on the surface, then again resorting at various depths, but usually near the surface when insect life is plentiful, and fly-casting is possible.

Regarding the matter of lures and tackle: The most eagerly taken flies in those waters are March brown, oak, blue wing, black and blue, red ant, black and bumble bee, professor, royal coachman, and evening dun.

Nos. 10 and 12 hooks are the best to use. The trolling and casting spoons should be Al. Wilson's wobbler, copper and silver and all copper, also the Emeric spinner; for leaders, 9-foot light silk worm gut; line, enameled silk, size F. and G., reel to carry 150 feet of line; rod from 9 to 10 feet long and weighing from 6 to 8 ounces.

Webber is only one of many lakes and streams in the wild Sierra regions. Within a comparatively small radius there are no less than ten lakes, in any and all of which very excellent sport may be found.

Little Fordyce Lake is worthy of special mention. This body lies only seven miles away from Weber, and is reached by a narrow and winding trail, leading well up into the frowning Sierras some 9,000 feet above the tide-level. The little lake fairly swarms with fish.

The fishing season, proper, opens April 1 and closes November 1, but there is no very good fishing in Webber lake, or the other lakes mentioned, much before the first of June.

So lofty and hyperborean are those regions that the snow and ice do not disappear before that date. Fishing in these lakes is principally done with boats. Trolling is one of the principal and favorite methods. But very little shore fishing is done except in the remote lakes where there are no boats.

In these high and magnificent regions, the ardent fly-caster is sure of a heart's content of complete rest and change for work-weary eyes. These superb lakes—especially Webber—are among the grandest for scenery and "fishing qualities" to be found on the entire Pacific Coast. Anglers from the East and Middle West, who contemplate a professional trip to the Pacific Coast should not overlook these magnificent Sierra lakes—Webber in particular.

Grand American Handicap.

Secretary-Manager Elmer E. Shaner in a recent letter states that the Grand American Handicap target tournament will be held the third or fourth week in June—the exact dates will be shortly announced.

NERVOUS DOGS.

In order to appreciate properly what is meant by the expression nervous dogs, it is necessary to bear in mind that the predominant feature in canine temperament is actually nervousness, and that when we point to any particular members of the race as being nervous, we really mean ultra-nervous ones—those, in fact, in which the natural trait is unduly pronounced. The result of overlooking this important consideration is that nervousness in dogs is far more frequently regarded, as far as its results go, as a sign or instance of bad behavior, whereas it is really an exhibition of a very natural weakness. As a rule, with this mistaken view of the matter, the means adopted to check or remedy the failure are frequently only too well calculated to increase and aggravate it. It thus follows that ultra-nervousness, but slightly prominent in a puppy, may, by incorrect handling and treatment, be gradually developed into what is generally termed gun-shyness in the sporting breeds and extreme nervousness in others, writes "Moorman" in The Illustrated Kennel News.

Popular error describes gun-shyness as a hereditary complaint, but there is certain reason for the mistake. Dogs of highly nervous nature are apt to beget puppies of equal or more pronounced nature in this respect, which quite easily, by wrong treatment or incorrect handling, may be developed into a singularly annoying weakness or fault. It is, however, possible, and not very rarely the case, that extreme nervousness in dogs may arise from constitutional weakness.

This is usually the case when it is suddenly developed in mature dogs and is then a matter to be dealt with by the skillful canine pathologist, and not one in which the average dog owner or trainer is likely to attain a cure. For the most part, however, nervousness is gradually developed in the dog from the time of puppyhood onward, and as it is only when it reaches a certain stage, and a particular proof of its existence impresses itself upon the owner that the blemish becomes apparent. It is not unusual, moreover, for the fact that a dog is ultra-nervous to be made evident by a change of ownership. In the case of sporting dogs this occurs more frequently than in those of other breeds not subject to close control. Its occurrence, however, for the reason named, is usually unsuspected, or overlooked. It is obvious that, from this cause, many of the disputes as to dogs' behavior may, and certainly do, arise.

In most instances, however, nervousness in dogs is brought out by shock; shock acting upon nerves already weak or highly strung, according to the point of view. The result is more or less collapse of the nervous system, exactly as in the case under corresponding circumstances in the human subject. In the latter the shock may be produced by a variety of causes; in the dog it is usually by a sound, occasionally by an accident or unmerited and unexpected chastisement.

Where the nervous system is unduly developed it is chiefly an unexplained and sudden and unexpected sound which causes the shock and starts the complaint. That this is termed mostly gunshyness is due to the fact that a sudden and unexplained sound is thrust upon dog, and caused by a gun, the most fruitful source of anything of the kind where dogs are concerned.

The symptoms of ultra-nervousness are the same in all dogs, sporting, non-sporting, or Toys. The chief of them is extreme susceptibility to sound suddenly uttered. It may be the mere crack of a whip, the slamming of a door or gate, a sharply expressed order or a gunshot itself. The effect is the same. The dog suffers a shock, and the resulting effect is the exhibition of fright, unnecessary and uncalled for, so the owner thinks, and so it actually is. There has, however, been a shock to the animal's nerves, and therein lies the mischief. This may occur almost at any time in the life of the dog, in early puppyhood or at a more mature period. When a shock of this nature occurs to a dog of tender years the effect is frequently less lasting than in the case of an older one, and is consequently more easily, or rather with less difficulty, dealt with. There are, too, some breeds of dogs which may be said to be practically proof against anything of the kind, whilst others, such as gundogs, sporting Terriers, Greyhounds and the majority of the Toy dogs, are much more susceptible to it. It will probably come as a surprise to many of the fair owners and others of Toy dogs, but it is necessary to put on record that the great majority of these pets are more or less affected with gun-shyness in the particular form in which it appears in their pets.

We have now made it clear what constitutes and what causes nervousness in dogs. When not dealt with properly the weakness or blemish will inevitably steadily increase until the case of the afflicted dog becomes a hopeless one. On the other hand, by careful and considerate treatment, the nervousness may be steadily overcome. It is, however, usually a matter likely to occupy considerable time and involve much trouble and care. As soon as a dog shows signs of nervousness endeavor must be made to discover the cause which has brought about that state of affairs. Sometimes the primary instance which caused it may be known. That in itself is a great point of assistance in combating the malady. In any case, by close observation of the dog, and if need be by experiment, the original cause must be sought out and discovered. Then the necessary steps must be undertaken to overcome the affliction. In the case of trained dogs, it is often feasible to maintain the trained state at the same time that it is sought to overcome the nervousness, but in the case of those not trained, but intended to be, any thought of this latter must be put aside until the nervousness is wholly or partly overcome.

The first thing to be done is to thoroughly and entirely gain the confidence of the dog. Whatever may

have been the case in the past, the nervous shock which the dog has suffered will have affected the confidence which it held in its master or owner. It is necessary to cause it to understand, as far as possible, that the owner of the dog is not responsible for the cause which originated the nervous shock, and by continually making much of it re-secure its entire confidence. The dog must also be placed under conditions which will prevent any repetition of that cause in the shape of sudden fright or alarm. The dog should be kennelled in company with a single and steady companion not likely to quarrel with it, be exercised with it, and kept as far as possible from mixing with other dogs for the time being.

The dog when at exercise should be kept under close observation, and be offered every encouragement to enjoy itself in unrestricted freedom. Of course, anything likely to alarm or scare the dog must be avoided, but should it show signs of fear or nervousness, then every endeavor must be made to bring the dog's understanding to the fact that there is no valid reason for its fearsomeness. In endeavoring to do this the entire confidence of the dog must be sought to be maintained, and should it evince any signs of extreme shyness and a tendency to slink off and bolt, every means must be employed to coax and encourage it. Any attempt to compel the dog to remain or return is sure to lead to failure. Peremptory orders, threats, or the like, are here entirely out of place and ineffective, and unless the dog can be coaxed into obedience and restraint it is useless to attempt other means. Extreme patience and the expenditure of a great deal of time and trouble are required before the nervousness of the dog can be overcome.

Even then, however, it may not be possible to succeed, and in that case the dog must be put on the lead, but the means in question must not be employed in any forcible manner, but only as a means to restrain the dog from bolting away and retain it within the limits necessary for exercising influence over it. Under no circumstances should it be coupled to another dog, a supposed remedy frequently recommended, but entirely ineffective, and usually provocative of increased fear.

As soon as the extreme nervousness will be partly overcome, and the dog's confidence thoroughly and effectually regained, steps must be taken to accustom it to what may have been the cause of its nervous breakdown, and to other happenings of a like nature. Amongst ordinary dogs, other than gun-dogs, there is no more fruitful cause of nervousness than gate-slaming and no more frequent cause for a continuance of the weakness in dogs so afflicted. And I know no more easy and effective means of curing them of the failing than by accustoming them to the working and slaming of a large and loosely-constructed and loosely-hung field gate. It will be easily ascertained from the behavior of the dog if it betrays fear of the subject in question, and if so, the mode of overcoming its aversion and timidity would be as follows: In the first instance, take or coax the dog up to the gate, induce it to follow through, and close it gently. Repeat the process until the dog understands that so far there is nothing to fear. Then take the dog to some little distance, fifteen yards or so, and get some one to open and then gently slam the gate. Keep on repeating the process, bringing the dog a little nearer each time, and increasing the force and consequent noise with which the gate is closed, until you have succeeded in bringing the dog close to the gate and letting it understand that there is nothing to fear from the noise caused.

Then commence to pass the dog to and fro, repeating the performance of gently, and then roughly, closing the gate behind you, until such time when the dog no longer shows signs of fear, and has become to regard the noise made as being quite in the natural order of things, and devoid of (fancied) danger to itself. It is not advisable to give the dog too severe a lesson upon the first occasion, and it may be extended, and must be repeated upon successive days. Then miss a day and try the dog again. If it appears all right, then miss two or three days, and again repeat the experiment. Following upon this try the dog with other gates, and if all goes well the battle is won.

From the foregoing will be learned how one must go to work to overcome this dreadful nervousness. As the slaming of a gate has been got over, so can, and must, other irritant causes be dealt with, until the dog's nerves have been once more thoroughly rehabilitated. It is a vexing and tiresome process, involving an unlimited amount of patience. There is, however, no other mode of accomplishing the end in view, and anything in the way of harshness or compulsion is entirely out of the question. The same process applied to gun-shyness or any other form of acute nervousness and will overcome and cure it. The principle is the same; it is only the application of it which varies.

The only other point necessary of note is a careful observance of the nervous dog's behavior in connection with other dogs in the kennel, and, in fact, with dogs generally. As a rule, the ultra-nervous dog seems to be aware of its weakness, and tends to display the fact when in company. This may, however, equally well be overcome by working the dog in and out in the company of others, by putting them together and then withdrawing the patient, by making much of each and all together, and by coaxing the nervous subject into play and into obedience along with its companions.

It must be remembered, too, that even when you have cured a dog of ultra-nervousness it will forever afterwards be more liable to further attacks, and that in handling, training, and the every-day ordering of the dog, an eye must always be given to such possibility, and a more suave and equable form of control be meted out to it than to others of its kind and kennel.

Jackson's Napa Soda does not tangle the feet.

FITTING THE MAN TO THE GUN.

The sporting works of the day, and many of the more particular sportsmen who read them, are eloquent on the subject of the "fit of guns," and there is vouchsafed a continual assurance that "a gun should fit its user as his boots, his gloves, or his coat fit him." The gunmaker catering to the desire of the very particular sportsman aforesaid is as anxious as his patron to emphasize the desirability, if not the absolute necessity, of an excellent fit. Thus, by constant reiteration it has come to be believed that a gun must fit its user or he can not shoot with it. That in this belief there is a certain grain of truth cannot be gainsaid. But carry it to its logical conclusion and the idea is encouraged that, if the gun does fit, its user must be able to use it to good effect. As a matter of fact, there is no "must" about it, and hence arises a vexatious misapprehension likely to cause disappointment and give a good gun a bad name.

Of course, one's gun should fit, but if the shooter is a fair shot and has no physical deformity or abnormality, he does not depend for his accuracy upon an exact fit. If, on the other hand, he is a poor shot, the best fitting available will not, alone, transform him into a good one. Nothing can be more erroneous than the idea that it will, for the bad shot, if ever he is to become a good shot, must do what all good shots consciously or unconsciously do and adapt himself to the gun. If he is led to believe that gun-fitting will produce for him a weapon that will hold straight whichever way he points it, he will be grievously disappointed.

When the shooter gets a try-gun adjusted to suit him to the best advantage, the gun built to the model so produced will not handle like the try-gun, which in all probability is just as well, because the try-gun is only a gunmaker's fitting appliance, and not a sportsman's weapon. In a well stocked gunstore it is probable that any man, who is neither abnormally big nor small and is free from deformity, could pick out a gun from stock that would suit him very well. With a little alteration it might suit him better, but the weapon being at first well chosen he will probably be able to adapt himself to the gun quite as well as the gunsmith could adapt the gun to him.

As a matter of fact, a good shot can shoot well with almost any gun. Trap shots have won great events with guns of widely different weights and measurements. Many professional shooters do not bother very much about the exact fit of the gun, being usually more concerned to uphold the reputation of the name it bears, and the majority of these guns are used just as they are received from the factory.

An instance, in this respect, is cited in the case of Dr. Carver. His shooting in this country was done with a Parker gun of the usual factory measurements. In England he bought a gun in the first gunshop he visited—again a factory made gun. In Germany he shot a gun made in Suhl, and in Spain he used a Belgian made gun; shooting up to his average with each change of guns. Returning to the United States he went back again to his former make—with a 2½ inch drop, and alternated with the double-barreled 12-gauge, such widely differing weapons as a repeating shotgun and a double 10 gauge hammerless with a straight stock.

Dr. Carver's case, like his shooting, was doubtless exceptional, but there are always plenty of excellent game and trap shots who do not depend upon the extreme shooting fit of their guns to produce results. Some of the finest shots, whose repute is international, are, invariably fitted when buying new guns, but others who possibly shoot equally well, although their opportunities for the display of skill may be more limited, never use, and never have the chance to use, other than the guns made to factory dimensions.

Empire Gun Club.

In a recent communication Secretary J. B. Hauer gives the following most favorable report of a successful season and the intimation that this year is full of promise for the club's career during 1906.

On account of the entire satisfaction given during the past year and for several years prior all the present officers of the Empire Gun Club have been re-elected. The same committees have again been appointed, which assures the same aggressive movement that the club has been noted for in the past and which has brought the club up to its present high standing. The officers are: President, James P. Sweeney; vice-president, Dr. George G. Gere; secretary-treasurer, J. B. Hauer; captain, A. J. Webb; lieutenant, W. O. Cullen; sergeant-at-arms, C. A. Bennett. The executive committee is composed of the following: Dr. Geo. G. Gore, J. B. Hauer, F. S. Judah, J. Peltier and Con Roman.

The club's finances are in first-class shape. Much work has been planned for the coming season in the shape of more and larger ponds. The new ponds put in last year have proven to be exceptionally good this winter and duck shooting so far has been away ahead of last year or any previous year in the history of the club. Quail shooting has also been very good and a large number of snipe have been bagged on the club's extensive preserves at Elkhorn, Monterey county. The new clubhouse, recently built, has proven to be a valuable addition and the club's quarters throughout are now up to date in every respect and are excelled by none in this State. An electric light plant to illuminate the building and the grounds about the clubhouse is being seriously considered, likewise the acquisition of a speedy launch is being talked of as an addition for the near future to run on the waters of Monterey bay during the summer months when salmon fishing affords such great sport.

A program for the club's trap-shooting section will soon be arranged.

Sober up on Jackson's Napa Soda.

SINGLE TRIGGERS IN COLD WEATHER.

In late season upland or blind shooting, when the fingers are benumbed with cold they became rather too stiff for the finest work in trigger-pulling, and to avoid this many shooters have recourse to shooting gloves. It is here that the full benefit of the single trigger gun comes into play. The elimination of the second trigger gives more room to the gloved trigger-finger, and it also dispenses with the necessity of changing from one trigger to the other, as must be the case with double triggered guns. It becomes, therefore, so much easier for the gloved finger to press the second time, without removal, on exactly the same spot, than to change triggers in the small space enclosed by the trigger-guard, that one can quite well understand the meaning of those sportsmen who describe the single trigger mechanism as a shooting luxury.

But it is more than a luxury, it is a great aid, in such circumstances, to good shooting with both barrels, particularly so with the left. The difficulty, with a gloved finger, of getting back to the second trigger, after the first has been pulled, is very great. That difficulty is only thoroughly realized after one has shot for a few days with a single-trigger gun. Many crack wing shots have followed the practice of pulling the left trigger first, in field or marsh, because, as it has been explained, it was found much easier to get forward to the right trigger—the jar of the discharge "jumping" the finger forward, for the second barrel, than to get back to pull the left trigger. It was also argued that the forward movement of the hand and trigger-finger for the second shot tended to set the gun tighter to the shoulder and consequently give increased control of it, whereas, the loosening of the grip in the backward movement to the left trigger, whether consciously or unconsciously, loosened the hold on the gun and also took up a fraction of valuable time which could be better utilized in making certain the aim with the second shot.

The abolition, however, of the double trigger, it is claimed, now rids the shooter of all of these troubles entirely, in addition to giving much more room to the trigger-finger, gloved or ungloved. It is just as easy, of course, to shoot with the right barrel as with the left of a single-triggered gun, and the fact makes a great difference in the shooting of many, who can shoot more accurately with the left barrel than with the right—a very common thing with those who use double-triggers. The single-trigger brings up the shooting of both barrels to the same level exactly, and the luxury of its use is doubly appreciated by those who feel the cold while inactive in blind or boat or on the hillside and prefer to wear gloves when shooting during chilly weather.

Trap Shooting at Catalina.

The Avalon Gun Club of Catalina Island, California, will hold several live bird shoots at Catalina Island during February and March. There will be team and individual matches. Two of the events will be of championship character. One of these will be for individual honors and the other for team prizes.

The cup for the individual championship will be donated by the Pilgrim Club of Catalina Island. Rules of the Interstate Association will govern all competitions. In addition to the championship events there will be several handicap shoots.

Entries for all the events will close with L. B. Woods, president of the Avalon Gun Club, Catalina Island, California, on January 30th, 1906. The members of the tournament committee are L. B. Woods, Albert Rau, J. B. Colman and Max Blumenthal.

New Gun Club.

The Donahue Gun Club is the name of a new club recently organized. The club has erected a new cottage at Donahue and has the same comfortably furnished. The members of the club are Joseph Rodgers, Frank and Joseph Joseph, and F. F. Santos.

Excellent Scores Made by the Parker Gun.

The following is a record of J. F. Hurt, Tazewell, Va., for 1905. Mr. Hurt is an amateur shooting the Parker gun, with which these scores were made: Total number of targets shot at, 7125; total number broken, 6621. Average for entire season over 92 per cent.

In the five successive days' shoot at local grounds at Tazewell, Va., in August, Mr. Hurt made the following score: Saturday, August 26, shot at 100, broke 95; Monday, August 28, shot at 100, broke 97; Tuesday, August 29, shot at 100, broke 99; Wednesday, August 30, shot at 100, broke 86; Thursday, August 31, shot at 100, broke 94; total shot at 500, broke 481. Average of over 96 per cent.

At the shoot at Tazewell Fair, September 12, Mr. Hurt broke 94 out of 100, winning first prize and high gun. Second day at Tazewell Fair he broke 189 out of 200, winning high gun and first money and first prize in all ten events participated in during the day, in which contest over thirty shooters participated.

At the 13th annual tournament of the Arizona Sportsmen's Association held at Phoenix, Ariz., December 28-31, Mr. J. M. Aitken, shooting a Parker gun, was high man on the first day with a score of 170 out of 174. Mr. Aitken was also high man the second day and made a run of 94 straight. The entire program called for 550 targets, of which only 345 counted on general average. Mr. Aitken's average for the 345 was 93.1-3 per cent. He also won the Copper Queen Trophy, a silver cup, with a straight 25, and the Gwynn Trophy with 29 out of 30, which was a tie with another, and on shooting it off in the next two events, made 39 to the other's 38 out of 40. Mr. Aitken is an amateur, and among others at this shoot were six professionals. Mr. Aitken's work is certainly very creditable, and all of these scores speak well for the "Old Reliable" Parker gun.

GOSSIP FOR SPORTSMEN.

Duck Hunting Notes.

The recent stormy weather has practically put an end to the sport of duck shooting for local sportsmen. The birds for the time being have scattered to the interior puddles and overflowed sections miles away from the bay counties marsh shooting districts. Some varieties, the canvasbacks, bluebills and the few other deep water ducks are still with us. But the open water stretches afford the birds safe abiding places, where they pass the time leisurely resting in flocks, estimated in some districts, of thousands.

There is of course a certain amount of sport to be had by experienced hunters, but generally speaking the game of duck hunting is over for the season for the local shooters.

In various localities of the interior, the sportsmen now have an inning. To the south in various sections of the San Joaquin Valley, duck shooting has much improved. In the overflowed sections of the Sacramento and Yolo basins the birds may now be seen in countless flocks.

Throughout the season it has been most noticeable that the northern birds have been in better condition than for years past. Home bred birds have hardly had a look in so far as table condition was concerned. Canvasback ducks particularly have been very much off in condition recently. In this respect Mr. Al. M. Cumming, a well known sportsman, is quoted:

"The canvasback duck prefers the wide waters of San Pablo and San Francisco bays to the smaller bodies of water in the marshes. The canvasback would rather be in salt water, if he can, and the only thing that will drive him inland to fresh water is a storm. Usually we have two or three good blows from the southeast before this time of year, and when the ducks are driven inland shortly after their arrival from the north they remain in the same fine condition which characterizes them on their first appearance here.

"As long as the ducks stay in fresh water they keep their plump condition and their flesh is sweet and good to eat, but after they have been on the bay for three or four weeks, living on the food they find in the salt water, then they lose their fat and soon acquire the 'fishy' taste that makes them disagreeable to the palate, if it does not entirely unfit them for serving as food. The other breeds of duck are more easily driven from salt water, the canvasback being generally the last to go to fresh water and the first to come back when the weather gets fine again. This season there has been no storm violent enough to drive the canvasback from the bay, although the storm a week ago made all the other ducks take to the fresh, inland waters, and considerably thinned the flocks of canvasbacks on the bay.

"To show you that what I say is right, I can mention the gadwall, commonly called the gray duck, which is very rarely found on salt water. These ducks are always fat and juicy, and I have shot them at the beginning of the season and also at the end of the season, and have invariably found that their condition was not changed a whit. From October to February the gadwall is always the same. The canvasback and the other species would keep the condition they bring from the north if they kept to fresh water, but, as I say, most of them prefer the salt water, especially the canvasback and the redhead, which is a very similar duck."

The southerly storm last Sunday made shooting conditions better for hunters who were out on the lower sections of San Francisco bay.

Hunters returning from the day's shoot about the lower bay reported that the water was alive with canvasbacks, bluebills and small birds. Sport was great, and every gunner came home with big bags of game, eager to again scull forth down the slough and float about the bay. Guns were popping from Alviso to Alameda, with no interruption of the volleys. Decoy shooting along the bay shore was pronounced fine and successful sport by many San Jose hunters. The weather was just right for a good outing, and that most of the local hunters took advantage of the day goes without saying.

Gun Club Takes Protective Measures.

The Farmers' Hunting and Fishing Club of Marysville held a meeting recently and arrangements were made for funds, etc., to defend any suits that might be brought to oust the club members from the preserves. The following compose the Board of Directors: J. A. Littlejohn, Walter Eager, M. S. Peters, W. R. Carpenter and Charley Best.

A. L. Holling's Gordon Setter bitch Flora B. (Dick-Vic) whelped on January 23rd six puppies (4 dogs) to A. Stuart's Doc (Sport-Trix).

A Fitting Finale for a Year of Triumphs.

The amateur trap shooting championship of America for the year of 1905 was won with the time tried and reliable Winchester "Leader" shells. Mr. J. H. Hendrickson of the Queens County Gun Club, Long Island City, N. Y., captured the Amateur Trap Shooting Championship of America at the New York Athletic Club grounds on December 14th, breaking 94 out of 100 targets. Mr. John W. Garrett of Colorado Springs was second with a score of 93. Messrs. Hendrickson and Garrett both shot Winchester "Leader" shells, thereby displaying great wisdom as well as great skill. If you would shoot to win, you must shoot the shells the winners shoot, and they are the Winchester make of shells. Their invariable uniformity and reliability, which make them the choice of the greater majority of intelligent shooters, are not equalled by any other brand of shot gun shells.

Strike—if they don't give you Jackson's Napa Soda when you ask for it

GLANDERS AND FARCY.

The veterinary editor of the Breeders' Gazette of Chicago has written for that journal the following very complete article in regard to these diseases.

When we speak of glanders it should be clearly understood that there is another form of this dread disease—farcy—affecting the skin and lymphatics and always accompanied by internal lesions indicative of glanders. Glanders proper affects internal organs—lungs, air passages, nostrils. Both forms are due to the same germ (*Bacillus mallei*), both are contagious to horses, mules and asses and communicable and fatal to man by inoculation of a cut or scratch. Both forms may either be acute or chronic, are more or less virulent in either form and recognized as incurable when thoroughly established.

The disease is spread by the discharges of the affected animal. The germs do not float about in the air of stables, but are found in the discharge which is sneezed onto woodwork, walls, partitions, mangers, harness, neck-yokes, water troughs, feeding troughs or hitching posts. Susceptible horses coming in contact with such sources of infection are liable to become infected, develop the acute form of the disease and in turn spread the contagion to other horses.

In a typical case of chronic glanders the horse may be little if any reduced in flesh or apparently unaffected in health. A thin, sticky, whitish or yellowish discharge comes from his nose, adheres about the orifice of the nostrils and is blown out upon such articles as have already been mentioned. Between the jaw, feeling from below, will be found grape-like clusters of little hard tumors which adhere to the bone and are not as a rule sensitive nor do they form abscesses and discharge pus. Letting the sunlight stream into the horse's nostrils, the lining membrane of the cavities and of the partition between the nostrils (septum nasi) will be seen of a dull, bluish cast and covered with ulcers, giving the parts a mouse-bitten appearance. In addition to ulcers (chancres), having, ragged, inflamed edges and depressed centers, healed ulcers will be seen in the form of scars. Generally one finds in addition to these visible lesions small tumors under the skin (enlarged lymphatics) in the arm pit and in the groin. In many instances the patient is emaciated, woe-begone, fevered, coughs, is lame in a hind leg or has a permanently enlarged hind leg, and harsh, staring coat. The latter symptoms are more likely to be seen in acute glanders, which comes on suddenly, is characterized by painful swelling and lameness of a hind leg, fever, possibly cough, discharge from the nostrils and finally by the appearance of ulcers as mentioned.

In farcy ulcers are not seen in the nostrils; cough may be present but no discharge; hind legs are swollen and covered with small "buttons" or "buds," which rupture and discharge yellowish, sticky matter like raw linseed oil, but sometimes streaked or discolored with blood. These character-

istic buds may also appear upon the lips, sides of neck or elsewhere upon the body. After bursting they form ulcers having ragged edges and dirty grey depressions. The lymphatics near the ulcers (chancres) become enlarged, hot and painful to the touch.

Farcy may be suspected when horse has periodic swelling of one or both hind legs, at such times is lame and when button-like nodes (bunches) appear upon the inside of the legs, break, discharge and prove wellnigh impossible to heal. Also suspect this disease when a horse is thriftless, emaciated and shows a tendency to form boils or small abscesses on sides of neck, about hip, about face or elsewhere on body.

Suspect glanders when horse has frequent attacks of nose-bleed, fails to thrive although fed nutritious food, has chronic discharge from one or both nostrils which does not flow from the nostrils but sticks about orifice, shows sores, scars, ulcers or little bunches on lining of nostrils and partition under jaws, chronic cough and tendency to periodic swelling of the hind legs. Bleeding from the nostrils, sudden swelling of the hind legs, and swelling of the testicles are often seen in advance of a sudden acute attack of glanders.

In differentiating between the discharge of glanders and that of influenza, distemper, strangles or chronic catarrh, remember that in these troubles ulcers are absent from the lining membranes of the nostrils and small tumors are not found under the jaws which location may, however, show large swellings distended with pus (abscesses of strangles.) Discharge from one nostril or both nostrils characterized by an offensive odor usually indicates the presence of a diseased molar tooth in upper jaw and is often accompanied by bulging of the bones of the face under the eye. Where distortion of the bones of the nose is observed in connection with odorless discharge, glanders is to be suspected and other symptoms should be looked for. It is not always true that glanders discharge sinks in water while that of other diseases floats.

As it is possible to decide by the hypodermic injection of tuberculin whether a cow has tuberculosis or not, in the same way one readily can decide whether a horse has glanders or farcy by using mallein, which is a sterilized extract from a culture of glanders bacilli and to be obtained from the Bureau of Animal Industry, Washington, D. C., State Agricultural Experiment stations or any firm handling veterinary supplies. It is best used by a qualified veterinarian, who at the same time will be able to conduct necessary quarantine and disinfection operations.

The mode of using mallein follows. Temperature of horse is taken at rectum, by means of a clinical thermometer, three or four times in one day. By this means the average or normal temperature of the horse is discovered prior to injection of mallein. Mallein is injected under the skin of neck of horse late on the night of the day when the preliminary temperatures were taken. Early next morning the temperature is taken and this is repeated every two hours until afternoon. A marked rise in temperature over normal, accompanied by a flat, painful swelling at point where needle of syringe was inserted in skin, and which continues for several days, may be considered surely indicative of the presence of glanders or farcy.

According to the law of a number of States all reacting horses have to be destroyed provided there are other apparent symptoms of the disease. Some States pay a partial reimbursement to the owner of the horse destroyed. All necessitate thorough disinfection of the premises occupied by the diseased animal, a quarantine and frequent examination of horses that have been exposed. Instances are on record where horses showing no visible symptoms of glanders or farcy have reacted to the mallein test, been quarantined and after repeated testing with mallein have failed to react and been pronounced cured. No cases are on record, so far as the writer is aware, where horses showing typical lesions of glanders or farcy have been cured by the use of mallein.

Under the circumstances we would urgently dissuade owners of horses from experimenting with mallein as an alleged cure for glanders. The disease cannot safely be handled on a farm or ranch. The owner endangers his own life and surely exposes all of

his horses to the contagion. He should at least destroy every horse showing plain lesions of glanders and then have the exposed horses examined every two weeks by a qualified veterinarian or deputy veterinarian. The latter may if they see fit, make necessary tests with mallein, and by this means and thorough disinfection of the premises will soon stamp out the disease at a minimum loss to the owner and for the protection of the horses of the neighborhood.

It is doubtless a fact that annually hundreds of horses are destroyed as glandered or affected with farcy, yet are free from those diseases. Glanders is properly feared and through ignorance of its characteristic lesions horses afflicted with chronic catarrh, lymphangitis, skin disease or diseased molar teeth are sacrificed. Evidently the condemning of horses should be left to the qualified veterinarian and he also should be consulted in seeking to stay the spread of the disease in a center where it has appeared.

SEC. WILSON ON SHEEP SCAB.

In his annual report Secretary Wilson has the following on sheep scab: "Sheep scab has been one of the greatest obstacles to successful sheep raising and the department has experienced a great deal of difficulty in fighting it. Even after the order of June 18, 1897, was issued diseased sheep continued to arrive in large numbers at the principal markets. In 1898 a bulletin, entitled 'Sheep Scab; Its Nature and Treatment,' was issued giving full information upon this subject and specifying the treatment by which the disease might be eradicated. This bulletin had remarkable influence in educating sheep raisers in checking the disease and in informing the public as to a possibility of curing infected animals. In July, 1899, an important order was issued describing the manner in which affected sheep should be dipped, instead of leaving this to the discretion of the owners and commission merchants. This order approved of the tobacco and sulphur and the lime and sulphur dips; formulas were given for their preparation, and the animals had to be dipped in one or the other before they were allowed shipment in interstate commerce.

Sponges—S. Adderley, 307 Market St.

Standing Offer

Good always, everywhere. \$100 Reward, for any lameness, curb, splint, founder, distemper, etc., (where cure is possible) that is not cured by

TUTTLE'S ELIXIR

Greatest horse remedy in the world. Tuttle's Family Elixir invaluable for human bruises, pains, rheumatism, etc. Send for free 100 page book, "Veterinary Experience." The perfect horseman's guide. Every disease symptom and its treatment.

Tuttle's Elixir Co., 52 Beverly St., Boston, Mass. Mack & Co., San Francisco and F. W. Braun, Los Angeles, California Agents.

High Class Team For Sale

BRIGHT BAYS; WEIGH 1100 LBS. EACH; 16 hands high; well bred; Wilkes stock; well broken, gentle, kind disposition; absolutely sound; 6 years old, and a very desirable team in every respect. Can be seen at the Hulda Stables, 1530 Fell St., San Francisco.

WILLIAM HAROLD 2:13 1/4 FOR SALE

THE MEEK ESTATE HAVING BEEN PARTITIONED, and the breeding of horses discontinued, the stallion WILLIAM HAROLD 2:13 1/4 is offered for sale or lease to a responsible party. William Harold is by Sidney 2:19 1/4, and his dam is Cricket 2:10 by Steinway. Cricket is one of the great producing mares of California, being already the dam of five in the list and has three more foals that will be given records. William Harold has had the most limited opportunities in the stud, yet is the sire of Janice 2:08 1/4 trotting, Dan Burns 2:15 and Judith 2:25 and several others in the list. He is in excellent condition, and as his get are all large, well made and nicely turned horses he should be a good money earner in the stud if in good hands. Apply to or address H. W. MEEK, San Lorenzo, Cal.

A GOOD MARE FOR SALE.

By CLIPPER 2:06, dam by ANTEEO JR.

7 YEARS OLD, TROTS OR PACES; HANDSOME, sound and a high-class animal in every respect. An AI roadster and will make a race horse or a valuable brood mare. Reason for selling is that I have no time to devote to handling her. Call or address

Phone: GEO. C. PETERMAN, Oakland 6501. 779 Twelfth St., Oakland, Cal.

Norman Stallion For Sale.

DARK IRON GRAY NORMAN STALLION; weighs about 1600; 16 hands high; 4 years old. Is blockily built and a sure foot getter. Colts can be seen at San Jose. For further particulars address W. H. WILLIAMS, 1120 Alameda Ave., San Jose, Cal.

McKINNEY'S FASTEST ENTIRE SON

ZOLOCK 2:05 1/4

Great Race Horse and Producing Sire.

SIRE OF

Ambush (3)	2:14 1/4
Delilah (3)	2:14 1/2
Bystander	2:14 3/4
Sherlock Holmes	2:15 1/4
Dixie S.	2:27
Conchita	2:29

Has 10 Three-Year-Olds that worked trials in 1905 as follows: LILIAN ZOLOCK 2:14, KINNEY WOOD 2:15, CLEOPATRA 2:15, RED LOCK 2:18, ZOLLIE 2:18, INAUGURETTA 2:22, MYLOCK 2:25, MAJELLA 2:26, ADALANTE 2:26, BOLOCK 2:27, and 3 Two-Year-Olds as follows: WENZA 2:24, BONNIE JUNE 2:27, ISALCO 2:30, and 12 others now in training that can show quarters in from 33 to 36 seconds.

ZOLOCK'S Sire is the Great McKINNEY 2:11 1-4

His Dam is the great broodmare GAZELLE 2:11 1-2

(by Gossiper 2:14 1/4), dam of ZOLOCK 2:05 1/4, Zephyr 2:07 1/4; second dam the great broodmare Gipsy (by Gen. Booth 2:30 1/4), dam of Gazelle 2:11 1/4, Delilah (3) 2:14 1/2, Ed Winsap 2:15, Wilets (mat.) 2:17, Dixie S. 2:27, and granddam of Col. Green (trial) 2:10 1/2, third dam Echo Belle (granddam of Conn 2:15 1/4) by Echo 4:2; 4th dam by Lummo and 5th dam by Grey Eagle.

ZOLOCK stands 16 hands, is a beautiful brown and a horse of grand proportions. All his colts are good-headed, and there has never been one that went lame.

Will Make the Season of 1906 at SAN JOSE, CAL.

Terms for the Season, \$75.

no responsibility for accidents or escapes.

Season starts February 1st and ends June 1st.

Mares will be cared for in any manner desired, but

Also, the Three-Year-Old Stallion

ISALCO

Terms for the Season.....\$25

by ZOLOCK 2:05 1/4; dam GIPSEY, dam of Gazelle 2:11 1/4, Delilah 2:14 1/2 and three more in the list. Isalco is a full brother to Delilah (3) 2:14 1/2.

HENRY DELANEY, Race Track, San Jose, Cal.

IRAN ALTO

24586 Sire, PALO ALTO 2:08 3-4
Rec. 2:12 1/4 Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12 1/4, Thomas R. 3:15, Vendome 2:17, Dr. Frasse's Sister 2:35—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$20 due when mare is bred and \$20 payable when mare is known to be in foal.

For further particulars address

H. S. HOGBOOM, Woodland, Cal.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

SPEED, GAIT, QUALITY AND BREEDING FOR SALE

ALAMA 2:27 $\frac{1}{2}$ (Trial quarters 33 sec.); brown mare; 15.2; foaled 1900; very handsome and stylish, with fine action and should trot in 2:15 next season. Winner of the blue ribbon and championship at Montana State Fair in 1901, and four blue ribbons, champion and grand champion prizes at the Lewis and Clark Live Stock Show. Sire, Alfonso 2:29 $\frac{1}{4}$, dam a performer and producer; second and third dams great brood mares.

MANDOLIN 2:25 p. (trial quarters 32 sec.); bay gelding; 15.3; foaled 1900; a clean, easy pacer; trots up to a forty clip; equal to the best; a premium winner at the Lewis and Clark Live Stock Show. Sire, Alcone 2:31 $\frac{1}{2}$, 6780, sire of 20 in the list, son of Alcyone 2:27, the greatest Wilkes sire. Dam, Mistral, dam of two others with records better than 2:20.

MIRZA (Trial quarters 37 sec.); brown gelding; 15.2; foaled 1901; very stylish, extra action, will be very fast; winner of a blue ribbon at the Lewis and Clark Live Stock Show. Sire, Alfonso 2:29 $\frac{1}{4}$, 9700, sire of 23 in the list, son of Baron Wilkes 2:18, the great sire of race winners. Dam, Mistral, above, dam of 3 in list. These horses belong to

C. X. LARRABEE, Brook-Nook Stock Ranch, Home Park, Madison Co., Montana.

MONTANA PRODUCES THE BEST HORSES IN THE WORLD, everything considered. The above horses have been jogged and kept in condition for a year and are in fine shape to train, and can be seen at

THE PALACE LIVERY CO., 51-53 Dayton St., PASADENA, CAL.

BUILDING THE DAIRY HERD.

A recent bulletin from the Ithaca College of Agriculture is about the dairy herd, with these among the introductory words:

"We may call the milk the main product and the calves, beef and mutton the by-products of the dairy cow. It has been asserted that the milk product is the only thing that should be taken into consideration in estimating the value of a dairy cow, and that the calves and beef should be entirely ignored by a successful dairyman; but in these days of strong competition it is not possible to ignore the by-products, and in any scheme of successful dairying the calves and beef must at least be taken into consideration. This does not mean that in any case milk-producing qualities are to be sacrificed for the sake of the by-products. It simply means that of two animals of equal value for the production of milk, the one that will give the greater return in production of calves and value of carcass is more profitable."

The bulletin truthfully says that "there is no best breed of dairy cows." One of the first questions in the formation of a dairy herd is the choice of a breed and whether the herd shall be made up of pure bred or grade animals. A pure bred animal is commonly regarded as one recorded in the herd books of the respective breeds. A grade animal is a pure bred sire upon a common or grade dam and there are crosses with less and less of the pure bred blood.

The offspring of pure bred animals are more valuable than the offspring of grades. But by the grading-up process continually selecting the cows that are the best producers, it is not difficult to establish a herd of grade cows that will equal in the production of milk any herd of pure bred animals, although the by-products will not be so valuable.

A dairy herd may be maintained in two ways: First, by continued purchase of mature animals to replace those whose period of usefulness has passed. There are many conditions under which this may be a wise practice. If it is desirable to have the whole herd composed of cows in their full productive capacity; if there is abundant opportunity for selection and purchase near at hand; if there is a reasonably good market for cows that are undesirable, and if one has reasonable skill in selecting and good ability in bargaining, a herd of high productive capacity may be more easily and more cheaply maintained in this way than by attempting to raise young animals to replace those that are worn out.

The other method of maintaining the herd is by raising calves to supply the place of old cows that are no longer profitable. Such a herd will always contain a certain number of young animals that have not yet reached full development and therefore such a herd will seldom equal in average production a herd that is maintained wholly by purchase. At the same time a greater degree of uniformity of type may be maintained where the animals are raised. If land is abundant and cheap the cost of raising a calf, up to the time that she becomes a full developed cow, will be less than that of purchas-

ing a similar animal outright.

Through force of circumstances by far the greater number of dairymen must rely on raising the calves necessary to maintain the herd. This being the case the ordinary dairyman will need to provide himself with the service of a bull suitable to produce useful dairy cows. In most cases he will need to own this bull, so that the question of the selection and care of the breeding bull has an important bearing upon the maintenance of the dairy herd.

Such a bull should be purely bred. The progeny that a bull has already produced is by far the best index of his usefulness; and he should not be very old. He should have characteristics that indicate vigor of constitution and vital activities, such as a loose, mellow hide, a bold, bright eye, an active gait and disposition.

In all cases where it is possible it is better that the bull should run with the herd, lest his temper and breeding powers become impaired from lack of exercise. When this is not feasible his powers and temper may be safeguarded by giving him exercise on a tread-power or hitching him by a long rope or chain to a wire between two upright posts. Occasionally he may be utilized upon a tread-power for cutting feed, pumping water, etc., and even be broken to work to harness or in a cart.

In order to determine which are the good cows for breeding a record of the production of each cow must be kept; this is much surer than any outward signs; also the milk should be tested to ascertain the comparative amounts of fat. To obtain a complete record of a cow it is necessary that the milk be weighed and the fat determined at regular intervals. The regular use of scales and the Babcock test is an indispensable part of the labor of a progressive dairyman.

But there are certain characteristics of form which more or less indicate the capacity of a dairy cow. She should be wedged-shaped, that is, the skeleton of the hinder portion of the body should be distinctly more largely developed than those of the forward portions. She should stand from half an inch to an inch and a half higher at the hips than at the shoulders. The width, as viewed from the front, should be distinctly wider behind than before, and the depth of the body as viewed from the side should be distinctly greater behind than before. She should also have vigorous powers of respiration and circulation. The former are indicated by a large, deep, full chest, and by large, clean, open air passages, and the latter by prominent exterior blood vessels, and pink complexion of the thinner portion of the skin and visible mucous membranes. She should also have large digestive organs. She should have a large udder, which is sometimes so close to the abdomen and hidden by the legs that it is larger than it appears. But it should not be fleshy, a condition indicated by its appearing to be about the same size when empty as when full of milk.

SURREY HORSE WANTED.

A HIGH-CLASS HORSE SUITABLE FOR surrey. Must be over 16 hands high, stylish, thoroughly broken for city driving, have good action and a good disposition. Give particulars where horse can be seen, price, etc. Address W. J. care of Breeder and Sportsman, 36 Geary street, San Francisco.

AROUND THE DAIRY.

To go from the fresh air into the milk room is a good way to detect objectionable odors. The cultivated nose is invaluable for such purposes.

There are times when one strain of cows are more popular than others. With the Jerseys, the Flying Foxes, the Golden Lads, the Comasses and the St. Lamberts have each had their day. All were good, and there are others just as good, and better, to follow.

Too much liberty is believed by some to make poor milkers. This is certainly the case where there is not plenty of feed. Cows with too much liberty are not good milkers. When confined in close quarters and well fed they often do their best.

It still continues to be a wonder that men bestow more time and feed upon their horses than they do upon their cows. They curry and feed the horse for appearance. If the cow was treated with the same care, not only would her appearance be improved, but she would give more milk.

Cows seem to be naturally mischief-makers. They are inquisitive, prowling around, seeking what they can find. This leads them over the fences, and through the fence into the neighbor's fields. This is one of the strongest arguments for good fences and plenty of feed in her pasture.

Many things interfere with the making of good butter. Butter should be churned at a temperature from 40 to 70 degrees according to the season and the nature of the food. There is more danger of churning at too high a temperature than at too low. The butter is often soft and the reason is that it is too warm.

It is a wrong calculation that expects the butter to be better than the conditions which produce them. No crop is better than the seed, no cow is better than the feed, and no butter is better than the milk and the management. He miscalculates who expects it to be so.

When churning, if the cream foams it is too cold, and should be set into hot water until it is warmer. If the butter comes at all it will be crumbly. When the churn is set into the water it should be as high on the outside as the cream is on the inside. The water should not be poured into the churn, whether it be warm or cold, until after the churning is finished.

When the butter begins to come a little cold water should be thrown into the churn. It will hasten the coming, and assist in its gathering. The milk may be poured through a strainer, then pour in water and wash the butter. To prepare the churn properly, it should be rinsed first with cold water, then with hot water, then cooled off with cold water. When the butter is to be first class there can be no haphazard methods; the cream should be weighed, so that the proper amount of salt and coloring matter can be put in without guess work—Texas Farmer.

For Sale.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11 1-4

(Reg. No. 22449)

Sire, ELECTIONEER, sire of 166 in 2:30 and grandsire of Major Delmar 1:59 1/2.

Dam, LOKITA 2:18 1/4 (dam of Alta Vela 2:11 1/4 and Palori 2:24 1/4) by Piedmont 2:17 1/4; second dam, Lady Lowell (dam of Ladywell 2:16 1/4 and Lorita 2:18 1/4) by St. Clair; third dam, Laura, dam of Doe, sire of Occident 2:16 1/4.

Address all communications to BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

FOR SALE OR LEASE.

Two Prince Airlie Stallions.

PORTOLA 37413, a handsome golden bay, 7 years old, 16 hands, weighs 1190 lbs.
MENLO BOY 37401, a magnificent brown with white points, 6 years old, 16.1 hands, weighs 1200 lbs.

These two horses are full brothers, being sired by Prince Airlie 28045; he by Guy Wilkes 2:15 1/4, sire of Fred Khol 2:07 1/4, Hulda 2:08 1/4, Seymour Wilkes 2:08 1/4; first dam Signal by Del Sur 2:34; second dam Lady Signal 2:35 1/4 by Signal 3337. Both of these horses are very fast for the amount of work, being only a few months last year, showing quarters around 34 and 35.

"SAVE-THE-HORSE"
SPAVIN CURE

Registered Trade Mark

Tuscola, Ills., Nov. 15, 1905.

TROY CHEMICAL CO., Binghamton, N. Y.

Dear Sirs:—Yours of Nov. 11th, asking about results with "Save-the-Horse" Spavin Cure received yesterday, and in reply can say that I had a driving horse with a bony growth on one of his front knees so bad that the leg was stiff and had to be moved sideways to go. My attention was called to "Save-the-Horse" Spavin Cure by my asking my druggist for something that would help or cure it, and he called my attention to this remedy and guarantee. I was fearful that it had been too long standing to be cured, and had him write the company and see what they thought about the case. In a short time got letter from the company to sell me the Cure on the guarantee. So I brought it out and commenced using it as directed and did not notice any effect for ten days—then a diminishment could be seen, and before I had used all the medicine could not notice a particle of lameness and the enlargement had nearly all gone. Have been using the horse all the time since, and notice no lameness in that leg whatever. I would not have believed any medicine could have done the work so effectually. I have recommended it to several neighbors and think "Save-the-Horse" is unexcelled.

Yours sincerely,

P. J. GATES.

Mamaroneck, N. Y., Nov. 7, 1905.

TROY CHEMICAL CO., Binghamton, N. Y.

Gentlemen:—About eighteen months ago I had a black horse with a bone spavin. I had him fired and blistered several times and it did not seem to do one bit of good. One day a horse trainer told me he thought "Save-the-Horse" might do him some good. I tried it and after using half a bottle I found my horse was perfectly sound again. The rest of the bottle I used on another horse that had a large shoe-boil, and in a short time the shoe-boil disappeared.

Yours very truly,

JOHN LYNCH,

122 Winfield Ave.

Burlington, Iowa, Nov. 14, 1905

The case on which I used "Save-the-Horse" was a bog spavin of six months standing. I applied one-half of a bottle and the hock is now clean and sound. I think "Save-the-Horse" fills a long felt want.

Very respectfully,

WALTER C. MOORE.

"Save-the-Horse" Permanently Cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for copy and booklet. At druggists and dealers or express paid. Scores of letters to confirm and convince. Send for copies. Absolute and overwhelming evidence and certainties as to the unfailing power of "Save-the-Horse."

BOOKS FOR STALLION OWNERS

1. Hoover's Stallion Service Record.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding, description, dates of service, dates of foaling, etc., with index, complete, size 10x7 1/2. Each book is handsomely and substantially bound. \$2.00

2. The Standard Stallion Service Book.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, date of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherine, suitable for pocket use. \$1.00

3. Breeder's Note and Certificate Book and Stallion Service Book Combined.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. \$1.00

C. F. KERTELL, Manager.

A GAME GETTER doesn't allow rust on his gun—neither does "3-in-one." Heavy oils and greases cannot prevent rust because they simply coat the surface and dry out. **3-in-one** sinks into the pores of the metal, forming a delicate, imperceptible overcoat that prevents rust or tarnish on the barrel, in the bore, at any and every action point. Lubricates the magazine, triggers, etc. Our booklet tells—a sample proves—both free. **G. W. COLE CO.**

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (3 y. o.) 2:21¹/₄, (3 y. o.) 2:12, (a) 2:09¹/₄, Leonora 2:12¹/₄, Polka Dot 2:14¹/₄, etc. Bay Stallion, 15.3¹/₄ hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.Sire, **ELECTIONEER 125**, son of Hambletonian 10. First dam, **MANO** (dam of MENDOCINO) (3) 2:19¹/₄, Electant 2:19¹/₄, Morocco (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, **Mamie** (dam of Mamie W. (3) 2:17¹/₄, Hyperion 2:21¹/₄, Memento 2:25¹/₄, Mithra (p) 2:14¹/₄) by Hambletonian Jr. 1882; third dam, **Gilda** (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm.

Sire, **McKINNEY 8818** (record 2:11¹/₄). First dam, **HELENA** 2:11¹/₄ (dam of Wildnutting 2:11¹/₄; Dobbel 2:22, Hyta (trial 2:12) by Electioneer 125; second dam, **Lady Ellen** 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, **Ida May Jr.** by Owen Dale; fourth dam, **Ida May** by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at **PALO ALTO STOCK FARM**. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications toPALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.

McKINNEY, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

California Stake Payments Due in 1906.

Pacific Breeders' Futurity Stakes.

(Payments should be made to F. W. Kelley, secretary, 36 Geary street, San Francisco.)

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—\$10 due March 1, 1906, and starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 5, \$7000, foals of 1905—\$10 due February 1, 1906.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

AN EFFORT WILL BE MADE to organize a California circuit next week. At a meeting of the executive committee of the directors of the Breeders' Association held Thursday of this week, Secretary Kelley was instructed to correspond with the managers of the principal tracks in California to arrange for a conference at which a circuit of harness meetings can be arranged and dates and purses announced. There is every prospect for a very prosperous year in California for farmers and fruit growers and a good circuit of harness racing should be a big success if properly managed. It is hoped that every track in the State that has held meetings in the past will send a representative to this meeting who will be authorized to give assurance that it will be a member of the circuit.

FOUR BIG STAKES are advertised by the Pacific Coast Trotting Horse Breeders' Association to close April 2d. The California Stakes for 2:24 class trot-

ters and the Pacific Slope Stakes for 2:20 class pacers, are renewed at \$2000 each. In addition the Sunset Stakes of \$1000 for a free for all trot, and the Golden Gate Stakes of \$1000 for a 2:09 class pace are offered. This starts the ball rolling. These races will be held at the regular annual meeting of the Breeders' Association in August, the place to be announced hereafter.

AN EPIDEMIC OF GLANDERS which was raging recently among the horses of Vancouver, British Columbia, has been almost stamped out, but according to a Vancouver exchange, has spread to the interior and many valuable horses are being killed by the inspectors. Measures to stamp out this dreadful disease should be prompt and strict to be effective.

ANSWERS TO CORRESPONDENTS.

ERNEST A. GAMMON, Courtland.—Lilly Stanley 2:17½ was sired by Whippleton 1883, dam Dolly McMann, pedigree untraced. Lilly Stanley is registered on page 413, vol. 8, of the American Trotting Register. Her daughter, Lilly S., by Direct 2:05½ is registered on page 499, vol. 15. Mares and geldings are not given numbers.

SUBSCRIBER, Phoenix, Ariz.—Prince Derby is a registered horse. His number is 31,828. His sire is Charles Derby 4907, his dam Princess (dam of Derby Princess 2:08½, Princess Derby 2:13½, Prince Away 2:19½ and Neva 2:27) is by Administrator 357, his grandam by Volunteer 55, great grandam by American Star 14, etc. Princess was owned by Oakwood Stock Farm and her foals were all bred there. We cannot place the mare Molly McCarty by McKinney 2:11½. If you know who bred her and how old she is we may be able to trace her breeding for you.

WILLIAM DUNCAN, Colusa.—Beau Monde, chestnut horse, foaled 1895, is imported by De Beavior, dam Thundercloud by imported Thunderstorm. He is registered in vol. 7 of the American Stud Book. He ran five furlongs in 1:01½, six furlongs in 1:15, seven furlongs in 1:28½ and was beaten a length in a mile in 1:43½.

T. L. Creason, Point Richmond—Golddust 150 was a chestnut horse, foaled 1855 and died in 1871. He was by Vermont Morgan, and his dam was said to be by the imported Arabian Zilcaadi. He was never in California. McCracken's Golddust was a California bred horse and was by Black Hawk 767. He sired Artist 2:26½. Another horse called Golddust was owned in Contra Costa county and was sired by Emigrant.

GREATEST PRICE EVER OFFERED FOR A HORSE.

New York, Jan. 31.—James R. Keene has refused an offer of \$200,000 for Sysonby. This was made by W. T. Robinson, the leading trainer of the English turf last season, who is said to represent a syndicate on the other side. Sysonby, which was bred in England, has a strong following over there, especially among the breeders who believe he should be retired to one of their studs.

Mr. Keene, who turned down an offer of \$100,000 made for Sysonby last summer by John W. Gates, evidently believes the son of Melton-Optime will prove a valuable addition to his breeding establishment at Castleton.

Trainer Robinson and C. A. Mills, a prominent English turf man, paid a visit last week to the Keene barns at Sheepshead Bay, where they inspected Sysonby. Both of them declared they had never seen a finer specimen of the thoroughbred. They then made their offer of £40,000, which did not cause Mr. Keene a moment's hesitation in filing a refusal.

THE GRAND CIRCUIT.

The management of the meeting to be given at Readville, Mass., will endeavor to get along without pool selling at their track this year, if it should prove necessary, and to accomplish it have formulated a new plan of competition that they think will prove satisfactory, and it is as follows: Each day three races will be given, limited to three heats each, with every heat a race, thus following the plan at Detroit last season. To this end they will reduce the amount of fered for the big stakes, and would thus make the Massachusetts this season \$9,000 instead of \$10,000 as heretofore, and divided in the following manner: At the end of each heat \$3,000 will be distributed—the winner getting \$2,000, the second horse \$900, the third horse \$300 and the fourth horse \$100. As to the entrance fee, it will be made five per cent, as usual, for each starter, payable as follows: April 10, \$40, when the entries close; May 10, \$65; June 9, \$65; July 10, \$120, and August 8, \$135. For each additional horse from the same stable they can be named by the payment of \$9 on each of the dates named. In the settlement of the winnings there will be no deduction made in the amount paid, thus making the races a straight five per cent entrance fee. Readville is opposed to the extra five per cent, making the claim that under that system, and which was in use last year at Buffalo, that some of the money winners were taxed thirty-seven per cent on their winnings at that place. Some of the leading members of the association at Readville are now convinced that in late years there has been considerable cheating, and therefore they will make a special effort this year to stop it by more surveillance from the judges' stand. The

late Grand Circuit meeting produced no results as to the plan of racing on that circuit, but the above shows the plan of the Readville people; while Detroit, as has been reported, will adhere to the 'three heats, every heat a race,' as Spirit of the West stated last week, but with ten per cent taken from the money winners. It has not yet been decided whether the Detroit meeting will be given at the Grosse Pointe track or not, but if no terms can be agreed upon for the use of the track, the meeting will be given over the track at the State Fair grounds that was built last season. The matter of the meeting this year at Cleveland is not yet fully decided upon and it probably will not be until it is known what the Ohio Legislature does in regard to the enactment of a new law which is to come up for decision this session. It is to be hoped that Cleveland this year will be able to give out its program when the other members of the circuit announce theirs, but that city should also be sure that a meeting will certainly be given when it does so to the end that the horsemen may not be treated to another fiasco as last year. "Be sure you're right, then go ahead." If not, decide the question early so that Detroit may fully arrange for a two weeks' meeting in accordance with the two weeks' dates that have been assigned to her. It does not seem possible that the Cleveland track is to be closed forever, located as it is in one of the best trotting horse cities of the Union, and all horsemen are of the opinion that "wiser counsels must eventually prevail." The other cities that go to make up the Grand Circuit are already in line as to their meetings.

GRANDSON OF ELECTIONEER.

Electioneer sired two sons that beat 2:10 trotting—Arion 2:07½ and Palo Alto 2:08½. Palo Alto was a great race horse, one of the sort that Senator Stanford had in mind when he used thoroughbred blood to enable sons and daughters of Electioneer to sustain extreme trotting speed to the end of the mile and to the end of long races. Palo Alto was out of Dame Winnie, a thoroughbred mare by Planet that produced five standard trotters. When Senator Stanford gave this stallion the name of the great farm where he was bred, it was proof that he considered him about the acme of his plan of breeding. Palo Alto left but about fifty foals, and of these, fifteen had taken standard records, three are producing sires, and two producing daughters. The fastest of Palo Alto's get is Iran Alto, whose record of 2:12½ was made in a race, and whose game racing qualities have often been commented upon by the horsemen of California who saw him race. Iran Alto has had very limited opportunities in the stud, in fact we believe the first regular season he ever made to public mares was last year when H. S. Hogoboom took him to Woodland and made a very successful season with him. Mr. H. will have Iran Alto in the stud again this year at the same place, and the son of the great race horse Palo Alto will be one of the most popular stallions in Yolo county. While his breeding on his sire's side is so superb, the trotting blood he gets through his dam is also of the richest quality. His dam is Elaine 2:20, who was a world's champion, and by Messenger Duroe out of Green Mountain Maid, the dam of Electioneer. Elaine has four standard performers. Iran Alto's sire and dam were both champion trotters and are both great producers. Iran Alto has sired but ten colts old enough to race. Of these four have records as follows: Dr. Frasse 2:12½, Thos. K. 2:15, Vendrome 2:17 and Dr. Frasse's sister 2:25, all records made at four years of age. Iran Alto's fee this year will be \$40, which is very low considering the price usually asked for services of horses that have fast records and are producers.

FASTEST SON OF SIDNEY.

The fastest trotter the world has ever seen was sired by a son of Sidney, and the fastest trotter that Sidney ever produced is his son Monterey 2:09½, who has been seen to exhibit faster than two minute speed on many occasions. Monterey is owned by the veteran horseman, Peter J. Williams of San Lorenzo, and just as sure as the horse lives, breeders will be willing to pay more for his services two or three years from now than Mr. Williams asks this year, as by that time a few more of Monterey's colts will be in the 2:10 list, and then the public will want his produce. The very first colt of Monterey's ever raced was the four-year-old, Irish 2:08½, fastest of his age in 1904. Irish took his record at the pacing gait, but is being trained at the trot this season and is expected to trot faster than his pacing record. Monterey sired another colt that was given the name of Young Monterey and took a record of 2:21 over the slow Eureka track in Humboldt county. Young Monterey is only six years old, but has one in the list already, a three-year-old with a record of 2:23. Monterey is the youngest grandsire in the State. He is by a great sire and out of a great brood mare, his dam having also produced Montana 2:16. Mr. Williams has a very high class son of Monterey, called Yosemite, which he will train and race this year, but desires to breed to a half dozen mares early in the season. Yosemite is out of Leap Year, an own sister to that good trotter Iago 2:11, well known to race goers as one of the gamest of trotters. These horses will stand at San Lorenzo and at Alameda, Mr. Williams having leased the Sherman street stables in the latter town, where he has fourteen nice box stalls and will take a few horses to train.

N. I. McKaughan of Anaheim has removed to Los Angeles, where he will turn his attention to breeding and training harness horses.

FROM STAM B'S HOME.

Rocklin, Cal., January 29, 1906.

Dear Editor: I have been living here since last July and among the many things I miss are the visits to the office of the Breeder and Sportsman. As I cannot call on you here goes for a visit on paper.

Last year was one of the lean kind to the California horsemen, but there were many experiences and incidents I shall not forget. Let me name a few: The drive Rev. Williams and I had behind Sadie Moore which you got wind of and wrote up.

In 1902 Landon Hunt of Eureka showed me a healthy chunk of horseflesh he was breaking, which proved to be our famous Bolivar 2:06 1/4.

Ben Davis invited myself and family out to the old San Bernardino track to see his colt Zolock move in 1898 and as he came down the stretch my wife said: "An engine!" I expected much from him but did not expect him to serve 75 mares and take a mark of 2:05 1/4 the same year. Had he been kept out of the stud and been tested upon a fast track my impression is his mark would have been a few seconds lower.

I shall always remember with pleasure the trips from Oakland to Pleasanton on workout days when Judge Green, whose face was a benediction, would give me descriptions of sires and dam and contests as we returned after a feast of fat things, before the famous ones went East. It makes us all sad to think that we shall meet that princely gentleman here no more.

A special visit to San Jose to see Lou Dillon gave me great satisfaction, because of the courtesy of that bishop of horsemen, Mr. Budd Doble, who was more patient than a country pastor while he exercised that beautiful, powerful volume of sensitiveness bound in nerves. Imagine my feelings when he said, "Stay a little while, Mr. Speers, and I'll step her up a little." He did. That was my only chance.

You won't expect me to forget July 21st. That day I took my filly for a five mile drive to protect her box stall. When within 100 feet of the barn a boy shot her with an air gun. It appeared to me that sixteen hind feet were trying to get on the cart seat at the same time. I am fat and not as active as I was in 1875 but I dismounted rapidly after the manner a young man enters a plunge tank—my pants were on top; there seemed a smell of sulphur, and by the time I rolled off myself the filly was out of sight. I concluded she was a greater success than I in the breaking business. This act lasted about 15 seconds. The footlights were turned on at 5:05 P. M.; at 6:30 I had a surgeon set my broken arm; at 7 I led the filly to Dr. Archibald's Hospital, where she remained 46 days. (His services were high class and his charges very moderate.) Next day I sold the pieces of my cart. The entire affair was a great surprise to me but I suppose she is not the first standard bred filly that has broken the owner.

There is a good half mile track here and a great many choice young horses.

Tuttle Bros. and Mr. Delano deserve great credit for the interest they have aroused in the fancy harness horse. If every town this size (2,000) in the State were as much alive to this pleasure as Rocklin there would be less unnecessary alarm among horsemen who falsely believe that the destiny of the harness horse depends on pool selling.

When Stam B. came to this town April, 1895 (I am told) there was only one horse within ten miles of the town that could trot a three-minute gait. There are to-day perhaps twenty horses within the town limits that can show from three minutes to a 2:30 gait.

Today about one hundred people visited the track while seven different horses entertained the crowd for about two hours.

I have not seen more promising colts anywhere than are owned here, except, of course, at some of the horse centers, such as Pleasanton or San Jose.

This week Tuttle Bros. will send a string of beauties to Pleasanton to Dr. Boucher, namely: Bay pacer Hattie T. by Stam B. 2:11 1/4, dam Kliekitat Maid 2:18 by Altamont; bay filly Ramona by Stam B., dam by Albert W.; bay filly by Stam B., dam by Silver Bow 2:16, owned by A. J. De Ryder; bay filly by Mendocino, dam by Electioneer; brown filly by Mendocino, dam by Geo. Wilkes; black filly (3) by McKinney, dam by Palo Alto 2:08 1/2, second dam by Arion 2:07 1/4; bay yearling colt by Bert Logan 2:16 1/4, dam by Altamont.

I'll name some nice prospects owned here which show lots of speed:

A four-year-old pacer by Falrose, owned by Mr. McGinerty; a four-year-old pacer by Suomi out of Kliekitat Maid, owned by Jas. Petch, that is a very choice colt; a handsome four-year-old by Stam B., owned by Mr. Hebuck; a seven-year-old by Stam B., owned by Ed Coe, which trotted this track this year to record in 1:14; a three-year-old by William Harold 2:13 1/4 out of a mare by Direct 2:05 1/2, that is a fast and handsome filly, breezy looking and a nice steady mover; a four-year-old stallion by Stam B. out of a mare by Fallis, owned by J. T. Whitney; a bay Stam B. five-year-old that weighs 1100 pounds and can road a 2:40 gait, is owned by Engineer Noble; a roan mare by Black Prince, owned by J. M. Hackett, is a beauty in form, manners and gait. Mr. Hackett has refused \$500 for her since I came here.

J. Pfofi drives a bay horse that is five years old that looks as good as his breeding; he is by Stam B. out of Laurels 2:13 1/2. Walter Benton has a five-year-old son of Stam B. that is a smooth, nicely turned horse. Engineer Jerdeau owns a three-year-old Zombro that is a big gaited fellow and very promising.

The colt that is most talked of in Rocklin today, however, is a four-year-old by Stam B., dam a strong well made mare from Oregon, whose breeding is unknown. This colt is called Doc Frazier. He is owned

by Mr. Frazier, a rancher near here, and has surprised all the horsemen, even his owner. You are very likely to receive a report from him again, as Mr. Frazier is receiving propositions from different places.

W. J. SPEERS.

FROM NORTHERN SOLANO.

Dixon, January 28, 1906.

The casual observer, be he a lover of good horseflesh, will readily appreciate the fact that Dixon and its vicinity is becoming more and more important as a factor in producing good horses. Not only is this true in regard to drivers, but equally so as affecting draft stock. During the last year renewed interest has taken hold of the horse lovers of this section and the farmers as well as the light harness men have begun to realize that draft horses are a factor of Solano county farms. Last year imported Percheron stallions were bought in Vallejo, Suisun, Rio Vista and Dixon, and an imported Belgian draft stallion is also owned in Suisun Valley. Since then Dixon has added a fine coach stallion at a value upward of \$3,000 and with this infusion of new blood Dixon and vicinity may easily hold its rank as one of the foremost horse breeding sections of the State.

Horses, thoroughbred and standard bred, have been raised in Solano county, since Theo. Winters established his famous stud on Putah Creek. Today there are several noted breeding farms here. The Hoy breeding and training farm in this county opposite Winter's has Bayswater Wilkes at the head of the stud. The Suisun Stock Farm in the Potrero Hills has for its premier stallion Demonio 2:11 1/4, a full brother to Diablo 2:09 1/4. At the Dixon track Mr. Lou Mativia has the good horse Alton by Altamont.

On visiting the fine stock farm of Mr. Delmar Dudley, commencing at the limits of Dixon and extending several miles north we find an ideal establishment consisting of 1000 acres of the finest land in the county.

Mr. Dudley takes great pride in showing visitors his stock and well might he be for who can beat such promising ones as are quartered here. McFadyen, the game colt that paced in 2:15 1/4 last summer when he won the two-year-old division of the Breeders' Futurity at Santa Rosa, and proved the fastest colt of his age of the year, will be at the head of Mr. Dudley's breeding farm. At present he is being jogged by Sam Hoy at his track at Winters.

Der Teufel is now a three-year-old and was worked a mile by Fred Chadbourne at Pleasanton on the 15th of June last as a two-year-old in 2:27. Mr. Dudley is jogging him on the road at present and expects to put him in the stud by the first of February. Another very promising one is Truth, a two-year-old by Searchlight, dam Bee by Sterling. She is entered in the Western Horseman Stake as a three-year-old. A two-year-old chestnut colt by Diablo, dam Babe by Dawnlight, entered in the Breeders' Futurity and the Western Horseman, is also a fine prospect.

Lookout, a brown yearling by Searchlight, dam Bee, is another one of great promise, and entered in the Breeders' Futurity for next year.

Mr. Dudley just traded a nice yearling by Demonio out of Babe to Dr. J. H. Haile of Dixon for a fine bred Broadmoor mare which he has added to the list of brood mares on his farm.

Entered in the Stanford Stake is Palite, by Nutwood Wilkes, dam Palita by Palo Alto, second dam Elsie by Gen. Benton, third dam Elaine, fourth dam Green Mountain Maid, dam of Electioneer. This colt was worked a little last year and showed very fast.

Paprika is still another good one; she is a chestnut mare by Ora Belmont 2:15 1/4, dam Auntie by Dawn. The dam of this mare is dam of the sire of Mamie R., recently sold last year by Mannie Reams to Mr. Butler of New York.

Ima Jones is a fine four-year-old bay filly by Captain Jones out of Babe. She is a good solid color, has much style and quality.

The brown filly Friskarina 2:13 1/4 won second money in the first Breeders' Futurity and first money in the three-year-old division.

Lorna Doone is a brown filly, full sister to Friskarina, and worked a trial mile in 2:18.

Still another good one is Miss Valentine, a full sister to Friskarina and Lorna Doon. She is a four-year-old and a big fine mare of marvelous strength, good bone and plenty of quality, but has never been worked for speed.

To conclude this list of promising horses without mentioning the grand old mares Babe and Bee, aged respectively twelve and twenty years, would be gross negligence on the part of any writer. They are both with foal to Palite.

A correspondent at Visalia writes: The proposed new race track for Exeter is now assured. This afternoon articles of incorporation of the Exeter Stock Breeders' Association were filed, under which name the company has been formed with the principal place of business at Exeter. The directors are L. F. Brown, George W. Kirkman, C. E. Mackey, T. M. Dungan, and C. F. Balaam. The company is capitalized for \$100,000, of which \$1550 has been actually subscribed. A forty-acre piece southwest of Exeter has been secured, on which a regulation half mile track will be constructed and all the necessary buildings constituting a fair grounds, including pavilion, grand stand, exhibition sheds, etc., will be erected.

Mr. T. L. Davidson, Jr., writes from Salem, Oregon, that owing to the fact that he has all the mares booked to Hal D. that he wishes to breed this year, he cannot bring this son of Brown Hal to California as he intended. He states that he will be with us next year sure, however.

A STALLION WITH CLASS.

One of the best posted horsemen in California, a gentleman who bred one of the best stake winners of last year, remarked to the writer recently: "There is no doubt in my mind but Martin Carter's horse Nutwood Wilkes is at the present time the highest class trotting bred stallion in California." And if any one will look over the list of stallions standing for service, and take into consideration breeding, individuality, racing qualities and success in the stud, he will probably come to the same conclusion. Nutwood Wilkes is so well known to all the readers of this journal that the mere announcement that he will be in the stud again this year at Nutwood Stock Farm at the usual fee of \$50 is sufficient, but in this connection we desire to call the attention of breeders to a few facts:

Nutwood Wilkes is by Guy Wilkes 2:15 1/4, son of Geo. Wilkes 2:22. His dam is Lida W. 2:18 1/4 by Nutwood 2:18 1/4, greatest sire of brood mares that ever lived. Lida W. is herself a member of the Great Brood Mare Table. The second dam of Nutwood Wilkes is Belle by Geo. M. Patchen, Jr. 31, whose blood has given pure trotting gait and great staying powers to a very large number of California bred horses. The third dam of Nutwood Wilkes was Rebel Daughter, winner of many running races, and she was by Williamson's Belmont, the best thoroughbred strain ever introduced into the trotting strains of this coast. So much for his breeding.

As an individual he cannot be surpassed. He is smooth, round, with lofty carriage, fine head and neck, good feet and legs and with great vigor.

As a sire he has the distinction of siring the fastest trotting stallion of all the Wilkes tribe—John A. McKerron 2:04 1/2. In addition to this, however, he has ten in the 2:15 list, six of which have records below 2:11. The get of Nutwood Wilkes have the racing instinct, and they seem to know the game as soon as they are broke to harness. They come to their speed early and stay with it late in life, and have excellent road as well as track qualities. The largest winner in California last year was North Star 2:13 1/4, as a three-year-old, winner of the Breeders' Futurity, Occident and Stanford Trotting Stakes. The fastest three-year-old pacing filly on the California circuit last year was Mona Wilkes 2:11 1/2, who was out of a daughter of Nutwood Wilkes.

The sons and daughters of Nutwood Wilkes breed on. He has two sons that have sired horses with records below 2:10 and five daughters that have produced horses with record below 2:15.

Those breeding good mares to Nutwood Wilkes can depend on getting foals that will have good looks, good size, excellent feet and legs, speed, gameness and race horse qualities. If the foal is a colt and is kept for a stallion he will be certain to produce speed. If it is a filly she will do the same. What more could one ask for the money.

STRAHWAY FOR SALE.

As Mr. Graham E. Babcock of San Diego is selling all his trotting bred horses and retiring from breeding he advertises his good producing stallion Strathway 2:19 for sale. Strathway is not a young horse, but he is one of the most vigorous and best preserved stallions in California and during the past two years (the first time he has had good opportunities in the stud) he has not had a mare fail to get in foal. Strathway was a very fast horse himself and comes from speedy families on both sides, his sire being Steinway and his dam Countess, the dam of Dawn 2:18 1/4 by Whipple's Hambletonian. Strathway with the most limited opportunities has sired no less than seven with records better than 2:15, among them John Caldwell 2:08 1/2, Toggles 2:08 1/2, two of the best gaited trotters ever hooked to a sulky. Strathway also sired Homeward 2:13, sire of the sensational trotter George G., that sold for \$15,000 and took a record of 2:05 1/4. Stoneway, another son of Strathway, is producing great speed, a two-year-old taking a record last season of 2:15 1/4, and a three-year-old one of 2:15 1/4. Strathway's get are all good gaited and come to their speed naturally and quickly. He will be a good investment for some one. Write to his owner for price asked and full particulars.

BON VOYAGE IS AT PLEASANTON.

J. O. Gerrity, who trained the horses owned by Mr. W. A. Clark, Jr., last year, and is now located at Los Angeles with them, shipped the famous young stallion Bon Voyage 2:12 1/4 to Ted Hayes at Pleasanton this week, and the fastest three-year-old trotting colt of 1905 will be in the stud at Pleasanton this season under Mr. Hayes' care. Bon Voyage is a grand individual and one of the best bred ones in America. He should be a great horse to breed mares of the Wilkes blood to, as he is by Expedition 2:15 1/4, one of Electioneer's greatest sons. The cross of Electioneer and Wilkes blood is proving such a great success, and there being so many high-class mares of the Wilkes strain in California, great results should certainly follow the bringing of such a high-class young stallion to this State by Mr. Clark. Bon Voyage was a great stake winner as a two-year-old and took a record of 2:15 that year in a winning race, and reduced it to 2:12 1/4 in a winning race last season as a three-year-old, being the champion trotter of his age and sex both years. Mr. Clark has a small collection of high-class brood mares at Pleasanton, most of which will be bred to this splendid son of Expedition.

The saddle stallion Star McDonald by Rex McDonald recently changed hands in Kentucky, the consideration being \$2500.

THOUGHTS ON THE BREED DEPARTMENT.

By Ralph H. Tozer.)

The Burns Handicap, the far West's most important stake race, was won in hollow fashion by Dr. Leggo last Saturday, the Puryear D. horse carrying 114 pounds in track record time, 2:05½. Red Leaf (100 pounds) was second, two and one-half lengths away, and a neck before the favorite, Proper (122 pounds). Sir Brillar set the pace for over a mile, closely attended by Red Leaf. Prior kept Leggo close up, and making the last turn was third. When he set the Doctor down he ran past the leaders as if they were tied and won in a big gallop. The winner could have gone the route in about 2:04½ if it had been necessary. Owner C. C. McCafferty is certainly a fox. Through the defeat of Dr. Leggo by mediocre performers at Ascot Park, Handicapper Egbert was fooled into allotting but 114 pounds to the horse, when the race proved he could have won with 125 pounds. The lesson taught is that a horse should be handicapped on his very best performance, unless the galloper shows by a long series of bad races that it has gone away back, and an owner who schemes to "get weight off," in short, practices fraud, should be punished severely. The Ascot performances of Dr. Leggo were "bogus," in the opinion of nearly every one, and it is not too late for the Los Angeles officials to take action in the matter, if the Emeryville stewards do not believe they have jurisdiction, for both associations are working under the same rules and are members of the Pacific Jockey Club.

But forgetting the ante-post features of Dr. Leggo's running, he is a grand race horse, and as I wrote in these columns nearly a year ago, is the best colt produced in California in many years, if, indeed, his equal was ever foaled within the borders of the Golden State. It must be a pleasant matter for A. B. Spreckels to contemplate—that within the first ten years of his breeding operations he should send from his Napa Stock Farm to do turf battle the champion race horse of his day, as far as the middle and far West is concerned—and I am not at all sure that Dr. Leggo would be very badly beaten by Sysonby should the pair meet on equal terms at a mile and a quarter just at this moment. I have seen both race, and both generally win their races easily. Sysonby goes out in front, Dr. Leggo comes from behind. Both are plain-looking bay horses, Sysonby the larger of the duo, and a darker bay. No performance of Sysonby in 1905, considering the "fastness" of the various tracks, excels Dr. Leggo's Emeryville race very much, and if you want to hark back to Leggo's races of ten and eleven months ago they would not suffer by comparison. It might not be amiss to give the best performances of each, from a time and weight standpoint, so that they can be compared:

Sysonby.	Dr. Leggo.
2½ miles in 3:54, 115 lbs., galloping, Coney Island, Sept. 2. Track record, 3:53 3-5.	3 miles in 5:22 (beaten about half a length), 85 lbs., Emeryville, April 8. World's record, 5:22.
1½ miles in 2:33 1-5, 126 lbs., 3-year-olds, galloping, Brighton Beach, July 29. Track record, 2:32 1-5.	13-16 miles in 1:59½, 108 lbs., easily, Emeryville, April 5. Track record 1:59½.
1½ miles in 2:06 2-5, 126 lbs., 3-year-olds, easily, Brighton Beach, July 20. Track record, 2:04 4-5.	1½ miles in 2:05½, 115 lbs., galloping, Emeryville, January 27, 1906. Track record, 2:05½.
1½ miles in 2:47, 126 lbs., 3-year-olds, galloping, Coney Island, July 4. Track record, 2:47. (?)	1 mile and 50 yards in 1:42½, 110 lbs., easily, Emeryville, April 12. Track record, 1:42.
1½ miles in 2:07, 111 lbs., easily, Coney Island, July 1. Track record, 2:04 3-5.	About 1½ miles in 2:03½, 122 lbs., easily, Los Angeles, Feb. 18, track slow. Track record, 2:02½.
1½ miles in 2:05, 126 lbs., 3-year-olds, easily, Coney Island, July 17. Track record, 2:04 3-5.	1 mile in 1:39, 103 lbs., handily, Emeryville, February 25. Then track record, 1:39.

Sysonby (111 pounds) beat Proper (114 pounds) by four lengths, easily, in the Commonwealth, at Coney Island, mile and a quarter, July 1, 1905, time 2:07, but Proper later on ran faster than this, as did Sysonby, so that it is hardly a test race. Judging of the above records, Sysonby is perhaps a six-pound better horse than Dr. Leggo, but not a bit better, if, indeed, that much superior to the Californian. Much better care has been taken of Sysonby, too. He was not raced at three miles as a three-year-old in the month of April, as was Dr. Leggo, neither was the Melton colt sent along a mile in 1:39 in a race as early as February, or a mile and fifty yards and a mile and three-sixteenths in fast time in April. Had the Napa colt been handled as carefully as was Sysonby there would have been some question as to which was the superior racer, and I am not so sure that the verdict would have been in favor of the English racer. Dr. Leggo is a racing marvel, and considering his treatment, as much of a phenomenon as is Sysonby.

The breeding of Dr. Leggo is upon the lines that I have been talking of for a long time past—unbroken links of success on both sides of the house. Puryear D., his sire, was not a great race horse, but he is a success at the stud, as was Deceiver, his sire, then Wenlock, Lord Clifden, Newminster, Touchstone and down to the unbeaten Eclipse. On the dam's side of Dr. Leggo's house I find Sevens, a stake winner by the great sire, imp. Watercross, then Folly (sister to the great race horse Sinfax, a winner herself and a dam of several good winners), then Folly was from a stake winner that threw stake winners, and thus the pedigree continues on the mother's side—the first six or seven dams by tried sires and themselves mothers of stake horses. It only emphasizes the truth of the old saying, "Nothing succeeds like success." Breed to good sires with no breaks in the success chain and if on the mother's side the first five or six dams have produced stake-winners, as in the case of Dr. Leggo, you are quite likely to breed horses of the stamp of the California champion and one of the most remarkable racers that ever saw the light.

Manager Brooks and Starter Holtman are at loggerheads at Ascot, and it was over the question of an assistant starter's right to hold or not to hold a horse at the post. I applaud Manager Brooks' stand in the matter and believe, with him, that if assistants are allowed to hold horses as their own sweet will dictates it will kill off all the popularity racing possesses in shorter order than anything that could be devised. If a starter were unscrupulous and wanted to get rich quick all he would need to do would be to give orders to hold every well-played horse in a race until those not well-played were on their way fifty or 100 yards. A starter with this power and no one to say, "Hold, enough of this holding," could beat Sysonby or Dr. Leggo with Swagger or Bearskin. It is high time the governing turf body took a hand in the game and forbade the holding of any horse at the post under penalty of a heavy fine or loss of position for the "assistant bookmaker," or "hold-on Jimmy." I have not observed that Dick Dwyer's assistants have to take horses by the head as did Holtman's—no, not one-twentieth part as much.

To dissolve a partnership, the following horses in W. M. Murry's hands will be sold to-day in the paddock at Emeryville: St. Francis, Mazel, Bakersfield, Marie H., Edelweiss and a chestnut four-year-old gelding by imp. Prestonpans-Queen Kapiolani.

POLO AND PONY RACING AT CORONADO.

Preparations are being made for the entertainment of the crowds that are expected at Coronado for the polo tournament to be held March 3 and 5, when the Mackay team from England will compete with local teams for the Spreckels challenge cup.

The meeting will be held under the direction of the Southern California Polo and Racing Association. All ponies will be raced under the rules of the association, entries must be in before February 19, and only ponies of three years old and upward and not exceeding 14.2 in height will be admitted to the various events. The program for the two days' racing is:

First Day.

Selling pony race, one-half mile, \$50.
Galloway race, gentlemen riders only, five-eighths mile, \$75.
Polo pony race, gentlemen riders only, three-sixteenths mile, cup valued at \$80.

The Spreckels challenge cup, to be won three times by same owner, owner of winner on each occasion to receive a duplicate of cup in miniature. Gentlemen riders only, one and one-half miles.

Race for horses, three-quarters mile, \$75.
Pony hurdle race, one mile over six hurdles, three feet timber, six inches brush, cup, \$50.

Second Day.

Polo pony race, gentlemen riders only, three-eighths mile, cup \$50.
Horse race, for horses owned in San Diego county, half mile and repeat, \$50.

Breeders' stakes, for ponies, three-year-olds and under, weight for inches; subscription of \$15, second to save stake, three-eighths mile, cup added \$50.

Horse race, weight for age scaling down from top weight, one mile, \$75.

Pony race, gentlemen riders only, three-quarters mile, cup \$600.

Pony race for ponies, gentlemen riders only, one-quarter mile, cup \$50.

NUSHAGAK AND PRINCE ANSEL.

Woodland Stock Farm presents its advertisement this week of those two excellent stallions, Nushagak and Prince Ansel.

The first named has already sired a trotter that is known all over the country—Aristo, winner of the Occident Stake and Stanford Stakes of 1902, and earner of a race record of 2:08½ the following year at the New York meeting of the Grand Circuit. There is quite a bunch of colts and fillies by Nushagak now in training at Woodland Stock Farm track that will still further add to Nushagak's reputation as a sire of fast trotters that have size and good looks. Nushagak is a royally bred stallion. His sire is Sable Wilkes, whose three-year-old record was 2:18, and his dam is the great brood mare Fidelia by Director 2:17, founder of one of the greatest racing families ever known to the harness racing turf. The second dam of Nushagak was by Reavis Blackbird, and the third dam by McCracken's Blackhawk. Nushagak will make the season at a fee of \$50.

Prince Ansel, two-year-old record 2:20½, is a son of Dexter Prince and the great brood mare Woodflower by Electioneer. He was one of the greatest two-year-old trotters ever produced on the coast, and but for an accident would have had a much lower record. He has the distinction of having beaten that great trotter John A. McKerron in his two-year-old form. The Dexter Prince-Electioneer cross proved a speedy one at Palo Alto Farm, and Prince Ansel is one of its best representatives. He is a very fine individual and his colts are showing great speed. His fee will be \$30, which is certainly a bargain in stallion fees.

DISTEMPER PREVALENT.

There is a great deal of distemper about just now in some sections of the country. More than usual at this time of the year, and the cause is perhaps to be found in the damp, wet weather which prevailed in most parts of the country during the summer and fall. This damp unfavorable weather predisposes horses and colts to lung and throat troubles, and there is always a greater likelihood of distemper inoculating animals when suffering from a cold or chill. It will be useful for every horse owner to have on hand in readiness a bottle of Craft's Distemper and Cough Cure and give an occasional dose to prevent the possibility of any infectious disease, such as distemper, pinkeye, influenza, epizootic, catarrhal or shipping fever taking hold of your stock. It is just as effectual for sheep and dogs as for horses. It is made by the Wells Medicine Co., 13 Third St., Lafayette, Ind., and is sold by druggists generally, or will be sent direct prepaid on receipt of price, 50c and \$1.00.

GOOD BLOOD AT LOW FEES.

The veteran horseman Thos. Smith of Vallejo, has two stallions in the stud at that town this year whose services have been put so low that they are within the reach of every breeder. We do not remember of ever hearing of such richly bred stallions standing for such low fees anywhere on this coast.

The services of the registered horse Gen. J. B. Frisbie, No. 41637, are offered for \$25 for the season. This horse is a full brother to that handsome and fast trotter Tom Smith 2:13½ and is one of the most perfect models of a trotting stallion. He is good gaited and fast. His sire is McKinney 2:11½, his dam the great brood mare Daisy S., dam of four in the list by McDonald Chief 3583, second dam Fanny Rose, dam of Geo. Washington 2:16½, Columbus 2:17, etc., by Ethan Allen Jr. 2903. The McKinney, Clark Chief and Morgan crosses can be expected to produce handsome horses when unfitted, and it has been realized in Gen. J. B. Frisbie, certainly one of the hand-somest stallions in California.

The other stallion which Mr. Smith advertises is Mambrino Chief Jr. 11622, the sire of Dollican 2:15½, Geo. Washington 2:16½, and many others. This horse is by McDonald Chief 3583, out of Venus by Mambrino Patchen. Mambrino Chief Jr. is a uniform sire of large handsome horses of solid color and with the best of feet and legs. His get have generally been owned by persons who have not trained them, yet he has quite a respectable list of standard performers, and has sons and daughters that are producers. His service fee will be but \$20 for the season. Look over the advertisement of these two stallions.

PALO ALTO STALLIONS AT STUD.

The advertisement of Mendocino and McKena, the only two stallions remaining at Palo Alto Stock Farm appears in our issue this week.

Mendocino, whose record of 2:19½ was made when he was three years old, is a son of Electioneer, and a well-bred one, as his dam is the great brood mare Mano by Piedmont. Mendocino is most powerfully muscled and a grandly proportioned horse whose reputation as a sire of game race winners is established. He has sired Monte Carlo 2:07½, Idolita 2:09½, Leonora 2:12½, Polka Dot 2:14½ and many others with fast records. Mendocino carries the blood of Electioneer, Piedmont and Whipples Hambletonian backed up by the strong thoroughbred strain of imported Mango. His service fee this year will be \$75.

McKena 39460 is a son of McKinney 2:11½, that is out of that great race mare Helena 2:11½, dam of three in the list, by Electioneer, second dam Lady Ellen, dam of six in the list, by Carr's Mambrino, third dam by Owen Dale and fourth dam by Williamson's Belmont. McKena is a magnificent large horse, weighing over 1300 pounds and finely formed. He was injured as a colt and could not be trained, but he is one of the surest of foal getters and one of the best bred McKinnys living. At a service fee of \$35 he is one of the best horses to breed to in California. Read the advertisement of these two stallions in this issue.

KINGS COUNTY FAIR.

Down at the little town of Hanford, Kings county, where the Central California Fair is held every year, there is only a half mile track, but the progressive managers succeed in giving the best county fair held in the State. They took in nearly \$6000 in gate receipts during six days last fall, which shows that the people of that section turn out better than they do elsewhere. While a good program of racing is given, the managers make a special endeavor to have a fine stock show each year, and the exhibits of dairy and beef breeds, and of sheep, hogs and draft horses is large and meritorious. The association has recently prepared a financial statement from the secretary's books which is as follows:

RECEIPTS.

Advertising	\$ 62.70
Concession	1770.52
Gate receipts	5966.90
Exhibition space	25.00
Entrance fee	165.00
Lease ground, Co. I.	100.00
Rent, wood, straw	47.35
County donation	1000.00

Total \$9137.47

PAID OUT.

Taxes, two years	\$ 156.82
Insurance	142.80
Rent of office	27.00
Account of 1904	965.76
Improvements	669.06
Labor	829.50
Labor, clerical	424.40
Expense	1530.43
Premiums	1165.90
Races	2344.30
Band	536.50
Acrobats	200.00
Directors' expense	144.00

Total \$9136.47

"ANOTHER SPAVIN CURE."

Mr. John W. Sanner of Decatur, Ill., writes as follows: "I have used QUINN'S OINTMENT to remove splints and reduce soreness in spavins with very satisfactory results. Recently I advised a friend owning a horse with a bad spavin to use QUINN'S OINTMENT, and he informed me that the horse is going sound; this result being produced in two weeks, the horse being used daily on paved streets." This is the general expression of leading horsemen all over the country who have given QUINN'S OINTMENT a trial. For curbs, splints, spavins, windpuffs and all bunches there is nothing better. Price one dollar per bottle. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

JOTTINGS.

"Marque," the Horse Review's representative who goes through the Grand Circuit every year and writes the accounts of the races for that journal, says:

"I saw many mistakes made last season in placing horses as they finished, both on the Grand Circuit and the Great Western. Some of these errors were so glaring as to be inexcusable, even at a county fair, where the officials are not always guaranteed adepts. On four or five successive occasions on the 'big ring' serious errors were made when there was no possible excuse. For instance: At Oakley Park, Brownie Wilton beat Norrie by a margin of four feet in the final heat of a race. The judges, to the consternation of the crowd, gave the heat to Norrie.

In the two-year-old division of the Review Futurity, at the same meeting, four horses were misplaced in the first heat, although they were widely separated. In this instance the error caused fourth money, \$300, to be given to the wrong horse.

At Decatur, Ill., last August, a horse heavily backed to come second won the place handily, but another horse away back in the rear ranks was awarded it. The "books" paid according to the decision of the judges, who afterwards placed the horses correctly. There was a howl went up from those who had played the originally misplaced horse to place, and the secretary had to cash the tickets.

No less than five horses were misplaced at Galesburg, Ill., in a single heat.

Only rank carelessness on the part of the judges could make such unpardonable mistakes possible. In case of a really close heat no one can afford to gainsay their judgment, and no one does, excepting the ones who hold losing tickets."

When such errors occur at the average country meeting there is not much surprise manifested among horsemen, a good strong kick being generally registered by the losers and a lot of loud talk indulged in for an hour or two, and then the races go on as usual, but for Grand Circuit judges to make such mistakes as those mentioned by Marque is inexcusable. I remember acting as clerk at a meeting once where three "prominent citizens" were the judges. A purse of \$1000 was being trotted for and there were six horses in the race. Just at the finish of a heat a little "disturbance" started in the crowd just back of the judges' stand and not one of the three judges saw the finish of the race. It was one of my duties to take down the numbers of the horses as they crossed the wire, and as they were called by one of the judges, and as from my position in the stand I could not see the scrap, my attention was directed to this race and I got the numbers of the horses as they finished. The presiding judge took my "call" as correct and with his usual dignity announced the result. I have often wondered who these judges would have called on for the necessary information as to the places earned by each horse in that heat, had the "little unpleasantness" been within the line of my vision. They might have done as the judges at a little country fair in this State once did. On this occasion the drivers wore no arm numbers and the judges were all looking at the nose and nose finish of the two leaders and forgot all about the other five in the race. They were in a quandary for a few minutes as to what to do, when a happy idea struck one of them. The five drivers were called into the stand and questioned as to the possibility of a little foul driving in the stretch. The first question asked each one was, "Mr. —, where did you finish?" The clerk took the claimed figure down, and when all were interrogated it was found that there was no contest—all had claimed different positions and the summary was made up without even the suspicion that the "prominent citizens" had not placed their eagle eyes on every man in the race. To this day those drivers probably believe that there was something doing by some one of them in the way of foul driving in that heat, but which one they have never been able to ascertain.

RECORD STALLIONS AND MARES.

Stallions that have been trained and have made fast records will have the preference among breeders in the future. They will be more liberally patronized and receive a better class of mares than will those stallions which have not been trained or those that have been trained but have failed to take records. This is as it should be, for the fact that a horse has taken a fast record is positive proof that he has inherited and possesses all the qualities essential for speed. The horse that possesses all the elements of speed is sure to be more successful as a sire of speed than one which is lacking in any of these important qualities upon which speed depends.

If a horse has inherited and does possess all these qualities essential to speed, however, he will surely transmit those qualities, whether his speed is developed or not. Patronage had no record and yet when but seven years old he got the world's champion trotter, Alix 2:03½. The sire of Patronage was Pancoast 2:21½, but Pancoast was only two years old and consequently had not been trained for speed when he got Patronage. Several sons of Pancoast took fast records, but none of them has ever sired a trotter that has taken so fast a record as that of Alix 2:03½.

Three entire sons of Baron Wilkes 2:18 have made records below 2:10. They are Baron Bell 2:09, Oakland Baron 2:09½, and Baron Rogers 2:09½. The fastest trotter by the records got by any son of Baron Wilkes is Fereno 2:05½. Moko, the sire of Fereno, has no record and was only three years old when he got Fereno. Sidney Dillon had no record yet when he was only two years old he got Dolly Dillon 2:06½, and was but five years old when he got the world's champion trotter Lou Dillon 1:58½.

Fanella 2:13 was not trained for speed until after she had produced the sensational young trotter Todd 2:14½ (that trotted eighths in 15 seconds as a two-year-old) and the lamented Sadie Mac 2:06½, the most sensational trotter out last season. The rich speed inheritance that she derived from her ancestors enabled her to transmit extreme speed ability to her offspring before her speed was developed.

Th dam of Alix 2:03½ had a remarkably strong speed inheritance but had no record, yet Alix was not only a world's champion trotting record breaker in her day, but also holds the honor of winning the fastest nine-heat race ever trotted. Mabel, the dam of Cresceus 2:02½, had no record but she produced one of the most remarkable trotters ever foaled, the winner of an eight-heat race as a three-year-old against aged horses. After losing the first five heats he won the last three in 2:12½, 2:11½, 2:11½. Few three-year-old trotters could ever recover from the effects of such a race as that, yet Cresceus did not seem to mind it, and finally became the world's champion trotter with a record of 2:02½, without the assistance of a runner pulling a dirt shield in front to lessen atmospheric resistance.

No horse that has held the world's champion trotting stallion record has yet sired a world's champion trotter, hence although it is advisable for stallion owners to develop the speed of their horses and prove by giving them fast records that they do possess speed ability, such development is not essential to a stallion in order to insure his success as a sire of extreme speed. The success of a stallion as a sire or a mare as a producer undoubtedly depends upon his or her speed inheritance rather than development. If the inheritance be there with no undesirable element to antagonize it, success is sure to follow under favorable conditions. Without an inheritance of the right sort, years of development will not enable a stallion to become a successful sire or a mare a successful producer of speed.

SIGNS OF A DOCILE HORSE.

F. M. Ware in Outing gives various suggestions to the man who would buy a good horse, and among them the following.

Once out of the stall, notice that he submits quietly to being wiped over, and betrays no resentment, while harnessing, at accepting the bit, bridle, crupper, etc., etc., and decorously permitting all necessary alterations and attentions. Accept no departure from absolute docility of deportment; for be sure that if the animal betrays either excitability, nervousness, or vice in the dealer's hands, he will be far worse with you, for you know you don't know, and he will know you don't know—and those combinations spell trouble. In the same way, see him led out and put to the vehicle to which he is to be driven, noting each stage of the process, viewing him always with the icily critical eye of the individual who does not (yet) own him. Excuse nothing, and make no allowances for less. If he makes a move you don't fancy, say so frankly and look further—there are plenty of horses.

Mr. D. J. Desmond of Los Angeles is spending a good portion of his time in San Francisco just now, as the firm of which he is a member has the contract for building the bridges on the new Ocean Shore Railway now building from San Francisco to Santa Cruz. Mr. Desmond is an ardent horseman, and an enthusiastic road driver. In company with Mr. S. Christianson of this city he took several spins over our park roads and ocean drives last week, and has consequently decided to keep one or two of his horses here while his contracts are under way. Mr. Desmond formerly owned that whirlwind pacer by Titus out of Lady Waldstein that is the sensation of the Los Angeles track and that recently stepped a mile in 2:07.

The first colt by Strathway 2:19 for 1906 made his appearance at Mr. Whalen's Santa Rita Ranch, near Pleasanton, last Monday. His dam is a fine mare by Athadon, out of a mare by Dexter Prince. She is owned by Mr. O. Scribner of the Associated Oil Company, who is now in Europe. Mr. Whalen reports the colt as a fine big lusty fellow, looking like his sire.

Mine Host "Scotty" Burns of the Western Hotel, Sacramento, is the owner of a Nutwood Wilkes filly that he believes will be one of the race winners of the future in the free-for-all class, and his friends who have looked the little miss over are already figuring on having a ticket or two on her when she is old enough to start. She is a handsome bay, just eight months old and like all the Nutwood Wilkes family has good legs and feet and a lot of "class." She is out of Ollie Dew by Waldstein, son of Director. Abbott of Callie is the name Mr. Burns has chosen for this filly, and the fact that \$1000 would not tempt him to part with her shows that he thinks pretty well of her.

Dan O'Keefe, an occasional correspondent of the Breeder and Sportsman at Woodland, has sold his horseshoeing shop at that place to his brother, and has gone on the road for the Capewell Horse Shoe Nail Company. Mr. O'Keefe's decision has been influenced by two considerations: The position he has accepted is a very desirable one. Strict attention to business has somewhat impaired his health and an opportunity to travel will undoubtedly restore it. Mr. O'Keefe took a course in scientific horseshoeing from a Philadelphia expert and has since had a high class of patronage. His services have been much in demand by horsemen of Yolo county, and those who own good roadsters.

Sober up on Jackson's Napa Soda.

COMMON SENSE TALK ABOUT THE AUTOMOBILE.

(From the Newark Advertiser.)

The general public throughout the entire State is demanding a new law to regulate the speed of all vehicles upon the highways. Horsemen are joining the road drivers' associations in all sections of the State, and much interest is being manifested in the new State organization. The general demand is for a just and fair law for all. Suggestions are numerous as to the terms of such a measure and autoists and horsemen alike are studying in order to agree upon an equitable statute. W. Gould Brokaw, a millionaire auto owner, in a recent interview, said:

"There have been altogether too many people killed in the last six months in automobile driving and I believe something should be done to remedy the matter. I am an enthusiastic automobilist myself and I think that all chauffeurs should pass an examination and be licensed before they are allowed to operate a car. In France, where the automobile is in the highest state of perfection and great pleasure is taken in automobile riding and racing, every chauffeur is licensed and has to pass a rigid examination before he is permitted to take anybody out in a car.

"We should have the same law in this country. Why should chauffeurs be allowed to take persons' lives in their hands without previously having undergone some kind of an examination. There should be a law passed similar to that under which locomotive engineers are examined. Their eyesight is tested. Their physical condition is tested, and if there is any accident in which any one can be blamed, the chauffeur, like the engineer, should be responsible. The laws relating to locomotive engineers and chauffeurs should be similar.

"In an accident where there is neglect on the part of the chauffeur he should be punished by criminal action. I think if such an examination were had and such a law passed, it would do much to lower the automobile accidents in this country."

The suggestion of Mr. Brokaw would seem to be a good one. It comes from an auto owner, and it has been noticed that most all of the recent fatal accidents have been caused by the great speed at which the machines were being driven by the chauffeur. The ability of a chauffeur and the size of his salary seems to be based upon the speed at which he can run his machine. Another suggestion is to allow no higher than twenty-horse power machines to be run upon the highways, or machines which could not attain more speed than twenty miles an hour, the higher power machines being classified as racing machines and allowed only on tracks or beaches where racing carnivals are being given. Another suggestion is that it be made a State prison offense for either a driver of a horse or machine to be found guilty of careless driving upon the public highways. Twenty miles an hour, or a three-minute gait, it is argued, is fast enough for any one to ride behind a horse or in a machine upon the highways of this State.

The autoists claim that the reason why the machine should be allowed by law to go at a much faster pace than the horse, is because it can be stopped more quickly. Just what difference it makes after an accident has occurred how quick the stop is made is not stated. But this statement is disputed. A machine is inanimate; a horse is almost human. The animal, even at runaway speed, will guide itself among vehicles, and when checked in its course is easily controlled. A machine, when the brake is suddenly applied for a quick stop, will, in many instances, when going at full speed, "turn turtle" or run sideways and overturn. Whoever heard of a road driver killing cows, chickens, dogs, etc., on the road? Yet the statement is made and vouched for that a South Jersey farmer makes his living by picking up turkeys and chickens killed upon the public roads by the machines. Both the horse and the machine enter in the business life of this community.

The horse and his owner keep thousands employed as coachmen, blacksmiths, harness makers, grain merchants, wagon and carriage manufacturers, stablemen, etc., and the machines use oil, gasoline, leather and machinery for the manufacture of which this city is celebrated. These merchants and manufacturers are therefore opposed to any law which would abridge the use of machines. But would a law regulating the speed lessen the use? Would there not be just as many machines, if not more, sold, if the speed was so controlled by law as to lessen the danger of accident, and should not the regulation of speed by law lessen the danger and increase the sale?

Another question is that of the public health. It is well known that a machine going over a dusty road by reason of the large tires and low body causes a much larger amount of dust to rise than any vehicle to which a horse may be attached. The inhalation of this dust is injurious, and the faster rate of speed at which the machine is being driven there is necessarily more dust. Machine owners admit and horsemen declare that the present law is inadequate and non-enforceable. Why, therefore, cannot the two interests get together and agree upon such a measure as will satisfy each and in turn merit the commendation of the general public? Let there be a give and take spirit manifested, let personal feelings and bickerings be left out of the discussion and when a measure is drafted let it receive the support of all.

The Gilroy race track has been plowed up and will be closed to the public hereafter. The owner, Mrs. Sargent, has heretofore permitted everybody who desired to drive on the track, but the privilege was abused, valuable fruit trees were broken down, fences destroyed and other depredations committed. The Gilroy track was particularly adapted to winter training and its loss to the trainers of that locality will be a serious one.

NOTES AND NEWS.

Woodland claims the week prior to the California State Fair for its meeting this year.

Joe Cuicello worked Charley Belden, the Lynwood W. gelding owned by Mart Rollins, a half in 1:04½ at Pleasanton one day last week. At the end of a mile in 2:20 on another occasion this good trotter stepped a half in 1:05 and the railbirds say Joe was only buggy riding.

Sol Shockley of Merced advertises a five-year-old sprinter for sale that should do for pony racing or polo, as he is 14.2 hands, perfectly sound, and can run a quarter in 23 seconds or better.

It has been officially announced that the champion trotter, Lou Dillon 1:58½, will be bred this season to John A. McKerron 2:04½.

George Hayt, of Binghamton, New York, will again act as presiding judge on the Grand Circuit and Robert Newton of Yorkville, Illinois, will again give the drivers the word.

The pretty two-year-old filly by Stam B. 2:11¼, whose picture graces our title page this week, is owned by Mr. S. Christianson of the Palace Hotel in this city and is in James Thompson's string at Pleasanton. She is out of his mare Perza by Allie Wilkes 2:15, second dam Anglia by Geo. Wilkes. Anglie is the dam of Anglina 2:11¼, Effie Hill 2:21½ and grandam of Kellar 2:16¼, and William P. Anglin 2:29½. This filly is well staked and is a very promis-

T. C. 2:30 BY NUTWOOD WILKES

Purchased This Week by George Algeo of Oakland from Nutwood Stock Farm.

ing trotter. Mr. Christianson has a Stam B. two-year-old colt which he turned over to Millard Saunders on the 22d of this month and just one week later Saunders drove him a mile in 3:03. This colt is the picture of his sire, and puts on just as much style when on dress parade. He is out of that fast mare Marguerite by Don Pedro, owned by Charles F. Kapp, who gave her a matinee record of 2:17.

Barondale 2:11¼ is commanding a fee of \$50 this season in Iowa. He is now the sire of seven trotters and twelve pacers in the standard list, having had six additions to his list in 1905. The young Barondales in California are very highly thought of, although none are old enough to race.

M. Henry of Haywards, who is working quite a string of horses at Pleasanton, was in the city this week making payments on several colts he has entered in the Pacific Breeders Futurity. He reports his horses at Pleasanton as all doing well. Robert C., a gelding by Gossiper, worked a mile in 2:37 last week, with the last half in 1:10, and the last quarter in 34 seconds. Will Guthrie, a colt by Mr. Henry's stallion Educator, trotted a mile in 2:30, with a half in 1:13 and a quarter in 35 seconds. Both these youngsters can show a mile in 2:20 if necessary. A five-year-old McKinney colt out of a Director mare trotted a quarter in 36½ seconds, back in 35 and the third trial in 34 seconds the first time on the track. He looks like a high-class prospect. Frank C., a three-year-old pacer by Gossiper, showed a quarter in 34 seconds to a Toomey cart. Ed. Kiel, black stallion by Educator, is one of the showiest animals at the track. He is quite a high stepper and has speed as well. Educator's colts are all showing well. Offers of \$250 for yearlings by this son of Director were refused by two owners recently.

Sealed bids will be received up to six o'clock this evening by Ira B. Kilgore of Concord, for furnishing the material and constructing fifty-two (52) box stalls for horses at the race track near Concord, according to plans and specifications on file in Mr. Kilgore's office.

We received a very pleasant call this week from Mr. C. E. Veeder of the International Stock Food Company, whose headquarters for a few months past have been in Pasadena. Mr. Veeder came to California partly to recuperate his health, which had become somewhat impaired by a too strict attention to business for many years. We are pleased to know that the glorious climate of this State has fully restored him to health, however, and that he is now traveling about over the coast looking after the interests of the company that makes the food that Dan Patch, Cresceus, Directum and Arion eat. He left last Monday night for a week's trip to Oregon and Washington, and will stop in San Francisco for a few days on his return. Mr. Veeder is now the coast agent for the International Stock Food Company.

The Tucson Driving Association will give a program of races on Washington's birthday which is expected to furnish some fine sport. Arizona is getting to be quite a horse breeding section and many good ones are owned there.

Martin Carter, proprietor of the Nutwood Stock Farm, the home of Nutwood Wilkes 2:16½, has just sold to Mr. Geo. T. Algeo, of Oakland, the trotting stallion T. C., three-year-old record 2:30, and trial of 2:20½, which is no measure of the horse's speed. T. C. is one of the best bred stallions in California, and Mr. Algeo will place him in the stud at Oakland. T. C. is by Nutwood Wilkes 2:16½, his dam is Zeta Carter by Director, and his second dam Lida W. 2:18¼, the dam of Nutwood Wilkes, etc., by Nutwood. As John A. McKerron 2:04½, champion trotting stallion of the Wilkes tribe, is by Nutwood Wilkes out of a Director mare, it will be seen that T. C. is bred in the same lines as that great performer. This horse should receive a liberal patronage from the breeders of Alameda county, and while he has been bred heretofore to but very few mares, his get are

uniformly good lookers and will be speedy. A three-year-old filly by him which Mr. Carter has placed in Fred Chadbourne's charge at Pleasanton is a very promising young mare that has all the earmarks of a high class trotter.

Recent additions to Budd Doble's stable are Ed. McGary, three-year-old trotting colt by Zombro 2:11, dam Diavolo by Diablo 2:09¼, second dam Lilly Langtry, dam of Ed. B. Young 2:11¼, Dudley 2:14, and several others in 2:30. This is a handsome, good gaired colt and very promising. Lilly Dillon, four-year-old trotting filly by Sidney Dillon, dam the noted old trotting mare Lilly Stanley 2:17½, by Whippleton, sire of the dams of Robeby 2:13¼, Clay S. 2:13¼, and many others. This filly was trained last year as a three-year-old by the unfortunate Willard Zibble, until he met with that sad accident at Fresno. She has got some of the famous "Dillon speed" and gives promise of adding another to the list of fast trotters by the sire of the trotting queen. Another is also by Sidney Dillon, dam Palo Belle 2:24½, by the old war horse Palo Alto 2:08¼, second dam Belle Isle by Piedmont 2:17¼, third dam Ida Belle, dam of Carlisle 2:22¼, by Hambletonian 10, fourth dam Godfrey Star by American Star 14. This is a two-year-old filly and while never trained, is a trotting youngster that gives every indication of being as good as her royal breeding. Her dam is one of the best mares in breeding and other qualities ever bred to Sidney Dillon in California.

Among the good mares that are being booked to Kinney Lou is Electress Wilkes 2:28¼, dam of that fast and good trotting filly, Lady Mowry 2:12½, by Nutwood Wilkes 2:16½, dam Electress by Richard Elector. She is now in foal to the great son of McKinney and her owner, J. C. Mowry, of Newark, Cal., believes if one Kinney Lou is good to have, it is better still to have two.

Hanford Medium 2:11¼, one of the fast pacers of the California circuit of years ago, is to be raffled for \$1 a throw at Santa Maria soon, where he is now owned by G. L. Blosser.

Bakersfield horsemen will race their horses on Washington's Birthday. Five or six harness events and three or four running races will be carded and some good contests are certain. The track will have a lot of extra work done on it to make it as fast as possible and good time may be expected.

Mr. Henry Struve of Watsonville writes that his mare, Hegar Wilkes, nominated in the Pacific Breeders' Futurity, foaled a nice bay filly on the 23d inst., and he expects her to be in the front ranks when she starts. Mr. Struve recently visited Mr. A. B. Spreckels' Aptos Ranch and states that he saw there as nice a lot of young horses as he ever saw in his life, and says there are several fine prospects among them. All have size and good looks and he says "Sandy" has taught them good manners. They will attract much attention when they are put up for sale in this city next month.

NN

Kenney, the sulky and speed cart man, whose establishment at 531 Valencia street is the place to get the latest speed vehicles, has sold to O. Taylor, the owner of Billy Ellsworth, a white Kenney training cart that is the admiration of everybody that has seen it. Kenney has just received some rose colored McMurray carts that are beauties, and he also has a few unpainted carts and bikes of the McMurray make. Buyers thus have a chance to inspect the wood and workmanship and order them painted in any color to suit. Go out to Kenney's and see them.

Admiral Togo, the four-year-old by Iran Alto 2:12¼, out of Aria 2:16¼ by Bernal, that Joe Cuicello gave a record of 2:29¼ as a two-year-old in 1904, is stepping like a 2:10 trotter at Pleasanton. Cuicello, worked "the Jap horse" a mile in 2:18 this week.

Philip C. Byrne, who had announced that he would stand the stallion Expressive Mac at Sacramento this year, has been induced to take the horse to Hanford, Kings county, instead, where he has been assured the patronage of a large number of breeders.

Mr. T. W. Barstow, owner of that high class producing stallion Nearest 2:22¼, own brother to John A. McKerron 2:04½, writes us that he will not move to Colorado this season, but will stand his horse and train at the San Jose track as usual. More definite announcement later.

Ambush 2:14½ will make the season of 1906 at Association Park, San Bernardino instead of at the farm of his owner, G. W. Bonnell at Redlands.

Secretary W. H. Gocher has officially promulgated the call for the biennial congress of the members of the National Trotting Association, to be held at the Murray Hill Hotel, New York City, on Wednesday, February 14. This will be the twenty-third congress of the Association, and in accordance with a resolution by a former congress the committee on credentials will meet at 9 o'clock a. m. of the above date, to receive the credentials of delegates. Any proposed changes in the rules should be sent to the secretary, to be submitted to the rules committees. Two of the members selected for that committee are W. J. Carer, of Richmond, Va., and Chas. Marvin, of Lexington, Ky. The other position on the committee has been tendered to Col. Robert Hough, the veteran starting judge and track manager of Baltimore, who has accepted. The rules committee will meet two days prior to the congress, to go over the rules and receive any suggestions as to their improvement that experience has demonstrated would be advisable.

At the meeting of the Kentucky Association of Trotting Horse Breeders held in Lexington, Jan. 16, R. C. Estill was re-elected president, James E. Clay vice-president, and Horace W. Wilson, Lexington, Ky., secretary. The treasury was shown to be in a plethoric condition.

The good old trotting mare Flora M. 2:16 by Richards Elector, who gave the talent such a tremendous dump at Sacramento a dozen years ago when the Palo Alto horse Truman 2:12 was an overwhelming favorite, was shipped to San Jose this week to be bred to Mr. Doble's great trotting stallion. She is owned by Mr. W. J. Dingee.

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich., July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle Sept. 3 to 8
Salem Sept. 10 to 15
North Yakima Sept. 17 to 22
Spokane Sept. 24 to 29
Walla Walla Oct. 1 to 6
Lewiston Oct. 8 to 13
Everett was given the privilege to select such dates as they may decide on.

Jackson's Napa Soda does not tangle the feet.

ROD, GUN AND KENNEL.

Conducted by J. K. De WITT.

THE REVOLVER—HINTS FOR THE NOVICE.

Technical literature on the revolver is available to a certain degree, but it is to be regretted that there is practically nothing extant treating on this important topic in the style and manner suited to the needs of a beginner. The comparatively few publications on the subject cater to the experienced marksman and, in consequence, presuppose an intimacy with the art of using what has been called "the heraldic American weapon," the protector of the citizen and the equalizer of men; which places the giant within the punishing power of the dwarf.

The point of what may be accomplished with the revolver is rather uncomplimentary to a very reliable and effective firearm. Many assume that the revolver is useless, particularly on a human target, at a distance of ten paces or more. Generally speaking it is true. There is, however, a good reason for this, for the erroneous impression is the growth of opinion prompted by instances in which the principals are both inexperienced and excited when indulging in gun fire—at bipeds or quadrupeds, as the cases may have been. This belief, however, does great injustice to the sovereign merits of the six shooter. A well known revolver expert writing on this subject among other statements, says: "But let it be understood briefly in the revolver's defense, that if some one would place dollar pieces at 50 yards, and allow a club of experts to keep what they hit, that some one would lose a lot of money before the day was over. And if there is a man in America who cannot hit the ace of spades at ten long strides it is his own fault."

The revolver is a type of pistol, differing primarily in having a revolving cylinder, hence the name. A pistol is a sort of rifle, classified as such. So there is the relation between both weapons, the gist of which is a rifled firearm. Rifling consists of alternate grooves and lands throughout the barrel. A revolver, therefore, is practically a short rifle having a revolving cylinder or magazine in which are placed the cartridges or ammunition.

In the selection of a revolver it is equally essential to know what to avoid and what to value. Selection very often depends upon intelligence, rejection and elimination. And, primarily, in choosing a weapon, look for defects even in a brand new gun. At the outset never buy a weapon of cheap manufacture. There are many revolvers catchily advertised as "don't pay for reputation," "an honest weapon at an honest price," whose chief virtues exist only in ink. Shun these as evil, for danger lurks in every inch of them. If you would enjoy your sport, enjoy it safely. A first-class revolver is the only kind you are justified in using. No weapon can be too good; a high-grade weapon is never cheap. Then, again, allowing a cheap revolver to be safe, they are certainly inaccurate. Where lies the use of having an inaccurate weapon when accuracy is the thing striven for? It has been said that experts use high-priced weapons because they are fancy. Nonsense. Safety and accuracy are what they pursue. If, perchance, you cannot feel justified in affording a high-grade gun new, by all means select a second-hand weapon of merit. Because of its utmost importance, reject all cheap revolvers. There are but two high-grade brands of revolvers made in America; these are well established and need not be named here.

Use a hammer gun only; hammerless, automatic pistols and double-action revolvers are delusions and snares. The hammerless is a covered double-action, and double-actions are accurate impossibilities. The hammer must be raised to full cock, leaving nothing to do but aim and pull the trigger. In a double-action the trigger lifts the hammer while sighting, the revolver trembles and twitches and this absolutely precludes an aim. Many good revolvers are made with double-action devices; but these are used entirely as single actions; many shooters remove the double-action part. An automatic is fairly reliable, but is cumbersome and unwieldy. The first shot is slow to fire. Afterward it becomes a matter of unnecessary danger and is far from satisfactory. Automatics are now in the most embryo of development, and the future may produce a perfected weapon which will undoubtedly be a very interesting production.

Do not use a barrel less than four inches long, exclusive of cylinder. Otherwise the sights will be too close together to insure an aim and the barrel too short to properly shape the bullet. Further, a short-barrelled "gun" does not balance nicely, which balance should be as near the trigger as possible.

Picking up the revolver, for the first time at the gun dealers, or anywhere else for that matter, open it and be absolutely sure it is not loaded. If you do not know how to open it, get the salesman to show you, or have him do it himself. He will, for one thing, think a great deal better of you, than if you took a chance of putting the pistol out of commission, for nothing so annoys a dealer as inexperienced handling and possible damaging of his wares. In this, firearms dealers are somewhat peculiar; further, an old shooter is never backward about asking questions; the dealer or clerk knows this. The opposite prevails with the novice; this is also understood. So it is better to pose as an old shooter and be respected, instead of being regarded with apprehension.

Having the weapon open in your hand, carefully inspect all the exposed parts for rust and corrosion. Don't take the salesman's word for it—not that he is

at all mendacious, but to be your own judge. Then, carrying the weapon to the sunlight, hold a piece of white paper or card at the lower end of the barrel at an angle reflecting the light up through it, so that by looking through the other end you can see the entire inside of the barrel with great distinctness. Don't look through the barrel directly at the light, for the intense glare will preclude a careful inspection, but use the piece of paper as suggested. Notice carefully the "grooves" and the "lands" between them, which pursue the barrel spirally. This constitutes the "rifling." See that the edges and corners are cut squarely and sharp, for it is the rifling which prepares the bullet for its rotating flight to the target. In an old gun the rifling is worn; sometimes it is eaten away by corrosion, and the result is termed "pitting." A pitted barrel scrapes the bullet and fills the "pits" with lead, and the barrel then becomes what is called "lead." A bullet from a leaden barrel flies off from its course in any indescribable direction. These erratic flights are termed "fliers" or "unaccountables." These will, at times, miss a target clean. Occasionally, and very often from an inferior gun, the bullet will turn sideways in its flight, producing "keyholes"—a descriptive name of the puncture in the target. These defects militate irredeemably against accuracy. So in selecting the weapon beware of "pits."

It is next in the order of choosing a weapon to look to the "chamber alignment." The chamber is the place in the cylinder which holds the cartridge. Each chamber in the cylinder should lock directly behind the lower end of the barrel. To examine this close the breech, cock the hammer, and, pointing the gun to the light, look through the firing-pin orifice. Through this you can readily see whether the chamber is in collimation with the barrel when the cylinder is locked and to all intents and purposes the weapon is ready for firing. Should you detect a crescent of metal at either side, or at the top or bottom, just where the chamber butts up to the barrel, he alignment is undesirable. An improper chamber alignment, like pittings, will strip the bullet, lead the barrel and develop the same results. The stripping of the bullet spoils its roundness, and in so doing allows an uneven escape of gas when the bullet emerges from the barrel. This uneven escape of gas throws the bullet out of plumb, and consequently out of its course. One may suggest that the bullet is at the muzzle scarcely long enough for this. The bullet may be quick, but the gas is quicker, the bullet depending upon the gas for its speed; and the result is with us just the same.

These defects already described may presuppose a new gun as well as an old one. If the purchaser is selecting a second-hand weapon numerous other defects are to be guarded against. At the upper end of the cartridge chamber is a thickening or "collar," and a careless shooter will allow the crease in front of it to become filled and corroded, thereby weakening the cylinder; and a weak cylinder is always a source of danger. In the second-hand weapon "bulgings" are to be looked for. Then, again, an unscrupulous or ignorant dealer will remove the pits from a barrel, and to an unsophisticated purchaser this barrel will appear fine and smooth. A very careful inspection is necessary to avoid being hoodwinked by this ruse. So if you come upon an old gun, scarred and rusted, but with an apparently smooth and shining barrel, the chances are this barrel has been tampered with; that this barrel has been "cleaned," say with flour of emery. Reject this gun forthwith. Better buy an honest gun with a pitted barrel, relying upon getting a new barrel from the factory. But in this event make sure the old gun will not cost more in the end than if you bought a new gun outright.

Another defect, but one which can be readily remedied, is a poor trigger pull. A slow, rasping trigger which grates along is very disconcerting to the aim. An otherwise good aim is often spoiled by this alone. This defect is termed a "creep," and a good trigger pull goes crisp and sharp. The trigger should hold fast till just the right pressure is brought and then be up and away quick and with a snap. As any first-class gunsmith can readily correct a bad trigger, this defect is scarcely sufficient to warrant a rejection of the weapon.

Your gunsmith can also regulate the weight of the trigger pull. Three pounds makes a nice, reliable trigger which does not operate prematurely. "Hair-triggers" are abominations. Somewhat "finer" shooting may be done at times with a hair-trigger, but for general purposes they are unsatisfactory and dangerous. Official shooting is done with a 2½-pound pull, which is weighted by placing a dead weight on the trigger three-eighths of an inch from its end.

The chief difficulty met in aiming and firing the revolver lies in the proper execution of the trigger pull. The novice grasps the handle and undertakes to "pull" the trigger by merely increasing the crookedness of his finger. A miss, and he blames the weapon; hence, the universal condemnation that the arm is impractical; or, he says he cannot hold it steady. Practice, of course, develops the muscles of the arm and perfects steady holding, which is a factor in favor of a good shot. But the best "hold" is entirely useless when the weapon is "pulled" way out of alignment with the target. A shot from a good weapon goes straight to where it is pointed, and it is the shooter, not the weapon, who misses.

Standing nearly erect, but with the shoulders tilted slightly back, the feet separated comfortably about

fourteen inches, without straddling, with the arm extended free from the body, the shooter is in the correct position for revolver practice. This puts the body at an even balance, and no unsteady muscular effort is necessary, which would disconcert the aim. Stand freely and comfortably with the body at ease.

Load the weapon with but one cartridge at a time, and, upon firing, leave the empty shell in the chamber, loading the next and firing until the cylinder is filled with empty shells. This distributes the work evenly among the chambers, and there is no perceptible change in the weight of the gun, as would be the case if the chambers were all loaded at first and then fired till empty. This system minimizes danger. No one is lounging about with a loaded weapon; then, again, ammunition in the other chambers is not spoiled by loosened bullets or primers. There being no occasion for rapid shooting, this system may be readily followed, and the shooter gains thereby a beneficial rest between shots.

This system would not be practical in actual service; but in this instance he bullets are fixed firmly by heavy "crimping," the shell being tightly closed around the bullet. For hunting or personal protection the service ammunition should be used. As crimping is slightly injurious to the bullet, target shooters fire from uncrimped shells, loading one at a time. But at the target, even with crimped shells, it is safer to follow the target system. Most clubs make a rule of this which is enforced very strictly.

The manner or trick of "pulling" the trigger is the mysterious key to successful revolver shooting. Aiming and firing being done with but one hand, the best aim possible is invariably frustrated by an improper pull. It is not so much to hold steady as it is to pull steady. A revolver may be grasped and pointed well, but the convulsive jerk of a pulling finger undoes everything. The trigger should be "squeezed." The stock, the trigger, and the space between, must be regarded as one entire solid object which is to be squeezed or pressed evenly, gradually and steadily from all sides at once. This pressure being exerted from each direction contemporaneously, keeps the weapon pointed steadily according to the aim and does not detract from it. This gradual, even "squeeze," coming from all sides at once, ultimately releases the hammer without deflecting the aim. The weapon at the time of discharge thus retains its aim and the bullet flies to its intended mark. This is the great and only secret of success with the revolver. Having acquired the necessary dexterity in squeezing, the shooter is the master of any weapon and can always rely upon himself in any emergency.

As a question might be interjected here of "how about the 'kick'?" a word or two. This so-called "kick" is a mere bugbear and nothing more. It suffices to say the bullet is a long ways from the gun before the "kick" scarcely begins. So, standing in the position described, grasp the weapon as indicated, firmly but without tension or strain, confine your attention to the aligning of the sights upon the target and of properly executing the squeeze. Keep your mind off the anticipated discharge of the cartridge. That will take care of itself, and the anticipation of the report can serve only to unnerve the shooter. If, upon making an attempt to shoot, you find your "holding" is poor, or that your aim is tiring, lay the weapon down and take a short rest. Concentrate your mind upon conscientiously executing each shot and never fire at random. One properly fired shot is of value, while all the random shots you could blaze away would be of no benefit. Then pick up your weapon and try again, grasping it correctly, aligning the sights and starting the gradual, even squeeze. Do this and your bullet will land there or thereabouts, and the result will be worth while.

At first this "squeeze" may appear to be a slow and unsatisfactory way of shooting; that the other man could have emptied his gun at you while you were firing once. But here, this "squeeze" is perfected with practice, and in a short time develops into certain and rapid matter. And then, again, what damage has an incompetently emptied revolver done? The hit is the thing, though it were slow in starting.

Now provide yourself with sufficient ammunition of reputable manufacture, betake yourself to some convenient range, and, with but one shell in the gun, which must at all times be kept pointed toward the target, practice—and practice continuously.

Cleaning Guns.

Running oiled cloths through a gun or rifle barrel will not always soften and remove the fouling, though to the eye the interior may appear perfectly clean and bright. Wood alcohol is a better dissolvent of the residue, but a rifleman who has made the subject a study claims that ammonia is the best of all. The final operation in all cases is to wipe the interior thoroughly dry and then apply a good coating of oil.

The Late F. S. Stedman.

Frederick S. Stedman, secretary of the Duquesne Kennel Club and of the American Pomeranian Club, a prominent and esteemed Pittsburg fancier, passed away in Pittsburg on January 22.

Walter Parrish of Stockton recently lost by death his good Cocker "Paddy," for that was the kennel name of Mr. Longers, a winner at several shows.

The Second Annual Produce Stakes of the Bull Terrier Breeders' Association will be held at the Hotel Irlington, New York, on February 12, 1906, at 10:30 p. m. Mr. Bellin, who will also pass upon this breed at the New York Show, will be the judge. A number of very promising puppies are entered and the competition promises to be very interesting.

On a hot day drink Jackson's Napa Soda lemonades and be refreshed.

COLORS IN GREAT DANES.

The Great Dane Club has adopted the standard of the German Doggen-Klub for colors, and I think it will interest the Dane fanciers to know what these colors are. According to the description of dogs de luxe, edited by the "Kennel Association of Breeders of Dogs de Luxe and Fox Terriers" in Germany, which contains the standard of the "Deutsche Dogge," standard mentioned also by the Stud Book, vol. 2, published by the Deutscher Doggen-Club, in conjunction with the Nationaler Doggen-Club, there are three divisions of colors—(a) brindle Danes, (b) unicolor Danes, and (c) harlequins.

(a) Brindle Danes—The ground color from the lightest yellow to the darkest fawn, always with oblique (transversal) black stripes. (b) Unicolor Danes—Yellow or grey (blue) in the most various shades, either of one color or with darker shades on the muzzle and round the eyes and streak on the back. The nose in brindles and unicolor Danes must always be black, the eyes and nails dark, white markings allowed only on the chest, between the front legs, and exceptionally on the paws (toes). In blue Danes lighter eyes are permissible, but in no case "glassy" eyes. (c) Harlequin Danes—The ground color white, with irregularly broken, but possibly symmetrically distributed all over the body black patches (a few gray spots are allowed). In Harlequin Danes "glassy" eyes, flesh-colored and spotted nose, as well as light-colored nails, are not faulty.

It will probably interest the Dane fanciers in this country to know that the Dalmatians are called "Petits Danois" (little Danes) in Belgium and France, probably on account of their markings.

Now that the date is fast approaching when the new rule as to colors of the Great Dane Club will be in force, it will be very interesting to mention what our German "cousins," the pioneers of the "Deutsche Dogge" in the world, do in order to obtain the clean colors. The Germans say that they like all colors when the latter are clean. The same applies to Austria, Holland and Belgium, but it is otherwise in France. Not that the French have not an "entente cordiale" in clean colors with the other countries, but they, for instance, do not like at all the brindle-and-fawn Danes. On the contrary, the French, especially the Parisians, are fond of blue Danes and black-and-white Harlequins. Every Dane breeder in Germany knows how to mate the colors in order to obtain clean ones. Badly colored Danes are very seldom seen in their country, and their owners have simply no courage to exhibit these dogs. Before going any further into the subject, I wish it to be understood that I do not presume teaching the old, experienced breeder, who knows his "business" well, but I do want to help the inexperienced one—the novice. I think that now is just the time for taking the question of colors in Danes into serious consideration, as the result of the end of this month's mating will just fall at the beginning of January, 1906, when the new rule of the Great Dane Club comes into force. In Germany they mate, in the first instance, brindles with brindles, because they (the Germans) possess a sufficient "material" of dark brindles and light brindles. In the second instance they mate brindles with fawns. Then they mate in the first instance fawns with fawns, and in the second instance fawns with brindles. It is risky to match a blue bitch to a blue dog with Harlequin blood in him; in this case it is preferable to mate her to a black dog. Black-and-white Harlequins must always be mated with black-and-white Harlequins. If the bitch has much white she must be put to a dog with much black, and vice versa; or a Harlequin bitch with much white can be put to a pure bred black dog—i. e., a black dog bred from Harlequins.

By mating fawns with blues one may get biscuit fawns; by mating blues with brindles one may obtain inferior brindles. These latter are most dangerous for breeding, as it does not take a few generations, but many, many generations to get rid of the wrong blood, which an experienced eye can see at a glance on the progeny.—English Stock Keeper.

DOINGS IN DOGDOM.

Portland Kennel Club.

A communication from a Portland subscriber, dated January 23d, among other things states:

"The following officers were elected by the Portland Kennel Club at the annual meeting last night: President, J. Wesley Ladd; vice-president, Dr. Ernest F. Tucker; treasurer, Henry Ladd Corbett; members of the board of directors, W. B. Fecheimer, Frank E. Watkins, Dr. J. C. %an and Henry Berger, Jr. The meeting was not very largely attended, for there were just enough members present to form a quorum, but these were the most enthusiastic among the dog fanciers in this city.

"The meeting was called to order with Vice-President F. A. Fleming in the chair, and aside from the election the principal item transacted was the changing of the date of the annual meeting from the last week in December to the last Wednesday in the month following the holding of the annual bench show. This move was made in order to secure a better attendance among the members of the club, many of whom find it inconvenient to be present at this time of the year.

"It was also decided upon motion of J. A. Taylor that the club should be incorporated as soon as the new officials take office and a secretary is chosen by them. This office was left open in order to enable the new board of directors to make a selection for the office, as F. F. Wamsley, the retiring secretary, declined the place on account of business and no one present desired to assume the responsibility.

"According to the members of the club the coming

bench show will eclipse anything of the kind ever held by the club in the past. The affairs of the club are in a flourishing condition, the report of the secretary showing a balance of \$605.54 in the treasury. The treasurer's report was not presented at the meeting for the reason that Mr. Goldman is out of the city on business and promised to turn over his accounts as soon as he returned.

"Frank E. Watkins was made custodian of the secretary's books until a man for the office shall be chosen."

Requisites of a Good Field Dog.

The first requisite to a good field dog is his ability to find and point game, and upon his method of finding, and the snap and vim with which he goes at it, will depend the place he will occupy when the judges get through with him; he may run fast enough and cover a large amount of ground, as far as distance is concerned, but this question always comes into consideration in placing the winners in a field trial; and the contestants being found good bird dogs, as far as pointing and nose goes, then arises the question: Which has the most style, which has the best face, the snappiest way of going, the most style in pointing birds, and the best range and hunting ability. There are a great many fast, wide-ranging dogs that never win a place at a field trial, and their owners wonder why, but it is the combination of all of these good and desirable qualities that the winner may possess in order to make him valuable to the kennel world. Some breeders think a field trial nothing more than a race and exhibition of speed, but the "all-heels" quality is not their predominating one; yet this fact remains and forces itself to the front in every contest, that out of several competitors for honors at any trial, the dog which has the widest range, fastest pace, coupled with style, pointing ability used to advantage, usually wins, and it is this dog that is known as the high-class field-trial dog, and whose services are eagerly sought by the prominent breeders throughout the country. We frequently hear men say: "Oh, my dog is no field-trial dog; he is only a good shooting dog, and the best one I ever saw." True; but what makes him the "best you ever saw?" The simple fact that this same shooting dog may be the son or daughter of one of the high-class field-trial dogs that has had good qualities developed and proven, and who would probably range a quarter of a mile away. Your puppy possibly would not range fifty yards away, but, if he has been properly bred and you have the record of his sire and dam to back him up, it is safe to say he will take after them in many respects, and it devolves upon the trainer to bring out his natural qualities.

Size of Fox Terriers.

The question of size in Fox Terriers is one which will never be settled; it is too much a question of individual liking. A show Fox Terrier, however, is one thing and the "working man" is another. The former is a dog combining style with substance and quality, with soundness of conformation. The "workman" generally shows all the characteristics of his profession—a wide chest, a strong head, and a general lack of race or quality. His performances above or under ground count for nothing in the show ring, in fact, his very prowess with fox or badger implies that his development has not been in accordance with the exacting demand of the show ring.

No one who has a valuable dog cares to risk letting him "go to earth," except in a very half-hearted manner, for the purpose of advertising the gameness of his strain. An eye is too easily lost or an ear disfigured for life to make such diversion profitable. In these days of keen competition the show dog's career is necessarily a very limited one. "Youth will be served," and to win the highest honors a dog must have all youth's freshness, activity and beauty of outline. Hence the modern show Fox Terrier is in a class far removed from the "yorkingstamp." Many years of intelligent breeding have produced in him a beautiful type of animal, the natural outcome of all the thought and study that have been devoted to his development.

He Is Still With Us.

In response to numerous inquiries we will state that the J. E. Lucas whose name appears in the roster of lost passengers of the ill-fated Valencia, is not the well known handler, John E. Lucas of Mount View Kennels. "Munzie" informed us during the trials at Bakersfield that he would stay in that locality until probably the first of April. At last accounts he was still in Kern county with his string of dogs.

Denver Show.

The Colorado Kennel Club have decided to hold their show on March 8, 9 and 10, 1906, at Denver. The early work is progressing nicely, and there are indications that the show will be the greatest that was ever held in the State.

Coast Judges.

We notice in the American Stock-Keeper comment on Coast judges and an extract from an obscure publication criticising the Pasadena show.

The excerpt was purely a case of sour grapes. The Pasadena people did very well for an initial show. The inuendo that comment was made in the hearing of the judge—"Of course we know that this talk didn't interfere with the judges or some decisions wouldn't have gone the way they did." Sour grapes and a reflex of a mind that is facile with all tricks and shady innovations of dogdom.

Probably the writer fancied to have seen in the Pasadena ring a certain individual whose reputation in dogdom is tersely expressed by nine people out of

ten when referring to him. Coast dogdom and Coast judges would be all right and everything lovely could there be eliminated from the fancy certain miasmatic, blackguard influences that have done more to retard advancement than anything else.

This influence has been clever enough to temporarily divert the finger of suspicion and consequent deserved ostracism.

Diarrhoea and Dysentery in Puppies.

There is a great deal of mortality among puppies of all breeds which is due to diarrhoea or dysentery, which is simply an aggravated form of diarrhoea. The causes of this are several, and perhaps in the majority of cases the presence of worms is responsible for it. When that is so, of course the proper course of treatment is to give a vermifuge and get rid of these pests. We need not enter further upon that, for it is a subject which has been very frequently dealt with in this column. There are, however, other causes, and most common of all is the giving of sour or unwholesome food. Soft or semi-liquid foods will very quickly become sour, and care should be taken that no such food is allowed to remain from one feeding time to another.

Only prepare as much as is required for one meal at a time, and if any remains, get rid of it before it sets up fermentation or becomes unwholesome. It must be borne in mind that young puppies when they are weaned are very liable to disturbance of the digestive organs, because hitherto they have been subsisting mainly upon milk, and when you begin to give them solid food of course nature is called upon to perform a different digestive task. Care, therefore, should be taken that puppies are weaned very gradually, for it is useless to expect a puppy to survive a sudden change of food from an entire milk diet on to an entire diet of patent foods. The first result of indigestion in a puppy will be an attack of diarrhoea. Should this come on, pay attention at once to the food, returning to a milk or milk and barley water diet for a day or two, first giving the puppy a good dose of castor oil to clear and soothe the intestines.

Diet All Important.

When a dog is ailing one of the most important considerations is his diet. In ordinary health a sturdy dog can make quite light of swallowing all sorts of indigestible things; he will even be able to digest bones, but if he is ill it is surprising how speedily the digestive functions become deranged, so that in a serious case the dog may not even be able to keep a simple thing like milk down. Everything, of course, depends upon the nature of the ailment from which he is suffering, and the seriousness of it or otherwise; and it may not be desirable to give any solid food at all, particularly if the dog be feverish. By the aid of a clinical thermometer, which has been so frequently advocated in this column, it is always possible to tell at once whether the dog is feverish.

When the clinical thermometer shows a degree of fever, it means that there is inflammation in the system somewhere, and that is a warning which must not be neglected. The meaning of it is, so far as diet is concerned, that the dog must not have any solid food whatever until the symptom abates. In any case, when a dog is not well, it is always safe to give liquid or semi-liquid food. Good sheep's head broth, barley water, and oatmeal gruel, milk, gravy and such like, are the proper foods for a dog which is either seriously ill or is convalescent; and it may be remarked that when a dog is convalescent it is most important that too great a strain should not be put suddenly upon his digestive powers until they have had time to recuperate. A return to solid food, therefore, should only be made gradually.

GOSSIP FOR SPORTSMEN.

Bob Whites and Pheasants Thrive.

Game Warden George Neale of Sacramento county is meeting with success of the most pronounced character in the propagation of two species of game birds imported in an attempt to restock the depleted game supply of this section of the State, says the Union. A few pair of bob white quail, liberated last season by Mr. Neale on the Rancho Del Paso, have multiplied to such an extent that there are now hundreds of birds of that variety in the brush and thickets of the grant.

By arrangement with the management of the ranch the birds will be protected for a period of two years by which time, it is believed, they will be so numerous as to admit of a brief open season. A curious feature of their development is due to the absence of polygamy among the bob white quail. Unmated members of the flock have taken up homes at some distance from their feathered relatives, and some of them are found with chickens and pigeons in barnyards at the edge of town, where their visits are encouraged by people who were at a loss to account for their appearance.

Native or "valley" quail are also doing well on the Huggin grant, and in other localities where land-owners and sportsmen have agreed upon their protection. These birds, at one time so scarce that their extinction was threatened, are expected to furnish splendid sport within a couple of years if not relentlessly pursued with dog and gun prior to that time. On the grant shooting at any species of quail is prohibited, because there are few hunters able to distinguish between bob white and native quail in the brief interval before pulling the trigger.

Game Warden Neale has also received satisfactory reports regarding the English pheasants liberated some time ago. He is satisfied that this variety will thrive and multiply rapidly after this season and is giving considerably attention to their program.

T. S. Palmer, who has charge of the government commission devoted to fish and game interests, is manifesting considerable interest in Mr. Neale's at-

tempt to populate the country with imported birds. He has written to find out what they eat and in what localities they establish homes, with a view to future introduction of birds in favorable localities.

It is because of the interest shown by Sacramento county in the protection of game that the State Commission has favored Mr. Neale with the choice of several imported varieties of game.

To Protect Striped Bass.

Members of the California Anglers' Association are considering two measures designed to protect striped bass, one of which will be presented at the next session of the Legislature. One of these contemplates a close season of two years, while the other would provide for a close season hereafter during February and March of each year.

The marked decrease in the supply of striped bass in the waters of the bay has stirred the members of the association to action. They felt some radical measures must be taken or else this great game and food fish will be completely wiped out here, sharing the fate of the sturgeon.

Jabez Swan, one of the directors of the association, makes the following statement:

"The enormous catches of striped bass made by professional fishermen has reduced the supply to a remarkable extent. Five years ago many bass were caught in the Oakland estuary, San Leandro bay, San Pablo bay, the tributaries of Petaluma creek and in all the small streams up to the mouth of the Sacramento river.

"The waters of the bay have been depleted to such an extent that sportsmen trolling in Raccoon straits get no fish, while in other places not 10 per cent of the fish are taken by anglers which were caught some years ago. From various causes the fish have become scarce and will become extinct in a few years like the sturgeon, of which not one is seen here now.

"Bass go in schools and their presence is indicated by the seagulls and by other signs known to the market fishermen. When a school is located a haul is made running into tons in weight. Most of these fish range from one-half to three pounds in weight, the latter being the smallest supposed to be taken under the law. These under-sized fish may be obtained at almost any restaurant in this city. The little fish markets in the suburbs also have these under-sized fish for sale at all times. Tons may be seen being packed for the country or sold for consumption here almost every day in the year.

"Another, and, if anything, a more deadly enemy than the market fishermen, is the refuse oil which is discharged from ships and refineries about the bay. This drifts onto the marsh grasses and tules and then settles down upon the roe of the bass, destroying millions of the embryo bass. The officials charged with the prevention of this seem powerless to cope with the evil.

"This city supplies today about one-third of the fish consumed in this State. If the supply is to be maintained a decided stand must be taken by the officials in the protection of the food fishes. Set-nets, which are against the law, are reported at the mouths of sloughs all over the bay. Seizure or prosecution by the officials are heard of only occasionally. The people should rise up and protect this most valuable of food fishes in the bays and rivers.

"The California Anglers' Association is setting on foot a scheme whereby something may be done effectually in this direction. While the bass are prolific, they cannot stand everything, and some radical measures must be taken for their preservation. Our association has under consideration two measures, one of which will be presented at the next session of the Legislature. One of these contemplates a close season of two years to give the bass an opportunity to multiply and replenish the waters completely. The other provides for a two-month close season each year instead of one month, as at present.

"There has been a noticeable falling off in the supply since last year, and severe measures must be taken at once or else the fish will be wiped out."

American Bred Dogs.

This vexed question has, for the time being, been settled by the Ladies' Kennel Association of Massachusetts in a most thoroughly sportsmanlike manner, according to the Boston Herald, which says:

There is no topic in dogdom being more universally discussed by breeders, fanciers and exhibitors than the restrictions that have been placed on Canadian dogs at shows held in the United States. Heretofore there has been no distinction between Canadian-bred and American-bred dogs, and while many believe that it is all very well for the American Kennel Club to put up the bars against dogs bred in Great Britain or any other foreign country, the term American as applied to dogs should, it is claimed, include dogs bred in Canada. This action of the American Kennel Club was not favorably received by the Ladies' Kennel Association of Massachusetts, which believes in reciprocity in kennel matters, as well as in commercial life. The Ladies' Kennel Club now announces that in all of the valuable special prizes, which it has given for the annual bench show of the New England Kennel Club to be held in Boston next month, in which American-bred dogs are mentioned, the association stands by the old definition. In other words, the specials donated by the association are open equally to Canadian-bred and American bred dogs.

Illegal Meshed Net Seized.

Deputy Game Warden R. McDonald of Stockton recently seized a 600-foot net, the meshes of which were less than the legal size. Two men, for whom warrants have been issued, were using the net in Disappointment slough.

Many quail limits have recently been shot in the vicinity of Milton, San Joaquin county.

Shooting Hints for Beginners.

It is not altogether surprising, when one comes to think of it, that every youth sooner or later, should evince a desire to become the possessor of a gun. From his earliest days he is, wisely or unwisely, encouraged to take an interest in popguns and toy pistols, and his parents, no doubt, forget that the day will come when the young hopeful of the family is no longer satisfied with these, comparatively harmless weapons, but must needs become the owner of something more like the real article. At such times the fond parents begin to ask themselves whether it is wise to encourage in their child that natural instinct of affection for something that makes a noise, which instinct in time develops into that stronger desire for "killing something." But it is then too late to consider such things. The average boy is a self-willed young person, and, the more you try to keep things out of his reach, the more he will endeavor to obtain them. Nor is there really any reason why his desire to possess dangerous weapons should be checked writes a contributor to the English Shooting Times. Your warlike boy is worth a dozen of his more peacefully inclined brethren, and he who shows the sporting instinct when young is far more likely to turn out a good fellow later on than the youth of the molly-coddle type, who has no venturesome spirit in his composition.

There is, one may assert, without fear of contradiction, no harm whatever in allowing the youngster to follow his own natural inclinations in the matter of catapults, slings, airguns and such like weapons of early youth, nor need one hesitate to encourage him in their use, provided that—and here lies the gist of the whole matter—the beginner is properly schooled in the use of these early emblems of warfare.

Even the toy pistol which shoots a small shot, and, of course, the airgun, are capable of doing a good deal of damage and serious injury if carelessly used, and those who have charge of the youngster with his juvenile weapons of danger cannot be too careful to inculcate into his naturally retentive mind the first principle of safety. Youth, as we all know, is easily impressed, and bad habits, as we all know, learned when young, are not easily forgotten. Nor can a youth of 18 or 20 learn so readily as one half his age the elementary portion of any particular training. Carelessness with firearms is a thing which we often see in the field; but it will be noted that offenders in this respect are more usually to be found among those who have taken up shooting late in life, than in those who begin to learn the game at the beginning of their teens. The older man, and, indeed, sometimes the youth, only too often thinks that, because he knows a good many things, he knows all—that which pertains to the use of firearms included. Perhaps he is a fair shot, or on the road to become one, and he therefore imagines, very erroneously, that his behavior is all that can be desired. But a man may be a good shot, and yet be very careless with his gun. One sees instances of this almost every day, and ninety-nine out of every hundred shooting "accidents" are due to the arrant carelessness of someone. Boys are not the most common offenders in this respect; but, unless they are properly schooled, they are more than likely to cause some terror among their companions in the field. There are many men who, if they but knew it, ought never to be allowed to handle a gun; and their ignorance of their own carelessness costs them dear. How many men are there who find that they do not get asked to shoot so often as they would like or expect? But they generally search for all kinds of reasons for this, rather than attribute it to the real cause—carelessness on their own part. Unfortunately, it is always difficult to tell anyone that he is careless with firearms. A host is the only man who can do it, and even he, especially if he be a younger man than his guest always finds it a disagreeable task. He naturally hesitates to offend a man who may be one of his best friends, and few people care to have their errors pointed out to them even in the most friendly and quiet way. For all that, it is sometimes necessary to call out to a dangerous man to be more careful, even in the presence of the rest of the party, and it is far better to run the risk of mortally offending one member, rather than allow the lives of the rest to be endangered.

The first lesson, therefore, of the beginner is that which concerns safety, and in this respect matters are far more easy for him nowadays than they were in the days of his grandfather. The up-to-date breech-loader is a very different thing to the old-fashioned muzzle-loader, with its "hang-fires," unexploded charges, and other dangerous features, and the tyro of to-day has to observe but a few simple rules to ensure the safety of himself and his fellows. There are any number of ways of carrying a gun, but only three of these at the most can be considered safe, and then only according to circumstances. The safest and best way of all is over the shoulder, holding the stock by the thin part behind the trigger-guard or at the butt, but always with the trigger-guard uppermost and not, as so many people still persist in doing, with the trigger-guard underneath. Under the arm is a good way of carrying a gun if going through covert, or when on a long tramp, and an occasional change from this to the shoulder position and back again will be found to add greatly to one's comfort. When one is walking in line, the gun is best carried across one arm at an angle of not less than 45 degrees, the barrels pointing forward and downwards. Thus carried, the gun is always ready for a shot, and one's companions to the left are always safe. The over-shoulder position, with the small part of the stock grasped in one's right hand, as referred to above, is also a good position when walking in line. It will be found that, while the gun is in the safest position possible, especially in the case of a stumble over a root or other obstacle, it can be brought to the "present" in an instant.

COMING EVENTS.

Rod.

Jan. 1–June 1—Closed season for black bass.
Apr. 1–Sept. 1, Oct. 15–Feb. 1—Open season for taking steelhead in tidewater.
Sept. 10–Oct. 15—Close season in tidewater for steelhead.
Sept. 10–Oct. 15—Close season for catching salmon.
Sept. 15–April 1—Open season for lobsters and crawfish.
Oct. 15–Nov. 15—Close season for taking salmon above tide water.
Nov. 1–April 1—Trout season closed.
Nov. 1–April 1—Closed season for taking steelhead above the water.
Nov. 1–Sept. 1—Open season for crabs.
Nov. 15–Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1–Feb. 15—Dove season open.
Sept. 1–Feb. 15—Open season for mountain quail, grouse and age hen.
Oct. 15–Feb. 15—Open season for quail, ducks, etc.
Oct. 15–April 1—Open season for English snipe.
Oct. 15–Aug. 1—Deer season closed.

Bench Shows.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary. Entries close Jan. 25.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary. Entries close Jan. 30.
Feb. 28–March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary. Entries close Feb. 23.
March 1, 3—Southern Ohio Kennel Club. Hamilton, Ohio. Thos. Boli, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburgh, Pa. F. S. Steadman, Secretary. Entries close Feb. 25.
March 8, 10—Colorado Kennel Club. Denver, Col. T. W. Bartels, Secretary.

TRADE NOTES.

Averages Reported.

Chicago, Ill., Jan. 1.—W. D. Stannard, first, general average, 96 out of 100, shooting "DuPont;" J. S. Boa, second, general average, 91 out of 100, shooting "DuPont;" Dr. Lovell and E. B. Shogren, both of Chicago, and both shooting "DuPont," tied for first amateur and third general average, 90 out of 100; W. Einfeldt, Oak Park, Ill., third amateur, average, 87 out of 100.

Holmesburg, Junction, Pa., Jan. 1.—L. J. Squier, first, general average, 160 out of 189, shooting "DuPont;" C. H. Newcomb, Philadelphia, Pa., first amateur and second general average, 154 out of 180, shooting "Infallible;" F. M. Eames, Philadelphia, Pa., second amateur and third general average, 151 out of 180, shooting "DuPont;" A. L. Annack, Vineland, N. J., third amateur, average, 146 out of 180, shooting "DuPont."

Landsdale, Pa., Jan. 4.—L. J. Squier, first general average, 170 out of 180, shooting "DuPont;" W. H. Heer, second general average, 168 out of 180, shooting "New E. C. (Improved);" J. A. R. Elliott, third general average, 166 out of 180, shooting "New Schultze;" L. L. Swartz, Landsdale, Pa., first amateur, average, 163 out of 180, shooting "New Schultze;" E. M. Ludwick, Honeybrook, Pa., second amateur, average, 145 out of 180, shooting "DuPont;" J. E. Pratt, Philadelphia, third amateur, average, 144 out of 180, shooting "Infallible."

Volo, Ill., Jan. 9.—J. R. Graham, Ingleside, Ill., shooting "New E. C. (Improved)," first amateur and tied for first general average with J. Boa, shooting "DuPont," 166 out of 190; F. C. Riehl, second general average, 165 out of 190, shooting "New E. C. (Improved);" L. R. Barkley, Chicago, Ill., second amateur and third general average, 162 out of 190, shooting "DuPont;" Mr. Ben Sterling, McHenry, Ill., third amateur average, 159 out of 190, shooting "New E. C. (Improved)."

Milton, Pa., Jan. 10.—H. C. Hirschy, first general average, 147 out of 150, shooting "DuPont;" W. H. Heer, second general average, 143 out of 150, shooting "New E. C. (Improved);" L. J. Squier, "third general average, 138 out of 150, shooting "DuPont;" C. H. Newcomb, Philadelphia, Pa., first amateur, average, 131 out of 150, shooting "Infallible;" Fred. God-Pontcharles, Milton, Pa., second amateur average, shooting "DuPont;" A. B. Longshore, Shamokin, Pa., third amateur average, shooting "Infallible."

They Did it With a Parker.

At the Grand Canadian Handicap held at Hamilton, Ont., Jan. 16 to 19, the "Old Reliable" Parker gun was much in evidence.

Thos. Upton, winner of the live bird event, with a score of 34 out of 35, is an exceptional record at live birds, and reflects credit upon the Parker gun. Live bird shooting is the most severe test of a shotgun, and this record is particularly flattering to Parker Bros.

The first, second and third amateur averages at inanimate targets were carried off by Parker guns in the hands of C. E. Doolittle, of Cleveland; Jay D. Green, Avon, N. Y., and H. D. Kirkover, Jr., of Buffalo, respectively, showing that the Parker gun is a winner in the hands of amateurs no matter where used.

A Prominent New Yorker.

J. Noah H. Slee, head of the manufacturing concern that manufactures and markets "3 in One" oil, has just been elected a member of the New York Chamber of Commerce. While Mr. Slee is a very busy man manufacturing "3 in One" oil, he still has time enough to be public spirited and progressive in the interests of the community in which he lives and works, and the whole country as well. The sales of "3 in One" are increasing every day at a faster rate than ever before. That Mr. Slee is in earnest in his desire to place "3 in One" in the hands of every sportsman and gun owner in the country is certainly evidenced by the fact that they offer in all their advertising to send generous samples free of cost to anyone who asks.

FOUR
BIG

GUARANTEED STAKES!

EARLY
CLOSING

Pacific Coast Trotting Horse Breeders Association

MEETING TO BE HELD IN AUGUST.

ENTRIES TO CLOSE MONDAY, APRIL 2, '06

Only Two Per Cent to Enter.

CALIFORNIA STAKES.....	\$2000	For Trotters Eligible to 2:24 Class
PACIFIC SLOPE STAKES.....	2000	For Pacers Eligible to 2:20 Class
SUNSET STAKES.....	1000	For Free-for-All Trotters
GOLDEN GATE STAKES.....	1000	For Pacers Eligible to 2:09 Class

ENTRANCE DUE AS FOLLOWS: 2 per cent April 2, 1906; 1 per cent additional if not declared out by May 1, 1906; 1 per cent additional if not declared out by June 1, 1906, and 1 per cent additional if not declared by July 2, 1906.

Liberal Stakes for other classes will be announced later. Entry Blanks will be issued March 1st.

E. P. HEALD, President.

F. W. KELLEY, Secretary, 36 Geary St., S. F.

CUTTING AND CURING PORK.

After killing and dressing, the hog should hang until thoroughly cooled. Operations are usually begun early in the morning, so as to have ample time to cool before night.

There is a greater demand for bacon in this country than for salt pork, hence the sides of all hogs which are not overfat should be converted into bacon, says New York Farmer. For salt pork and fresh roasts the hog is first split along the back, the cuts of meat being removed from the loin and shoulder portions and the belly strips used for bacon.

When bacon only is desired, the hams and shoulders are first removed after which the spare ribs are cut away. Bacon strips about three inches wide are cut around the body and these are cut in two.

The hams and shoulders are cut short of the leg joint, well rounded and trimmed. Lean trimmings are made into sausage or head cheese.

Choice lard is made from leaf lard and trimmings only, second-grade lard from gut fat, leaf lard and trimmings.

The hams, shoulders and bacon are rubbed with salt and placed on edge in layers in a barrel, which should have a layer of salt sprinkled over the bottom.

For each 100 pounds of meat make a pickle of ten pounds of salt, two pounds of brown sugar, two ounces of saltpeter, one ounce of red pepper and from four to four and one-half gallons of water.

Put these ingredients in an iron or tin vessel, place it over the fire and boil 10 or 15 minutes. Stir while boiling and remove the scum. After the brine has cooled, pour it over the meat and let it remain from five to six weeks, then remove, drain and wipe the pieces, after which they are ready for the smoke, which should last two or three weeks.

The patent liquid smoke produces meat of a very good flavor. If cured in the old-fashioned way, the smoke should be kept up constantly, but the meat should not hang near enough to the fire to become heated.

The smokehouse must be tight, and it is safer to have a ground floor. The fire should be built in an iron pan near the middle of the building. If a red-hot iron is placed in the pan and the corn cobs and chips placed over this, the smudge will start easily. An occasional piece of green wood adds to the smoke.

After smoking, the hams shoulders and bacon pieces can be sewed up in muslin bags, which are whitewashed with lime and hung up in a dark, cool place.

The salt pork is left in brine until used. It is usually salted more than the hams, and should be placed in a separate barrel made from well seasoned oak. A stone is placed over the meat to keep it under the brine.

In the spring the meat is removed and rinsed in clean water, and the barrel scalded. The brine is boiled and the impurities skimmed off.

The pork is then put in the clean barrel and the brine poured over it. If this precaution is not taken, when warm weather approaches, the grease at the top of the brine will putrify and

taint the meat.

MOST COMMON DISEASE.

Indigestion is the most common of all diseases among horses and mules. It is so often not visible, however, that the victim is termed sluggish or lazy without the real trouble being known, and the diseases progresses until the animal becomes worthless. The characteristics of the disease are much the same with all live stock, so the suggestion made here may be applied in a general way to any animal on the farm.

The symptom are variable. The appetite may not be impaired. Sometimes it is capricious and perverted and again it continues good. In either case the victim is likely to lose flesh slowly but steadily.

The bowels are generally irregular, the faces often coated with mucus and there may be great thirst and acid eruptions. Abdominal pain is not infrequent, especially, when the appetite remains unimpaired. The appetite is not only irregular, but in some cases is depressed. There is a disposition to eat unusual substances, such as wood, soiled bedding or other filthy matter.

A healthy horse is the cleanest feeder of all animals, but if affected with indigestion he may eat food that a hog would refuse. A common symptom is the passing of grain through the body whole and entirely undigested. The victim continues to lose flesh, the skin presents a hard, dry appearance and seems tight, or "hide bound."

As to treatment—the cause of the disease should be looked after carefully and the diet promptly arranged. Commence with the food and regulate its quality, quantity and the intervals between feeding.

See that the water supply is fresh and above all that it is given before feeding, for if taken after a meal it washes the contents of the stomach into the bowels before they have been thoroughly prepared for their reception.

Endeavor to locate the trouble—whether it is in the stomach, intestines or annexed organs of digestion, as the liver, pancreas, etc. If the teeth are bad, attend to them. If sharp and irregular, dress them and smooth them with a tooth rasp. If indigestion is due to bolting the food, correct this by feeding in a large manger where the food can be spread out so that the animal must eat slowly.

The bowels should be kept open by feeding soft foods, and when necessary, give such vegetable tonics as pulverized gentian in one or two teaspoonful doses mixed with pulverized quassia and bicarbonate of soda in the same sized doses. When acidity of the stomach is a marked symptom, such antacids as pulverized chalk of sub-nitrate of bismuth may be administered in half to tablespoonful doses.

To have careless milkers decreases the flow of milk. He who milks with thumb and finger is a poor milker. The udder is very tender and needs gentle treatment. It should not be pulled hard nor jerked. Firm, gentle manipulation will obtain the best results.

DAIRY NOTES.

Statistics show that only one and one-half per cent of the cattle in America have had the benefit of a registered sire.

A cow that shows she is a good milker or a good breeder when young, will probably continue to be such throughout her career.

It is sometimes the case that cows that give the most milk are the worst kickers. If they are really good it pays to work with them.

Anyone contemplating the dairy business needs to consider well his location and his market, and get that breed which is best adapted to both.

Salt should not be fed as a ration at stated times, as too much or too little will be given. They should have free access to it whenever they want it.

The calf that is not vigorous is not worth raising, and no time should be spent, nor food wasted, in trying to coax him along. He will be unsatisfactory when he is grown.

First-class cows are money makers at almost any price. The \$20 cow is almost sure to be a rapid money loser. She would be, even if she did not cost anything, but was a present.

The modern process of selecting the best for breeding purposes, is a repetition of the old law of the survival of the fittest being worked by man, instead of letting nature work it out herself.

As soon as a heifer calf is dropped it should be fed and trained with a view to making the very best cow possible from the material that is in its little hide. That is, the object aimed at for her to convert the largest amount of food into milk, richest with butter fat. It should not develop the predisposition to put on fat. Fat is antagonistic to making milk.

A college professor is quoted as saying that a boy can be taught more good sound butter and cheese practice and doctrine in three months, at a good dairy school, than can be learned in ten months at regular work. After a few years of experience as a dairyman, many things will be understood which now seem strange. But then there will be other problems to handle which are unseen at first. It is an endless interesting study.

There is such a thing as a milking habit with cows. These are made by the one who trains them. The future value of the cow depends largely upon how she is treated during her young cowhood. If at the time she is so treated that she will give milk 10 to 12 months or more, she will probably keep it up all her life. Carelessness along this line should be watched to avoid trouble and loss in the future.

The stingy feeder cheats himself as well as his cows; but, on the other hand, the dairy cow that will not repay generous feeding should be displaced at once.

The best results come from helpers who come fresh at from 24 to 28 months old. Some which are small and undeveloped may wait until older. To wait longer is to lose time.

When training calves they should be fed at regular intervals. Not too much at a time. When we observe the course of nature—a little at a time and often

—we are not far from the right method.

Calves that are to become cows should not be fed much corn, as that has a tendency to put on fat. Wheat bran and oats are better, as these have a tendency to produce bone and muscle.

Dairymen who try to be good to their calves often make them too fat by overfeeding. They will not make the best cows. The milking qualities are impaired by developing a predisposition to put on fat, before the time for milking comes.

The term "pure bred" is thought to be deserved by the Island of Jersey, or Guernsey, because no outside breed has been used there for more than 250 years except for beef. All registered cattle in these lines are imported directly from their native islands.

One of the best ways to develop the feeding capacity of the calf is to teach it to eat hay as soon as it will, and increase the amount as rapidly as possible. Well cured hay is a good ration by itself. But the calf should have some oats and bran besides.

POULTRY POINTS.

The only hens that it will pay to keep through the winter are the layers.

Pay little attention to curing sick fowls, but study how to prevent diseases.

Poultry droppings make the best fertilizer for the flower and vegetable garden.

Meal fed to poultry should always be mixed with boiling water, which partially cooks the food.

The shape of the eggs has nothing to do with the life germ, unless the egg is deformed.

Eggs from fat hens do not hatch well and should there be any chicks they will be weak.

The farm is the proper place to raise poultry profitably. Fowls, like sheep, will eat much waste grain and rid the farm of weed seed and will destroy millions of insect enemies.

The feeding of a little charred corn twice a week will help to brighten the combs and gloss the plumage.

While giving egg-making constituents, the farmer must not forget to furnish material for shell-making as well.

The three great factors in the winter production of eggs are cut bone or meat, green food in some shape, clover or roots, and exercise.

Give the hens a variety of food in the winter for they soon begin to show the effects of the sameness of diet if they are fed on grain exclusively.

Grit is quite as necessary for the ducks as it is for the chickens, and the best way to supply them with it is to put it in the drinking water. They like to "go fishing" for it.

FOR SALE—O'Brien & Sons, side bar Pneumatic Buggy, in fine condition. Address, Buggy, Breeder and Sportsman.

FOR SALE—Bay mare, standard and registered, good prospect for race mare and fine on the road. Address C., Breeder and Sportsman.

GREATEST MEAT SURPLUS COUNTRY.

(Bureau of Statistics, U. S. D. A.)

No other country produces so great a surplus of meat as the United States. During the year ending June 30, 1904, the exports of live meat animals and packing house products were valued at \$217,000,000. No other country, except nearby Ireland, sends so many cattle to the English market. The exports of United States cattle to British ports during 1904 amounted to 387,000 head, valued at \$36,000,000, and along with them were exported 223,000 sheep, worth nearly \$2,000,000.

Belgium has become an important destination for United States cattle, and more than 18,000 were exported there during 1904. The cattle shipments to Cuba, which prior to 1898 seldom reached ten head a year, amounted in 1904 to 135,000 head, valued at \$2,000,000.

Beef is exported from the United States chiefly in the form of fresh meat, and this is nearly all sent to British markets. This trade has increased while the exports of other kinds of beef have become less during the 15 years 1890-1904. The United States exported to the United Kingdom 171,000,000 pounds of fresh beef in 1890 and 298,000,000 pounds in 1904. Trade in Bacon, Hams and Pickled Pork.

The exports of bacon have declined since 1890. In that year 450,000,000 pounds were shipped to the United Kingdom, 37,000,000 to Belgium, and 12,000,000 to the Netherlands; while in 1904 the quantity exported to the United Kingdom was only 197,000,000 pounds, to Belgium 12,000,000, and to the Netherlands 2,000,000 pounds.

On the other hand, the exports of hams increased. In 1890 there were exported 65,000,000 pounds to the United Kingdom, and in 1904 the amount was 170,000,000 pounds. With some counties, however, there has been a recent decline. Shipments of hams to Germany increased from 1890 to 1898, after which they declined greatly on account of restrictive legislation.

Similarly, the exports of hams to Belgium, which in 1898 reached 16,000,000 pounds, suffered a decline after that year. Exports of salted and pickled pork to the United Kingdom increased from 1890 to 1898 and declined from 1899 to 1904.

Extensive Market for Lard.

Lard is not only the most valuable of the packing house products exported from the United States and worth even more than the cattle exported, but it reaches more markets in large quantities than do most other products of its class. Exports of this article to the United Kingdom increased from 151,000,000 pounds in 1890 to 199,000,000 in 1904; and the exports to Germany increased from 117,000,000 to 178,000,000 pounds in the same time.

Lard compounds have gained in importance among the exports until the quantity shipped in 1904 to Cuba reached 21,000,000 pounds, United Kingdom 11,000,000, Germany 7,000,000, and Belgium 5,000,000 pounds. Oleomargarine is exported chiefly to Germany and the Netherlands, with smaller quantities to Norway, Cuba,

British West Indies, Sweden and Belgium. The chief markets for oleo, oil are the Netherlands and Germany, the exports to those countries in 1904 being 39,000,000 and 27,000,000 pounds, respectively.

VITALITY OF THE COW.

The "Australasian" is published a long way off, but the following practical suggestions which it puts forth regarding the feeding of the dairy cow are as good for America as Australia:

Does the production of butter exhaust the vitality of the cow and render her less valuable for breeding purposes, is a question which is exciting a good deal of attention in various parts of the world. The assertion has been made that the extraordinary yields of butter which certain dairy cows have produced are so extremely exhausting to the animals, that there is a loss of vigor both in the cow and her progeny. It is very questionable, however, if this assertion can be supported by any well authenticated facts.

It is commonly supposed that animals can be forced to go beyond nature's limit by a system of high feeding; that hens can be forced to lay large quantities of eggs, and cows to produce immense yields of milk. But unless drugs are used to cause abnormal activity of the organs of secretion, animals never exceed their natural capacity. As a matter of fact very few come up to it, owing to the lack of intelligent feeding. So far from the vitality of cows being exhausted by a system of feeding which causes them to produce the largest amount of butter fat in a given period, it is the very animals which have most distinguished themselves in the dairy that have produced the famous butter cows and bulls of succeeding generations. The American cows which have yielded such enormous quantities of butter are also descended from ancestors that have also been famous. A dairy cow is a very complex machine for converting food into milk, and notwithstanding all that may be asserted to the contrary, the weight of evidence goes to show that in order to maintain the milk or butter producing powers for the greatest length of time and to obtain the most profit, the machine should be run at its fullest capacity. No farmer in this State need be afraid of injuring his cows, or impairing their constitutional vitality by feeding with a view to obtain the largest possible returns.

Individual butter yields are of special interest to every owner of a dairy herd, since they show the value of breeding on lines that are undoubtedly hereditary, and also emphasize the necessity of feeding upon proper foods in suitable quantities so that the cows may be as productive and profitable as nature will permit.

TEXAS A. AND M. COLLEGE STUDENTS AT CHICAGO.

At the sixth International Live Stock Exposition, held in Chicago, Dec. 16 to 23d, 1905, unusual interest was centered in competition for the trophies awarded to the Agricultural College whose students proved themselves the best judges of stock.

Thirty-five individuals took part in the contest, five each from the States of Iowa, Ohio, Michigan, Kansas, Missouri, Texas, and five from Ontario, Canada.

When the results were published it was found that the students from Texas had drawn first honors in swine judging, out of 1500 points obtaining a score of 1229, while the Canadians were in second place with 12 points less.

Ontario was first in sheep judging, Ohio in cattle and also in horses, with Ontario second and Texas third.

The highest total score by any one individual from the seven colleges represented was made by Mr. John Ashton of Texas, who obtained 831 out of a possible 1100 points, Bracken, an Ontario student, being second with 12 points less than Ashton. Two of the 1904 stock judging team are now in lucrative positions. Of the 1905 team three members who will graduate in June, will be in demand by some of the other Southern colleges which are giving particular attention to live stock matters.

Size and condition count for more in market than any particular shade or color.

Sponges—S. Adderley, 307 Market St.

KENDALL'S SPAVIN CURE

WORTH \$900.00 TO THIS MAN.

Newark, N. J., 129 8th St., June 24, 1905.

DR. B. J. KENDALL CO.,
Dear Sirs:—Please send me your horse book. I used your Kendall's Spavin Cure on a running colt with great success. He had a very small Jack spavin coming on, but the party I bought him of could not see it. I knew this was a good colt, also if I got him that I could keep him on his paces using Kendall's Spavin Cure. I bought him from that party for \$100.00. He used to be a trifle dicky on that one leg but just as soon as I began to apply the Spavin Cure he started to go sound for me. I started him in a maiden race three weeks after and he just walked home with the purse. I started him five times after that and he won all five races easy. I knew well what was keeping the colt going sound but I never told anyone until I sold him. I sold him back to the same party again for one thousand dollars in a short while after as he kept trying to get him back. I then told him just what he must use on the colt if he wanted to win races with him. This party could hardly believe me, but he now knows the difference and thinks the world of your Spavin Cure. THOMAS A. CASTLES.
Owner and trainer of thoroughbred race horses.

Cures Curb, Spavin, Ringbone, Splint, And All Lameness.

Price \$1.00 for \$5.00. Greatest known liniment for family use. All druggists sell it. Accept no substitute. Our great book, "A Treatise on the Horse," free from druggists or

Dr. B. J. Kendall Co.,
Enosburg Falls, Vermont.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curls, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dick writes as follows: I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curls, splints, spavins, windpuffs and all bunches it has no equal. Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

W. B. Eddy & Co., Whitehall, N. Y.

FIRST PRIZE BUTTER.

Mrs. L. A. Sweet, of Fairmount, Minn., secured first prize on dairy butter at the recent convention of the Minnesota State Dairymen. The following description of the methods of handling milk on the farm and the way in which the butter is made is of interest:

All the cans, milk pails, strainers, separator, and every utensil used in the manufacture of butter is kept thoroughly cleansed by the use of a brush and Wyandotte's cleansing powder. First, having thoroughly rinsed the utensils with warm water, they are washed with luke-warm water, using the brush and cleansing powder, and are finally thoroughly scalded with boiling water—at a temperature of 212 degrees. Then they are placed in the sunlight so that the direct rays can reach the inside of each utensil.

The cows are fed a good quality of ensilage and corn fodder, about 28 to 32 pounds of the former and seven pounds of the latter daily, together with a mixture of five quarts of wheat bran, four parts fine ground corn meal and one part oil cake meal. Each cow is fed two-fifths the number of pounds of this concentrated feed that she gives pounds of milk. The cow stables are aired, the cows are carefully brushed before milking and are kept in a cleanly condition at all times.

The milk is strained through a strainer consisting of a wire gauze and one thickness of muslin. As soon as milked it is taken from the barn to the milk room, which is wholly separated from the barn and run through the separator at once, the cream being placed in a shotgun can. This can is immediately set in ice cold water. As soon as it is thoroughly cooled it is poured into the storage can and tightly covered.

When two days' cream is obtained, twenty-four hours before churning it, five gallons of 35 per cent cream is heated to a temperature of 70 degrees, to which is added two quarts of good commercial starter. (Butter-milk was used with the State Convention butter because the commercial starter made was not as good as had been expected.) The cream and starter are mixed thoroughly and then, allowed to stand for twelve hours at about the same temperature, cooled to about sixty degrees and let stand for twelve hours, churning at about 60 degrees.

Dry-picking is always to be preferred when preparing turkeys for market. When in fine condition, nicely picked, and sent to market without having been packed in ice, a turkey is at its best and commands the highest price.

High Class Team For Sale

BRIGHT BAYS; WEIGH 1100 LBS. EACH; 16 hands high; well bred; Wilkes stock; well broken, gentle, kind disposition; absolutely sound; 6 years old, and a very desirable team in every respect. Can be seen at the Hulda Stables, 1530 Fell St., San Francisco.

WILLIAM HAROLD 2:13 1/4 FOR SALE

THE MEEK ESTATE HAVING BEEN PARTITIONED, and the breeding of horses discontinued, the stallion WILLIAM HAROLD 2:13 1/4 is offered for sale or lease to a responsible party. William Harold is by Sidney 2:18 1/4, and his dam is Cricket 2:10 by Steadway. Cricket is one of the great producing mares of California, being already the dam of five in the list and has three more foals that will be given records. William Harold has had the most limited opportunities in the list, yet is the sire of Janice 2:08 1/4 trotting, Dan Burns 2:15 and Judith 2:25 and several others in the list. He is in excellent condition; and as his get are all large, well made and nicely turned horses he should be a good money earner in the stud if in good hands. Apply to or address H. W. MEEK, San Lorenzo, Cal.

STALLION TO LEASE

To some competent horsemen that can furnish himself and take in charge

EDWARD B. by STAM B.

dam by Dexter Prince, to take the route between Rio Vista and Courtland and vicinity of D. S. Mathews' home ranch on Grand Island. The horse is in good condition and ready for work. If the route isn't satisfactory another can be chosen. For further particulars write to D. S. MATTHEWS, Ryde, Cal.

A GOOD MARE FOR SALE.

PATENTEES-MANUFACTURERS-BROOKLYN, N.Y.

"SAVE-THE-HORSE" SPAVIN CURE

Registered U. S. Patent Office

The fire iron is uncertain; blistering is less effective, and both necessitate laying up the horse from weeks to many months; mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors.

Scores of letters to confirm and convince; send for copy. Absolute and overwhelming evidence and certainties as to the unfailing power of "Save-the-Horse."

"Save-the-Horse" Permanently Cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boli, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for copy and booklet. At Druggists and Dealers or Express Paid.

CRABBET ARABIAN STUD

CRABBET PARK, THREE BRIDGES,

and NEWBUILDINGS, SOUTHWATER.

SUSSEX, ENGLAND.

The largest breeding stud of Arabian horses in the world. The conditions under which these horses are bred at Newbuildings produce a type unrivalled for quality and hardiness. The unique knowledge of the breed gained by the owners in Arabia enables them to guarantee purity of blood of the choicest strains, some of which are now extinct in the East. Stallions and mares constantly supplied to breeders throughout the Colonies and on the Continent. A few mares suitable for polo, hacks and quiet in harness generally for sale. For further particulars address

GUY CABLETON, Manager, Carpenters, Southwater, Sussex, England.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED

NUTWOOD WILKES 2:16½

NUTWOOD WILKES 2:16½ is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who is it? 2:12, ex-champion three-year-old gelding of the world, reduced his record to 2:10½. John A. McKerron 2:04½ (2:12½ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04½ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09, Miss Idaho 2:09½, Who is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes (4) 2:10½, George B. 2:12½, Claudius (4) 2:13½, North Star (3) 2:13½, Bob Ingersoll (4) 2:14½, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone (4) 2:09½ and Cavaliero 2:09½.

His daughters produced Miss Georgie 2:10½, Mona Wilkes (3) 2:11½, Lady Mowry (4) 2:12½, Caroline L. 2:14½, Iloilo 2:15.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

Send for Tabulated Pedigree. For further particulars apply or address

MARTIN CARTER, Nutwood Stock Farm, Irvington, Alameda Co., Cal.

GUNS, AMMUNITION, FISHING TACKLE AND SPORTING GOODS

SAN FRANCISCO, CALIFORNIA.

For GALL BACKS and SHOULDERS, CRUIPER
SORES and SADDLE GALLS there is none
superior.

The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES,
ES, BLOOD POISONED SORES and ABRASIONS
OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery
as well as a dry sore.

Its use will absolutely prevent BLOOD POISON-
ING. In this respect there is no Gall Cure offered
which can justly even claim to be a competitor.
We placed it on the market relying wholly on its
merit for success, and notwithstanding the fact that
comparatively little has been done in the way of
advertising, the sales of 1900 were 100 per cent greater
than the aggregate sales of Gall Cure preceding
that year. This increase was entirely due to its
MERITS, and from it we feel justified in saying that
it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome
skin cracks under the fetlock which injure and often
lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

BUDD DOBLE, San Jose, Cal.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (3 y. o.) 2:21¹/₄, (3 y. o.) 2:12, (a) 2:09¹/₄, Leonora 2:12¹/₄, Polka Dot 2:14¹/₄, etc. Bay Stallion, 15.3¹/₄ hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1899. Bred at Palo Alto Stock Farm.Sire, ELECTIONEER 125, son of Hambletonian 10. First dam, MANO (dam of MENDOCINO) (3) 2:19¹/₄, Electant 2:19¹/₄, Morocco (3 y. o. trial 2:32) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W (3) 2:17¹/₄, Hyperion 2:21¹/₄, Memento 2:25¹/₄, Mithra (p) 2:14¹/₄) by Hambletonian Jr. 1882; third dam, Gilda (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm. Sire, MCKINNEY 8818 (record 2:11¹/₄). First dam, HELENA 2:11¹/₄ (dam of Wildnutting 2:11¹/₄; Dobbelt 2:23, Hyta (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at PALO ALTO STOCK FARM. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

A CUSTOM that has prevailed in the Eastern and Middle States for many years, and has recently become very popular on this coast, is for a number of farmers and horse breeders to associate themselves together in a joint stock company and purchase a stallion to which their own mares will be bred, the horse also standing for public service. Probably a hundred draft and coach stallions have been sold on this coast by Eastern dealers during the past two years, and some of the horses have been good ones and will probably prove profitable investments. This is especially true of the draft breeds, although more than one law suit has already been started on the grounds that the stallions purchased were worthless and misrepresented to buyers. This journal has for years advised the farmers of California to raise better

and more draft stock, and the prevailing high prices for such, and the unlimited demand for draft animals is proof that our advice has been correct. We have written much against the practice of cross breeding indulged in by so many farmers, who have patronized a Shire horse one year, a Percheron the next, and a Belgian the next, and have tried to impress upon them the wisdom of sticking to one breed and trying to breed up all the time. There is a demand in California for heavy horses, and stallions that are good representatives of their breeds should be well patronized this year, but we desire to particularly warn our readers against forming companies to buy stallions unless some of their number are expert horsemen who are up to the tricks which traveling horse sharps are such adepts at practicing. A stallion may be one of the best bred of his race and yet be an utter failure in the stud. There have been many instances of companies paying a long price for a stallion, and failing to get foals from over ten per cent of the mares bred to him, while other instances are known of stallions sold for large figures proving utterly impotent and worthless. The average farmer knows no more of the value of a long pedigree given with an imported horse than he knows of the uniform inscriptions on the Babylonian marbles, and the sires and dams so flaunted as the ancestors of the stallion offered them may have been conspicuous failures in the stud. In the sale of draft stallions fat also covers a multitude of sins, and the ton horse may fail to sire any foals at all or sire none that are heavy enough to rank as drafters.

The breed of stallions that we would especially advise our readers to be wary of, however, are those of the coach breeds. These breeds, like the sport of roller skating, have a vogue every ten or twelve years, and after a sort of craze for them for a year or two gradually drop out of sight and are heard of no more. Where are the descendants of the coach stallions that were so numerous in California twelve or fifteen years ago. They equalled in looks, style and breeding the majority of those now being offered to buyers at big prices, but we can search the country over for their produce that have sold or are selling at good profitable figures. The expert horse dealer can take an average looking coach stallion of 1200 pounds or over, dock his tail, pull his mane, put a heavy pair of shoes on him to make him step high, and get ten times the money for him from a company of farmers than the horse cost him in France or Germany, and yet the prices of good horses of the coach breeds are higher in Europe than they are here when purchased by experts. At every big sale of horses in New York, and Chicago, European buyers are present in large numbers looking for coach pairs and single horses of the type they want. These horses are generally sired by standard bred stallions, and the Europeans are willing to pay good prices for them here, knowing them to be worth much more on the other side of the Atlantic. It is really astonishing to think that farmers and horse breeders will form companies and pay from \$2,500 to \$5,000 for a so-called imported coach stallion and then put him at service at from \$20 to \$25 for the season, while a good sized standard bred trotter could be bought for the same money, would secure twice the patronage at the same fee, but would command much more. Nearly the entire list of winners at the big horse shows in New York, Chicago and elsewhere were sired by trotting SEVEN—Breeder 2-7 M bred stallions, and nearly all the remainder by Hackneys, while the French and German coach horses are very seldom represented. We suppose, however, that the craze for the coach breeds, which has been worked up by the dealers, will have its run, and within the next two or three years many of them will be scattered throughout California and Oregon at prices at least four times higher than can be obtained for them on the other side of the Rocky Mountains, while those who pay their hard-earned money for them will be sadder if not wiser men when the returns are all in.

HOOF BEATS.

Mr. Richard Swasey, of Eureka, Humboldt county, brought a pair of handsome carriage horses to this city week before last, and advertised them for sale in the columns of this journal. They were sold this week for \$1100 through the advertisement. These horses were bright bays, well bred, and well mannered. They were six years old and absolutely sound. Such horses do not wait long for buyers.

"Jack" Phippen has in training at San Jose a two-year-old colt by Searchlight 2:03¾, dam Mae Gill by Sidney, that is a trotter. He is a grand looking colt, very much resembling his great sire, and as his dam

is a pacer it was expected he would choose the latter gait, but he cannot pace a step and is developing into a swell gaited trotter that promises to be a fast one. He is owned by the well known real estate dealer, E. W. Clayton of San Jose. Mr. Phippen has received two more Searchlight colts this week from Clement Arques of San Martin. These are also two-year-olds and well bred ones. The dam of one is Dixie by Chas. Derby 2:20, second dam Ramona, dam of W. Wood 2:07 by Anteeo 2:16¾, and the dam of the other is Spry Ruth by Boodle 2:12¾, next dam Nina B. by Electioneer. Our San Jose correspondent writes that Capt. Williams of Palo Alto will also soon send his Searchlight colt to Mr. Phippen, and there will be four colts by the greatest race horse that ever stood in California, in the hands of the greatest colt trainer in California.

The mare Palo Belle 2:24¾ by Palo Alto 2:03¾, first dam Belle Isle by Piedmont 2:17¾, second dam by Hambletonian 10, and third dam by American Star 14, has been sent to San Jose to be bred to Kinney Lou 2:07¾. She is owned by Lieut. William Price of San Francisco.

Fred Cornell and the veteran trainer Dan Mizner from Pleasanton were in town this week and purchased one of those long shaft low seated McMurray carts that W. J. Kenney, 531 Valencia street, is agent for. They say it is the best cart on earth.

The many friends of Dr. C. E. Farnum, the well known physician of this city, will regret to learn that in alighting from a street car some days ago he suffered a compound fracture of the bones of one of his legs, and also broke several ribs. He is at present confined to his bed and will be laid up for some time.

Dr. Wm. B. Clowe of Walla Walla, who has been spending a few weeks in Los Angeles, was in San Francisco this week on his way home, and took a run up to Pleasanton Friday to see the horses. Dr. Clowe says there are about 200 horses at work at Los Angeles, among them some very promising ones from Washington and Oregon. He reports William Hogaboom as doing well at Walla Walla with his two stallions, Caution by Electioneer, and Teddy by Diablo. The get of the former he says are all well turned handsome horses that make fine roadsters and have racing speed, as the records of the past few years show. The colts by Teddy he speaks very highly of and believes they will be heard from often when raced. The stallion Del Norte 2:08 is a very popular stallion with Washington breeders, and from the way the youngsters by him are stepping he will soon have several additions to his 2:10 list which now comprises those two fast ones, Helen Norte 2:09¾, and Oregon Maid 2:08. The North Pacific Circuit promises to give the best racing that has been seen in the Northwest for years.

TWO SONS OF DIRECT 2:05½.

On the front page of this issue of the Breeder and Sportsman is a picture of one of the handsomest pairs of horses in this city. They are owned and driven by Mr. Mabry McMahan, the well known real estate operator, and drive together as well as a trotter and pacer could be expected to. Both horses are by Direct 2:05½. The off horse, Birdcatcher, is a bay trotting gelding with 2:10 speed, and the near horse is the handsome seal-brown stallion I Direct 2:12¾, one of the best bred of all the Directs and a very speedy pacer, as he has repeatedly shown miles better than 2:10 in his races, and was only beaten a neck in 2:08 by the famous ringer Walter K. at Santa Rosa. I Direct will be in the stud this year under the management of that well known horseman, Dan Lieginger of this city.

While I Direct and Birdcatcher make a very handsome pair of roadsters, both being capable of showing 2:10 speed, one is a pacer and the other a trotter, and Mr. McMahan is ambitious to secure a mate for Birdcatcher if possible, believing that could he find a horse to match him in style, size, conformation and speed, he would have one of the most valuable as well as one of the fastest pair of trotters ever owned on this Coast. He therefore offers to trade I Direct for such a horse if one can be found. He must be a square trotter, able to show a 2:10 gait, and be sound and all right. He considers I Direct a high-class and valuable horse to race or use in the stud and will not think of trading him for anything but a first class animal that will mate Birdcatcher. The latter is now nine years old, a mahogany bay, fine style and action, easy on the bit, with no bad habits and afraid of nothing. If there are any of our readers who own a trotter that will mate Birdcatcher, and is as good as he is, and would like to own a stallion that has a mark of 2:12¾, is by Direct 2:05½, out of the great brood mare Francisca, dam of three in the list, by Almont 33, he should correspond with Mr. McMahon, 207 Sansome street, San Francisco. There is no better bred horse than I Direct. His second dam is by Sentinel 280, third dam by Bayard 53, fourth dam the famous mare Luna by Swigert's Lexington, and fifth dam that wonderful thoroughbred mare Eagles by imported Glencoe that has scores of winners of both trotting and running races as her descendants. The pedigree of I Direct on the dam's side goes back without a break to the 24th dam, the famous Layton Barb mare of English thoroughbred history. With such blood on his dam's side, and sired by such a producer as Direct 2:05½, Mr. McMahon's stallion will be a sire of speed if given an opportunity, something he has never had. He has two three-year-olds that have not been trained, about a half dozen yearlings, and of the ten mares bred to him last year all are in foal.

A SENSATIONAL FILLY.

Pleasanton track, where more harness horses are in training during the winter and spring months than at any other track in America, always furnishes a sensation about this time of the year. The sensation of 1906 is a baby pacer by Mr. W. A. Clark Jr.'s stallion Highland. It is a filly and is just eight months old. The precocious little miss is owned jointly by Mr. Clark and Ted Hayes and is the first piece of horseflesh either ever bred. Her dam is a mare called Reina del Diablo by Diablo 2:09½, and was the first mare bred to Highland after Mr. Clark purchased him. The filly is a natural born pacer—don't know any gait but the lateral one, and while only eight months old stepped out like a campaigner the first time she was ever hitched to anything which was a few weeks ago, and on Monday last astonished everyone by pacing a quarter in 44 seconds and doing it so easily and so handily that she did not seem to realize she was doing anything out of the ordinary. She is level headed, perfectly gaited and one of the sweetest dispositioned youngsters ever seen on the Pleasanton track.

She has made a good start for Highland (who will be in the stud at Pleasanton this year) as a sire, and if his produce are all like her, he will have a prominent place in the Great Table before he is much older. Highland is admitted by all horsemen to be one of the best gaited and most determined of trotters. He has a trial of 2:12, and is such a magnificent individual and so well bred, that no doubt can be entertained of his ability to sire speed of a high order. He is coal black, with one white hind ankle, stands 16 hands and weighs 1200 pounds. In short he is just about the ideal for a trotting bred sire. His breeding is unsurpassed. His sire is Expresso 29,199, a half brother to that great trotting three-year-old Expressive 2:12½. Expresso was by Advertiser 2:15½, out of the great brood mare Esther, dam of three in the list. Highland's dam is Alpha 2:23½, dam of three standard performers, three producing sons and two producing daughters. The grandam of Highland is that famous mare, Jessie Pepper, one of the greatest brood mares that ever lived. She produced two standard performers, three of her sons are sires of standard speed and no less than seven of her daughters have produced trotters with records.

Bred in these lines Highland is as certain to produce speed as night is to follow day, and breeders can make no mistake in sending good mares to him. He will be in the stud at Pleasanton at \$25 the season. By addressing Ted Hayes at Pleasanton any further particulars in regard to shipping and care of mares, etc., will be furnished.

Highland was bred to a few choice mares last year that were the property of Mr. Clark. Such mares as Hazel Wilkes 2:11½, She 2:12½, Patty D. 2:12½, and others were among them and all are now in foal. When these foals appear, they will be carefully raised, trained and given race records if possible, so that outsiders who have colts by Highland will thus get the benefit. There is nothing like breeding to a horse whose get are trained and raced by the owner.

LOS ANGELES DRIVING CLUB.

The Los Angeles Driving Club held its monthly matinee at Agricultural Park January 27th, and was well attended. The card was a good one, the day all that could be desired and the track in excellent condition, while the events were run off in good order, the Seventh Regiment band played.

The event of the day was the fourth, in which Welcome Mc, owned and driven by Thomas Hughes, paced a mile to a wagon against time in 2:11½. Welcome Mc also has a previous matinee record of 2:08½ to a sulky.

The third race, a 2:20 pace, was an exceptionally good one, the cup lying between Lohengrin, driven by his owner, Dr. William Dodd, and Connors, owned and driven by G. A. Pounder; but Dodd's horse proved the best of the other starters and won the heats in good time, the first being made in 2:14½. In the 2:25 trot Abe Miller, owned and driven by M. B. Mosher, proved himself the fastest of a good bunch and won the event.

Summary:

2:30 pace, mile heats, best two in three—Star Mason won, Nuttie second, Barney third. Time, 2:23½, 2:29.

2:25 trot, mile heats, best two in three—Abe Miller won, George Anderson second, Don Z. third. Time, 2:22, 2:24½.

2:20 pace, mile heats, best two in three—Lohengrin won, Connors second, Harry H. third, Athlo fourth. Time, 2:21½, 2:14½.

Against time to a wagon—Welcome Mc., 2:17 and 2:11½.

2:20 trot, mile heats, best two in three—Zombretta won, Bur Nut second. (Two starters). Time, 2:26, 2:25.

2:25 pace, mile heats, best two in three—Zollie won, Siegfried second, Laura G. third. Time, 2:21½ and 2:23.

A CHALLENGE.

At the Pleasanton race track on Sunday, February 4th, Mr. John O'Keefe of San Francisco, drove his five-year-old pacing filly Centereye a mile in 2:13½, last half in 1:04, and last quarter in 30½ seconds. Mr. O'Keefe now claims the fastest mare driven by an amateur for 1906, and challenges any five-year-old pacing colt, gelding or filly to a match race over the Pleasanton track on any Sunday, horses to be green and without records, and owners, who must be amateurs, to drive.

ZOMBRO 2:11 AT LOS ANGELES.

Geo. T. Beckers, owner of Zombro 2:11, the greatest three-year-old ever raced on the Pacific Coast, and sire of Zephyr 2:07¼ and ten more in the list, writes us that this noted horse will make the season of 1906 at Los Angeles at \$50 for the season, which announcement will be of interest to a large number of the leading breeders of California. Full value for the money is obtained by every person who secures a Zombro foal, even though the price of service fee were many times the low figure asked by Mr. Beckers, as the Zombros sell for good figures at any time. Every few weeks one hears of a Zombro being sold and in every instance the price is a good one. There is good money in raising them as there is in raising anything that is in strong demand.

Zombro is distinguished in many ways. He was the greatest colt trotter ever raced in California. He has more blue ribbons and gold medals for wins in the show ring than any stallion in the State, and his list of standard performers is not only headed by the fastest ever sired by a son of McKinney, but it contains more names than the lists of all other sons of McKinney combined. His daughter Zephyr took a race record of 2:07¼ trotting on the grand circuit last year and won over \$8,000. His son Charlie T. 2:13½ won more money on the California circuit last year than any trotter raced in class races. In these days speed and money talk.

Down at Los Angeles the young Zombros are the talk of the track. Mr. Samuel Elmore, the well known capitalist of Astoria, Oregon, has a Zombro gelding that is now four years old. He is called Zomont, and is out of a Altamont mare. Will Durfee is training him and the gelding is considered about the best green prospect in Southern California. Zomont worked a mile last Wednesday in 2:16, last half in 1:06.

Ezra Tilden has a fine bunch of youngsters there, all of which are Zombros. He has four belonging to L. H. Todhunter of Sacramento, all of which are trotters. They have all worked miles better than 2:30. Two young stallions which will be three years old in May are entered in all the stakes to be trotted on the Coast this year. One of them, Gerald G., is out of a Sidney mare and has worked a half in 1:09, and a quarter in 33½ seconds. The other is called Hooligan. He is out of a mare by Silver Bow and has stepped a half in 1:10½ and a quarter in 34 seconds. Billy Emerson, a four-year-old, and Zomitella, the same age, stepped quarters in 33½ seconds this week. This is a fine showing for four youngsters to make, all by the same sire, owned by the same man and in the same stable. Zombowette 2:16½ is also there and in good shape after her Arizona races. She also belongs to Mr. Todhunter and many consider her about the best trotter and the gamest in her class on this Coast.

Up at Pleasanton there are a few Zombros that are right up in the limelight all the time, and wherever the get of Zombro are in training they are considered fast enough to cause lots of talk.

Attention is called to the new advertisement of Zombro which appears in this issue.

FOUND THE MISSING LINK.

New York, Jan. 23.—At last the chain of equine evolution is complete. After years of search, and just when all hope of success had been abandoned, the American Museum of Natural History, New York, has been rewarded by the discovery of remains of the "mountain horse," or Orohippus. This discovery fills in the last gap in the record which science has long endeavored to make perfect.

The museum began its explorations in 1901 under the direction of Professor Henry F. Osborn, curator of the Department of Vertebrate Paleontology, with a trip to the Big Horn Basin of Northern Wyoming. The expenses were defrayed from a fund contributed by the late William C. Whitney. At his death these special explorations had to cease, the hunt for fossil horses is now carried on in conjunction with that for other fossil animals, until some equally public-spirited horse lover comes forward to continue it distinctively.

The locality around Fort Bridger, Wyoming, was carefully searched for fossils, but particularly for the "mountain horse," fragments of which had been found and named by Professor Marsh in 1872. Parties sent out by the American Museum visited this region in 1893 and 1895, and from 1903 to 1905, but in spite of the most indefatigable efforts the Orohippus eluded the searchers. It has begun to look as though the attempt to locate his skeleton would have to be given up as hopeless, when on the very last day of the final expedition of 1905, just when the party was about to return, the long-sought for remains were unearthed. These consisted of the skull, backbone, limbs and other parts of the skeleton of the very stage wanted.

The find has not been publicly announced heretofore, and it will be some time before the museum has ready its exhibit, showing every stage of horse evolution, beginning when the ancestors of the horse of to-day were about the size of an Irish terrier. The museum has already classified the fossils of the horse previously found in various localities in the western part of the United States, and will thus be able now to place before the public a complete ocular record of equine evolution from the early days of the Eocene period, estimated at three million years ago, down to the present time.

The museum's latest discovery is of the greatest importance, not only because it will make these records more complete, but also because it may lead to the verification of the theory that the horse originated in this country. Professor Osborn will make a thorough examination of these remains and his conclusions are awaited with a great deal of interest.

NEWS FROM THE NORTH.

(Portland Rural Spirit.)

Fred Hambleton 2:26, made to high wheel sulkey eighteen years ago, is now doing stud duty at Aurora, Oregon, and is owned by S. A. Miller.

Boise, Idaho, will claim the week of October 15 to 20 for their fair this year and will again become a member of the North Pacific Fair Association.

E. Rosencrance, of Hubbard, Oregon, is the proud possessor of a very handsome four-year-old mare, standing 16-2 and weighing 1300 pounds. She is by Nutwood Wilkes, out of a mare by Altamont, and possesses a wonderful lot of speed, besides being large and handsome.

The Spokane Interstate Fair Association let a contract to build 150 feet additional grand stand on the north end of the present grand stand to accommodate the increased attendance at each year's fairs. The present structure was inadequate last year and a greater crowd is expected in 1906.

S. S. Bailey of Los Angeles, will send his stallion, Tidal Wave 2:09, by Nutwood Wilkes, dam by McKinney, to Salem, Oregon, for a stud season.

F. A. Rankin, of Eugene, Oregon, reports the sale of Myra Goldust (dam of Broadheart) by Pedro, and her yearling filly by Diablo 2:09½, to John Dimmick, of Salem. Mr. Rankin at one time owned the famous pacer, Bessie Rankin 2:16½.

August Erickson has sold his McKinney mare, Alma Mac, to Fink & Co., of this city, at a reported price of \$750. Alma Mac's dam is Mary A. 2:30, by Altamont; second dam by Kisbar. This mare has trotted miles close to 2:20, but met with an accident and was thrown out of training. She is sound now and is a good green prospect.

Capt. Jones will make the season of 1906 at the State fair grounds near Salem, Oregon, commencing about March 1st. A stallion that can sire colts good enough to be taken to Indiana, where thousands of trotters are bred ought to be good enough for the Oregon breeders to patronize. This horse's value as a sire has not been duly recognized in this State in the past, but the show ring record of the Lewis and Clark fair ought to set people thinking.

SOME OF THE PRICES FOR CHAMPIONS.

Among the first of the famous old-time trotters that changed hands at a high figure was Pocahontas Girl 2:26½, this mare bringing \$40,000 back in 1864. Since that time other trotting mares that have sold for big prices are Sunol 2:08½, \$41,000; Maud S. 2:08½, the champion trotter for many years, for whom Robert Bonner paid \$40,000; Nancy Hanks 2:04, the champion trotter of her time, that the late J. Malcolm Forbes paid \$40,000 for; Goldsmith Maid 2:14, sold for \$32,000, while Lady Thorne 2:18½, went for \$30,000. The highest price ever paid for a trotter was the \$125,000 paid by Mr. Forbes to Leland Stanford of California for the stallion Arion 2:07½, in 1892. Three years previous to that time Axtell 2:12 was sold to a syndicate for \$105,000, and has proven a most prolific sire of speed.

When the horses owned by Mr. Forbes were sold to close out the estate, the trotting stallion Bingen 2:06½ went to A. H. Parker of Bedford, Mass., for \$32,000, while last November M. W. Savage, of Minneapolis, Minn., paid \$21,000 for Cresceus 2:02½. Other stallions that were sold for big money were Director 2:17, for \$75,000; Red Wilkes 2:40, for \$60,000; Anteeo 2:16½, for \$55,000; Bell Boy 2:19½, who met death by fire shortly after selling, for \$51,000, the largest price ever realized for a harness horse at public auction. Robert McGregor 2:17½, sire of Cresceus, sold for \$50,000, as did the successful Ohio sire Wilton 2:15½. Alcolyte 2:21, the pet of J. S. Coxey, of "Coxey army" fame, cost him \$40,000. Other high prices secured for trotting stallions being \$42,000 for Stamboul, \$35,000 for Anteevo 2:19½, \$35,000 for Dare Devil 2:09, \$35,000 for Conductor 2:14½, \$31,000 for The King, and \$30,000 each for Jay Gould 2:21½, and Ralph Wilkes 2:06½, and \$20,000 for Directum 2:05½. Cresceus, with the fastest record of all, sold for \$21,000.

Quite a number of geldings have sold for high figures. Rarus 2:13½, and Dexter 2:17½, both champions in their day, selling for \$36,000 and \$35,000, respectively. Prince Wilkes 2:14½ sold for \$30,000 in 1899, while The Abbott 2:03½ brought \$26,000 under the hammer five years since. E. E. Smathers paid \$40,000 for Major Delmar 1:59½, while C. K. G. Billings secured a bargain when he paid \$12,500 at auction for the champion Lou Dillon 1:58½. The top price paid for a pacer is \$60,000, the amount M. W. Savage is said to have paid for the champion Dan Patch 1:55½.

Joe Gahagan of Toledo, O., has purchased from Mel Crews of Arcola, Ill., the fast young trotting stallion Central G. (3) 2:16½ by A. J. Gilck 2:10½, out of a full sister to Baradian 2:14½ by Bárada, second dam Dimpi C. by Gambetta Wilkes. The price paid was \$3500. Central G. took his record in the second heat of a winning five heat race at Springfield, Ill., last season and Mr. Gahagan looks for him to be a good race horse this season.

Senator Bailey of Texas, who retired from the racing and breeding industry, as will be remembered, is now deep in the game. His stable of trotters is the largest at Lexington. His string for the present includes a trio of three-year-olds, nine two-year-olds and eleven yearlings, all by Prodigal 2:16, and it constitutes the biggest string of youngsters by one sire ever in training over the Lexington track.

An advertiser offers a business for sale that clears \$5000 yearly. Just the thing for a horseman.

NOTES AND NEWS.

Zolock 2:05½ and his son, Izalco, will make the season at Pleasanton race track instead of San Jose. When you go to Pleasanton don't fail to call on Henry Delaney and have him show you this great horse, the fastest entire son of McKinney.

A payment of \$10 each is due March 1st on all two-year-olds entered in Pacific Breeders' Futurity No. 4, for foals of 1904. This stake has a guaranteed value of \$6000, and to keep your entries eligible to any of the divisions this payment must be made on or before Thursday, March 1st, 1906. Don't forget this.

The meeting at Woodland this year, which will be held during the week just prior to the State Fair, will be managed by Mr. Alex. Brown, proprietor of the Woodland Stock Farm, and his able superintendent, C. A. Spencer. Both gentlemen are thorough horsemen, as well as first class business men, and they will have the cordial and hearty support of the citizens of Woodland and Yolo county and the patronage and aid of every horseman who has trotters or pacers to race in California.

The new race track which is building at Exeter, near Visalia, will be completed in time to begin training horses over it by May 1st, and arrangements are being made to hold a meeting in the fall. About forty stalls will be erected immediately. Mr. George M. Kirkham will send all his horses, about twenty in number, there to train.

George Stickle of Angels, Cal., is proudly contemplating a young trotter of his own breeding, every time he looks over his colts in the pasture, and thinks he has one that will make all the horsemen "sit up and take notice" when he is old enough to train. At a sale of horses from the Santa Rosa Stock Farm held in this city in 1903, Mr. Stickle purchased a filly by Sidney Dillon out of the mare Maud (dam of Maudie 2:24½ and Legation 2:23½) by Nutwood. This filly is an own sister to Custer, the phenomenal pacer owned by Mr. J. C. Adams of Phoenix, Arizona. Mr. Stickle bred this filly in 1904 to his grandly bred stallion Stickle, son of Silver Bow 2:16 and Grace, dam of Daedalion, 2:08½, etc., by Buccaneer. In 1905 the mare foaled a colt that Mr. Stickle says he was not greatly prepossessed with at first, but is now not only a fine looking youngster but a trotter for there ever was one. He expects great things from him when he gets old enough to wear a harness, and if there is anything in blood lines and precocity he is justified in all his anticipations. Mr. Stickle also owns a colt by Sidney Dillon out of a Silver Bow mare that looks like something much better than the average.

Fred E. Perkins, president of Narragansett Park, announces from Providence that the Grand Circuit meeting will be held this season regardless of whether pools are allowed or not.

A gentlemen's driving club has been organized at Indianapolis, the State Fair grounds were leased and high class matinee turf sport is assured Indianapolis devotes the coming season. It will be conducted on the lines of the Cleveland Matinee Club.

The trotting training ground at Highland Park, Louisville, Ky., will have to be abandoned as the running horsemen have taken possession of the track and are rebuilding the grandstand and making other improvements for the advent of the gallopers.

To have a good road in winter in California drainage is necessary. An ordinary dirt road that is perfectly drained and kept smooth will never get very bad, even in the wettest winter. It is the same with a race track, and there are a half dozen tracks in California that would be good winter training grounds if they were properly drained.

Watch these pages for date of sale of horses from Mr. A. B. Spreckels Aptos Farm. The sale will be held during the last of this month or the first of next. When it is announced, particulars of the horses will be given, and catalogues issued. Every horseman who has seen "Sandy" working them at Aptos says they are the best looking lot that has been made ready for a California salesring in many a day. Don't miss this opportunity to get a good prospect by Cupid 2:18, own brother to Sidney Dillon. They are choice goods.

At a meeting of the Executive Committee of the Gentlemen's Driving Club of Boston, last week, Arnold Lawson, son of the author of Frenzied Finance, was elected chairman. It was decided to change the day of holding matinees from Thursday to Wednesday, and that cups be given for competition at every third matinee during the season of 1906.

A new driving club has been organized at Albuquerque, New Mexico, and will be incorporated for the purpose of giving race meetings. Mr. C. E. Newcomer is president, and the other incorporators are W. D. Trimble, C. M. Foraker, Simon Schloss and Jacob Levy.

The coming horse show at Pasadena is attracting much attention from owners of fine horses in that section and the entry list promises to be very large. Many handsome cups are offered and the money prizes are very liberal.

The Midwinter sale of the Fasig-Tipton Company opened in New York on January 29th. Among the horses sold were the following: Fantasy 2:06 by Chimes, 16 years old, \$1,000; Mush 2:08¾, by Lottery Ticket, \$850; Crown Prince, no record, by Dexter Prince-Miss Valensin, \$800; Star Hal 2:04¾, 12 years, by Brown Hal, \$3,500; Riley B. 2:05½, 10 years, by Happy Riley, \$1,500; Joe Pointer 2:05¼, b. g. by Star Pointer, \$1,125; Billy Buch 2:07¼, b. g., 10 years, by St. Clair, \$425; Alameda 2:09¼, b. m. by Altamont, \$550; The Native, two-year-old colt by Moko, \$2,100; Sara Patch, black filly, four years, by Joe Patchen, \$3,000. The twenty head consigned by the Parkway Farm, Goshen, N. Y., the estate of the late Senator McCarthy, sold at a higher average than any one consignment from a breeding farm in the history of the Fasig-Tipton Co. The colts by Joe Patchen 2:01¼ averaged over \$1,000, while the total of twenty head sold for \$15,230, or an average of \$761.50, a record of its kind.

Ten outside mares were booked to Mr. W. A. Clark Jr.'s stallion Bon Voyage (3) 2:12¾ within three days after the horse reached Pleasanton, and Ted Hayes remarks that as the son of Expedition is limited to twenty-five mares, owners who wish to breed to the champion three-year-old stallion of 1905, will have to speak quickly or they will be left.

It is stated that an epidemic of glanders has broken out among the horses belonging to the four troops of the Fourteenth United States Cavalry stationed at Monterey. The Government veterinary found twenty-eight horses afflicted with the dread disease, which were ordered shot. All the other horses were vaccinated and quarantined.

One of the largest sales of trotting horses ever held in Australia was that necessitated by the breaking up of the late Mr. John Robertson's stud, which took place last December. There was an attendance of some five hundred spectators, including would-be buyers from most of the other States, and representatives from this colony. Considering that the majority of the horses offered were in rather poor condition, the prices realised were of a satisfactory nature. Among those that came in for the most spirited competition was Oym, a two-year-old colt by Owyhee 2:11, that finally went to Mr. L. Wilson of Christchurch, New Zealand, at 155 guineas or over \$800. A yearling by Owyhee brought 150 guineas.—N. Z. Referee.

H. B. Rutherford, who took Helen Norte 2:09¼ over the Grand Circuit last year, will again go East in the summer with that mare and two of her sisters—a three-year-old pacer and a two-year-old trotter, that are said to show Grand Circuit form.

M. W. Savage, owner of Dan Patch, the world's champion pacer, has sent to Scott Hudson of Lexington, Ky., a handsome gold lined silver loving cup as a testimonial of his skill in holding the reins over the pacemaker the day the famous stallion lowered his own world's record to 1:55¼ last fall.

Ten thousand dollars has been appropriated by the San Francisco Fire Commissioners for new horses for the Department.

Chris Anderson of Livermore has leased from A. G. Roberts of San Lorenzo the latter's good stallion Aika by Chas. Derby and will stand him during the coming season at Livermore.

Jos. H. Martin of Livermore has sold to M. Dinehan of the same place the imported Percheron stallion Origen.

The horsemen of Livermore and vicinity have called a meeting for to-day, February 10th, to make arrangements for a horse show to be held in Livermore, March 3d. The horse shows at Livermore have always been well attended and well conducted. Owing to the fact that a number of fine draft and coach stallions have been purchased in Alameda county during the past few months, and that many fine trotting stallions are now located in and about Livermore, the show of stallions should be an extra good one this year.

William Johnson, who is the superintendent of Mr. H. Brace's farm near Agnews, went to Pleasanton last week with a dozen head of young horses, mostly by Mr. Brace's stallion Greco.

D. S. Matthews, of Ryde, Cal., advertises a good five year old jack for sale.

Mr. H. R. Rand, whose address is at the Hotel Metropole, Oakland, offers for sale a pair of cobby built coal black geldings by a son of McKinney out of standard bred mares. These geldings are five years old and must be seen to be appreciated. Read the advertisement.

A mix-up occurred in giving the breeding of Mr. S. Christenson's two-year-old filly whose picture graced the title page of the Breder and Sportsman last week. The filly, which is one of the most promising two-year-olds at the Pleasanton track, is by Bonnie Direct 2:05¼, instead of by Stam B., as stated.

The American Sportsman says: The best youngster in Charles Marvin's stable at Lexington is a two-year-old colt by Mendocino 2:19¾, dam Palita 2:16, by Palo Alto 2:08¾. Marvin is training this colt for the firm of Danforth & Son, Washington, Ill., who shipped the youngster to Marvin recently.

Diablo's brother, Arner 2:17¾, was shipped to Chico from Pleasanton last week, and will make the season of 1906 at the first named place. If the horse breeders of Butte county are wise they will patronize this son of Chas. Derby liberally. Arner is not only a magnificent individual royally bred and very fast, but his colts show that he is transmitting these qualities. Colts and fillies by Arner will meet with ready sale at good, profitable prices whenever they are offered.

Sherman Reams of Suisun Valley, Solano county, has purchased the stallion Comet Wilkes 2:21 and will use him in the stud this year.

Tom James of Des Moines, Iowa, has sent his five-year-old filly, Fashoda 2:24¾ by Barondale, to Ed Geers at Memphis, who will train and race her this year if she comes up to expectations. Those who visited the San Jose track when Mr. James had Fashoda and Barondale there during the seasons of 1903 and 1904 will recall this filly as a very high class one in looks and way of going.

The best bred ones do not always bring the most money. The stallion Almaboul by Stamboul, dam the great brood mare Alma Mater, sold for \$235 recently at the closing out sale of Kingsley Farm in New Hampshire. The late Mr. Kingsley paid \$3975 for Almaboul as a weanling in 1892, at the Hobart sale in New York.

The Hudson and Mohawk Valley Circuit of New York State has decided on the five heat plan for its harness races this year. No race is to be longer than five heats, and if no horse has won three heats after five have been decided, first money will go to the horse that stands best in the summary.

The Breeder and Sportsman Stallion Service Book, just from the press, is the newest and best service book that has been gotten up. Horsemen who have seen it pronounce it the best and the most convenient book of the kind ever brought to their notice. It is bound in flexible leather covers, and is of convenient size to carry in the pocket. It sells at one dollar.

Dick Ables, who is training at the Santa Rosa track, has three colt trotters in his stable that he purchased at the Rosedale Farm sale. They are all by Washington McKinney out of Daly mares and are nice individuals. The two three-year-olds were driven quarters by Mr. Ables the other day in 39 seconds, while the two-year-old showed him a quarter in 41 seconds.

The formation of harness racing circuits for 1906 shows that this branch of racing is likely to be conducted on a larger scale than ever this coming season, and under better organized methods which will assist in its growth in public favor. One of the strongest factors in the steady growth in popularity of harness racing is the organization of fair circuits. In days gone by when every fair association gave its meeting independent of any other association, the contests were little better than a travesty on harness racing. Today, with organized circuits of fair meetings, good stables of horses are secured, the racing is generally good and frequently of a high class, and the thousands of spectators go home with a better idea of harness racing, as a sport, than they had before. The county fair tracks are proving to be the kindergarten for Grand Circuit candidates, not only as refers to horses, but also to drivers. Many a famous Grand Circuit horse made his first appearance on the turf on a county fair track and more than one of the drivers now famous served his apprenticeship on the same tracks. It is not a far cry from the county fair track to the Grand Circuit track and those who are inclined to look with scorn on the racing, which is one of the greatest of county fair attractions, will do well to remember that some of the men and horses which may be seen this year on the fair tracks will doubtless be seen next year on the tracks of the Grand Circuit line.—Horse World.

BROOD MARE OWNERS! ATTENTION!

The attention of brood mare owners is called to the announcement of the American Horse Breeders Futurity, purse \$10,000, which appears in our business columns this week. The conditions governing this futurity are exceedingly liberal. Sixty-five hundred dollars of the purse goes to three-year-old trotters, \$4500 of this to the winner; \$1500 to two-year-old trotters, \$1000 to the winner; \$2000 to three-year-old pacers, \$1300 to the winner. Considering that pacing foals are apt to pop up from new and unexpected sources and that they are very numerous, the liberal allowance for pacers is worthy of special attention of brood mare owners, for \$1300 is a good sum of money to win and it is worth the time and trouble of training a colt to race for it, and it makes it an object to mark him. Note also that \$750 of the purse goes to nominators of the dams of winners.

It costs but \$5 to nominate a mare, and this payment entitles you to a year's subscription to one of the best turf papers published, the American Horse Breeder, and a further payment of \$10 on November 1st carries the nomination up to the year of the race. The other payments, right up to within 30 days of the race, are very small, thus making the burden light for a nominator up to the time when he shall have an opportunity to find out if his foal is fit to start. Entries are published each week in the American Horse Breeder as they are received. Write for entry blanks, giving full particulars, addressing American Horse Breeder Pub. Co., 161 High Street, Boston, Mass.

THIRD PAYMENT MADE ON 183 FOALS.

Third payment of \$10 each was made February 1st on 183 yearlings entered in Pacific Breeders' Futurity, \$7000 guaranteed, for foals of 1905. The list of those making payments is as follows:

(*) Indicates substitution.

P. E. G. Anzar's foal by Delphi, dam Antinoche by Echo.

Grove P. Ayers' b. f. Queen of Hearts by Cupid, dam Lady by Dietz's St. Clair.

Henry M. Ayers' br. c. Oyama by Almaden, dam Rachella by Chas. Derby.

Henry M. Ayers' br. c. Togo by Almaden, dam Yera by Chas. Derby.

*D. L. Bachant's b. f. Miss Dividend by Athablo, dam Vivian by Hamb. Wilkes.

T. W. Barstow's ch. c. Frank G. by Big Boy, dam Princess Airlie by Prince Airlie.

*Mrs. S. V. Barstow's ch. f. Miss Florence by Nearest, dam Alphabeta by Steinway.

Geo. H. Bixby's b. c. Banquero by Neernut, dam Alice McKinney by McKinney.

G. B. Blanchard's br. c. B. & D. by Kinney Lou, dam Aurelia by Nearest.

Oliver Blanchard's ch. c. by Kinney Lou, dam Miss Camilla by Boodle.

J. F. Blessing's b. f. Better B. by Stam B., dam Salinas Maid by Junio.

I. L. Borden's b. f. Ramona by Prince Robert, dam Allie Cresco by Cresco.

I. L. Borden's s. c. Belvoir by Monterey, dam Alice Bell by Washington.

I. L. Borden's s. f. Juliet by Monterey, dam La Belle Altamont by Altamont.

W. O. Bowers' ch. f. Betty Direct by I. Direct, dam Retsey by Silver Bee.

Alex. Brown's b. f. by Prince Ansel, dam Majella B. by Nushagak.

Alex. Brown's gr. c. by Nushagak, dam Serpolo by Mendocino.

Alex. Brown's br. c. by Nushagak, dam Addie B. by Dexter Prince.

Alex. Brown's b. c. by Prince Ansel, dam Bonnie Derby by Chas. Derby.

H. Brace's bl. c. by Greco, dam Banker's Daughter by Arthur Wilkes.

*H. Brace's br. c. by Greco, dam Maud by Stamboul.

*H. Brace's br. f. by Greco, dam Babe by Ferdinand.

*H. Brace's br. c. by Greco, dam Topsy by Electric.

*H. Brace's b. f. by Greco, dam Kisses by Saturn.

*H. Brace's bl. c. by Greco, dam Blossom by Mustapha.

*Joe Bonaparte's ch. c. Stewart by Nutwood Wilkes, dam Flora by Alex. Button.

*J. R. Bowles' br. c. by Jaybird, dam Alma Wilkes by Baron Wilkes.

Martin Carter's foal by Directum II, dam Muriel P. by Nutwood Wilkes.

*Martin Carter's foal by Nutwood Wilkes, dam Bessie C. by Calif. Nutwood.

Martin Carter's foal by Kinney Lou, dam Queen C. by Nutwood Wilkes.

Martin Carter's foal by Bonnie Direct, dam Georgie B. by Nutwood Wilkes.

James Campbell's bl. f. On Bly by On Stanley, dam Nellie Bly by Woolsey.

H. C. Carson's foal by Neernut, dam Nancy Carson s. t. b. by Nelson.

S. Christenson's b. f. by Stam B., dam Perza by Allie Wilkes.

*W. A. Clark Jr.'s b. f. by Nutwood Wilkes, dam Ruth Mary.

W. A. Clark Jr.'s ch. f. by Highland, dam Reina del Diablo by Diablo.

J. C. Connell's b. f. Bellecita by Kewanna, dam Belle C. by Atto Rex.

John A. Cole's br. c. Don Reginaldo by On Stanley, dam Belle Raymon by Raymond.

James Coffin's bl. c. Serge Witte by Cassian, dam Lilith by Secretary.

James Coffin's b. c. Mercury by Zombro, dam Ella J. by Bob Mason.

*James Coffin's bl. f. Grace Zolock by Zolock, dam Grace Kaiser by Kaiser.

James Coffin's bl. f. Rose Lecco by Lecco, dam Rose McKinney by McKinney.

T. J. Crowley's foal by Monterey, dam Lottie Parks by Cupid.

John Caldwell's b. c. Bonnie Antrim by Bonnie McK. dam by Antrim.

*S. T. Coram's ch. f. Kestrina by Nutwood Wilkes, dam Petrina by Piedmont.

*C. L. Crellin's b. f. by Searchlight, dam Bertha by Alcantara.

Joseph Depoister's ch. c. Mill Mont by Milton Gear, dam Alta Almont by Prince Almont.

Rick De Bernardi's br. c. Kinney Rick by Kinney Lou, dam Ione D. by Paloma Prince.

W. J. Dingee's b. c. Ned Dennis by Mendocino, dam Lucy Shaw by Cropsy's Nutwood.

S. Y. Dollenmayer's bl. f. Sierra Maid by Robert Direct, dam Ida May by Grosvenor.

R. L. Draper's bl. c. Robert D. by Murray M., dam Lady Royal by Royal Derby.

Frank Drake's bl. c. Count Leadbetter by Count Hannibal, dam Florista by Admiral.

E. D. Dudley's br. c. Lookout by Searchlight, dam Bee by Sterling.

W. G. Durfee's b. f. by Petigru, dam Jessie Madison by Jas. Madison.

*W. G. Durfee's c. by Coronado, dam Lulu Wilkes, dam by McKinney.

C. A. Durfee's bl. c. Dr. Lecco by Lecco, dam Bessie D. by McKinney.

*T. L. Davidson Jr.'s ch. f. Di Alto by Diablo, dam Trilby D. by Altamont.

*J. Wallace De Witt's b. f. Cauda O. by Dictatus, dam Alysse Latham by Steinway.

*P. M. Doyle's b. f. by Stam B., dam Jessie M. by Electioneer.

*W. E. Detels' b. f. Effie B. by Stam B., dam Effie Madison by Jas. Madison.

H. H. Elliott's b. c. by Wayland W., dam Belle Cooper by Ira.

August Erickson's bl. c. Arelight by Searchlight, dam Altalena by Altamont.

Byron Erkenbrecher's b. f. by Electro McKinney, dam Wilhelmina by Charleston.

J. P. Emigh's br. f. by Nushagak, dam Pattie Waldstein by Waldstein.

*Rae Fell's f. by Edward B., dam Lady F.

*Rae Fell's foal by Searchlight, dam Edith by Dexter Prince.

J. L. Field's b. f. Lady Parkhurst by Nearest, dam Nacy field by Janette Almont.

A. Morris Fosdick's b. f. Lulu K. by Kinney Lou, dam Athene by Dexter Prince.

*Mrs. Josie S. Frary's b. f. Rosezella by Falrose, dam Nora S. by Sable Wilkes.

Ernest A. Gammon's b. f. Cleo Dillon by Sidney Dillon, dam Cleo G. by Yosemite.

M. Grosemeyer's rn. c. by Richmond Chief, dam Bess. Charles A. Graves' b. c. Rosamond by Hurler, dam Sally Pane.

R. P. M. Greeley's bl. f. Lady Search by Searchlight, dam Winnie Wilkes by Rey Wilkes.

Griffith & McConnell's b. c. by Bonnie Direct, dam Ginger by Steinway.

Griffith & McConnell's br. f. by Bonnie Steinway, dam Victoria S. by Rory O'Moore.

*F. Gomme's b. f. by Alta Vela, dam Zorilla by Dexter Prince.

T. C. Horgan's b. f. De Olita by Demonio, dam Olita by Bradmoor.

T. C. Horgan's s. c. De Oro by Demonio, dam Han-

nora by Oro Wilkes.

*J. W. Haile & Co.'s br. c. by Demonio, dam Minerva by Guy Wilkes.

J. W. Haile & Co.'s s. c. by Demonio, dam Eva by Le Grande.

J. W. Haile & Co.'s b. c. by Demonio, dam Auntie by Dawn.

J. W. Haile & Co.'s s. c. by Demonio, dam Hannah by Le Grande.

J. W. Haile & Co.'s bl. f. by Demonio, dam May Norris by Norris.

J. W. Haile & Co.'s b. c. by Demonio, dam Laura H. by Nutwood Wilkes.

F. Hahn's bl. c. Gold Bond by Chas. Derby, dam Nellie Emoline by Leo Corbett.

Henry Hahn's b. f. Alameda by Stam B., dam Henrietta by Boodle.

F. P. Hellwig's b. c. Active by Monterey, dam Josie.

*M. Henry's bl. f. Sarah C. by Educator, dam Hulda by Guide.

M. Henry's bl. f. by Bonnie Direct, dam Jacobina by Decorator.

J. H. Haile's b. c. Delmer C. by Demonio, dam Babe by Starlight.

*N. Hauck's b. f. Julia M. by Nutwood Wilkes, dam Brown Bessie by Waldstein.

*Mrs. L. J. H. Hastings' b. c. by Coronado, dam Lady Gossiper by Gossiper.

*Hopland Stock Farm's b. c. Ridgewood by Mendocino, dam Mollie MacNita by McKinney.

*Hopland Stock Farm's b. f. Millville by Mendocino, dam Ada Stanley by McKinney.

*W. H. Hoy's bl. c. Jules by Jules Verne, dam Camella by Bayswater Wilkes.

J. B. Iverson's b. c. Starlight by Searchlight, dam Anita I. by Prince Neer.

J. B. Iverson's b. c. Ernest S. by Scott McKinney, dam Amy I. by Diablo.

J. A. Jones' bl. c. La Creole by Capt. Jones, dam Daisy Q. Hill by Altamont.

J. A. Jones' bl. c. Black Joe by Capt. Jones, dam Amy May by Alexis.

J. A. Jones' bl. f. Saeajawea by Capt. Jones, dam Lady Beach by Altamont.

J. A. Jones' bl. f. Alta Jones by Capt. Jones, dam Alta Norte by Del Norte.

Rudolph Jordan Jr.'s br. c. El Pronto by Stam B., dam Constancia by McKinney.

J. H. Kelly's br. c. On Rourke by On Stanley, dam Sister C. by Conn.

*J. H. Kelley's br. f. Hy You by On Stanley, dam Hyto by Happy Prince.

*J. H. Kelly's b. f. May V. by Exchange, dam Kate by Conn.

J. A. Kirkman's bl. f. Idolway by Stoneway, dam Carrie by A. W. Richmond.

George W. Kirkman's foal by Stoneway, dam Malplacet by Hyder All.

George W. Kirkman's s. c. Miss Stoneway by Stoneway, dam Glory.

T. F. Kiernan's s. f. Dorothy Wilkswood by Pacheco W., dam Daisy Nutwood by Nutwood.

*George A. Kelly's br. c. Bonkin by Bonnie McK., dam Vantrim by Antrim.

*E. C. Key's br. f. Sadie Seal by Red Seal, dam Scarlet Letter by Altamont.

*B. F. Lavin's b. f. Lady Derby by Prince Derby, dam Lady Richmond by A. W. Richmond.

La Siesta Ranch's b. c. Siesta by Iran Alto, dam Wanda by Eros.

S. W. Lillard's b. c. P. D. Q. by John A., dam Gipsy Maid by Billy St. Clair.

C. T. Likins' ch. c. Orcas by Tennysonian, dam Neerale by Neernut.

R. E. deB. Lopez's b. f. by Stam B., dam Missie Madison by Jas. Madison.

Thomas Lynam's ch. c. Count Hannibal, dam Pinkey H. by Dexterwood.

*Miss Minnie E. Lewis's b. c. Humboldt by Cruzados, dam Fatinitza by Poscora Hayward.

*R. P. Lathrop's b. c. Star Medium by Dictatus Medium, dam Diva by Mohawk Chief.

J. McKenneff's bl. c. McK. by John A., dam Nellie by Killarney.

A. L. Marshall's gr. c. Vernole by Jules Verne, dam Phenole.

W. S. Maben's b. f. Wander Lust by Petigru, dam Dixie W. by Zolock.

J. W. Marshall's b. s. Moortrix by Azmoor, dam Trix by Nutwood Wilkes.

H. W. Meek's b. f. by Stam B., dam Izobel by McKinney.

*H. W. Meek's br. c. by Kinney Lou, dam Cricket by Steinway.

Ray Mead's br. c. Rayolight by Searchlight, dam Carrie B. by Alex. Button.

T. H. Miller's bl. f. Flash by Searchlight, dam Bonnie by Director.

James W. Minturn's b. c. Bonnie's Orphan by Bonnie Direct, dam Oceano Bell by Killarney.

J. E. Montgomery's gr. c. Orphan Boy by Diawood, dam Nancy H. by Upstart.

*W. H. Martin's br. c. Japalac by Nushagak, dam by Stam B.

*I. C. Mosher's ch. c. Ocean Wave by Tidal Wave, dam Bessie L. by Montana Director.

*P. J. Mann's bl. f. Minnie M. by Capt. Jones, dam Minmont by Almont.

*C. S. Neal's ch. f. Fanny Tattler by Monterey, dam Fanny Gossip by Gossiper.

*Ottutt & Shadbolt's rn. c. by Seymour Wilkes, dam Vesper Bell by Dawn.

*Frank Overacker's b. f. Fanny Easter by Arner, dam Fanny Vasto by Vasto.

S. D. Parks' b. f. Yvonne by Monterey, dam Inline by Hamb. Wilkes.

G. W. Prescott's br. c. Sonlock by Zolock, dam Blondie by Prince Royal.

B. H. Rivers' b. c. Burney by Dictatus, dam Flora 2d by Brilliant.

William Rourke's bl. f. by On Stanley, dam Christmas Gift by Christmas.

H. B. Roben's s. f. Dew Drop by Demonio, dam Dixon Maid by Falrose.

F. H. Sanderson's bl. f. Fairfield Maid by Count Hannibal, dam Lady Woodnut by Woodnut.

F. H. Sanderson's b. c. Soscol by Count Hannibal, dam Ida S. by Baywood.

J. H. Sanders' s. c. Sidney Wilkes by Nutwood Wilkes, dam Vic S. by Sidney Chief.

John J. Sangster's s. f. Miss Jennie by Monochrome, dam Jennie S. by Directum.

Scott & Miller's b. c. by Scott McKinney, dam Maggie by Royal Sid.

George E. Shaw's b. f. by Benton Boy, dam Nellie Nutwood by Brown Jug.

E. E. Sherwood's b. f. Daisy Z. by Zombro, dam Queen Woolsey by Woolsey.

Fred Sims' b. f. Lelia S. by The Oregon, dam Lena S. by Monroe S.

Charles F. Silvia's b. c. by Stam B., dam Swift Bird by Waldstein.

P. R. Sims' b. c. Cap Gorgas by Marvin Wilkes, dam Chita by Son of Sidney.

M. J. Smeltzer's s. f. by Delphi, dam Fanny S. by Brown Jug.

C. J. Snyder's bl. f. Mabel Shaw by Robt. Direct, dam Black Diamond by Hanford Medium.

S. S. Stiles' b. f. Helen Stiles by Sidney Dillon, dam Silver Hawk by Silver Bow.

Sutherland & Chadbourne's s. f. Queen Eva by Lecco, dam Bertie by Piedmont.

Daniel Sullivan's b. c. Starlight by Searchlight, dam Carmel.

E. Sullivan's foal by Monterey, dam Silver Peak by Silver Bow.

Mrs. S. J. Summers' b. c. Dick Warfield by Lecco, dam Gypsy by Mosby.

*H. P. Smith's b. f. Finona McKinney by Montesol, dam Bessie Norfolk by Norfolk.

*Payne Shafter's bl. c. Homespun by Anteo D. dam Spotless by Leo Wilkes.

Fred Theuerkauf's br. f. Lulu by Scott McKinney, dam Bee Funtun by Dictatus.

G. W. Theuerkauf's rn. c. John Christenson by Kinney Lou, dam Pearl Dictatus by Dictatus.

P. J. Thompson's b. c. Welnado by Welcome, dam Delnado by Boydell.

J. H. Torrey's b. f. Bessie T. by Zombro, dam Manilla by Shadeland Hero.

Mrs. F. S. Turner's c. California Dillon by Sidney Dillon, dam Caritone by Antone.

Tuttle Bros.' b. f. by Bert Logan, dam Hattie T. by Stam B.

*J. A. Trescony's br. f. Miss Lloyd by Robin, dam Lady Lloyd by Sidney.

Valencia Stock Farm's foal by Direct Heir, dam La Belle by Sidney.

Valencia Stock Farm's foal by Direct Heir, dam Rosedrop by Sidney.

*Valencia Stock Farm's bl. c. Dusky Glen by Direct Heir, dam Glendover by Jas. Madison.

*M. M. Vincent's b. f. Vera Hal by Expressive Mac, dam Carmen by News Boy.

John Walling's br. f. Lady Seal by Red Seal, dam Bird by Rockwood.

James C. Wallace's foal by Keewanna, dam Ophelia by Alfred.

*George L. Warlow's b. c. Cordero by Athablo, dam Lusterine by Onward.

George L. Warlow's br. c. Bonnie Don by Bonnie Direct, dam Donagene by Athadon.

N. K. West's ch. c. Coming Wealth by The Commonwealth, dam Lena Andrews by McKinney.

*N. K. West's b. c. Hilgard by Kalaspall, dam Kitty Caution by Caution.

E. B. Whelehan's s. c. California B. by Dictatus, dam Bell by Colton.

Mrs. Alma Whitehead's br. f. Miss Delphi by Delphi, dam The Mrs. by Derby Ash.

*C. Whitehead's b. c. Delphi, dam Altoonita by Altoona.

C. F. White's br. c. Halgretta by Moko, dam Algretta by Red Heart.

O. H. Wright's br. c. Davis Boy by John A., dam Rosie Wilkes by Falrose.

W. Zibbell's foal by Lynwood W., dam Evangle by Shadeland Onward.

J. W. Zibbell's foal by Tom Smith, dam Kate Lumry by Shadeland Onward.

JOHN A. MCKERRON'S OWN BROTHER.

When a stallion is kept in service at one place year after year, and maintains his favor with breeders, it is pretty good evidence that he has merits which breeders not only recognize, but have faith in. Nearest 2:22½, own brother to the champion stallion of all the Wilkes tribe, John A. McKerron 2:04½, has been located at San Jose, adjoining Agricultural Park, since he was a colt and he is now in his twelfth year, at the zenith one might say of his vigor. He was a fast colt trotter himself and had speed enough to get a much lower mark had he been regularly trained and raced. But he proved so popular in the stud that Mr. Barstow, his owner, wisely concluded to keep him there. Nearest is a large horse, wonderfully well muscled, but with great style and finish. By Nutwood Wilkes out of Ingar by Director, he carries further back in his pedigree three crosses of that great thoroughbred, Williamson's Belmont, "the blood," as Mr. Barstow says, "that took Lou Dillon to the front for a fact."

Nearest sires size and style as well as speed, and his get sell at good big prices whenever offered. That's the sort to breed, be one rich or poor. He is the sire of Alone 2:09½ as a four-year-old, Just It 2:19½ as a three-year-old, with a trial of 2:12½. Highly, trial 2:12½ with the last half in 1:02½ as a three-year-old, and with a record of 2:24½ as a two-year-old. If Highly doesn't get a mark very close to two minutes this year, barring accidents, some good judges of horseflesh will get fooled, and there are a number of others of Nearest's get that will take records this season. Nearest is a beautiful dark bay horse, 15.3, and weighs 1200 pounds. His disposition is perfect. Those contemplating breeding mares this year should address Mr. T. W. Barstow, San Jose, for terms and card containing extended pedigree and other particulars about Nearest.

WILL MAKE THE SEASON AT ALAMEDA.

The announcement was made in these columns last week that Geo. T. Algeo, of Oakland, had purchased from Mr. Martin Carter of Irvington, the grandly bred young stallion T. C. 2:30 and would place him in the stud. Mr. Algeo has placed his advertisement in this journal, and states therein that T. C. will be in the stud at Alameda Race Track during the season of 1906, at the low fee of \$30. There are no better bred stallions than T. C., and judging from a two-year-old filly by him, which was in training for a few months in Fred Chadbourne's stable at Pleasanton, he has begun siring speed from the first. There is no other stallion in California except Nearest, a brother, and one owned by Mr. Carter, that is so closely related to the champion John A. McKerron 2:04 as T. C. Like that noted trotter he is by Nutwood Wilkes out of a Director mare and in addition to this his second dam is the dam of Nutwood Wilkes. T. C. as was shown by the picture printed last week, is a strongly made, good boned horse that has a lot of style and finish. He is a fast natural trotter and is proving that he sires speed. The sons of Nutwood Wilkes that are out of good mares are proving excellent sires. But three or four of them have ever stood for service, yet two have sired 2:10 speed, viz: Nearest 2:22½, sire of Alone 2:09½ and Stanton Wilkes 2:10½, sire of Cavaliero 2:09½. T. C. represents the acme of scientific breeding, and owners of good mares in Alameda county and the vicinity of San Francisco will find the Alameda track a very convenient place to send their mares. Mr. Algeo, who is an experienced man with horses, and has the faculty of "getting them going," will take a few to train for the road or track. He has fitted up a number of comfortable and well appointed stalls at the Alameda track and will be pleased to show his stallion at any time.

GOSSIP OF THE THOROUGHBRED.

(By Ralph H. Tozer.)

Barney Schreiber ought to be very proud of the showing of his Missouri-bred gallopers this year in California, and doubtless he is. The writer feels happy over the showing of the Sains, because he was largely instrumental in getting the genial German to buy the horse bred on the lines that breeders all over the world were enthusing over—a St. Simon-Musket stallion whose granddam was the mother of the two female turf immortals, Memoir and La Fleche, own sisters, bred much on the plan of Sain, because their sire was St. Simon (Sain is a son of St. Simon), their mother an almost full sister to Musket. Schreiber is evidently a believer in the old saying, "Nothing succeeds like success," for he has another good sire in the grand race horse Bannockburn, a son of Hayden Edwards and Bettie Blaise, a St. Blaise mare. With these horses he mates his best race mares like Uarda (a double Oaks winner), Miss Marion (a two-year-old staker), Derfargilla and Laura Agnes, and the result is the phenomenal Dr. Gardner, Tom McGrath, Deutschland and Ed. Sheridan. At the present meeting Dr. Gardner has won six races and \$5,470, Tom McGrath seven races (the season's record to date and \$5,950, Deutschland three races and many seconds and thirds and Ed. Sheridan five races. The ones that like the longest journey are Dr. Gardner and Ed. Sheridan, respectively, from the long-distance race mares Uarda and Laura Agnes. Miss Marion and Derfargilla were purely sprinters, and their preference for a short route shows plainly in their progeny. Should Schreiber desire to breed "Derby horses" all he would have to do would be to send to Sain or Bannockburn some good long-distance race mares of roomy pattern and racing conformation, whose first, second and third dams threw stake-winners, and if their fourth, fifth and sixth dams had the same distinction they could be "banked upon" twice as strongly. The breeding of the four mothers of good race-winners spoken of shows that if the mother was a "stayer" her produce will like a route, and if only "sprinters" they will be good at that game. Seven horses have won \$5,000 or upward at this meeting, and of these Schreiber had the honor of breeding two of the number (Tom McGrath and Dr. Gardner) and owning for a long time the sire of Dr. Leggo (Puryear D). Proper was bred at Rancho del Paso, Lubin and Bearcatcher in Kentucky, Tom McGrath and Dr. Gardner at "Woodlands," Bridgeton, Mo., and San Nicholas by Charles Kerr at Bakersfield, Cal.

Last Monday announcement was made that the stakes for the Saratoga midsummer meeting would close Monday, March 5, with the exception of the cross-country fixtures, which are to have a later closing day. The principal stake for the meeting, as formerly, will be the Great Republic, thought it will have nothing like the value of last season. It is now a stake with \$10,000 added money, as against a \$50,000 value when Sysonby galloped off with it last year. The stake was originated by William C. Whitney and was designed to be the richest fixture of the American turf. Last year its net value to James R. Keene was \$41,465, which more than equaled any two of the rich stakes won by the son of Melton. Next in money importance to the Great Republic in Sysonby's winnings was the Annual Champion—his last race of his three-year-old career. It netted \$20,500. His Realization had a net value of \$17,750; the Century, \$14,775; the Tidal \$14,550; Brighton Derby, \$11,750; Commonwealth, \$11,375; Iroquis, \$5850, and his division of the Metropolitan, through running a dead heat with Race King, \$5565. These figures will serve to show the importance of the Great Republic when run under the condition originally contemplated by Whitney. It is the intention of the Saratoga association to increase the Great Republic to make it a \$20,000 stake in 1907, but there will be no attempt to restore it to the princely value intended by its originator.

Apparently the Great Republic was not appreciated, and no wonder the racing magnates interested in Saratoga cut it down materially after Sysonby made a show of his field in the rich event. Saratoga is the place above all others for the running of a stake of national importance, and now that the Great Republic has proved a comparative failure in the all-aged division and Washington Park's American Derby looks like a glorious thing of the past, why should it not be a good idea to institute at Saratoga the United States Derby, with say \$25,000 added, at one and one-half miles, with no allowances whatever except the usual one to fillies? This would be a race of the greatest importance within a period of three years, and the first time the race was run the managers could let the entries be made two months ahead, so as to stimulate interest, after that when the coming contestants were two-year-olds, in March, as in the other stakes mentioned above. A race of this description would prove an incentive to breeders to breed "stayers" in place of soft "sprinters," and the breed would certainly be much improved. In October it would be fitting to have the American St. Leger, also for three-year-olds, at one mile and three-quarters, with \$25,000 added, run at Belmont Park, and the American Oaks, one and one-half miles, for three-year-old fillies, might be inaugurated by one of the big racing associations, say the Coney Island Jockey Club, and run in September. It is also astonishing that one of the Eastern clubs does not get up a race patterned after the Melbourne Cup, one of two miles, with \$25,000 added, a handicap, the entries to appear six months in advance of the race, the weights five months ahead, with certain penalties of winning a total of \$3,000 upwards from the time the weights

appear up to the running of the race. Melbourne, with a population of about 450,000, has an average attendance on "Cup days" of over 100,000, nearly every man, woman and child in the province has a wager on the event months ahead, and of course desires to see the "run for the money," and the result is more interest felt in this race than in any in the known world. It is odd that Australians should be able to teach us how to raise enthusiasm over a particular racing event, but the conditions governing the Melbourne Cup, run over the famed Flemington course, are such that every one, from the Governor of the province to the dirtiest bootblack, looks forward to this great national race with feelings of pleasure.

Manager Brooks and Presiding Judge Hamilton appear to be at loggerheads over Turfman Dick Williams and the running of his gallopers. Brooks telegraphed to Emeryville that no investigation of the turfman was in progress, while Judge Hamilton asserts to the contrary. Meanwhile the Williams' string is running across the bay with considerable success. George Rose, about the largest stockholder is said to side with Hamilton, and there is likely to be a showdown before very long and some one step down and out. Just who it will be is problematical, as the strength of the warring factions is unknown. According to every one who has lived at Los Angeles this winter, the "goody goods" made the times very torrid for the Ascot people, and they claim they will carry their complaints before the next Legislature. The anti-racing tide has rolled so high in States like Missouri, Illinois and Tennessee of late that, like the roulette marble, "no one knows where it's going to stop."

HORSES FOR ALASKA.

C. E. Porter, who is engaged extensively in the freighting business in Alaska, has been in Oregon recently looking for horses suitable for his use. He says:

"We do a great deal of handling in Alaska during the winter months, when the ground is frozen, but in the summer loads must be made very light as the horses frequently mire down, and we have to haul them out with chains. The new town of Fairbanks has 7000 inhabitants. It is well built, having a number of three-story brick blocks and modern improvements, including several sawmills. There is plenty of timber close at hand and we lack nothing in that respect. We pay \$25 a month for a telephone, and nearly everything else is in proportion. A common laborer receives \$8 a day and boards himself, or \$5 a day and board. We now get a good meal at a restaurant in Fairbanks for \$1. On the trail meals are \$2. Beds in Fairbanks are \$1 a night. There is a daily newspaper in Fairbanks, the Fairbanks News, which receives telegraphic service over the cable to Valdez and thence by the Overland wire. This is government service and is at reasonable charges. There is no politics in Fairbanks and we pay no taxes. The saloons pay all the government expenses. The town is covered with saloons, which pay \$500 a year license; the restaurants pay \$15 a year and the gamblers are regularly fined and the tough element contributes its share of government expense.

"The extreme cold weather in Fairbanks does not last very long. The coldest I saw it before I left was 57 degrees below zero, and that only lasted for a week or two. It is a still, dry cold, which you don't notice much. The average during the winter is 20 to 30 degrees below zero. The summers are very mild and pleasant, the thermometer running about 65 or 70. During the summer months, day or night, we never have to use artificial light. In the winter time we have only about four hours of daylight. Last summer we had lots of rain, and I must say that during the summer season the roads are simply fierce. The horses often go up to their necks in the mud."

DEATH OF SPHINX 2:20½.

The announcement has just been made that the Electioneer stallion Sphinx 2:20½ was put to death about two months ago at the Danforth Farm, Washington, Illinois, this act being made necessary as the horse was hopelessly afflicted with paralysis. The last stud service the horse did was in 1904.

Sphinx was foaled in 1883, and was bred at Palo Alto Stock Farm. His sire was Electioneer and his dam the famous mare Sprite, who was bred like Miss Russell, inasmuch as she was by Belmont 64 out of a mare by Pilot Jr. This Pilot Jr. mare was Waterwitch, dam of six with standard records, five producing sons, and grandam of 19 standard performers through her daughters. Sprite produced four standard trotters and her three sons, Egotist, Electrite and Sphinx, are among Electioneer's leading producing sons. Sphinx at the close of 1905 had 110 in the 2:30 list, of which eighteen have records below 2:15. His fastest trotter is Hazel Ridge 2:11¼, but he has four pacers with records below 2:09, the fastest being Sphinx S. 2:05¼. Sphinx up to the time of his death was the only son of Electioneer to sire as many as one hundred standard performers.

One of the best bred stallions ever foaled in this State has been taken to Salem, Oregon, for the season of 1906. We refer to Tidal Wave 2:09, sired by Nutwood Wilkes 2:16½, dam My Miracle (own sister to Coney 2:02, McZeus 2:13 and Grace McK. 2:21½), by McKinney 2:11¼, second dam Grace Kaiser, dam of Stipulator 2:11¼, Coney 2:02, McZeus 2:13 and Grace McK. 2:12½, by Kaiser 2:20. Tidal Wave is not only a fast horse and royally bred, but he is almost a perfect model of a horse in conformation, and very stylish. The Oregon breeders will do well who patronize such a horse as Tidal Wave.

OF INTEREST TO YOLO COUNTY BREEDERS.

The mere announcement that that splendid stallion Tom Smith 2:13¼, owned by Prof. E. P. Heald of this city, has been sent to Woodland, Yolo county, for the season of 1906, has already caused many of the harness horse breeders of that locality to express their pleasure, as it affords them an opportunity to mate their mares with one of the handsomest, best bred and fastest of the sons of the great McKinney. Yolo county farmers and horse breeders have had the reputation for years of producing and driving larger and better looking roadsters than can be found in most localities in California, and the reason is that while they have been good patrons of sires with speed and good breeding they have always demanded that size and good looks should be a portion of their qualifications. In Yolo county there was much of the blood of Signal, John Nelson 187, Dietz's St. Clair and Black Ralph, all horses that got size and good looks, and the daughters of these horses were bred to Alex. Button, whose get are noted for their lofty carriage, speed and splendid road qualities. In later years some of the best bred stallions in California have made seasons in Yolo county, notably Diablo, Bayswater Wilkes, Falrose, Iran Alto and Mr. Alex. Brown's two stallions, Nushagak and Prince Ansel. It will thus be seen that high class trotting blood is not scarce in the country about Woodland, where Tom Smith 2:13¼ will make a season this year in charge of C. A. Spencer, at the Woodland Stock Farm. As Tom Smith is a horse of grand proportions, a good gaited fast trotter, level headed and a sire of handsome foals, there is no doubt but the breeders of Yolo county will give him a liberal patronage this year, and the results cannot be anything but good for these breeders and the horse, as from the well bred mares of Yolo should come more than one 2:10 trotter by this son of McKinney. Tom Smith's dam is the great brood mare Daisy S., dam of Tom Smith 2:13¼, Gen. Valjejo 2:20½, Little Mac (3) 2:27 and Sweet Rosie 2:28½. Daisy S. is a daughter of McDonald Chief 3583, that sired five standard performers, among them that well known trotter, Columbus S. 2:17, and has a producing son and three producing daughters. McDonald Chief was by that stout bred horse Clark Chief 89 and out of a mare by thoroughbred Bethune. The second dam of Tom Smith is another great brood mare, Fanny Rose by Ethan Allen Jr. 2903, son of the old champion Ethan Allen and a mare by Hambletonian 2. Fanny Rose produced George Washington 2:16½, Columbus S. 2:17 and Solano Chief 2:29¼. The third dam of Tom Smith is Jenny Lind, a mare that won many races in California in early days and was considered a thoroughbred. Through Fanny Rose, Tom Smith gets a strong Morgan strain, as she was by Ethan Allen Jr. a son of Ethan Allen 43, the best son of Black Hawk 5. This Morgan blood was quite strong in many of the mares which formed the foundation stock of Yolo county and they should nick particularly well with this stallion. Sweet Marie 2:04¼ came from McKinney being bred to a mare with Morgan and thoroughbred blood in her veins, and there are many fine mares in Yolo county bred in similar lines.

THE GOLDDUSTS.

Editor Breeder and Sportsman:

Dear Sir—I notice in your last issue that T. L. Creason of Point Richmond inquires about the "Golddusts" in California. Will say that Col. McNasser brought two sons of Ensign Golddust (son of Golddust 150) to this county from Kentucky. These were full brothers out of the registered mare Silver Spray. One, Ensign Jr., was destroyed by fire; he got Bell Mc, dam of Silver Bee 2:27½ (2 years). The other, Starlight Golddust, got Col. McNasser, that Vet. Tryon trained and drove to a record of 2:19. I have always had the impression that Starlight Golddust and the McCracken Golddust were the same horse, as I believe Starlight stood out at Cosumnes. I have the full breeding of these McNasser horses if Mr. Creason desires it.

Yours truly,

M. L. LUSK,
631 K Street, Sacramento, Cal.

Joe Cuicello worked the trotter Admiral Togo, four years old, by Iran Alto 2:12¼, a mile in 2:16, last half in 1:06, and last quarter in 32½ seconds, at Pleasanton last Friday. This colt is a great natural trotter and the free-for-alls will have to look out for him soon. All the boys grab their watches and climb on the rail whenever Joe starts out with Charley Belden, the gelding he is working for Mart Rollins. Last Wednesday was work out day for this horse and he was given a mile in 2:18½ and then another in 2:14¼, the last half in 1:04¼ and the last quarter in 31¾ seconds. This mile was trotted in the middle of the track the entire distance, so the mile was a long one.

Henry Struve's mare Hagar Wilkes by Nutwood Wilkes foaled a fine b. f. by Welcome 2:10½, January 23d, one of the first, if not the first, foal in stake No. 6 of the Pacific Breeders' Futurity.

THE NEW HORSEMAN'S HANDBOOK.

The revised edition of the Horseman's Handbook, just off the press, is certainly a valuable little book. In addition to its treatment of the care and management of stallions, brood mares, colts, campagners and special chapters on the care of the feet, gaiting and balancing, it also contains the official rules of the American trotting turf and a wealth of statistics found nowhere else. It gives the championship records of every class, the leading progenitors of speed, list of horse associations, list of horse journals, catalogue of books on the horse, and a lot of other things too numerous to mention. It gives the rules to stand registers, rules for laying out tracks, state pool laws now in vogue, the different futurity stakes, what they are worth, when the payments are due, and a hundred hints and different suggestions of value to every horseman. This little book can be had at this office at 50 cents per copy in paper covers and at \$1.00 per copy in leatherette cover. Every horseman ought to carry one in his pocket.

ROD, GUN AND KENNEL.

Conducted by J. K. De WITT.

COMING EVENTS.

Rod.

Jan 1-June 1-Closed season for black bass.
Apr. 1-Sept. 15-Oct. 15-Feb. 1-Open season for taking steelhead in tidewater.
Sept. 10-Oct. 15-Close season in tidewater for steelhead.
Sept. 10-Oct. 15-Close season for catching salmon.
Sept. 15-April 1-Open season for lobsters and crawfish.
Oct. 15-Nov. 15-Close season for taking salmon above tide water.
Nov. 1-April 1-Trout season closed.
Nov. 1-April 1-Closed season for taking steelhead above the water.
Nov. 1-Sept. 1-Open season for crabs.
Nov. 15-Sept. 10-Season open for taking salmon above tide water.

Gun.

Feb. 22-Blue Rock Tournament under the auspices of the Golden Gate and Union Gun Clubs. Ingleside.
Feb. 22-Pueblo Gun Club. Blue rock tournament. Pueblo, Colo.
May 26, 27-Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, Flossen Station.
June 19, 22-Interstate Association. Grand American Handicap target tournament. \$1000 added money. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
July 1-Feb. 15-Dove season open.
Sept. 1-Feb. 15-Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15-Open season for quail, ducks, etc.
Oct. 15-April 1-Open season for English snipe.
Oct. 15-Aug 1-Deer season closed.

Bench Shows.

Feb. 12, 15-Westminster Kennel Club. New York. Robt. V. McKim, Secretary. Entries close Jan. 25.
Feb. 20, 23-New England Kennel Club. Boston. Wm. B. Emery, Secretary. Entries close Jan. 30.
Feb. 23-March 3-Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary. Entries close Feb. 22.
March 1, 3-Southern Ohio Kennel Club. Hamilton, Ohio. Thos. Boli, Secretary.
March 7, 10-Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary. Entries close Feb. 25.
March 8, 10-Colorado Kennel Club. Denver, Col. T. W. Bartels, Secretary.
March 13, 16-Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.
March 14, 17-Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary.
March 21, 24-Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
March-Southwestern Kennel Club. Los Angeles. George R. Albers, Secretary, Los Angeles.
May 29, 30-Long Island Kennel Club. Jos. M. Dale, Secretary, Brighton Beach, L. I.
June 1-2-Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary.
June 9-Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.
June--San Francisco Kennel Club. 10th annual bench show Fred P. Butler, Secretary.
Sept. 2, 6-Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary.
Sept. 8-Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

From the early settlement of America until the present day the size, toothsome qualities, and handsome appearance of the grouse and wild turkeys have given them a place among the most widely known and appreciated of our native birds. Throughout the conquest of the continent they served to eke out the scanty larder of the pioneer, and under the changed conditions of more recent times have taken an established place among the most prized luxuries of the table. Their habits are interesting alike to the country boy and the city sportsman, and both share in the keen pleasure of their pursuit. Their presence on the farm or in woodland is directly beneficial, owing to their destruction of harmful insects.

Twelve species of grouse occur within the limits of the United States, including Alaska. They inhabit the most varied country, from the rich prairies of the Mississippi Valley, through the heavily forested areas of the Eastern and Northern States, to above timber line on the desolate summits of mountain ranges and over dreary wastes of arctic tundra. While less beautifully marked than some of the quails, all the grouse are adorned with pleasing colors, and the males of the two species, the prairie hen and ruffed grouse, wear curiously shaped ornamental tufts of feathers on the sides of the neck. Some species have sacs on the neck, which they inflate to make the love notes more sonorous. The males of several species have over the eyes fleshy combs that are concealed by the feathers except in the mating season when they become brightly colored and are erected to form conspicuous and attractive ornaments. These combs are especially noticeable in both the dusky grouse and the ptarmigan.

The grouse may be arranged in three groups according to the kind of country they occupy. The group of the open plains or of regions covered with a growth of scrubby bushes includes the prairie hens of the Western prairies, from Manitoba south to Texas and Louisiana; the lesser prairie hen of the Southwest; the heath hen, once of the Eastern States, from Massachusetts to Virginia, now limited to Martha's Vineyard; the sharp-tailed grouse of the Northwest; and the sage cock of the sagebrush deserts of the Great Basin, a fine bird, nearly as large as a turkey.

Next are the species of the forested regions. The

most notable of these, the well-known ruffed grouse, occurs in wooded areas all through the eastern and northern parts of the country from Maine to northern California, and north to Alaska. Within this wide range it varies sufficiently in color to be separable into four forms. The Canada grouse, which also has been separated into several local forms, has nearly the same range in the north as the ruffed grouse, but does not extend so far south. The Franklin grouse, closely related to the spruce grouse, occurs only from the Rocky Mountains west, and north to Alaska. The blue, or dusky grouse, called "fool-hen" in the Rocky Mountains, also varies in color in parts of its range so that it has been divided into several not strikingly different local forms. It is the largest of the forest-loving species and is found only in the wooded mountain areas of the West, from the Rocky Mountains and Sierra Nevada north to Alaska. The forest-inhabiting grouse are rarely near neighbors of man, and hence are of less consequence to agriculture than those of the open country.

The last group of grouse comprises the ptarmigan, which live above timber line on the high summits of the Rocky Mountains and thence north over suitable country to the arctic tundras of Alaska. The ptarmigan are remarkable for the way in which they meet the seasonal conditions of their arctic home by changing the grays and browns of their summer dress for the snowy-white of their winter one. The willow grouse, or common white ptarmigan, a circumpolar bird, is common on the tundras of Alaska and British America. With it occurs the rock ptarmigan, which is rather more of a hill bird, and which is represented on the Aleutian chain by four island forms that differ slightly in color from it and from one another. The white-tailed ptarmigan occurs above timber line in the Rocky Mountains from the northern part of New Mexico to British Columbia and Alaska. Owing to their arctic or subarctic homes the ptarmigans have practically no relations with agriculture. They are resident throughout the year and abound in many parts of Alaska, where they have long been prized as food by the natives, and now are a welcome addition to the fare of the more recent population, though, as a rule, their flesh is dry and without much flavor.

The common tame turkey is a descendant of birds taken to Europe from Mexico by the Spaniards early in the sixteenth century. The wild turkeys of the United States originally occupied a large area extending from the coast of Massachusetts west to Colorado and south to Florida and the Mexican border. While they are of the same species as the Mexican bird, they have been modified by the varying conditions of their environment into four forms, distinguished by differences in color. The best known of these is the common wild turkey of the Mississippi Valley and the Eastern States. The others are the Florida wild turkey, the Rio Grande turkey, and the Merriam turkey of the south Rocky Mountains from Colorado south through New Mexico and Arizona. These birds differ in color to a certain extent, but have a close general resemblance. Owing to their size and the value set on their flesh, wild turkeys have been hunted so persistently that they have been exterminated over much of their former range and have become the shyest of our game birds. There are remarkable exceptions to this rule, however, as their persistence up to the present day in parts of Virginia and Maryland, within a few miles of Washington City. This ability to maintain a foothold in long-settled parts of their old territory suggests the feasibility of restocking parts of their former range. In pioneer days they were often destructive to cornfields, and in remote places they still raid grainfields, but the damage is insignificant.

Unfortunately a number of our game birds are now gone or are fast disappearing from their former haunts. An awakening appreciation of the real value of some of the species and of the evident danger of their extermination is evinced by protective laws that have been enacted in recent years throughout the country. These laws are mainly the outcome of a realization of the value of the birds from the sportsman's point of view. The investigations upon which the present report is based show that the farmer has a vastly greater interest at stake in the increase and protection of some of these birds, notably the bobwhite, than has the sportsman. In view of the decrease of both bobwhites and prairie hens it is important to know that there is every probability that proper efforts to rear these birds for restocking purposes will be successful. The numbers of bobwhite may be readily increased by careful protection, but the heath hen is already extinct in the Eastern States, and the prairie hen is nearly or quite gone from large areas in the West where it was numerous a few years ago. The restocking of suitable places in the former range of the prairie hen and even in the former range of the heath hen in the coast region of Virginia and Maryland appears to be quite practicable. The significance of an experiment made by Audubon many years ago at Henderson, Ky., is of special interest in this connection. In the fall he secured sixty prairie hens and, clipping their wings, turned them loose in his garden and orchard, which contained about four acres. The birds quickly became tame and "walked about the garden like so many tame fowls, mingling occasionally with the domestic poultry." The importance of the prairie hen as a destroyer of weeds and insects has been demonstrated and its value as a food and game bird is well known.

As the bird possesses such good qualities and as proper efforts for its reintroduction into parts of its former range will almost certainly be successful, it is hoped that the undertaking will not long be delayed. It is unquestionable that the presence of this bird will add appreciably to the value of any farm.

The Sage Grouse.

With the exception of the wild turkey, the sage grouse (*Centrocercus urophasianus*) is our largest game fowl. It is a fine-looking bird, with gray back, black breast, and long tail, and attains a maximum weight of 8 pounds. It breeds on the sagebrush plains of the Upper Sonoran and Transition zones, from the east slope of the Sierra Nevada and Cascade mountains in Nevada, California, and British Columbia, east to Assiniboia, Dakota, Nebraska, and Colorado. At mating time the cock inflates the sacs on the sides of his neck until they look like small oranges, and then goes through a droll performance, throwing himself forward on his breast and plowing along the ground until the breast feathers are almost completely worn away. The hen is captivated by these grotesque antics, and in due time chooses a mate and nests in a small depression in the ground under the shelter of a bush, where she lays about ten olive-buff eggs with chocolate markings. The cock leaves her before incubation begins, and in about three weeks the chicks are out. A young covey roosts in a circle on the ground, bobwhite-fashion. In winter, coveys unite in packs which sometimes number a hundred or more.

Food Habits.

The feeding habits of the sage grouse are peculiar, and its organs of digestion are unlike those of other grouse. The stomach is not differentiated into a powerful grinding gizzard, but is a thin, weak, membranous bag, resembling the stomach of a raptorial bird. Such an organ is evidently designed for the digestion of soft food, and we find that the bulk of the sage grouse's diet consists of leaves and tender shoots. A stomach collected September 7, 1890, in Idaho, by Dr. C. Hart Merriam, contained leaves of sage and other plants, seeds, and a ladybird beetle (*Coccinellidae*). Four birds shot in Wyoming during May and September by Vernon Bailey had gorged themselves with the leaves of sagebrush (*Artemisia tridentata*). This and other sages, including *A. cana* and *A. frigida*, furnish the bulk of the food of the sage grouse. Other food is taken, but it is comparatively insignificant. B. H. Dutcher, formerly of the Biological Survey, examined a stomach which, besides sagebrush leaves, contained seeds, flowers, buds of *Rhus trilobata*, and ants and grasshoppers. Three birds collected by Vernon Bailey on September 5, in Wyoming, had varied their sagebrush fare with ladybird beetles, ground beetles, (*Carabidae*), fly larvae, ants, moths, grasshoppers (*Melanoplus* sp.), and the leaves of asters and yarrow. Of two birds killed in May, one had fed wholly on the leaves of sagebrush (*Artemisia tridentata*), while the other in addition had taken insect galls from sagebrush and the flowers and flower buds of a phlox (*Phlox douglasii*), together with some undetermined seed capsules, pieces of moss, and several ants. A third bird, killed in July, had eaten a few plant stems and numerous grasshoppers.

Major Bendire writes that the diet of the sage grouse includes grass spikes, the tops of leguminous plants, including blossoms and pods of vetch (*Vicia*) and astragalus; also, that the bird eats golden-rod, and will go far to get a mourning feed of wheat. He notes that also berries, grasshoppers, and crickets (*Anabrus simplex*) are eaten. (Life Hist. N. A. Birds, [I], pp. 107-108, 1892.) Sage grouse have been known to eat rose hips, greasewood leaves, and the buds and foliage of the pulpy-leaved thorn. (Wilson and Bonaparte, Am. Ornith., IV, p. 214, 1831.)

The young, of course, are more highly insectivorous than their parents. A half-grown bird shot by Vernon Bailey had eaten, in addition to vegetable food, some 300 ants.

Much remains to be learned about the diet of the sage grouse, but enough is known to show that the bird lives principally on sage-brush, and does no harm to agriculture. The value of the flesh as food has been much discussed, but the general opinion is that when the birds have not been feeding much upon sage the flesh is excellent. A long-continued diet of sagebrush imparts to it a bitter, sagy flavor. Hon. Theodore Roosevelt says (The Wilderness Hunter, p. 99, 1893): "However, I killed plenty of prairie chickens and sage hens for the pot, and as the sage hens were still feeding largely upon crickets and grasshoppers, and not exclusively on sage, they were just as good eating as the prairie chickens."

Sage grouse should be drawn as soon as they are killed, to prevent the food in the stomach and intestines from tainting the flesh. The sage grouse is of very gentle disposition, and probably would thrive in captivity. Should it be domesticated, its size would make it a most valuable fowl. E. S. Cameron, of Terry, Mont., writes to the Biological Survey that he has made a beginning in this direction. He secured eggs of the sage grouse, hatched them under a domestic hen, and some of the chicks survived.

(To be Continued.)

Shooters' Re-Union.

The Tobacco Gun Club of Marysville held its annual house warming and duck broil recently at their club house on Butte Creek. There were not many large bags of taken, as the water is still very low. Abe Lewis certainly did himself proud with the duck broil, which was evidenced by the many compliments he received from the members and visitors present after stowing away several dozen ducks.

Among the members and invited guests present were C. C. Rubel, Judge Raish, Waldo Johnson, William Flannery, Mr. Giblin, J. Stevenson, Dr. Smith, Harvey Richardson, Mr. Hare, W. S. Kirk, Art Rubel and Walter Morgan.

GENERAL GAME CONDITIONS.

The passing of the year 1905 marked the close of the season for hunting and selling many kinds of game in the United States. Big game hunting is now over, except that deer may still be killed in a few Southern States—in Arkansas and Florida until February 1, in Kentucky until March 1, and in Alabama, Louisiana, Mississippi, and North Carolina, where various county laws prevail. Quail hunting is now allowed only in Oklahoma, Arizona, California, Nevada, and the Southern States, and wild turkey shooting only in twelve Southern States. The open ducking seasons, which, as a rule, are among the least restricted, have closed in ten States—Maine, Vermont, New York, Pennsylvania, Ohio, Michigan, Minnesota, Montana, and Utah.

No big game or game birds at present can be legally sold in the markets of Michigan, Wisconsin, Minnesota, or Missouri. At New York and San Francisco the sale of such game is restricted to waterfowl; at Baltimore to deer, snipe, plover, and waterfowl; and at Philadelphia to doves, redbirds, rail, shore birds, and waterfowl. In the District of Columbia the sale season for deer, ruffed grouse, and wild turkeys is over. Boston, Chicago, and New Orleans are the only important markets east of the Mississippi that are open to any considerable extent, and these are not without certain restrictions.

Now that the hunting season is practically over, the Biological Survey of the U. S. Department of Agriculture in a bulletin issued January 16th, suggests that efforts be directed toward insuring more effective protection of game and an adequate supply for the future. Owing to the nonmigratory character of quail and the consequent depletion of various localities where hunting has been excessive, or the birds have been killed off by the severity of the past two winters, restocking is frequently necessary; but the demand for live birds for this purpose far exceeds the available supply. The difficulty is augmented by the fact that southern birds are scarcely hardy enough to stand northern winters, and hence it is difficult for Northern States to secure birds suited to the climate. The game commissions of some States, particularly Massachusetts and New Jersey, for several years past have endeavored to obtain a supply of quail, but have been only partially successful.

The lesson of the great loss of life among quail occasioned by these two severe winters has not been lost. Perceiving that absence of food and shelter is the principal cause of mortality, State officials, game associations, and many private individuals have united in attempting to make good these deficiencies. Grain and other food have been distributed freely and systematically after heavy snowfalls, when the usual food is covered, and suitable shelter has been provided. Much activity prevailed last year in Illinois, Indiana, Massachusetts, Maryland, New Jersey, North Carolina, and West Virginia. Such measures are needed to preserve the quail from possible ultimate extinction; for with a growing army of sportsmen hunting for them annually—an army that now numbers hundreds of thousands in this country—their ranks are each fall reduced so far below the normal that, if the succeeding winter happens to be severe, extermination of many colonies is almost sure to follow. Such a result is deplorable, not only from the standpoint of the sportsman, but, owing to the great value of the quail to agricultural interests as a destroyer of insects and the seeds of weeds, from that of the farmer as well.

New Jersey Duck Hunting.

The way they do it down East is illustrated in a recent dispatch from Stone Harbor, N. J., and is interesting by way of contrast:

The cold weather of the past week has greatly improved the wild fowl shooting in the bays and creeks of Cape May county. During the late fall and early winter days thousands of ducks and geese frequented the water ways and ponds that cover the great marshes that extend from Great Egg Harbor bay to Sewell's point, but on account of the mildness of the weather the birds were shy. When the warmer weather prevailed the ducks spent much of the time out on the sea, miles from shore, only coming to the inland waters in rough weather or at night to drink and feed.

When the wind blows cold from the north, bringing snow and sleet, great flocks of wild fowl forsake the open sea and congregate by the thousands in Corson's Bay. Ludlam's bay, the Great sounds, and Richardson's bay. Winding through the marshes from these bays are scores of streams, where the lovers of duck shooting can find the finest kind of sport for three months to come. These water courses are separated from the ocean by five narrow islands, namely: Peck's or Ocean City beach, Ludlam's beach, Seven Mile beach, Five Mile beach, and Two Mile beach. It is in the sheltered coves in the rear of these islands that the sportsmen can find the shooting good. Just now black ducks, broadbills, shell ducks, blue bills, mallards, and a half dozen varieties of diving ducks are to be found in flocks numbering from a score to hundreds.

Most of the shooting is done in the early hours of the morning or two or three hours preceding darkness, but the best ducking is to be had in rough weather, especially during a snowstorm, when the wild fowl are continually on the move, flying from one stream to another. The use of big heavy guns is a thing of the past in this locality. The best gun is a double ten bore of any good make, chambered for a fairly long cartridge, to shoot three and one-half drams of smokeless powder and an ounce and a quarter of No. 4 chilled shot.

California favorite hot weather drink—Jackson's Napa Soda.

A BIG STRIPED BASS.

A report from Tiburon last Monday was to the effect that a very large striped bass had been found dead on the rocks under the railroad wharf. This fish weighed 55 pounds and measured over five feet long. The fish's body bore two deep wounds, spear marks, it was stated, but most probably made by a sea lion.

This fish is, if the weight and dimensions are correctly given, the second largest striped bass noted up to date. A fish scaling 59 pounds was taken about two years ago by Sacramento net fishermen. The find was made by Conductors Murphy and Daisy of the California Northwestern Railway.

This episode is rather an ironical commentary on the luck of the angling contingent who have been awaiting the appearance of the bass in the Tiburon waters. The fish, for some reason or other, have been very scarce in the "straits" for several months past, despite the constant trolling and watching for the anticipated run. Very few bass have been taken and now that the biggest bass ever reported as coming from San Francisco bay waters was found under the conditions noted above the anglers regard this incident as one of the many peculiar happenings in connection with striped bass fishing.

That big bass are in the Marin shore waters is a fact well authenticated, for the net men have recently taken some good sized ones. Last Sunday two youths got on the train at Greenbrae and they had three bass weighing nearly 60 pounds; one of the fish was over 20 pounds in weight. In answer to numerous questions by interested and empty-handed fishermen on the train and afterwards on the boat, the reply was made that the fish had been caught "way up the bay." In-

GEORGE LIVERMORE
President of the Ithaca Gun Company

vestigation proved that the fish had been bought from "Mike," a Greek fisherman at Point San Quentin. Taking the foregoing into consideration, it looks as if bass were present in their accustomed haunts, but for reasons best understood by the fish, the lure of the angler is, for the time being, impotent.

A striped bass weighing fifteen pounds was recently taken from the Sacramento river at Colusa. The fish was three feet long and is said to be the largest ever taken from the river at that point.

San Francisco Fly-Casting Club.

At a meeting of the Fly-Casting Club held on Tuesday evening the following officers were elected for the ensuing year: F. H. Reed, president; Carlos G. Young, first vice-president; H. C. Sperry, second vice-president; Tom C. Kierulff, secretary-treasurer, re-elected.

Thirteen new members were elected. The selected preserve, now owned by the club, on the Truckee river, was evidently a timely and well thought of move on the part of the club, judging from the enthusiasm shown in the project. It is proposed to have the ground in shape and a house erected the coming season for the accommodation of the members.

California Anglers' Association.

At a meeting of the California Anglers' Association, held last Monday evening, the following officers for the ensuing year were elected by the Board of Directors. James Watt, president; David Sachs, first vice-president; Achille Roos, second vice-president; W. R. Eaton, secretary; The Western National Bank, treasurer. The Board of Directors is composed as follows: Jabez Swan, John Butler, S. A. Wells, George Wentworth, R. Haas, W. F. Hillegass, Mr. Overholzer, J. Sammi, C. Ashlin, and E. Pomeroy.

Another Suit Against Trespassers.

The Colusa Shooting Club have filed suit in the Superior Court of Sutter County against Guy Herd, M. Parkinson, S. Kelly, and a half dozen others, asking that an injunction be issued to prevent them from trespassing and hunting on the preserve of the above club near Butte slough.

WESTMINSTER KENNEL CLUB SHOW.

America's premier dog show will begin in Madison Square Garden, New York, next Monday, and continue for four days. The record figures 3013 entries, 1951 dogs—a grand showing for the New York club. It was believed by many that the limit for an American show had been reached last year, when 2713 entries by 1752 dogs were chalked up. Even the management of the show was dubious over a bigger showing in the near future. Things apparently came along with a rush, the barriers were let down and all of the best dogs of the United States and Canada will be seen on the benches next week. Quality all down the line, we hear, is plentiful, and the show promises to be the best in every respect ever gotten together in this country.

In looking over the list of entries it will be seen that several old time favorite breeds have fallen off and the more recently fashionable breeds have gained correspondingly. Boston Terriers lead all breeds with the big entry of 277 and 217 dogs—seemingly a large contract is ready for the judges to carry out. Second on the list are Cocker—236 entries, 156 dogs—a splendid showing. Collies (rough) follow with 195 entries, 116 dogs—supplemented by smooth Collies, 13 entries, 7 dogs. Bulldogs, Bull Terriers, French Bulldogs, Beagles, Irish Terriers, English Setters and Pointers are strong. These entries can be considered a token of confidence in the judges.

Fox Terriers have given way, for the once, to Irish and Airedale Terriers, the latter seems to be gaining in popularity and deservedly so, which can also be said of the Irishmen. Scotties, judging from the entry list, are also in the same position in the Eastern fancy's regard.

St. Bernards have fallen off in actual numbers but show a gain in total entries. Of the big breeds, Russian Wolfhounds seem to be holding their own. Mastiffs are but the shadow of a tradition. Greyhounds make a rather good showing. The absence of entries by several well known exhibitors has cut down the Foxhound exhibit.

Irish Setters and Gordons have a following apparently, as they should have, but in Irish Water Spaniels and Chesapeake Bay Dogs we regret to notice the limited entry of two valuable and important breeds. It seems rather odd that dogs of the utility possessed by these breeds should be overlooked to such an extent.

Dalmatians, it is claimed, have taken a hold on popular fancy and show up better than Great Danes. Poms, Welsh Terriers, Whippets, Chows and Old English Sheepdogs are gainers, as are Dandie Dinmonts.

The following is the table of entries as issued by Superintendent James Mortimer:

	Entries.	Dogs.
Bloodhounds	39	16
Mastiffs	3	3
St. Bernards	55	40
Great Danes	75	46
Newfoundlands	5	5
Deerhounds	16	9
Russian Wolfhounds	76	40
Greyhounds	27	15
Foxhounds (English)	17	12
Foxhounds (American)	5	3
Pointers	118	84
English Setters	111	95
Irish Setters	32	22
Gordon Setters	22	15
Chesapeake Bay Dogs	2	2
Irish Water Spaniels	10	7
Clumber Spaniels	11	6
Field Spaniels	35	21
Cocker Spaniels	236	156
Collies (Rough)	195	116
Collies (Smooth)	13	7
Old English Sheep Dogs	52	23
Chow-Chows	39	17
Dalmatians	78	48
Poodles	47	33
Bulldogs	192	127
French Bulldogs	123	89
Bull Terriers	161	90
Airedales	97	53
Boston Terriers	277	217
Toy Boston Terriers	13	12
Basset Hounds	11	6
Beagles	103	64
Dachshunds	48	31
Fox Terriers (Smooth)	67	35
Fox Terriers (Wire)	63	37
Irish Terriers	129	72
Scottish Terriers	76	41
Roseneath Terriers	5	5
Welsh Terriers	34	19
Black and Tan Terriers	6	4
Dandie Dinmonts	6	6
Skye Terriers	1	1
Whippets	19	16
Schipperkes	7	7
Pomeranians	68	42
English Toy Spaniels	55	43
Japanese Spaniels	43	29
Pugs	11	8
Toy Poodles	3	3
Yorkshire Terriers	16	15
Maltese Terriers	8	6
Toy Terriers	8	8
Griffons Bruxellois	7	5
Chihuahuas	6	6
Papillons	4	4
Miscellaneous	8	8
Totals	3013	1951

A Quail Hunt.

A party composed of A. E. Schadlich, H. W. Hughes, Dr. F. J. Martin of Oakdale, J. B. Coleman of San Francisco, and Andrew Jackson of Napa, went to Don Pedro, near Oakdale, Wednesday of last week for a week's quail hunt. They started out well equipped with tents, cooking utensils and a well-stocked larder to carry the jolly sportsmen through the week's outing in comfort.

The rabbit pest in Washington is so serious that the Blalock Island Company, whose headquarters are at Coyote, on the island named, have made arrangements for the accommodation of 250 sportsmen to participate on February 9 in one of the biggest rabbit hunts ever pulled off in Washington. Invitations have been sent to every gun club in the Pacific Northwest. Railroad rates will be reduced and the company has made the proper arrangements to entertain at least 250 shooters.

DOINGS IN DOGDOM.

Southwestern Kennel Club.

Enthusiasm is strong and increasing in the ranks of the fancy dogs in the south, if recent reports from the southern part of the State are any criterion. The coming year of the Los Angeles organization are getting ready for another show next month, if we are not misinformed in the dates. The coming show will be the third annual exhibition of the Southwestern Kennel Club. Judging from past successes the next benching should eclipse the previous efforts. Besides the two past regular shows the club was sponsor for the recent Pasadena show, which a Boston contemporary recently had the bad taste to give a black eye by re-publishing matter that was unreliable and full of veiled, but none the less scurrilous, reflection on the Pasadena officials. And all that after the Boston Journal had previously given a full page favorable report of the show which was reliable and competent and contributed by a prominent Los Angeles fancier.

This publication had the effect of bringing from obscurity matter that would have passed away practically unnoticed had it not been floated on the broad current of kennel affairs by a journal of standing and reliability. This mistake, to draw it mildly, has been commented on by many fanciers here, most of them, under the circumstances, expressed a feeling of regret that so prominent a factor in kennel affairs has been used as a cat's paw.

The officers of the Southwestern Kennel Club, recently elected, are the following: Count Jaro Von Schmidt, president; W. K. Peasley, E. Greengeld and Paul Piepers, vice-presidents; George R. Albers, secretary; Messrs. Piepers, Greengeld and L. W. Young, finance committee. Captain L. H. Broadhead will act as the club's press agent, and this ensures much aid for a successful show.

Bull Terrier Specialty Show.

A move in the right direction is the contemplated one-day show of the Bull Terrier Club which is talked of for next month. The show is being promoted by prominent and reliable fanciers and should receive generous support.

The Breeder and Sportsman has always been an advocate of specialty shows. The one-day club shows are strong feeders for the various kennel club bench shows and are big factors in keeping up interest and enthusiasm.

A number of times in past years specialty shows have been talked of by the different clubs here, but nothing ever materialized in that line but talk. It is to be hoped that a radical change in the usual routine will be the initial factor introducing a worthy and valuable innovation among the Coast fanciers.

It was at first contemplated to show the different breeds of Terriers, this idea, with good judgment we believe, was abandoned.

Sanction of the Bull Terrier Club of America must first be secured after which Mr. J. P. Norman, secretary of the Pacific Advisory Board, will allot the requested date.

One pleasing feature of the proposed show is the number of special prizes that have been promised. The entry fee, we have been advised, will be \$1.00 for the first entry and 50 cents additional for each subsequent entry.

Big Game Hunting in Wyoming.

Mr. Antone Borel, Jr., of this city, recently returned from a most enjoyable trip after big game in the rugged fastnesses of Wyoming. Mr. Borel was one of a hunting party who were thoroughly outfitted and equipped for an arduous campaign, for the killing of elk and big horn in that country, at the present time, is no child's play and the sportsmen must be fortified with a strong heart and sound physical condition who would return from the hunt crowned with success. The hunting party were accompanied by three guides and a cook and had along twenty horses for riding and packing.

Among the trophies of the chase which fell to Mr. Borel's rifle was a magnificent big elk, one of the largest shot in that region for years past. This coup was accomplished near Mt. Ledy, a frowning snow-covered peak of the Rockies, last October. The mammoth elk's antlers spread over 52 inches, with a beam of over five feet. He was a seven-pointer and the head is said to be a perfect specimen. Three Rocky Mountain sheep, five elks and five antelopes, as well as many grouse and sage hens, were bagged in addition. Splendid trout fishing was found in several mountain streams. Grouse were numerous and easy to procure for the camp larder at all times.

The party put in twenty-one days on the hunting grounds and are most enthusiastic over the results of the trip.

Blue Cod Plentiful.

On Tuesday last several saltwater anglers who were fishing from a boat off the shores of Angel Island caught about 75 pounds of the cultus, or blue cod, as the fish is usually called by local fishers. These fish were all of large size, averaging from 5 to 8 pounds in weight.

The blue cod is caught in the water anywhere between 10 feet from the bottom or the same distance from the surface. They have been frequently caught on striped bass trolling spoons as well as clam-baited hooks. As a table fish they are esteemed, being of good flavor. As a medium of sport their grade can easily be guessed by the name applied to the fish by some of the regular anglers across the bay—"gum boots." The big blue cod is heavy and cumbersome and rarely puts up the faintest attempt at a fight.

Sober up on Jackson's Napa Soda.

AT THE TRAPS.

After the closing of the game shooting season, on February 15, there will be but a brief rest for many shotguns, for the powder-burning enthusiasts have in their mind's eye a lively season at the clay pigeon traps this year. A brief outline of the itinerary for local marksmen is the following:

The initial trap shoot for the year will be, as usual, a blue rock tournament at Ingleside on Washington's birthday under the combined auspices of the Union and Golden Gate Gun Clubs. The program of events will be announced during the coming week.

Three clubs, the California Wing, Golden Gate and Union Gun Clubs will shoot at the Ingleside grounds this season. The first regular meeting will take place next month. Each club will hold seven monthly shoots—the order being: Golden Gate the first Sunday of each month, the Wing Club the second Sunday and the Unions on the third Sunday. The individual club programs will be practically the same as last year. The two blue rock clubs will continue the class system of grading the shooters and the Wing Club will impose a distance handicap on the pigeon shooters.

Across the bay at Alameda Junction the Empire Gun Club's grounds have been prepared and a series of five monthly shoots is being arranged. The first shoot is billed for Sunday, March 11th, the club season closing on Sunday, July 8th. The club program will be practically the same as last season with but slight curtailment in minor particulars. The program will, it is believed, be issued in about a week. At the Empire traps this season there will be seen a number of new shooters who have recently joined the club.

The Millwood Gun Club may not be in position to open their grounds prior to the end of May or early in June. Growing crops prevent the use of the club's shooting ground in Mill Valley in accordance with their usual custom.

The Blue Rock Club of Alameda will hold forth at the High street trap grounds on the first Sunday of each month for a period of seven monthly shoots, the first of which will take place on March 4.

The third annual tournament of the Pacific Coast Trap Shooting Association will take place at Vallejo on May 26 and 27, on the grounds of the Vallejo Gun Club at Floden Station.

The Lincoln Gun Club proposes to hold three open trap shoots this year at Reclamation, a station on the Sonoma branch of the California Northwestern Railway.

It is very probable that the Interstate Association will hold the Pacific Coast handicap in this city again later on in the season. Negotiations to that effect are now in progress.

Down in San Jose members of the County Fish and Game Protective Association are arranging for a trap shooting season this year.

No less a prominent Californian than Hon. Victor H. Metcalfe, of Oakland, Secretary of the Department of Labor and Commerce, has recently been giving Washington sportsmen a few pointers in trap shooting. Mr. Metcalfe, Assistant Secretary Murray and Solicitor Sims are all members of the Analostan Gun Club which has a trap ground fitted up on one of the Potomac islands in the vicinity of Washington, D. C. Every Saturday there is a gathering of congenial spirits at the club traps. Mr. Metcalfe is generally high gun, his early experience on the Alameda marshes with wild ducks and practice at the Oakland traps giving him a shade the best of it over his Eastern competitors. This is only one of very many instances illustrating the growing popularity of a "clean sport" and of the diversified following indulging in the recreation.

In connection with the brief outline of the local schedule, trap shooting will be held at many other points on the Coast. Tournaments will be held at Sacramento, Los Angeles, San Diego, Colusa, Redding, etc., Phoenix, Ariz., Portland, Walla Walla, Medford, Ore., Victoria and Vancouver, B. C. At various points, too numerous to mention, not only in this State, but throughout the Pacific Coast, gun club shoots will be more numerous than ever before in the history of Coast trap shooting.

Taking it all in all, indications point to quite a boom in trap shooting here for 1906.

The program for the shoot at Ingleside on the 22d inst. is as follows:

Five 15-target races, \$1.00 entrance, 3 moneys, Rose system.

Five-man team shoot, for a purse. Entrance \$5 per team, 25 targets. Clubs may enter as many teams as is desired.

Trout and Pheasants.

Plans for the reorganization of the Oregon Fish and Game Association were proposed at its annual meeting last month by Secretary A. E. Gebhardt and a committee was appointed to look into the matter of incorporating the organization. It is proposed to organize county associations which will be auxiliary to the State society.

The Association decided to work for the establishment of a State fish hatchery for the purpose of keeping the Oregon streams stocked with trout. To maintain such an establishment it is proposed to impose a license of \$1 upon each man who carries a rod. Many applications were received for Chinese pheasants for breeding purposes from nearly every State in the Union.

H. B. Tronson was elected president; Dr. N. Churchman, vice-president; H. S. Butterfield, treasurer, and A. E. Gebhardt, secretary.

A PROMINENT EASTERN VISITOR.

Mr. George Livermore, the president of the Ithaca Gun Company, was in this city last week, the guest of Mr. Phil B. Bekeart, pausing for a few days' sight seeing, en route to Seattle. Mr. Livermore will meet Mr. Claude H. Smith and Messrs. L. C. and W. L. Smith, his two brothers-in-law, in the northern city. The three gentlemen last named are largely interested in Seattle real estate. Mr. Livermore's visit to the Coast is purely a trip of recreation and sight seeing. Before arriving here he spent several days in Los Angeles. He is a gentleman of pleasing personality and wide information and was keenly interested in many Coast matters that appeal to the consideration of an Easterner.

Quail Hunting South.

The quail season in Riverside and San Bernardino counties closed on January 31st, and with it closed the incidents which may or may not be pleasant memories to the festive hunter who has worn out his shoes and clothes, shooting his fowling piece hundreds of times and killing but a few birds.

Quail hunting the past season has not been over encouraging. In many cases it has proven good sport, but the average person who went out for a day or a few hours, has been doomed to disappointment, for if he got the limit, twenty-five in one day, he either shot away much ammunition and worked hard all day, or else was giving his friends the stiff upper lip, as has been the case with three hunters out of four. Generally "the limit" was translated in the sense of twenty-five birds, but in reality it meant the limit of the hunter's ability. It has been a good word, short, full of meaning, but has been dreadfully abused.

In and about the immediate vicinity of Redlands hunting has been poor. In Riverside county it has been better, while on the desert it was good. About Imperial the best of sport has been secured, especially with ducks, of which thousands have been killed without the least apparent decrease in the flight. There are still plenty on the Salton Sea, and hunters may kill them until February 15. They may also be killed in San Bernardino county until that time. The ducks in that section, however, have not been over plentiful, and hunters have found but little satisfaction except in Bear Valley.

Steelhead Season Closed.

Local anglers who have a fancy for steelhead fishing in tide water have now laid away their rods and tackle, for the season on steelhead ended on the first instant.

The law reads "Every person who, between the first day of February and the first day of April, or between the tenth day of September and the sixteenth day of October of each year, buys, sells, takes, catches, kills or has in his possession any steelhead trout (Salmo Gairdneri) is guilty of a misdemeanor and must be fined (upon conviction) in a sum not less than \$20, or be imprisoned in the county jail of the county in which the conviction shall be made, not less than ten days, or he may be punished by both fine and imprisonment."

The trout fishing season will open on April 1st and already many local enthusiasts are planning an early visit to a favorite trout stream. Indications for the coming season, so far, are very favorable for plenty of fishing sport.

TRADE NOTES.

Winchester Feather-Weight 1906 Model Repeater.

The Winchester Repeating Arms Company has just placed on the market a handsome little extra light weight 22 caliber repeating rifle, known as the Model 1906. This arm is a compact, take-down rifle, handling 22 short rim fire cartridges only. It is attractive in appearance and outline, and in accuracy, reliability of operation and finish it is fully up to the established Winchester standard. The repeating and take-down systems used in this rifle are simple, positive and thoroughly tried, having always given entire satisfaction. This rifle is made with a 20-inch round barrel fitted with a sporting front sight and an adjustable open rear sight, and when taken apart can be carried in a dress suit case. It measures 35½ inches over all and weighs about 5 pounds; has a handsome straight grip stock 12½ inches long, with a drop at comb of 1½ inches and at heel 2½ inches, finished with a rubber butt plate. The magazine holds fifteen cartridges. Model 1906 rifles can be furnished only according to the above specifications. The use of Winchester 22 caliber short smokeless, greaseless, or Winchester 22 short black powder cartridges in this rifle is recommended. The list price of this new rifle is \$10.50, and can be purchased from all sporting goods dealers.

Averages Reported.

Harrisburg, Pa., Jan. 11—W. H. Heer, first general average, 119 out of 125, shooting "New E. C. (Improved)"; H. C. Hiraschy and L. J. Squier tied for second general average, 115 out of 125, both shooting "DuPont"; H. B. Shoop, Harrisburg, Pa., first amateur average, shooting "DuPont."

McHenry, Ill., Jan. 13-14—J. S. Boa, first general average, 414 out of 450, shooting "DuPont"; W. D. Stannard, second general average, 403 out of 450, shooting "DuPont"; J. R. Graham, Ingleside, Ill., first amateur and third general average, 402 out of 450, shooting "New E. C." (Improved); Ben Sterling, McHenry, Ill., second amateur average, 400 out of 450, shooting "New E. C." (Improved).

JUDICIOUS INBREEDING.

"This subject has frequently been agitated in poultry publications in its application to poultry breeding for the last twenty years, it being an important question to those who seek to fix any particular type or characteristic in their stock; and although the subject is an old one, which has been worked over and over again, from every possible standpoint, still, the question is often asked. "How far is it desirable to breed fowls in and in?"

It has been abundantly proved that by continuing this practice too long a time, or if done carelessly, without selection and discrimination, it results in constitutional weakness, decay, reduction in size and loss of fecundity. On the other hand, it has been generally well proved that it is not prejudicial, but advantageous in standard breeding if intelligently practiced, and results in great satisfaction.

Inbreeding in dogs, cattle or other animals, we leave to those who have studied that branch of reproduction, and confine our remarks to poultry only. It is asserted that in animals, where it is desired to develop the nervous temperament and mental qualities, crossing is preferable; but in fowls there is nothing gained by great development of brain, and it is a question whether this assumption is well founded when the selection of the animal for inbreeding is intelligently made. Then again, the extent which inbreeding can be pursued without injury has been studied, and found to be much slower in injurious results than it has been generally understood to be, where the same has been intelligently practiced, so much so that many are led to believe that it can be carried on indefinitely. The great object of inbreeding is to improve the stock in certain things, as for instance, a peculiar comb, a certain shape, or fine color or markings. A male, of good form and size, may show remarkably fine coloring throughout, or perhaps may have phenomenally fine markings in some section, something, in fact, far superior to that of the flock in general, or even that found in the best of the breed, and there is a desire to produce it in the flock, which can be attained by carefully mating him with a female, the best to be had, both in form and color. The next season mate the best of the pullets from this mating, which should show good style and constitution to their sire. The pullets from this mating will be in blood three-fourths of the sire and one-fourth the blood of the first dam, and if the sire is strong in imparting his own characteristics, some of this second generation of females will show his traits strongly, and can be used with hopes of reproducing them generally. Perhaps this is as far as it may be safe to inbreed, but if the old sire still maintains his form and vigor, and the last generation shows no signs of degeneracy, then we would again mate him with females carefully selected from the second generation, and thus establish in the stock seven-eighths of his blood. As a general rule this direct inbreeding should stop here.

For fresh blood for the foregoing stock, we would procure a female of another family of the breed remote in relationship, but possessing the characteristics sought as far as possible, and mate her with a fine male of first generation, which should show he desired traits; and from the males from this mating one can be selected to mate with females of the third generation, and every year thereafter, by introducing fresh blood through an unrelated female, mated with a fine male from the generation last preceding. Keep up the work of improvement, at the same time preserving the constitution and vigor of the flock.

By breeding two families of the same stock, as herein directed, the question of deterioration from inbreeding would be almost wholly obviated, while the uniformity and advancement in quality of stock would be largely under the control of the breeder.—Fancier's Gazette.

BEATING THE BEEF TRUSTS.

Farmers of northeastern Kansas have devised a plan which makes them independent of the beef trust and gives them an advantage that is appreciated in the economies of their households. At the beginning of the winter they organized "beef clubs" of fifteen farmers each. No officers were elected, but at the preliminary meeting they drew

lots for the places of supremacy, each receiving a number from one to fifteen. These numbers are to be retained during the winter. When the organization is complete the first assessment is made to pay for a cow, which is slaughtered by a butcher for a small sum. It is divided into fifteen parts—all except the hide, refuse, etc., which are sold and credited toward the next purchase. The fifteen portions of the desirable meat are numbered from one to fifteen, beginning with the choicest portion and ending with that least prized. On a stated day all the farmers come or send to the market, get their portions of meat at the least possible cost. The next week the process is repeated, No. 1 becoming No. 2, No. 15 being No. 1, and so on until all have made the entire round of numbers. The fifteen weeks of the organization's winter existence covers the period when farmers can easily keep meat.

TO TELL THE EGG'S AGE.

A United States Consul in Germany writes about a recent discovery in that country regarding the age of an egg. He says:

It is based upon the fact that the air chamber at the flat end of the egg increases with age. If the egg is placed in a saturated solution of common salt it will show an increasing inclination to float with the long axis vertical. A scale is attached to the vessel containing the salt solution so that the inclination of the floating egg toward the horizontal can be measured. In this way the age of the egg can be determined almost to a day. A fresh egg lies in a horizontal position at the bottom of the vessel; an egg from three to five days old shows an elevation of the flat end so that its long axis forms an angle of 20 degrees. With an egg eight days old the angle increases to 30 degrees, and with one three weeks old to 75 degrees, while an egg a month old floats vertically upon the pointed end.

Too much overheating and fattening foods, such as corn, oats, barley and hemp, have a tendency to cause soft-shelled eggs. If we feed fat and heat-forming foods there cannot follow the large egg-producing results.

A nice, uniform flock of hens roaming around the yards adds a great deal of pleasure to farm life, and will have a tendency to make everybody, young as well as old, on the farm more interested in the poultry business.

Sponges—S. Adderley, 307 Market St.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. For Sale.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11 1-4

(Reg. No. 22449)

Sire, ELECTIONEER, sire of 166 in 2:30 and grandsire of Major Delmar 1:58 1/4.

Dam, LORITA 2:18 1/4 (dam of Alta Vela 2:11 1/4 and Palori 2:24 1/4) by Piedmont 2:17 1/4; second dam, Lady Lowell (dam of Ladywell 2:16 1/4 and Lorita 2:18 1/4) by St. Clair; third dam, Laura, dam of Doc, sire of Occident 2:16 1/4.

Address all communications to BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

FOR SALE OR LEASE.

Two Prince Airlie Stallions.

PORTOLA 37413, a handsome golden bay, 7 years old, 16 hands, weighs 1190 lbs.

MENLO BOY 37401, a magnificent brown with white points, 6 years old, 16.1 hands, weighs 1200 lbs.

These two horses are full brothers being sired by Prince Airlie 28045; he by Guy Wilkes 2:15 1/4, sire of Fred Khol 2:07 1/4, Hulda 2:08 1/4, Seymour Wilkes 2:08 1/4; first dam Signal by Del Sur 2:24; second dam Lady Signal 2:35 1/4 by Signal 3327. Both of these horses are very fast for the amount of work, being only a few months last year, showing quarters around :34 and :35.

For further information apply to

P. H. McEVROY, Menlo Park, Cal.

A GOOD MARE FOR SALE.

By CLIPPER 2:06, dam by ANTEEO JR.

7 YEARS OLD, TROTS OR PACES; HANDSOME, sound and a high-class animal in every respect. An Al roadster and will make a race horse or a valuable brood mare. Reason for selling is that I have no time to devote to handling her. Call or address

Phone: GEO. C. PETERMAN, Oakland 6501. 779 Twelfth St., Oakland, Cal.

Norman Stallion For Sale.

DARK IRON GRAY NORMAN STALLION; weighs about 1600; 16 hands high; 4 years old. Is blockily built and a sure foal getter. Colts can be seen at San Jose. For further particulars address

W. H. WILLIAMS, 1120 Alameda Ave., San Jose, Cal.

WILLIAM HAROLD 2:13 1/4 FOR SALE

THE MEEK ESTATE HAVING BEEN PARTITIONED, and the breeding of horses discontinued, the stallion WILLIAM HAROLD 2:13 1/4 is offered for sale or lease to a responsible party. William Harold is by Sidney 2:19 1/4, and his dam is Cricket 2:10 by Steinway. Cricket is one of the great producing mares of California, being already the dam of five in the list and has three more foals that will be given records. William Harold has had the most limited opportunities in the stud, yet is the sire of Janice 2:08 1/4 trotting, Dan Burns 2:15 and Judith 2:25 and several others in the list. He is in excellent condition, and as his get are all large, well made and nicely turned horses he should be a good money earner in the stud if in good hands. Apply to or address

H. W. MEEK, San Lorenzo, Cal.

JACK FOR SALE.

A BLACK JACK WITH LIGHT POINTS large, heavy boned, prompt and a good handler. Is a good foal getter and his foals are excellent individuals. Price very reasonable for prompt sale. Address for further particulars,

"SAVE-THE-HORSE"
SPAVIN CURE

Registered U. S. Patent Office

The fire iron is uncertain; blistering is less effective, and both necessitate laying up the horse from weeks to many months; mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors.

Scores of letters to confirm and convince. Send for copies.

Absolute and overwhelming evidence and certainties as to the unerring power of "Save-the-Horse."

"Save-the-Horse" Permanently Cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for copy and booklet. At Druggists and Dealers or Express Paid.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stars cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For cures, sprains, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By **EXPRESSO 29199** (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam **ALPHA 2:23½** (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:22; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11

GREATEST SON OF
McKINNEY 2:11½

Will make the Season of 1906, from February 1st to June 1st,

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:06½; Charles T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Belmont, three years old, record 2:15½; trial 2:11½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Dee Cee 2:19½, trial 2:13½; Lady Zombro 2:24, trial 2:10; Lord Kitchener 2:24½, trial 2:19½; Zealous 2:56½, trial 2:20; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED

NUTWOOD WILKES 2:16¹/₂

Sire GUY WILKES 2:15¹/₂
Dam LIDA W 2:18¹/₂
by NUTWOOD 2:18¹/₂

NUTWOOD WILKES 2:16¹/₂ is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12¹/₂ respectively. Who is it? 2:12, ex-champion three-year-old gelding of the world, reduced his record to 2:10¹/₂. John A. McKerron 2:04¹/₂ (2:12¹/₂ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04¹/₂ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09, Miss Idaho 2:09¹/₂, Who is It 2:10¹/₂, Stanton Wilkes 2:10¹/₂, Cresco Wilkes (4) 2:10¹/₂, George B. 2:12¹/₂, Claudius (4) 2:13¹/₂, North Star (3) 2:13¹/₂, Bob Ingersoll (4) 2:14¹/₂, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone (4) 2:09¹/₂ and Cavaliero 2:09¹/₂.

His daughters produced Miss George 2:10¹/₂, Mona Wilkes (3) 2:11¹/₂, Lady Mowry (4) 2:12¹/₂, Caroline L. 2:14¹/₂, Nello 2:15.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

Get the Blood that Produced the Champions, SWEET MARIE and LOU DILLON, by Breeding to

GRECO

BLACK COLT, FOALED 1900. Sire, McKINNEY 2:11¹/₂, sire of SWEET MARIE 2:04¹/₂, Kinney Lou 2:07¹/₂, Charley Mac 2:07¹/₂, Hazel Kinney 2:09¹/₂, The Roman 2:09¹/₂, Dr. Book 2:10, Coney 2:02, China Maid 2:05¹/₂, You Bet 2:07, Jennie Mac 2:09, Zolock 2:05¹/₄, Dam, AILEEN 2:26¹/₂ (dam of Mowitz 2:20¹/₂, Sister 2:20 and GRECO 2:32, trial 2:20) by Anteo 2:16¹/₂, sire of dams of Directum Kelly 2:08¹/₂, Grey Gem 2:09¹/₂, W. Wood 2:07, etc.

Grandam, LOU MILTON (dam of LOU DILLON 1:58¹/₂, Redwood 2:21¹/₂, Ethel Mack 2:25 and Aileen 2:26¹/₂) by Milton Medium 2:25¹/₂ (sire of 2 and dams of 5) by Happy Medium 2:32¹/₂, sire of Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:30 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address:

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO 24586 Sire, PALO ALTO 2:08 3-4 Rec. 2:12¹/₄ Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12¹/₂, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$20 due when mare is bred and

\$20 payable when mare is known to be in foal.

For further particulars address

H. S. HOGBOON,
Woodland, Cal.

DUCK SHOOTERS!

QUESTION---Why is it that so many excellent wing shots cripple fine birds?
ANSWER---Because they don't use

BALLISTITE

which never fails to kill clean.
REMEMBER---One (1) dead bird in the pocket is worth two (2) in the tulle.

THE SARATOGA SPECIAL.

By subscription of \$1000 each, half forfeit. A Piece of Gold Plate of the value of \$2500 to be added by the Association. Subscribers to name three horses by May 1st, and only one starter to be named for each subscription. Six Furlongs.

THE ADIRONDACK of \$5000. A Handicap.

By subscription of \$250 each, or \$25 if declared by June 1st. Starters to pay \$100 additional. To the winner \$4000, to the second \$700, and to the third \$300. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. Six Furlongs.

THE KENTUCKY. For Fillies. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for less, 1 lb. allowed for each \$100 down to \$1500. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. Five and a Half Furlongs.

THE ALBANY. A Handicap.

By subscription of \$25 each, or \$10 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. Six Furlongs.

THE TROY. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for \$3000, allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1500. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. Five and a Half Furlongs.

To Be Run at the Summer Meeting of 1907 THE GREAT REPUBLIC OF \$20,000 For Three-Year-Olds and Upward in 1907 (Now Two-Year-Olds and Upward)

For Now Two-Year-Old and Upward.

The Saratoga Association to guarantee the cash value of the race to be \$20,000; of which the owner of the second horse shall receive \$2000 and the owner of the third horse \$1000. Liabilities as follows:

For Now Two-Year-Olds.

By subscription of \$25 each. If left in after November 1, 1906, a further subscription of \$75 each, and if left in after June 1, 1907, a further subscription of \$100 each.

For Now Three-Year-Olds and Upward.

By subscription of \$50 each. If left in after November 1, 1906, a further subscription of \$100 each, and if left in after June 1, 1907, a further subscription of \$100 each.

STARTERS to pay \$100 additional. Winners in 1906 or 1907, when three-year-olds or upward, of a race of the value of \$10,000, to carry 3 lbs. extra; of two such races, 5 lbs. extra. Non-winners of \$2000 at any time allowed 5 lbs.; of \$5000, 8 lbs.; of \$2500, 12 lbs.; of \$1000, 15 lbs. One Mile and a Quarter.

All entries should be addressed to the Secretary, Windsor Arcade, Forty-sixth Street and Fifth Avenue, New York City.

ANDREW MILLER, Secretary.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Sprains, Cuts, Splits, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

California Stake Payments Due in 1906.

Pacific Breeders' Futurity Stakes.

(Payments should be made to F. W. Kelley, secretary, 36 Geary street, San Francisco.)

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—\$10 due March 1, 1906, and starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

AUTHORITATIVE STATEMENTS of the resources of California will in the future be furnished in the annual report of the State Agricultural Society. Secretary Albert Lindley and his assistants are now compiling the annual report for the year 1905, and it is promised that all precedents established during the past will be forgotten when the document comes from the printer's hands and is distributed. The change in conditions is ascribed to a law passed by the last Legislature. It provides that each Board of Supervisors in the State shall furnish to the society a sworn statement of manufactures, industries and resources of every description. The annual report of

the society is compiled from these statements. "We believe," said Mr. Lindley recently, "that the statements so procured will enable the society to issue a report upon California that will surpass anything of the kind ever published by the State or Federal authority." With a few exceptions the different counties have already complied with the provisions of the law, and it is evident, from the alteration of statistics that figure in previous reports, that the administration of an oath has enforced a compliance with the spirit as well as the letter of the law. Neither the directors nor the secretary are entirely satisfied with the report for 1904, recently issued, says the Sacramento Union. In nearly every instance the figures and information were secured through the agency of interested individuals or promotion organizations who permitted their imaginations to assume elastic properties when compiling the matter of which the report is composed. In some instances the information verged on the ridiculous, and in past years the annual report was a literary production that provoked no end of mirth. It is believed that the report for 1905 will be ready for the printer in about a month or six weeks. The force now engaged in its compilation will then have accomplished the task of preparing two such documents within a period of six months.

BON VOYAGE 2:12¼, the champion three-year-old trotting stallion of last year, is being greatly admired at Pleasanton and is getting some of the best mares in California. Besides the mares of his owner, W. A. Clark Jr., he has already had mares booked to him by a half dozen owners. His book will be full very shortly. The bad weather of the past week has prevented our artist getting a photograph of this grand horse, but we expect to present one on our front page next week.

STAKES FOR THE SUMMER MEETINGS of the Saratoga Association during 1906 and 1907 are announced in our advertising columns. There are eight stakes from three-year-olds and upwards, to which added money is given ranging from \$1500 to \$10,000. Four stakes are offered for three-year-olds, and five for two-year-olds. The Great Republic of \$20,000 for three-year-olds and upward to be run in 1907 is also advertised.

TALK ABOUT HORSE VALUES! Nothing demonstrates the boom condition of the market better than the fact that a physician in this city has attached the famous Little Albert 2:10 to satisfy a judgment of \$184 recently obtained against the horse's owner. Little Albert was foaled in 1884 and is therefore twenty-two years of age, and a gelding at that.

A PRAYER suggested by Hubbard, editor of The Phillistine, would be an excellent thing for horsemen, and especially amateur drivers, to commit to memory that they may offer it up frequently. It is: "Oh, Lord, help me to win; help me to win. But if, in Thy inscrutable wisdom Thou seest best that I should not win, then, oh, Lord, make me a cheerful loser."

Chas. DeRyder is working fourteen head of trotters and pacers at Pleasanton and last week moved some of them up a little. A chestnut pacer that he thinks very highly of is by Meridian 2:12¼, out of a thoroughbred mare. He is a stallion and the best dispositioned one in any country. DeRyder gave him an easy mile in 2:20 the other day, the last half of which was in 1:05 and the last quarter in 31 seconds. The horse is the property of Mrs. Julia Hamilton. A three-year-old by Meridian, owned by Captain Batchelder of this city, trotted a mile in 2:25 last week, with the last half in 1:08, and the colt's dam, Corinne Neilson, trotted a mile in 2:20, with the last half in 1:06. Fred Hahn's colt, Geo. Madison by James Madison, is learning to trot fast, a mile in 2:28, with the last half in 1:09. The stallion Grecco is another trotter that is showing speed for Mr. DeRyder. He trotted a mile out in 2:22, the last half in 1:05½, and the last quarter in 31 seconds. He is by McKinney out of a double producer by Anteo, and his second dam is the dam of Lou Dillon. This stallion has been booked to some high class mares this year. Babbie by Welcome, out of a sister to Cricket 2:10, looks like a good C. of C. candidate. She went a half in 1:04 last week. Captain Thomas' Nutwood Wilkes gelding trotted a half in 1:11½ and DeRyder says he likes him. Martin Carter's three-year-old sister to Bob Ingersoll 2:14¼ looks good enough to out-trot her brother. A mile in 2:25, with the last half in 1:09, was easy for her. A stud colt by L. W. Russell out of the great brood mare Elsie is just getting his first lessons in the DeRyder school. He was asked if he could trot a mile in 2:40 and answered the question in the affirmative, coming the last quarter in 37 seconds, a 2:28 gait. Mr. DeRyder let his pacer C. E. Hasey by Don Derby 2:04¼ down for a mile in 2:15 last week, the last half in 1:05, and it was only play for him. The mare Lady Bug trotted a mile in 2:22, last half in 1:09. Some high class mares are booked to Star Pointer. Much Better 2:07¼, Banker's Daughter 2:13¼, Alpha W. 2:08, Trix, the

dam of Mona Wilkes 2:11¼, the dam of Bolivar 2:06¼ and several others are among them. Cleo G. by Yosemite, the dam of Easter Direct, the filly that trialed in 2:03¼ last year, is also booked.

Farmer Bunch has seven or eight horses in training at Pleasanton, some of them bred in purple. He has a three-year-old by McKinney 2:11¼, out of Much Better 2:07¼ by Chas. Derby 2:20, and a bay stud colt by Chas. Derby out of Monica 2:15 by McKinney. Bunch is getting one or two youngsters ready for the colt stakes this year and has a look in for some of the money. The pacer Sweetheart by Baywood 2:10½, owned by Mr. William Bolton of Vallejo, is in his string and is doing nicely.

Mountain Maid by Cresco 4908 is a member of the Great Brood Mare Table, but is not yet registered and cannot be until another of her produce gets a trotting record. She is the dam of Tom Carneal 2:08½ and Miramonte 2:24¼, both pacers by Diablo 2:09¼. She is also the dam of that good trotting colt Kenneth C. 2:17 as a three-year-old, by McKinney. It seems as if a mare by a registered standard trotting horse, that has produced two pacers and one trotter with standard records ought to be eligible to registration, and if we were establishing a stock farm we would rather have one like her than a dozen of the kind that are standard for five of six generations but have never produced anything fast enough to catch the judge's eye. Mr. S. K. Trefry of Pleasanton, who owns Kenneth C, has a two-year-old out of Mountain Maid that he will give a standard record at the trotting gait so as to register the dam, and thus enable him to register Kenneth C. The last named colt looks as good as any four-year-old in California, and every horseman who saw him race last year as a three-year-old predicts a record of 2:10 or better for him. Colts by McKinney out of mares that have produced a 2:10 performer are not very numerous, and Kenneth C., although not yet entitled to registration, should attract all the mares this year his owner cares to breed to him. Kenneth C. won a heat in 2:17 last year, and but for the fact that he took the distemper soon after would have had a much lower record. He is one of the best formed horses in California and looks very much like his illustrious sire.

James T. Leonard of Watsonville has purchased through Ted Hayes, Mr. W. A. Clark Jr.'s Kinney Wilkes, a son of McKinney 2:11¼, out of Hazel Wilkes 2:11¼ by Guy Wilkes; second dam Blanche, dam of five in the list, by Arthurton; third dam by the old thirty mile champion Gen. Taylor. This horse is very fashionably bred, a good individual, and as Mr. Leonard will only charge the low fee of \$25 for his services, should get a large patronage. Kinney Wilkes will be in the stud at Leonard Station, and Mr. Leonard's address is Rural Delivery No. 3, Watsonville. Attention is called to the advertisement in this issue.

M. H. Tichenor, the celebrated horseman and horse dealer, has arrived in Pasadena with his family to spend the remainder of the winter. Mr. Tichenor is the head of the firm of M. H. Tichenor & Co., of Chicago, known the country over as dealers in heavy harness horses. The animals handled by his company are said to be the finest in their class in the United States. Mr. Tichenor has had entries in most of the horse shows that have been given in the East. Although he has not entered any of his horses for the show to be held in Pasadena it is expected that he will do so.

Lou Dillon 1:58½, bred to John A. McKerron 2:04¼, has been nominated in the American Horse Breeders' Futurity for foals of 1907.

The Kenney Manufacturing Co., 531 Valencia street, has a first class second hand bike runabout buggy for sale at \$65. It is a bargain. They have also just received a consignment of those popular low seat, long shaft McMurray carts.

The stallion A. Penn 2:08¼ will be trained for a faster record and then shipped abroad, having been sold to William Bodimer of Vienna, Austria, for \$5000.

Walter M. Jermyn, vice-president of the New York Road Drivers' Association, has sold the trotter Direct View 2:08¼ to Colonel W. C. Green of copper fame for \$8000. The horse was purchased at the last Old Glory sale for \$2750.

It is reported that Ed Geers will race the California stallion Bonnie Russell 2:10¼ and Lady Gail Hamilton (3) 2:11¼ this season.

It is announced that W. J. Bates of Dorchester has bought the fast pacing gelding Rey Del Diablo 2:12¼ and that Dick Lawrence will handle the son of Diablo 2:09¼ the coming season.

The Rey Directs are attracting much attention in Kentucky. The Stock Farm says: It looks as if Ed Benyon will have a good money winner in the four-year-old Rey del Valle, a pacer by Rey Direct 2:10. It is said that Rey Belle, about the best individual in the whole Direct family, and one of the fastest, will be raced this year by Bard Palmer. She showed miles last year in 2:14, with halves close to a two-minute gait, and she is booked for a record of 2:05 or better this year. Reydelette will be raced this year by Vance Nuckols, who trained her some last year, working her a mile in 2:13, last half in 1:04, trotting.

The average of the Midwinter Sale was \$355.33. There were 471 head sold for a total of \$167,360. The wonder is how the New York market absorbs so many trotters and pacers at good prices year after year.

MATINEE AT RIVERSIDE.

The Riverside Driving Club held an afternoon of racing on Saturday, February 3d, and in the evening the members enjoyed a splendid banquet and afterwards elected officers for the year.

There was a fine crowd out to see the races and the weather was just right for good work.

The first race was the 2:30 pace. E. F. Binder's Fernwood took two straight heats from Willie Jib in 2:17, and won the Bartee-Wilson cup.

In the 2:25 pace El Diablo won from Norda the J. H. Thompson cup in 2:23.

The third race was for the O'Connor-Garner cup. In this race W. A. Hayt's Lauretta had good company with Flash and Blonde, but she won both heats and the local championship among 2:30 trotters.

In the fourth race Roscoe won the first heat; Dewey the second, and Adalanthia the third, Roscoe's time being 2:36 and Dewey's 2:37. The deciding heat was won by Adalanthia, time 2:37½. The finishes in all these heats were neck and neck and the final heat was a splendid race.

E. F. Binder's Tom McKinney won two straight heats in the 2:40 mixed, which gives this horse the first leg on the Riverside Driving Club's cup for this class. Colonel, Baby and Monocrat also started in this race.

In the sixth race six horses got away and it was about the prettiest harness race which has been seen in these parts for a long time. All round the stretch in the first heat the field played in a bunch, changing places, but never losing distance. Alta Rena, Ping Pong, Laura K., White Stockings, Zella Z. and Bob Neernut were the names of the sextette. Ping Pong won the race in 2:30½, and in doing so won the first leg on the E. F. Binder cup.

Four horses entered in the road race. They were McO'D, Prince, Belle Raymond and Jack. Prince won the race in 2:50 and also the Riverside Driving Club cup.

Thirty-two members of the Riverside Driving Club sat down to one of the most appetizing banquets which has ever been spread in the Eighth Street Cafe on Saturday evening. Mr. Drummond had spared no pains to have this banquet one of his best and he surely succeeded in doing so. The tables were laid in the form of a Roman cross. This was the annual "feed" of this club:

Now, "They're Off." Under the Wire, Smoke Up and "Let's Get Busy."

At the conclusion of the supper, E. F. Binder, as president, welcomed the members and gave a brief history of the club. He stated the club was organized just one year ago last night and grew from twenty charter members to 104.

Short speeches by the members followed, anticipating even greater success during the coming season.

The next matter was a motion to increase the board of directors from seven to eleven members, which was carried. Nominations were then made for the members of the board, and the following were elected: E. F. Binder, W. L. Flagg, Alexander Wilson, H. G. Stanley, Maurice Griffin, J. T. Garner and W. A. Hayt of Riverside; M. S. Sutphen and Frank Ogden of Highgrove; Peter Beatty of Perris and George W. Prescott of San Bernardino. Messrs. Ogden, Sutphen, Beatty and Prescott were elected by a unanimous rising vote, while the remaining seven were elected by ballot. George W. Prescott was elected a director, as A. Wilson had been elected a director to the San Bernardino Driving Club. Immediately after they had been elected the directors adjourned to an adjoining room to elect the officers of the club for the coming year. The following were chosen: President, Alexander Wilson; vice-president, M. S. Sutphen; secretary-treasurer, W. L. Flagg.

The offices of secretary and treasurer were combined into one.

Upon the suggestion of President Wilson a hearty vote of thanks was extended E. F. Binder and the retiring board for the excellent work of the past year. The meeting then adjourned for the evening.

The following members were present: Alex. Wilson, Axel Nelson, J. Hudson, J. T. Garner, M. Griffin, T. E. Noland, E. F. Binder, W. L. Flagg, Chris O'Connor, J. F. Backstrand, Stanley McDougal, Dr. Huff, F. A. Ramsey, A. J. Stalder, M. J. Westerfield, S. J. Elliott, H. G. Judd, Julius Hess, J. H. Strachan, W. A. Hayt, Frank Pond, C. C. Cole, M. G. Sutphen, Frank Ogden, David Stanfield, George Smith, G. M. Carrigan, Chas. O'Brien, T. J. Pulley, H. G. Stanley.

Of the out-of-town members, Peter Beatty of Perris, Charles Farrer of Santa Ana, and A. B. Miller of Perris were the only outsiders present at the banquet board.

An interesting trotting race came off in the morning at the Riverside Driving Park between Messrs. Waddington and Make Kraig, who, in order to settle a question of superiority between their trotters, went three half-mile heats for \$25 a side. Kraig won two out of the three heats, all of them closely contested and hotly driven.

SPEED AT FRESNO.

The track at Fresno, while not one of the principal training centers in California, is nevertheless a place where some of the fastest miles are paced and trotted during the circuit racing, and for the number of horses trained in the winter and spring has as much speed to show as any place.

Schuyler Walton, the well-known reinsman, has nineteen or twenty horses in training there at the present time, some of which he is getting ready to race in California this year, others being given a few preliminary lessons in speed culture, preparatory to being driven on the road or turned out later to grow and be raced later on.

A green four-year-old pacer by Athabla that is called Dan S. is one of his best prospects. This horse has shown a half mile in 1:03½ very handily and is very highly thought of by all who have seen him at work.

The green mare Directrine after three months' work showed him a quarter in 34 seconds, with the last eighth in 15½ seconds, which makes her look like one of the good pacing prospects for 1906.

The two-year-old colt by John R. Gentry 2:00¼, out of a Hal mare, is of course a pacer, and is showing that he is as good as his breeding by pacing a quarter in 38 seconds, with an eighth in 18½ seconds, when not much more than bridle wise.

Walton is working a three-year-old pacing filly by Athabla out of Leticia by Eclectic that has shown considerable better than a 2:40 gait and is coming right along.

The famous "Buckskin mare" by Athadon, out of a mare whose breeding is unknown, is looking fit to race for the money, and she will astonish the natives some day when she is turned loose. She worked a mile better than 2:08 last year on two different occasions, and looks like a 2:05 pacer. Mr. Graham has leased her for this year and Walton will drive her.

Athasham, one of the best three-year-olds out last year, although he did not lower his two-year-old record, is trotting nicely and acts like a coming 2:10 performer.

About the handsomest horse at the track is Alessandro 2:23½, and he can trot a quarter better than 32 seconds right now. He took first premium at the stallion show at the Hanford fair last year.

Stanford McKinney, Geo. Warlow's representative for the three-year-old trotting stakes this year, has shown a half in 1:10 and gives every evidence of being a money winner.

There is a black pacer by Howard St. Clair 2:18 in Walton's string that causes considerable conversation among the horsemen. After three months' work last year he paced a mile in 2:14½, with the last half in 1:06.

A Diablo mare that wears the hoppers paced a quarter in 31 seconds recently with Walton up.

Trainer Middleton is driving seven or eight horses, besides a few colts, and has one horse that is being watched closely by the railbirds as he is looked upon as a likely phenom. He is a big, fine-looking pacer, nicely gaited and strong enough to pull a surrey with four people. He spent last year working on an oil wagon, but is eating good oats and hay at the present time and living like one in the swim, as he has shown a lot of speed. Quarters in 32½ seconds seem very easy for him now, and he has not been given any miles as yet at a gait that has tired him. If he proves to be a race horse he should be a good one.

Charley Clark is handling a string of eight horses, all green ones, and all going along nicely. He will have a few to talk about later on.

Stamboulette 2:10½ is doing stud duty at the Fresno track and is being well patronized, as also is Diablo 2:09¼.

Athabla and Athadon will have full books before the first of May, and Mr. Warlow's young stallions are also being patronized by the best breeders. Fresno would be quite a horse center were one of the old-fashioned county fairs and race meetings to be held every year.

GOOD OUTLOOK FOR RANGE HORSE BREEDERS

The man who has horses to sell for the next two years has a good chance to be king of the stockmen, according to H. I. Wilson of Montana. Mr. Wilson is associated with Capt. W. J. Bradshaw of Helena, in railroad contracts near Toronto on the Canadian Pacific. They tried to purchase horses in Montana last year, but could obtain but few.

The demand will be immeasurably increased with the building of the new roads. As it is now, all the big contractors have all the work they can do for several years ahead, and there is more in sight. The coming of the Milwaukee will mean work for an army of men and teams, the Gould system is to parallel the Union Pacific, and the Grand Trunk Pacific is to throw a line westward clear across Canada.

This will mean a market for thousands of horses. The contractors now buy their stock outright instead of hiring men with teams, and they want grade horses that weigh about 1200 pounds. Horses of the required standard command from \$100 to \$125 in the market.

At such figures the horseman has a bonanza. He runs less risks of loss than any other stockman. On the range the horses are good rustlers for a living, and by a little additional feeding they can be put in prime condition for sale. With the vast amount of work ahead of the contractors, there is no chance of a drop in price, in spite of the inroads of the automobile where the streets are paved.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

WM. SINNOCK VISITS APTOS RANCH.

Santa Ana, Cal., Feb. 11, 1906.

Breeder and Sportsman: I am not a subscriber of your very valuable paper, although I read it weekly. My neighbor, Mr. Charles A. Riggs, takes your paper, also the Horse Review, and I take Western Horseman and Spirit of the West, so you see we are quite horsey for two families. I want to tell you of a trip I took last week and what I found. I had some business which called me north to Santa Cruz and Watsonville. After I left Santa Cruz I heard the conductor call out Aptos, and the name kept coming up before me. After I got to Watsonville it dawned on me that Aptos was where Mr. Spreckels' stock farm was situated. I made inquiry and found that the farm was only half a mile from the station, so I stopped off and walked out. On my way out I met a gentleman driving an elegant pair of horses right on the bridge. I went a little farther and met "Sandy" Smith, the trainer, driving a very nice brown pacing horse, and he informed me he would soon be back and show me around.

The first horse he showed me was a four-year-old pacer sired by that grand old horse, Dexter Prince, and I think his dam was by Cupid 2:18. Mr. Smith told me to walk over to the track and he would show me something, and he "made good," as the saying goes. It was a magnificent big 16-hand horse, and such a set of legs and feet, good from tip of nose to his heels, beautifully mannered, elegantly gaited, and carried his head and tall like a Kentucky saddle horse. The man that wants a prospect and a No. 1 road horse can find him in this beautiful gelding.

Next was a four-year-old filly, I think by same sire, dam by McKinney 2:11¼, a high class one. Then a chestnut gelding that Mr. Smith says is fast. Then I was shown Cupid 2:18, own brother to Sidney Dillon. I need not tell you anything about him.

I was then shown a chestnut stallion. I don't remember his breeding, but he is a beauty and Mr. Smith informed me that it would take 2:15 to catch him when in condition.

Then to my notion I feasted my eyes on a four-year-old stallion by Dexter Prince, but cannot remember his dam. But he is all horse. Then a black imported coach stallion, a beauty; then a team of geldings on the coach order that were fine, and a pair of bay, two-year-olds by the coach stallion and out of trotting bred mares that to call beautiful is putting it mild. Fine heads and necks, long, full tails that reach the ground.

Mr. Smith informed me that he was getting about 25 head ready for sale, and they are the finest lot I have seen in California, all large and with elegant legs and feet. I then inspected the weanlings and they are a magnificent lot of youngsters. Now you will excuse this long article, as I am not a reporter. But I was treated so nicely that I could not resist telling your readers that if any one wants a day off, visit Aptos Ranch and if you are at all "horsey" you will find it a day well spent. Yours truly,

WM. SINNOCK.

ANOTHER GOOD CIRCUIT.

Harness racing in the Southwest is undergoing an unusual boom, no doubt brought about by the phenomenally successful meeting held the last week in the year at Phoenix, Ariz., says Palmer Clark. It was the occasion of the inaugural territorial fair, and not only were the races of a very high class order, but the management were accorded such generous patronage that they at once announced dates for a spring meeting to be held the fourth week in April.

A number of gentlemen present were so enthused over the success of a meeting conducted on such a high plane and liberal scale that a movement was inaugurated to organize at El Paso, Texas, and thus complete the chain of meetings that will make an ideal spring circuit. These two meetings are to precede the New Mexico and Colorado circuit, beginning at Albuquerque, and follow down the line to Las Vegas, Trinidad, Pueblo, Colorado Springs and Denver. The old half-mile track at Albuquerque has been practically abandoned, and a new mile track, with a half-mile in the center, is now under construction on the highlands on the plan of the one at Phoenix. This is just what was needed to popularize the sport in that wide-awake town.

This circuit would then be, as at present planned: Phoenix, Ariz., fourth week in April. El Paso, Texas, first week in May. Albuquerque, N. M., second week in May. Las Vegas, N. M., third week in May. Trinidad, Colo., fourth week in May. Pueblo, Colo., fourth week in May. Colorado Springs, Colo., second week in June. Denver, Colo., third and fourth weeks in June.

The well known real estate dealer T. C. Barnett of San Jose owns a very fine pair of matched trotting mares, full sisters, by Poloma, son of Fallis 2:23 by Electioneer, that are not only well matched in color, style and action, but are fast trotters both double and single. Neither have ever had any regular training, but have learned to step fast on the road. Last Fourth of July at the "sensational speed exhibition" given at the San Jose track by Frank Granger, promoter and ex-superintendent, one of these mares, only six weeks out of pasture, and first time in single harness, was hitched to sulky and driven by her owner, an amateur, a mile in 2:22½. The other mare is not quite so fast, but together they can trot in 2:30. These mares are daily seen on the streets of the Garden City and universally admired. Mr. Barnett is breeding them both this spring to the great Kinney Lou 2:07¾.

NOTES AND NEWS.

Hazel Patch 2:02½ will probably be stabled at the San Bernardino race track for the next few months.

Cal Rodriguez came up from Gonzales, Monterey county, this week, to take a thoroughbred stallion back for Mr. Chris Widemann of that place, who will turn the horse out with a bunch of range mares to raise saddle horses. The common saddle horse that has no particular gaits except walk, trot and gallop, but is sound in wind and limb and of average size, is getting very scarce in California, and Mr. Widemann is confident the demand for them is on the increase. Rodriguez has taken up Mr. Widemann's two pacers, Joe Robin and Fred W., two full brothers. Joe Robin worked a mile last year very handily in 2:13 but was taken sick and failed to make a very good showing. This year Cal thinks he will be able to get a low mark.

We have heard of horse carrots growing to pretty large dimensions in California, but Captain Watson, the well known marine surveyor of this port, raised one on his place in Oakland recently that weighed 12 pounds and 9 ounces. The captain drives good horses on the road that can show speed at the trot when necessary to win a brush, and it may be that these big carrots he feeds them are of a special variety that impart that much desired qualification.

Mr. E. C. Peart, the well known merchant and horse breeder of Colusa, recently wrote to an official of the Yuba and Sutter Driving Club at Marysville as follows: "I have the Colusa track and pasture leased and we are now making an effort to get up a three days' race meeting in April. I think we can do it O. K. and we shall want all the horsemen from Marysville. We shall give two harness and two or more running races each day. They will go with a rush, I think. Please tell the boys to get ready for April."

J. M. Herbert of Denver has recently purchased from C. W. Williams of Galesburg, Ill., a three-year-old colt by Belsire 2:18 out of a mare by Jay Bird.

Bids for furnishing the material and constructing fifty-two stalls for horses at the race track near Concord, were opened February 3, and the same was awarded to J. W. Guy of Concord. There were several bidders. The contract price is \$2275. The appurtenances will be built in two sections of 312 feet each. The stalls will be 12x12. In addition, outside the bid, several tanks will be erected and pipes laid to furnish water at intervals. Minor improvements of lesser character will be installed, and in many other respects the work will be prosecuted without delay. Mr. Guy looks for lumber to arrive on the ground this week, when the actual work of building the new stalls will begin.

W. G. Duncan of Wasco, Oregon, visited his former home in Yolo county, California, last week, and while there purchased from Gottleb Mast two good jacks, paying \$1325 for the pair. Mr. Duncan will engage in breeding mules on his ranch in Oregon.

The two-year-old pacer Oregon Patch by Joe Patchen out of Bhima by McKinney, second dam by Altamont, is just being broken by his owner in Oregon and is said to have a phenomenal lot of speed and a level head as well. He certainly ought to on his breeding.

Budd Doble purchased recently two yearlings by his great horse Kinney Lou. The dam of one is by Nutwood Wilkes, sire of John A. McKerron 2:04½, and the great North Star (3) 2:13½; second dam by Sidney, grandsire of Lou Dillon 1:58½; third dam by The Moor, sire of the greatest of brood mares, Beautiful Bells; fourth dam by Ben Lippencott, son of Williamson's Belmont. The dam of the other is by Near-est, son of Nutwood Wilkes and full brother to the great McKerron; second dam by Anteo 2:16½, son of the champion sire of champions, Electioneer; third dam by Venture 2:27, son of Williamson's Belmont and sire of the dam of Directum 2:05½, champion four-year-old trotter of the world. Mr. Doble has great faith in the success of the McKinney and Nutwood Wilkes cross and it will be seen that both of these youngsters unite the blood of both the above great horses. The second dam of one is by Sidney, a great speed sire, and the second dam of the other is by one of Electioneer's best sons, and Electioneer is the greatest of all sires of early and extreme speed, and both are backed up by the blood of the great thoroughbred, Williamson's Belmont—blood more highly prized than any other thoroughbred strain appearing in the pedigrees of California bred trotters.

A down east Yankee thus puts it: "I pity the man who says the automobile will drive out horses. There is all the difference in the world between the horse and the machine; the difference between the living and the dead; between the game, resolute, do-or-die sort of horse that compels admiration, and the inanimate grandfather's clock that keeps time in the front hallway. Were the old faithful clock to stop forever, you could not ring a tear out of the children with a force-pump; but they will cry as if their hearts were broken over a St. Bernard that has passed on to the animal heaven. The steam engine and the trolley have not put the horse out of commission, and the automobile will fail to do so. There is a practical as well as a sentimental phase of this matter. The automobile can do some things that a horse can not, also a lot of things that a horse will not. Is there an automobile that can travel in soft mud in comparison with horses, and are there any places in the United States where a wayfaring person does not find mud at certain seasons of the year? It is not sentiment but irresistibly logical facts that will prevent the automobile from supplanting the horse and the horseless age will not come until the arrival of the manless age, womanless era and dogless epoch.

Harry Brown has a string of horses at Pleasanton track that should have a money winner or two among them. His mare Helen Keyes by Sidney Dillon, out of Diva by Piedmont, is looking in good shape. This mare is a wonderful trotter. She was taken east last year by Monroe Salisbury, but was not started. In Chas. DeRyder's hands last year at Pleasanton she trotted a mile in 2:12 after three months' work, and the last eighth was in 15 seconds, a two minute clip. Mr. Brown has not commenced to move her up this year, but she has the speed at all times and is a great prospect. Brown has a gelding by Diablo that is a sure trotter and if he remains sound will be able to give Diablo a representative in the 2:15 trotting list along with his numerous pacers with records below that mark. A Sidmore gelding which Brown is working is also a speedy prospect.

One of the best looking two-year-olds that is eligible to this year's Breeders' Futurity is owned by Mr. F. W. Perkins of Oakland, who bred him. The colt is by Mr. Perkins' good stallion Athamax and is out of the mare Gary Pettus by Pittock, son of Altamont. After getting the colt nicely broken his owner has sent him up to S. W. Lillard of Davisville, who will work him some over the track there. As Mr. Lillard has leased Athamax for the season of 1906, the colt will give the breeders of that locality an idea of what sort of sire Athamax is.

Mr. Geo. C. Need of Galt has recently purchased the trotting bred stallion Gold Crown by Falrose out of a mare by Sable Wilkes, and he is an inch and a half over sixteen hands. He weighs 1200 pounds and is a fine model of a horse.

Mr. and Mrs. A. J. Van Nuys of Belle Mead, N. J., have announced the betrothal of their daughter Marie Elwood to Arthur Caton Thomas, New York representative of the American Horse Breeder.

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich, July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle Sept. 3 to 8
Salem Sept. 10 to 15
North Yakima Sept. 17 to 22
Spokane Sept. 24 to 29
Walla Walla Oct. 1 to 6
Lewiston Oct. 8 to 13

Everett was given the privilege to select such dates as they may decide on.

NUTWOOD 600

Sire of 174 standard performers, his sons have sired 977, and his daughters have produced 268 in the list

JOTTINGS.

THE GREATEST TURF SCANDAL in many years broke suddenly on the trotting horse world Saturday morning of last week, when it was announced that the famous \$5000 gold cup won by Mr. Elmer E. Smathers of New York with Major Delmar, when he defeated Mr. C. K. Billings' Lou Dillon at Memphis in October, 1904, had been seized on a writ of replevin by the sheriff of New York; that the seizure was made as the result of a suit brought by Murray Howe on behalf of the Memphis Trotting Association, who claimed the cup had been obtained by Mr. Smathers through fraud; that the fraud consisted in having had Lou Dillon drugged just before the race, and that Geo. Spear and Ed Sanders had made affidavits to the effect that Mr. Smathers had paid Ed Sanders \$5000 for administering the drug to Mr. Billings' mare. The dispatches further stated that Mr. Smathers had put up a bond of \$7000 and regained possession of the cup and would vigorously fight the charges made against him, which he denied in toto.

This was indeed a scandal, and as the first few preliminary announcements were followed day after day with additional charges and recriminations, the morsel became richer and richer, and was rolled with much unctious under the tongues of horsemen and all others who are interested in anything pertaining to the turf. Opinions were formed and freely expressed on all sides, the majority of them having little foundation outside the newspaper talk. Whether or not Lou Dillon was drugged at Memphis will not be established until the evidence of both sides is presented in court or before other proper authorities, and it is impossible for anyone to form an unbiased opinion on the subject on the evidence thus far submitted through the press. The salient points of the case are about as follows:

The Memphis Trotting Association alleges fraud on the ground that Mr. Billings' mare was drugged at the instigation of Mr. Smathers.

It has filed affidavits made by Geo. Spear and Ed Sanders, the former trainer for Smathers at the time, but the full text of these affidavits has not been printed as yet. The press report is that Spear makes oath to the statement that at the request of Mr. Smathers he had a talk with Ed Sanders, brother of Millard Sanders, who trained and drove Lou Dillon to her record, and suggested that Ed Sanders fix the mare so that she could not win. This Ed Sanders agreed to do for \$10,000. Smathers thought the sum too large and offered \$5000. Further negotiations were between Smathers and Ed Sanders. The latter is quoted as making affidavit that Smathers paid him \$5000, and the following words are said to be copied from this affidavit, but the full text of the document is not given:

"I prepared a rubber bag, tightly tied, capable of holding eight ounces of quicksilver. After a warming-up heat the mare appeared to be so good that I decided the little lead I had put in the quarter boots she wore was not sufficient to stop her. By means of being well acquainted with those in the stable, I got to the mare, and introduced the bag containing eight ounces of mercury."

It will be noticed by careful reading of the above statement that Sanders does not make it plain whether he "introduced" the bag of quicksilver into the mare or simply placed it in her boots where he claims to have placed a little lead prior to her warming up heat.

Outside the complaint in the case and the affidavits of George Spear and Ed Sanders, none of which have thus far been printed in full by any journal that has reached this coast, the only other sworn evidence pertaining to the case is an affidavit made last Wednesday by Dr. A. H. Fehr, now at the Emeryville track at Oakland, who deposes as follows:

"At the time of the trotting race meeting at Memphis when the celebrated race between Major Delmar, belonging to E. E. Smathers, and Lou Dillon, the property of C. K. G. Billings, was trotted, I was employed in the position of official veterinarian of the association and was also in the employ of C. K. G. Billings. I have known all along that there was something wrong with the race, but never considered that it was up to me to make any statement in connection with the case until the recent attempt of what I consider to be an unwarranted attack upon Mr. Smathers had been brought out.

In a few words I can say that after the first heat between Major Delmar and Lou Dillon was trotted I was summoned by Murray Howe in a great hurry. Mr. Howe seemed excited and the first thing he said

to me was that Lou Dillon had an attack of the thumps, or what we technically term in the profession spasmodic contraction of the diaphragm.

I went to the stall where the mare had been taken immediately after the first heat. She was closely guarded by a special officer, and Murray Howe, who was at the time the personal representative of Mr. Billings, directed me to treat the mare for the thumps. I examined her and found nothing wrong with the mare more than some nervousness, such as any horse would show after coming out of a hard race. In other words, I consider that I was simply ordered to give a dose of medicine where none was needed. Mr. Howe insisted that the mare should be treated for thumps, and, of course, it is commonly known that belladonna is the drug used in such cases. It is also common knowledge that such a drug will deaden any animal and kill speed. Therefore, acting under orders, I administered an abnormal and unusual dose of the drug, which was sufficient to kill the speed of the strongest and fastest horse in the world for the time being. Under those circumstances it was impossible for Lou Dillon to win the Memphis cup, a fact which Mr. Howe and Mr. Billings both knew at the time as well as I.

DR. A. H. FEHR.

Subscribed and sworn to before me this 14th day of February, 1906.

J. J. KERRIGAN, Notary Public.

After reading all that has appeared in the daily press so far, I for one cannot form a just opinion as to the guilt or innocence of Mr. Smathers. It is a remarkable case, the most remarkable in the history of the trotting turf of America. The testimony of Ed Sanders and George Spears, in the absence of corroborative evidence that will prove their statements beyond the possibility of a doubt, should not be considered for a moment by anyone. Men who will engage in such work for pay will make affidavits for pay, and their unsupported testimony should not be given any weight at all. On the other hand, such men as Murray Howe and the directors of the Memphis Trotting Association are not of the sort that can be easily deceived, and they must have additional evidence which in their opinion is conclusive of the guilt of Smathers, or they would not try to make a case of the testimony of Sanders and Spear.

The race was a memorable one. Lou Dillon had established her claim to the trotting championship by trotting a mile the year previous in 1:58½. Major Delmar's record was 1:59½, and there was a great deal of controversy as to the comparative abilities of the two as actual race horses. The Memphis cup race had been inaugurated two years previous by the Memphis Association. It was for trotters to be driven to wagon by amateurs. Mr. Smathers had won the first leg in 1902 with Lord Derby, defeating Mr. Billings' horse The Monk. For the second leg Mr. Smathers named Major Delmar, and Mr. Billings Lou Dillon. The latter won in two straight heats. The third leg was to decide the permanent ownership of the beautiful gold trophy. The same drivers with the same horses that contested in 1903, were to start. The mare was favorite. Delmar drew the pole. He got away in front and reached the half in 1:00½, Lou Dillon lapping him here, and as she was driven very wide was considered to have gone to the half faster than the Major. At the head of the stretch he drew away, however, and won as he pleased in 2:07, the mare evidently distressed. The poor performance in the first heat caused alarm among Lou Dillon's admirers, and her trainer called for the advice of a veterinary surgeon. After a close examination Lou Dillon was pronounced to be suffering from a case of "thumps." Mr. Billings therefore decided to start his pet, only in order to allow Smathers to proceed over the course. In the second heat Lou Dillon was pulled to a slow jog, Major Delmar continuing over the mile in 2:18½. The fractional time of the first heat was 0:30¼, 1:00¾, 1:31¾, 2:07.

So the cup went to Mr. Smathers, and Mr. Billings publicly congratulated his adversary on his win.

Four days after this memorable race Lou Dillon was good enough to start to beat 2:01¾ without a pace maker in front. Millard Sanders drove her, and while she did not lower the record she went away slowly but reached the first quarter in 29¾ seconds. Increasing her speed she got to the half in 59¾ seconds, was at the three-quarters in 1:29¾. She faced a strong wind up the back stretch which made her performance most remarkable, and finished the mile in 2:01¾, tying the unpaced record of Major Delmar. The next day she tried it again but 2:02½ was the best she could do. November 8th she again started to beat 2:01¾ and trotted her mile unpaced in 2:01¾, lowering the record. November 11 she started against this record and made her mile in 2:01. These per-

formances do not support the theory that she was permanently injured by drugs.

On Saturday last, when the San Francisco Examiner printed the first account of the Memphis Cup scandal which reached this coast, I met Millard Sanders at Pleasanton. At that time the Examiner's meagre account of the affair stated that affidavits had been made by Sanders and Spear, failing to give their initials. Millard, who was surprised at the publication, immediately stated that he had made no affidavit in regard to the matter and knew nothing of it. (It was not until the following morning that the papers connected Ed Sanders' name with the affair.)

In Millard Sanders' talk to me about that race, he was very careful and deliberate in his statements, and seemed to doubt the alleged drugging of the mare. He said that Mr. Billings drove her very wide, that the rate of speed to the half was faster than he himself would have driven it to wagon, and conveyed the impression that she had the "thumps" from some natural cause. He stoutly affirmed that some of the miles he drove her during the three weeks following were the greatest miles she ever trotted. And then he made this very significant statement.

"Doc Tanner, who manages and trains Mr. Billings' horses, has a 'dope' or heart medicine which he often gives his horses. Many times he asked me to administer a dose of it to Lou Dillon when she was to make a great effort to lower a record. I always opposed giving it to her, and sometimes Mr. Billings would come to me and ask me to let the mare have it as Mr. Tanner thought it would help her. Sometimes I would make a feint of giving this dope, throwing it all away at times, and again letting her have a very little of it. I was opposed to giving her anything of the kind as I did not believe she needed it. When she trotted her mile in 1:58½ in 1902 she did not have a drop of dope of any kind."

There is not a man in California who believes that Millard Sanders ever had anything to do with the drugging of Lou Dillon or knew anything about it. In an interview last Sunday he said:

"People turn to me, thinking that I must know something about this sensation. It is more of a surprise to me than any man on the face of the globe. If I were put on my oath this minute I would say that I do not believe these reported affidavits regarding lead being put in the quarter boots of Lou Dillon and the administering of quicksilver to the mare. I don't want any one person in the world to think that I ever put even the weight of a straw in the way of Lou Dillon. I loved Lou Dillon and I was heartbroken when Major Delmar beat her in the gold cup race. It was a crushing blow to me as I regarded the mare as good as she ever was in her life. I never accepted or received one dollar for doing or countenancing anything that would hinder this mare in any way. I was always faithful to Lou Dillon and C. K. G. Billings, and I want every man to believe that I am telling the absolute truth."

And every man that has known Millard here in California will believe him, and sympathize with him in this matter. When the case comes up in court it will be watched with intense interest, and until the testimony is given and sifted no one is justified in forming an opinion as to whether Lou Dillon was drugged or not.

The "doping" of horses to accelerate their speed or to enable them to carry it farther should be very severely legislated against. The running turf has had no end of scandals from this cause and while there are stringent rules against the practice it is almost impossible to stop it. The administration of heart tonics is injurious to the horses and when once a horse has become accustomed to its use in races he is a "dead one" without it, and there is no easier way to make a horse "run for the books" than to enter a dope horse in a race and refrain from giving him his dose. The trainers who came back from the Grand Circuit in 1905 say that the little mare Grace Bond doubtless had a big dose of heart tonic when she won that five-heat race in the Kentucky Futurity that year. Our readers will remember what a great story went the rounds about that race. How after this delicate little trotter had won two heats in the remarkable time of 2:09¾ and 2:09¾, she dropped back to fourth place in the third heat and finished fifth in the next. The time was 2:11¼ and 2:13. Then all her boots were taken off and every strap that could be spared was removed from her harness. Thus relieved she seemed to recuperate and lost somewhat the tired feeling she had and trotted the fifth heat in 2:09¾, winning the race. Some of the California trainers who were at the Lexington meeting that year say it was

not taking off the weight that brought the mare around so nicely, but a dose of heart tonic that revived her. Dr. McCoy, in an article condemning the use of these stimulants, intimates the same thing. Could it be possible that Lou Dillon had enough of a heart stimulant the day of the Memphis race to give her the "thumps"? Stranger things have happened.

H.

FROM A LINE OF GREAT BROOD MARES.

Our front page picture this week is the reproduction of a recent photograph of the McKinney stallion Constructor, owned by James Smith of Vallejo. Constructor is standard and registered, his number being 39569, and is an own brother to that very fast trotting stallion Tom Smith 2:13½. Constructor is a horse of grand proportions, a square trotter, and while having no record has shown his speed in a race. He was formerly called Duplicate, and under that name started in a race for three-year-olds at the Breeders' meeting at Petaluma in 1903. The fast mare Tuna, whose record is now 2:08½, won the race, but Constructor finished in second position in two heats, which were in 2:22½ and 2:24½, and was a close second each time. This shows that he possesses speed, and although he has not been raced since, he will be able to take a low mark if trained. Constructor is a fine looking black stallion, measures fifteen hands, two and a half inches over the withers and an inch higher over the loins. He weighs 1100 pounds. The name of his sire, McKinney 2:11½, appears oftener in the trotting turf journals than that of any other stallion in America, and owing to the fact that he is the greatest sire of 2:10 and 2:15 speed, living or dead, and that so many of his sons are doing stud duty, the McKinney family is destined in a few years to be one of the greatest of the Wilkes tribe, as it is breeding on and producing standard speed in every direction. McKinney has forty 2:15 performers and twelve in the 2:10 list. He stands at the highest service fee asked for any trotting stallion in America—\$500, and gets the mares. It is superfluous to talk about McKinney, as every reader knows his fame and his accomplishments on the track and in the stud.

Daisy S., one of the greatest brood mares in California, is Constructor's dam. She is by McDonald Chief 3583, a producing son of Clark Chief 89. The latter sired the dams of Martha Wilkes 2:08, one of the greatest race mares, and Phallas 2:13½, that held the champion stallion record back in 1884 and sired 27 standard trotters and two standard pacers, including Norman B. 2:06½. Daisy S. has produced four standard trotters and has three or four more able to enter the list at any time they are given the word. Her list of performers is: Tom Smith 2:13½, Gen. Vallejo 2:20½, Little Mac (3) 2:27, and Sweet Rosie 2:28½.

The second dam of Constructor is another great brood mare—Fanny Rose by Ethan Allen Jr. 2903, son of Ethan Allen, one of the greatest of the renowned Morgan family. Fanny Rose produced Geo. Washington 2:16½, Columbus S. 2:17 and Solano Chief 2:29½. Geo. Washington sired the dam of that fast trotter Pat Rose 2:12½. The third dam of Constructor, Jenny Lind, also occupies a place in the Great Brood Mare Table. Jenny Lind's dam was said to be a thoroughbred mare brought to this state from Kentucky in early days for breeding and racing purposes. Her owner died and the pedigree was lost, but her filly foal, dropped soon after her arrival in California, was raced and won, beating some of the best bred thoroughbreds in California. Bred to trotting bred stallions, she produced one standard trotter, Prince Allen 2:27, and two daughters that are in the Great Brood Mare list, viz., Fanny Rose, noted above, and Fanny McGill, dam of Scotty 2:19½, and Trilby 2:21½.

It will be seen that Constructor's first, second and third dams are all great brood mares and every successful breeder knows that stallions bred that way are the ones that can be expected to sire speed with certainty. Not only were these three mares producers, but they produced handsome, large horses that won hard fought races and have a great reputation for gameness.

Constructor will make the season at Vallejo at the very low fee of \$25 and should get a large patronage at this figure.

THE CAPTAIN JONES.

John Green has three head of the get of Captain Jones in his string at Pleasanton. Lady Jones 2:16½ looks as if she could take a few seconds off her record, and the three-year-old Chehalem is just about one of the nicest and raciest looking horses that one can find at the track. "Red" has purchased a commutation ticket and goes to Pleasanton from San Francisco every morning and back every night. As he reaches the track by 9 a. m. and leaves at 5:20 p. m. he has all the time necessary to devote to his horses, and has the advantage of living where he can get terrapin for dinner if he wants it.

A FUTURITY WINNER.

Murray M. 2:14, winner of the Pacific Breeders' \$6000 Futurity of 1904, will make the season of 1906 at the race track at Los Angeles in charge of Prof. H. B. Freeman. Murray M. is a son of Hambletonian Wilkes, sire of three with records below 2:09, and his dam is Anna Belle, one of California's greatest brood mares and the dam of three in the 2:15 list, and four in 2:20. Murray M. stood 16 hands as three-year-old, and weighs about 1200 pounds. He is a beautifully gaited trotter, and is bred right and gaited right to be a sire of extreme speed. See his advertisement in this issue.

N. T. A. BOARD OF REVIEW.

New York, February 14.—The National Trotting Association at its twenty-third biennial congress, held to-day, made many important changes in its rules to govern the trotting turf for the coming year. The adoption of a new rule to prevent drivers or riders from resorting to the use of the watch while in a race led to an animated discussion, but was finally adopted by a vote of 24 to 6.

Another new rule in regard to drivers and riders which was adopted was as follows:

"A driver or rider cannot be expelled from the National Trotting Association for non-payment except where he is the nominator or owner of the horse."

On the recommendation of the rules committee a rule was adopted allowing any circuit of tracks of five or more members to have its own board of stewards.

Rule 43 was amended to read: "That in all performances against time a pacemaker may accompany the trotter or pacer, but shall not run ahead of him to break the natural resistance of the atmosphere."

The reason announced for passing this rule was because experienced has shown that the wind shield aided the trotters and pacers to gain records from three to eight seconds faster than these same horses were capable of making under normal conditions.

Mr. Billings tendered his resignation from the board, and the resignation was accepted. The board felt that Billings should have had the Memphis Cup matter brought before it for investigation, and thus prevented the scandal from being aired in the courts.

After Billings' resignation had been accepted H. K. Devereaux said: "We all deplore the turf scandal which involves Billings and Smathers. Billings has seen fit to decline re-election as a member of the board. If it goes out that he is not re-elected, and there is no explanation attached, it may appear that it is a reflection upon him. I move that this body pass a resolution thanking Billings for his service in the past and expressing regret that he cannot accept re-election." The resolution was then adopted.

The following officers were elected: President, P. P. Johnston, Lexington, Ky.; first vice-president, Morgan G. Bulkley, Hartford, Conn.; second vice-president, N. T. Smith, San Francisco.

The district boards elected include: Pacific district, A. B. Spreckels, John C. Kirkpatrick and E. P. Heald, all of San Francisco.

A REAL TROTTER.

Breeders who are looking for a really high class and highly bred McKinney stallion to send their mares to this year should not overlook the fact that Geo. A. Kelly's young trotter Bonnie McK is in the stud at Pleasanton. Charley De Ryder saw this horse driven by and said: "There's a real trotter." Monroe Salisbury saw him work a mile and told Mr. Kelly that Bonnie McK was worth two of that mare he used to own, meaning Anzella 2:06½. When experts like these gentlemen have such things to say of a young trotting stallion it is worth while for the breeders to sit up and take notice. Bonnie McK's breeding has been commented on before in these columns, but it is as well to again state that he is by McKinney 2:11½, his dam the trotting mare Bon Silene 2:14½ by Stamboul 2:07½, his second dam that great mare Bon Bon 2:26 that is by Simmons 2:28, and has produced Bonnie Direct 2:05½ (sire of Bonalet, three years, 2:09½), Rector 2:10½, Bonsilene 2:14½ and the stallion Bonnie Steinway that paced a mile in 2:08½ with the last half in 1:02½ at Pleasanton last year. The next dam is Bonnie Wilkes, dam of four in the list, and the next is thoroughbred. There's no better breeding anywhere. Bonnie McK will be raced this year. He trotted a trial in 2:19 last year, and is able to take a record below 2:15. Look him over when you go to Pleasanton, or send to Geo. A. Kelly for his card containing terms, etc. A short tabulated pedigree of Bonnie McK appears in his advertisement in this issue.

SANTA ANA DRIVING CLUB.

The Santa Ana Driving Club has arranged to hold another meeting at the local race track on February 22, in accordance with the plans of the organization as mapped out earlier in the season, and already the promise is that a good card will be offered. All of the Fullerton horses which took part in the first meeting will be on hand, and besides these there will be a good representation from other parts of the county. There will be four races scheduled for the afternoon and each one will be a contest. In the gentlemen's road race, seven entries are talked of for sure, and the field may possibly be larger, as there are several horses owned at Santa Ana and at Orange that are good enough to go with the best green roadsters in the State.

The silver cups to be given as prizes are on exhibition. The cups are very handsome and make acceptable and valuable trophies.

To add to the interest of the meeting, there will probably be a match race between Burnut, owned by George W. Ford, and an unknown from Riverside, said to have gone the route in 2:16. This will be a feature thrown in free as an additional item of interest for sport lovers who believe a good horse race is one of the most entertaining things in the world. In the meantime horses entered for the various events are being worked on the local track and every assurance is given that the coming event will be one of the best affairs of the kind ever held in Santa Ana.

That good mare Lemonee 2:18½, half sister to W. G. Durfee's good trotter Petigru 2:10½, died recently at Patchen Wilkes Farm. She was in foal to Peter the Great 2:07½.

WELL BRED HORSES FOR SALE.

In our advertising columns will be found the announcement of sale of several royally bred horses owned by the Sacramento Valley Stock Farm. The proprietor of this farm in starting out in the breeding business many years ago made for his guidance the following deductions concerning the breeding of trotters:

First—Most of the successful producers of trotters trace in the male line to Hambletonian 10.

Second—A successful producing male line of Hambletonian 10, as a rule, is represented by individuals that in each and every generation have been successful as producers, no generation being represented by an individual that has failed to produce well, unless it be the young sire representing the last generation, which has not yet had an opportunity to demonstrate his producing quality.

Third—The most successful male lines of Hambletonian 10 (through which we may expect to eliminate chance as much as possible in the breeding business) are those that in each generation are represented by an individual that has produced better than any ancestor of the preceding generation, thus giving improvement in the producing quality of each succeeding generation from Hambletonian 10 down.

Fourth—The male lines of the sire and the sires of the first, second, third, fourth and even subsequent dams are all important in estimating the producing quality of a pedigree.

Fifth—Outcrosses of blood other than that of Hambletonian 10 in a pedigree are to be estimated of value only when these outcrosses have demonstrated their ability to produce trotters independently of the blood of Hambletonian 10, or in conjunction with the blood of Hambletonian 10 as producing the dams and grandams of performers or producers.

Sixth—Thoroughbred blood in the trotter is of value only when it is the blood of particular thoroughbred male or female lines that have proven ability to produce trotting speed, all other thoroughbred crosses being detrimental and retrogressive. Such thoroughbred blood is as much trotting blood as the blood of the standard bred horse and should not be considered "thoroughbred blood in the trotter."

By interpreting the pedigrees of the sires and brood mares of the Sacramento Stock Farm in accordance with the foregoing deductions of the owner, a fair estimate of the blood lines of each individual for breeding purposes will be easily obtained.

SWEET MARIE AND WENTWORTH.

In New York February 1st, Emerson E. McCargo of Philadelphia approached a couple of newspaper men and said:

"I am anxious to match Wentworth against Sweet Marie or Tiverton, or both. There has been considerable beating about the bush and talk about such a matter, so I came over here today with the money in my pocket to effect a match. I don't seem to be able to reach the right parties, so I have decided to issue a formal challenge which I would like to give to the press."

Mr. McCargo then dictated the following challenge: "I, Emerson E. McCargo, trainer and driver of Wentworth 2:04½, world's champion trotting gelding, hereby challenge the trainers, owners, drivers and managers of Sweet Marie 2:04½ and Tiverton 2:04½ to a match race, or a series of match races, for \$1500 to \$2500 a side per race, winner to take all. I will race either horse separately or make them three cornered events, as owners may select, race to come off during the month of July, 1906, date and track to be mutually agreed upon."

"I mean business and am ready to post forfeit at short notice. EMERSON E. MCCARGO."

This challenge appeared throughout the country in the various dailies of February 2d, and provoked the following reply from Alta P. McDonald, in whose charge Sweet Marie now is.

"I, A. P. McDonald, driver of Sweet Marie 2:04½, hereby agree to match her against Wentworth 2:04½, in response to the challenge issued by Emerson E. McCargo. I accept his terms for amount of purse mentioned with the understanding that said sum be \$2500, the maximum named by Mr. McCargo."

"I am ready to meet the Wentworth party in New York within the next two weeks to make final arrangements and post forfeit in the sum of \$500 to \$1250. I agree to make the race a match event between Sweet Marie and Wentworth, or a three-cornered race with Tiverton included."

"I have repeatedly stated my willingness of racing Sweet Marie against any trotter in the country, and hereby back my declaration by accepting Mr. McCargo's challenge, the proposed race to be held during the month of July, 1906, previous to the opening of the Grand Circuit meeting at Detroit, over any track mutually agreed upon."

As all parties seem to be agreed in this matter the only thing remaining to do is to put up the money and get ready for the race.

The committee in charge of the racing matinee, which is to be held on the Bakersfield race track on the afternoon of Washington's birthday, is preparing the longest and what will undoubtedly be the best program that has yet been run off at that race track. Many of the fastest horses in Kern county are already entered both in the harness and running races. The free-for-all trot and pace will be the feature of the afternoon.

Harry McKerron 2:24½, trial 2:10, was sold a few days ago by Chas. A. Otis Jr. to a syndicate of Cleveland gentlemen for the sum of \$7000. It is reported that he will be trained for the M. & M. this year. He is by John A. McKerron 2:04½, son of Nutwood Wilkes 2:16½.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

Proper's win of the Palace Hotel Handicap last Saturday, worth \$2,700 to W. B. Jennings, makes the Preston-pans horse the heaviest winner at the local meeting. He will now be given a much-needed rest before being taken to the far East. The big bay is a good piece of racing machinery. Returning from the East with the reputation of being about the best handicap horse on the continent, Proper has fully sustained his "rep." His record is eight starts here (in the first he was probably not fit, was caught in the webbing and finished sixth). After that he won four races, was second twice and third once. When his racing days are over Jennings should have a high-class sire with the much-prized Voltigeur blood closer up than in any horse in the world (except other sons and daughters of Preston-pans). The last-named was a son of the same Prince Charlie that sired Salvador, Senorita, imp. Pirate of Penzance, imp. Wagner, Lochiel, Princess Bowling, etc., and his dam was Beatrice by Voltigeur. Prince Charlie (a 2000 guineas winner and second for the St. Leger) was by Stockwell's best son, Blair Athol, out of Eastern Princess, by Surplice, winner of the Derby and St. Leger. This Prince Charlie branch of the Stockwell tribe is one exceedingly prolific of good sires, there being others nearly equal to Pirate of Penzance, Wagner and Lochiel, the latter a horse who has headed the "winning stallions" list in Australia. Wagner would have been famous if he had never sired anything but Imp and Flying Dutchman. The Pirate of Penzance tribe is noted for its good two-year-olds and the ability of all the members of the family to run in the mud with success. Proper's dam, Prim II, was by Ben Ali (son of Virgil, grandsire of the greatest of American sires, Hanover); his second dam was the good producing mare Prude (own sister to Katie Creel); by King Alfonso; third dam Marguerite (a fine producer), by Lexington, and on through My Lady, Motto, Lady Thompkins, Katy Ann and Medoc's dam (five great producers), to the old Montague mare, the source from which came Lexington.

The rain seemed to bring a return of "form-running," which had been conspicuously absent for the best part of the time since the flyers left Ingleside. At the last-named place the running was very true, and a person who could not pick winners at that track could not do so anywhere, in all probability. The bookmakers were a very sorry-looking lot at the San Francisco course, but their sad faces wreathed in smiles and they rubbed their hands gleefully when the races had been on at Emeryville for a few days. There was little or no form to the running, and the "reversals" shown by a host of horses was so marked that the failure to mete out punishment to the offenders was the wonder of the race-goers. One of the great in-and-outers died the other day, and so rank had been her running that little sympathy was expressed over her demise, but on the contrary the majority of form-players seemed to be glad that the mare had passed to the land where she could play no more tricks and extract no more coin from their pockets. Edinborough is a fine sample of recent running. On February 10th he won from Sad Sam, Pickaway and others over a five-furlong course in the mud with 110 pounds up and Dugan riding. February 12th the black horse, with the same rider up and two pounds more in the saddle, runs absolutely last, behind the horses he had beaten in a five furlong race in the mud. Harbor was beaten over thirteen lengths in a mile and fifty yards race February 9th, and on the 12th, in a mile race, and in new hands, nearly won. But in the words of Jimmy Fadden, "Wat t'ell?" However, it does look as if to be successful these days on the race course a handicapper must needs be not only clever at figuring horses' capabilities, but must be an adept at finding out owner's prices and jockeys that will or will not follow owner's instructions.

The once good race mare Esherin, a former winner of the California Oaks, died February 9th, right after running in a mile and fifty-yard dash. She was owned by Leslie Coggins and was a very useful racing tool, principally noted in her later days as the champion form flipflop at the track.

Speaking about Esherin makes one think of her rival in the opposite direction, viz., consistency. Bannock Belle, the one spoken of, is second to Tom McGrath, number of starts considered, at the meeting. On the 29th of November the Bannockburn mare ran third, and in seventeen starts thereafter she was "out of the money" just once, her record being three wins, eight seconds, six thirds and one fourth, all of which reflects the utmost credit upon her owners, Jones & Co. Angelica has been "in the money" seven times out of eight. Bucolic six out of seven, Cruzados won three out of four races here, Cloudlight has won three races and been "out of the money" just once in seven trials. Cerro Santa's record is two wins and a close second in three starts up to last Tuesday; Dr. Gardner has started nine times, unplaced, second, eighth, then six wins in a row; Ed Lilburn started six times, winning three races and being second twice; Fireball has been one-two-three in six races out of seven; Firm Foot ran second and then won three in a row; Forerunner, in his last nine races, has won four, been second once, third four; Gateway, in sixteen starts, has been "in the coin" on thirteen occasions; Gossiper started twelve times, winning six, being second twice and third once; in eleven

starts Hi-Caul-Cap won thrice, was second thrice and third twice. Lady Goodrich started six times, winning twice, being second twice and third once; Lily Golding, Lem Reed, Military Man, Nagazam, Northwest, Nigrette, Native Son, Nine Spot, Proper, Pal, Palemon, Pinkin Peerless Lass Royal Rogue (in ten starts not worse than third), Romaine (nine times in the money out of ten starts), Rey del Mundo, Ralbert, Ralph Young, Supreme Court, Tocolaw (nine out of ten times in the money, including four wins), Toupee (nine out of ten times in the money, including four wins), Tom McGrath (in fourteen starts in the money thirteen times, including seven victories, and holding the place of honor), The Lieutenant, Tawasentha (three wins in the same number of starts), and Viola B. (the same) come under the heading of extremely consistent horses that have raced here since November 11th last. The inconsistent horses, many of which ought to have been barred long ago for in-and-out running, are legion, and their poor showings would take up too much space and cause an overflow of wrath in the detailing, hence I will leave it out.

THE BLOOD HORSE.

Look, how 'round his straining throat
Grace and shifting beauty float;
Sinewy strength is in his reins,
And the red blood gallops through his veins,
Richer, redder, never ran
Never through the heart of man.
He can trace his lineage higher
Than the Bourbon dare aspire—
Douglas, Guzman, or the Guelph,
Or, O'Brien's blood itself!

He, who hath no peer, was born,
Here, upon a red March morn;
But his famous fathers dead
Were Arabs all, and Arab bred,
And the last of that great line
Trod like one of a race divine!
And yet he was but friend to one
Who fed him at the set of sun,
By some lone fountain fringed with green;
With him a roving Bedouin
He lived (none else would he obey
Through all the hot Arabian day),
And died untamed upon the sands
Where Bulkhi amidst the desert stands!

—Barry Cornwall.

THE HORSE AND THE TIGER.

The "man-eater," a name given to a dangerous horse in Rudyard Kipling's tale of "The Walking Delegate," received salutary and deserved treatment at the hands, or rather the hoofs, of his fellow beasts; but the horse of which Mr. Knighton writes in "Private Life of an Eastern King" had never experienced a superior power, and therefore his ferocity was untempered by fear.

I was driving in a buggy with a friend through one of the finest of Lucknow's streets, on the way to the palace, when we suddenly noticed a deserted condition of that part of the city. No inhabitant was to be seen in that part of the city. No inhabitant was to be seen in any direction. "Some execution," we whispered.

Just then we came upon the body of a woman which looked as if it had been trampled to death on the pavement. On we went. No citizen was in sight, and the houses everywhere were closed. The next thing we saw was the figure of a youth, lying dead upon the road. On the top of a neighboring house I spied one of the king's troopers, intently looking up the road.

"What is the matter?" I called.

"The man-eater is loose, Wallah he has turned. Look out for your safety, sahibs. He is wild today."

I had heard of the fierce animal owned by the troopers.

"He is coming. Take care!" shouted the man.

Far ahead we could see the brute, a large bay horse, coming toward us. He caught sight of the vehicle, and rushed forward to attack. We turned rapidly round, and our horse, almost unmanageable from terror, flew over the road.

Away we went in a mad gallop toward an enclosure with iron gates. As we sped we could hear the furious clatter of hoofs growing nearer and nearer. We gained the gates; my companion leaped from the buggy and closed them. The monster rushed up and stood looking savagely, his nostrils distended, his glaring eyeballs as ferocious as any wild beast's.

He saw that he was foiled, turned, kicked the iron bars, and made for the archway, where a party of troops were awaiting him. They skillfully noosed the brute, muzzled him, and led him away.

That evening I mentioned the incident to the king.

"I have often heard of the man-eater. He must be a furious beast."

"More savage than a tiger, your majesty."

"A tiger! Good! He shall fight a tiger. We will see what impression Burrhea will make on him."

Burrhea was a favorite tiger, and had never been allowed to enter a contest in which he could not conquer. The next day we all assembled in a courtyard to see the fight. The man-eater was standing in a great inclosure made by bamboo rails. Burrhea's cage was brought, and the beautiful creature was let loose.

The man-eater fixed his eyes on the tiger, lowered his head, and waited. The tiger bounded with rapidity, and landed on the horse's haunches. Up went the iron heels, and Burrhea lay sprawling.

After this the tiger was more cautious. Round and round the enclosure he went with catlike tread. For fully ten minutes he kept up the march, then, quick as lightning, sprang. The man-eater was ready, and ducked his head low. Burrhea leaped to his back and

in an instant those terrible heels were lashing up and down.

The tiger was thrown helplessly to the ground, and lay with broken jaw, crying out with pain. The king gave a signal, the door of the cage was opened and the poor, defeated Burrhea rushed in and buried himself in the farthest corner. The man-eater stood erect and triumphant.—Chicago Horseman.

THE TICHENOR MADE HORSE.

Horse lovers of the world are indebted to Myron H. Tichenor for what he has done in establishing a type of American trotting bred show and carriage horses, writes Chas. Phillips. Mr. Tichenor has proved so conclusively that the American trotting bred horses outclasses all other types, that the establishment of experiment stations by the United States government is due entirely to the initiative that he took some years ago at his breeding farm at Oconomowoc, Wis. When Mr. Tichenor invaded the New York market, the hackney craze was more intense than it is to-day. He showed a horse that had more than the desired percentage of conformation; he showed more quality than the hackney was capable of; he showed better manners, and he showed what the hackney has always and will ever lack—courage and speed. In those days there was no such thing to be found among horses as all around action. We had the knee actors, and horse lovers used to stand entranced when the dealer drew their attention to how the exhibited horse was folding his knees above the shaft point, but our esteemed Chicago breeder happened along and showed horses that could not only outstep their competitors, but fold the knees and pull the hocks up so that the action was all around, with the horse in perfect equipoise and without any undue exertion on the part of its rider. This was a decade ago, and since the advent of this horse, which is rightly called the "Tichenor made" horse, the progress made by breeders of the American trotting bred horse has been phenomenal. The demand became so great that within five years there was a scarcity in the market, and phenomenal prices began to prevail; exporters could not get a sufficient number of horses to supply the foreign demand, and such good prices were to be obtained that within the last two or three years, instead of sending horses abroad, our export trade has dwindled to nothing, and there has been in its place an influx of English and Canadian dealers with hackney and other nondescript types of horses. That they found a ready market cannot be denied, for the Eastern Anglomaniacs were ably assisted in their endeavor to out-English the English by the National Horse Show Association, which imported an English dealer named Gooch to judge American horses and to attempt to establish a precedent for a type of saddle horse that would be English rather than American.

There is now in course of organization a society composed of wealthy patriotic horsemen who are breeders, and who intend to band themselves into an association that will be more formidable than that of any association in the country, and it will not be long before the markets of the world will recognize the superiority of the trotting bred carriage horse over all other types, as it now recognizes but is loath to admit the greatness and grandeur of our gaited saddle horse and our standard bred trotter.

TO CURE COLDS IN HORSES.

The cold in a horse is generally manifested by a mucous discharge from either one or both nostrils, a staring coat, general depression, slightly "off feed," bowels slightly constipated and scanty, high colored urine; these symptoms become aggravated as the disease progresses; the mucous discharge takes on a more sticky, thick appearance; a cough is quite frequent, especially if exercised; the cold may extend to the throat, causing considerable sore throat, as is shown by the animal protruding the head, soreness from manipulation of the throat, and frequent coughing.

If left to itself the simple cold becomes chronic and may last for a considerable length of time, the animal constantly losing flesh, the coat remaining rough from improper nutrition, and feed apparently doing the animal no good. Preventive treatment is, of course, much easier than medicinal. Keep the animal from standing in draughts while warm, blanket during cold weather to prevent chilling, and if obliged to work during the severest weather a canvass blanket is of extreme importance and should be provided for every animal.

Medicinal treatment consists of steaming the nose, using a pail of hot water to which is attached a sack, the other end being cut so as to allow the steam to enter the horse's nose; a tablespoonful of one of the coal tar products is of extreme importance in helping to heal the inflamed mucous membranes of the nose. A pint of raw linseed oil to open the bowels is beneficial. A poultice of bran or linseed meal, hot, applied to the throat, will relieve the tenderness there. A thick blanket to keep the animal warm should, of course, be provided. The patient, as of course is understood, is placed in a large stall, preferably a box stall. As the animal begins to convalesce, of course a bitter tonic is indicated to stimulate the system and set the organs working again; such as an ounce of pulverized nux vomica, four ounces of pulverized iron sulphate and ten ounces of pulverized glychrriza mixed with ten pounds of oil meal; a dose of this mixture being a teaspoonful night and morning in ground feed.—C. L. Barnes.

Like all good things, Jackson's Napa Soda has a dozen counterfeits. Watch out!

MAMBRINO PATCHEN.

Unlike the so-called brood mare sires Pilot Jr. 12 and American Star 14, Mambrino Patchen has a number of 2:10 trotters descended from him in a direct male line. Mambrino Patchen was foaled in 1862 and his great son, Mambrino King, was foaled in 1872. Mambrino King is sire of three 2:10 trotters, Lord Derby 2:05½, Nightingale 2:08 and Dare Devil 2:09, and sired the dams of the great trotters The Abbot 2:03¼, The Monk 2:05¼, and the grandam of Battleton 2:09¼, Fred Keyes 11944 by Elyria 2:25¼, son of Mambrino King, is sire of Letah S. 2:09½. Patchen Mambrino, a son of Mambrino Patchen, is sire of Walter E. 2:10. This makes five 2:10 trotters sired by male descendants of Mambrino Patchen.

Daughters of Mambrino Patchen are dams of Ralph Wilkes 2:06¼, Jupe 2:07½, Bouncer 2:09, Rubber 2:10, and Lizzie G. 2:09½, and grandams of Charley Herr 2:07, Fred Kohl 2:07¼, Kingmond 2:09, Hesperus 2:09½, Ozanam 2:07, Stanley Dillon 2:07¼, Glenwood M. 2:07¼, and Robert Mc 2:08¼.

The sons of Mambrino Patchen, other than Mambrino King, that have sired the dams or grandams of 2:10 trotters appear to be as follows. (1) Mambrino Boy 2:26½, sire of Gussie Wilkes, dam of Allerton 2:09¼, that in turn is sire of four 2:10 trotters and the dam of one. Mambrino Boy also sired the dam of Axtell (3) 2:12, that is sire of four and of the dam of three 2:10 trotters. Mambrino Boy was bred to the great brood mare Betty Brown, that was by his sire Mambrino Patchen which produced the mare Aileen, that is dam of St. Vincent 2:13½, the sire of Lord Vincent 2:08¼. (2) Homer, sire of the great brood mare Lucy Homer, that is dam of the 2:10 trotters Authoress 2:09¼ and Lecco 2:09¼. (3) Republic, the sire of the dam of Louise Jefferson 2:10. (4) Mambrino (Carr's) the sire of the dam of the fast trotter Sweet Marie 2:04¼. (5) Mambrino Blitzen, sire of the grandam of Bay Star 2:08. (6) Trotting Boy, sire of the dam of Robert Mc. 2:08¼.

Great as is the foregoing showing made by the sons and daughters of Mambrino Patchen, it is probable that in the estimation of a large number of horsemen and breeders who have studied the subject Mambrino Patchen makes a still greater showing in regard to the sires produced by his daughters. His famous daughter, the great brood mare Alma Mater, that was out of thoroughbred Estella by imp. Australian, and grandam Fanny G. by imp. Margrave, the third dam of Palo Alto 2:08¼, is dam of the three celebrated sires Alcantara 2:23, Alcyone 2:27 (both by George Wilkes 2:22) and Allandorf 2:19½, by Onward 2:25¼, son of George Wilkes, Autograph 2:16½ by Alcantara is sire of Authoress 2:09¼ and also of Expectation, the dam of Major Delmar 1:59¼, the world's fastest trotting gelding and the world's second fastest trotter. As the dam of Autograph was by Kentucky Clay, son of the Rodes Mare, it follows that Major Delmar possesses two crosses of the blood of the Rodes Mare. Alcantarus 2:20¼ by Alcantara sired Altro L. 2:09¼, and Atlanta 2:09¼, a daughter of Alcantara, is dam of Early Reaper 2:09¼. Boreal (3) 2:15¼, whose dam was Rosy Morn by Alcantara, is sire of Boralma 2:07 and Boreazelle 2:09¼.

Alcyone 2:27 is sire of the three 2:10 trotters Martha Wilkes 2:08, Bush 2:09½ and Harrietta 2:09¼. His great son McKinney 2:11¼ is the only sire in the world that has sired as many as six 2:10 trotters the six being (1) Sweet Marie 2:04¼, whose dam was by Mambrino (Carr's), son of Mambrino Patchen, thus giving this, the fastest trotting mare descended from George Wilkes 2:22, two crosses of the blood of the great son of the Rodes Mare; (2) Charley Mac 2:07¼, (3) Kinney Lou 2:07¼, (4) Hazel Kinney 2:09¼, (5) The Roman 2:09½, and (6) Dr. Book 2:10. McKinney's son Zombro 2:11, whose grandam was by Kentucky Clay 194, son of the Rodes Mare, was bred to Gazelle 2:11¼, a daughter of Gossiper 2:14¼, by Simmons 2:28, whose dam was Black Jane by Mambrino Patchen, and the result of this breeding was Zephyr 2:07¼, that possesses three crosses of the blood of the Rodes Mare. Alcyone's son Dark Night is sire of Valpa 2:09½, and grandsire of Emma Brook 2:09¼. His son Silver Shimes is sire of Promise 2:10, and his son Quechy 2:12 is sire of Wilque 2:09¼.

Alcyone was foaled in 1877 and died in 1887. He was unquestionably one of the greatest speed progenitors that ever lived, and his untimely death was an immense loss to all horsemen interested in the harness horse.

Allandorf 2:19½ is sire of Dick Hubbard 2:09¼, his son Strong Boy 2:11¼, whose grandam was the thoroughbred mare Grey Mary, is sire of the good trotter Doctor Strong 2:05¼; and his son Silverthorne 2:15, whose grandam was the thoroughbred mare Alice by imp. Knight of St. George, is sire of Kirkwood Jr. 2:10, that went to Europe and there won some excellent races and is editorially described as winning a two-mile race at Vienna, Austria, lowering the European two-mile record to 4:26½. Silverthorne also sired Goldust Maid 2:09¼.

Baron Wilkes 2:18, whose dam, Belle Patchen, was by Mambrino Patchen, is sire of four 2:10 trotters, and has five sons that are sires of 2:10 trotters, viz.: (1) Baron Dillon 2:12, sire of Dillon Boy 2:09¼, (2) Moko (own brother of Bumps 2:03¼), sire of Fereno 2:05½ and Susie N. (3) 2:09¼, whose record is the fastest three-year-old record of 1905 for a trotter, and a wonderful filly that compelled Miss Adbell to trot two heats in the Kentucky Futurity in 2:09¼ and 2:11¼ in order to win the race. (3) Oakland Baron 2:09¼, sire of Rhythmic 2:06¼ and Baron de Shay 2:08¼. (4) Prince of India, sire of Prince of Orange 2:06¼, and (5) The Bondsman, sire of Grace Bond (3) 2:09¼, and winner of the 1904 Kentucky Futurity.

Guy Wilkes 2:15¼, dam Lady Bunker by Mambrino Patchen, is sire of Fred Kohl 2:07¼, Hulda 2:08½ and Lesa Wilkes 2:09, his son Nutwood Wilkes 2:16½ is sire of John A. McKerron 2:04¼, and his

grandson Nushagak (son of Sable Wilkes 2:18) is sire of Aristo 2:08¼. William L. (own brother of Guy Wilkes) is sire of Axtell (3) 2:12, whose dam was by Mambrino boy 2:26½, by Mambrino Patchen, and Axtell is sire of four 2:10 trotters and dams of three. Patchen Wilkes 2:29½, whose dam and grandam were both by Mambrino Patchen, is sire of Patchen Maid 2:08¼, and his son Bonnie Bow 2:27¼ was bred to Lucy Homer by Homer, son of Mambrino Patchen, and sired Lecco 2:09¼. Wilkes Boy 2:24½, dam the great brood mare Betty Brown by Mambrino Patchen, has four sons that are sires of 2:10 trotters, viz.: Grat-tan 2:13, whose grandam was the thoroughbred mare Bandella, is sire of Grattan Boy 2:08 and Clarita W. 2:09¼. Constantine 2:12½, dam Kincora by Mambrino Patchen, grandam by Mambrino Tranby, son of Mambrino Patchen, and third dam Betty Brown by Mambrino Patchen, is sire of Masetto 2:08¼. His son St. Vincent, before mentioned, is sire of Lord Vincent 2:08¼ and his son Gregory the Great, whose great grandam was the great brood mare Belle Clay by Kentucky Clay 194, son of the Rodes Mare, sired Angiola 2:07¼, that either leads or is among the largest money winners of the 1905 Grand Circuit. Wilkes Boy's great grandson, the non-standard St. Clair, sired Billy Buch 2:07¼, that was a large, if not the largest, Grand Circuit winner two or three years ago.

Simmons 2:28, whose dam Black Jane was by Mambrino Patchen, is sire of Hesperus 2:09½, of the dam of Fereno 2:05½, and grandam of Stanley Dillon 2:07¼. Kitchell's Red Wilkes 2:19¼, whose dam, Mambrino June, was by Mambrino Patchen, sired Dan Wilkes 2:09¼. Crawford (p) 2:07¼, whose dam Carrie Patchen was by Mambrino Patchen, sired Dan T. 2:07¼. The great brood mare Mary Mambrino by Mambrino Patchen is grandam of the three noted sires, Patron 2:14¼, sire of Caspian 2:07¼ and Caracalla 2:10; Patronage, sire of the world's second fastest trotting mare, Alix 2:03¼, and Prodigal 2:16, sire of John Nolan 2:08. Shadeland Onward 2:18½, whose dam Nettie Time was by Mambrino Time, son of Mambrino Patchen, is sire of Mabel Onward 2:09¼. Allerton 2:09¼, whose dam was by Mambrino Boy 2:26½, son of Mambrino Patchen, has already been mentioned as the sire of four 2:10 trotters and dam of one.

Mary Mambrino was bred to Cuyler and produced Beatrice, the dam of Patronage, sire of Alix 2:03¼; Patron 2:14¼, sire of Caspian 2:07¼ and Caracalla 2:10, and Prodigal 2:16, sire of John Nolan 2:08. The blood of Mambrino Patchen and Cuyler each appear in Prince Orange 2:06½, and Harrietta 2:09¼, was by Alcyone, whose dam was Alma Mater by Mambrino Patchen, the third dam of Harrietta, Emma Arterburn, also being by Mambrino Patchen, and this mare Emma Arterburn, whose dam was the thoroughbred mare Jenny Johnson, was bred to Cuyler and produced Mercedes, the grandam of Harrietta.

All Right 2:09¼, whose sire was Enright 2:18¼ by Nutwood 2:18¼, a grandson of Sally Russell, by thoroughbred Boston, Enright's dam being by Cuyler, and Pat Ford 2:10, whose sire, Blitzen 2:27¼, was out of a daughter of Cuyler appear to be the only 2:10 trotters possessing the blood of Cuyler that do not also possess the blood of Mambrino Patchen. The blood of Mambrino Patchen appears in ninety-one of the 2:10 trotters in which the blood for Cuyler does not appear, the comparison being two for Cuyler as against ninety-one for Mambrino Patchen, or more than forty-five times as many for Mambrino Patchen as for Cuyler, the horse that Wallace declared helped to save Mambrino Patchen from disgrace.

The 2:10 trotters possessing the blood of Lady Thorn 2:18¼:

Belle Kuser 2:08. Her son General Washington sired Stranger, sire of Colonel Kuser 2:11¼, that sired Belle Kuser.

Ethel Downs 2:10. Stranger also sired Boodle 2:12½, the sire of Ethel Downs.

Pixley 2:08¼. Her dam, Loto, was by General Washington, son of Lady Thorn.

Lady Thorn's blood also appears in Promise 2:10. The 2:10 trotters descended from Kentucky Clay 194, son of the Rodes mare:

Captain Jack 2:09¼, whose dam, Mattie C., was by Wildwood, a son of Kentucky Clay.

Jim Fenton 2:08¼, whose dam was by Atlantic 2:21, whose dam was a daughter of Kentucky Clay.

The blood of Kentucky Clay also appears in the tabulation of the pedigree of Major Delmar 1:59¼, the world's fastest trotting gelding. Kentucky Clay also sired the third dam of Gregory the Great, that sired the excellent trotting mare Angiola 2:07¼. Kentucky Clay also sired the grandam of Zombro 2:11, the sire of Zephyr 2:07¼.—Algernon in Horse Breeder.

The Horse World of Buffalo has opened a stallion representative purse of a guaranteed value of \$7500 which is novel in its way and should be popular with breeders and owners. The purse or stake is for three-year-olds that are sired by stallions nominated in the stake. The nominating of a stallion before December 1st this year will make all of his get that are foaled next year eligible to the stake and not one cent will have to be paid on them until April 1st, 1910, the year of the race, when \$25 will be due on each three-year-old. A starting payment of \$100 will then be payable the day before the race, and both these payments are to be added to the stake. Stallion owners will pay an entrance fee to nominate their stallion, which fee is graded according to the amount asked for service fee. It is a novel stake and will be a very valuable one if stallion owners make the list of stallions nominated a liberal one, which they should do. It is one of the most liberal stakes ever proposed, inasmuch as every foal of 1907 that is sired by a stallion nominated in it will be eligible as soon as it is born and there will not be one cent to pay on it until it is three-years-old.

Sober up on Jackson's Napa Soda.

AZOTURIA.

Azoturia is defined by the dictionaries as "a disease of animals arising from a too rapid disintegration of tissues or a defective assimilation of food." The word itself is an illegitimate scion of the English, Greek and Latin languages, thrown together after the notably careless methods of the wordsmiths of the medical profession. It is also known to the wise men of the horse doctoring fraternity as haemoglobinuria, but it is not likely that the wayfaring man would be malicious enough to call anything that. Briefly stated, it is a deadly ailment that any horse is liable to if he is not properly cared for—that is, if he is kept cooped up in a stable and fed nitrogenous food, and then brought out to work after a few days' of rest. Let your horse eat as much when he is not working as when he is, and take him out after a few days of rest in a warm stable, and you may get a practical knowledge of azoturia that you will probably regret. It doesn't matter about the age, sex or breed of the horse; all of them are subject to it if they meet the same conditions. Epizootics of this disease are comparatively rare, but it may be said to be epidemic in all large cities in winter. There are very few years in which the veterinary is not called upon to treat cases of the disease. So frequently are there a number of cases at the same time that the word is sent out that there is an epizootic in progress, and possibly the condition may be properly styled epizootic, but it may be observed that such conditions cease almost as promptly as they begin.

The cause of azoturia, as heretofore stated, is too much feeding and too little exercising. Given a horse of normal appetite, and confine him in a stable for a week with the same amount of food to eat that he thrives under when he is worked regularly, then take him out, drive him on a cold day, and you are very likely to note the following symptoms: For the first fifteen minutes or so he will be full of life and spirits. Then he will perspire profusely. The kidneys throw off dark-colored liquid, and the animal becomes depressed. All the life and fire seem to have gone out of him, and he breathes heavily and with difficulty. In a very few minutes one or both of his hind limbs becomes rigid, and he loses control of his hindquarters. He sinks to the ground, and in most cases is dead in a few hours, although sometimes the illness lasts for several days before it is terminated one way or another. In cases where one limb only is affected the driver is very likely to think that the animal has picked up a nail, but upon examination it will be found that the loins are swollen, and he is unsteady on both feet. He crouches, and the limbs are semiflexed, and in a short time the animal drops his hindquarters to the ground. The body and limbs move convulsively, but there is a lack of co-ordination between the various sets of muscles. If there is a competent veterinary surgeon at hand the horse may be cured, and again he may die in a few hours in spite of the most skillful treatment. In cases of late recovery the animal is usually partially paralyzed for months and owners should remember that one attack of the disease predisposes to others. The treatment indicated by the best authorities includes a thorough physic, diuretics and anti-spasmodics. It is not an ailment, however, that an amateur should undertake to treat. The best thing to do after a horse is stricken is to get him to a stable as rapidly as possible, blanket him carefully, and get the doctor without a moment's delay.

It is a disease that is practically confined to horses used in cities, and it usually attacks those in the full flush of vigor of life. So far as the books show, there has never been known a case in a horse on pasture, and very rarely one where the animal was worked daily. Plethoric horses that feed heartily are the most subject to it, for the reason that they consume more food than they can properly assimilate. The mortality is from thirty to eighty per cent. The Germans, who are particularly accurate in the matter of statistics, are inclined to fix the mortality rather higher than the French and American authorities. Bay reports that out of 368 cases there was a mortality of seventy per cent. Stockleth reports a mortality of fifty per cent, Grimm of forty, and Stuttgart of forty. The records of the veterinary department of the German army show a mortality of from twenty to forty per cent, but as most of the horses tested by the vets of the Kaiser's hosts get the most scientific care imaginable, it may be that the average of deaths among them is lower than among less favored animals. The French authorities claim that the mortality is from five to seventy per cent. The Americans hold it is from twenty to ninety. Anyhow, it is a "turribul" disease, and the veterinary who gets a call in such a case is sorry before he starts in. And it is so easily prevented that the doctor is inclined to be indignant when he sees a case. Here is a simple rule that every horse-owner should see that his stableman observes:

When a horse is idle, reduce his rations, give him regular exercise. Do not feed an idle horse as much as he wants. Keep his bowels open. If possible, give him green stuff occasionally.—Exchange.

"BOG SPAVIN CURED."

Capt. I. F. Sperry of Arkansas City writes: I have cured my two-year-old colt of a bad case of bog spavin and thorough-pin with QUINN'S OINTMENT; have used it for years and believe it is the only medicine that will remove all kinds of enlargements on horses without removing the hair." This is the general expression of leading horsemen from Maine to California. For curbs, splints, spavins, windpuffs and all buncches there is nothing better. Price One Dollar per bottle delivered. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

Mr. A. E. Ashbrook of Chicago, where he edits and manages "Bit and Spur," a monthly magazine devoted to horses, is in Pasadena for the purpose of assisting in the management of the horse show.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

The Prairie Hen.

The prairie hen, or "prairie chicken," (*Tympanuchus americanus*) inhabits the Western prairies from Manitoba to southern Texas and Louisiana and from Ohio to Nebraska. The birds of southern Texas and Louisiana (*Tympanuchus americanus atwateri*—Bendire) are smaller and darker than the common bird. This big grouse, resembling a brownish-gray hen, adds animation to the Western prairies and is as characteristic of them as the mocking-bird is of the South. In the nuptial season the birds assemble every morning at daybreak on little hillocks on the plains, and the cocks strut about with wings drooping, tail spread, and the large orange-colored sacs on the sides of the neck fully inflated. At intervals they lower their heads and emit a singular booming love note that can be heard more than a mile, and is one of the most striking bird notes in the general spring chorus. The rivalry of the males at these gatherings often leads to fierce fights. Finally all find partners, separate into pairs, and make nests in grass-lined depressions among standing grass or similar shelter, where about a dozen eggs are laid to a clutch. Generally only one brood is raised in a season. The young, like those of other gallinaceous birds, leave the nest as soon as they are hatched and run about with the hen in search of food. In summer prairie hens roost on the ground in a family covey, as does the bobwhite, but in winter, in many sections, they roost in trees. In the fall several coveys congregate in a pack, after the fashion of ptarmigans and crested quail. Prof. F. E. L. Beal informs the writer that at Ames, Iowa, during the early eighties, he frequently found packs numbering as many as a thousand birds, and that they habitually roosted in the long grass beside sloughs. The prairie hen is migratory in the northern part of its range, and to a certain extent farther south also. The well-known authority on migration, Prof. W. W. Cook, says (Bul. 2, Div. Econ. Ornith., Dept. Agri., p. 105, 1888):

"In November and December large flocks of prairie chickens come from northern Iowa and southern Minnesota to settle for the winter in northern Missouri and southern Iowa. This migration varies in bulk with the severity of the winter."

From a gastronomic point of view the prairie hen deserves high praise; it is larger than the ruffed grouse, sometimes weighing 3 pounds, and has a delicious flavor. The flesh of young birds is light-colored, of old ones dark. The estimation in which the bird is held may be realized from the fact that in 1902 the supply at from \$3 to \$5 a brace nowhere met the demand. Years ago prairie chickens were shipped east by carloads, but to-day scarcity of birds and a commendable stringency of laws practically preclude shipments.

Many sportsmen declare that there is no better sport than "chicken" shooting. The bird unquestionably is one of the noblest of game birds. Though in speed of flight it by no means equals the ruffed grouse or the bobwhite, it furnishes fine sport when hunted with dogs. Early in the season, in suitable cover, it lies to a dog like a stone. So reluctant occasionally is it to fly that it can hardly be put up, and Professor Cook informs the writer that several times while hunting in northern Minnesota he saw a pointing dog jump and catch a three-fourths grown prairie hen. Late in the fall, however, when gathered in large packs, they do not lie well.

Early in the season—that is, during the last two weeks of August and the first part of September—the prairie hen affords a better test of a dog's ability to hunt fast and to range out a mile or more from the gun than does the bobwhite. It is for this reason that field trials on "chicks" are always well patronized, and the dogs that win are highly valued. So highly esteemed is the prairie chicken as the quarry of "racing" dogs that abundant means for the restocking of suitable places with the species is likely to be forthcoming from field-trial patrons. The ideal conditions for "chicken" shooting are realized in a fenceless country, where it is possible for the hunter to drive, while the dogs range from a quarter of a mile to a mile away from the wagon. As soon as they point game the sportsman hurries up and shoots. The driver "marks down" the birds that escape and perhaps fly half a mile before alighting. Then the wagon advances to where they dropped, and shooting is again in order. In some parts of the country the sport stops at 10 or 11 o'clock in the morning, because of the intense heat during the middle of the day, when the birds are resting in places difficult of access, and is not resumed before 3 or 4 o'clock in the afternoon.

Preservation and Propagation.—The prairie hen deserves well of man. It is beneficial to agriculture, is one of the best table delicacies, and its booming call is the dominant spring note of the plains, as the bird is their most characteristic resident. Furthermore, the number of entries to the yearly field trials on "chicks" speak for it as an object of sport. In view of all the good qualities of the bird, the causes of its diminished numbers should be sought, and adequate means applied to preserve it from extinction.

At the beginning of the nineteenth century the prairie hen was extremely abundant throughout Ohio

and Kentucky. It is now rare in both States. A part of the ground it has lost in the East it has gained by a westerward and northward movement. It has followed the grain fields of the pioneers of the plains, and with the extension of grain culture into Minnesota and Manitoba it has become plentiful there. According to Doctor Hatch, it was by no means common when the white man first came to Minnesota, and he says that in Illinois as late as 1836 a hunter was extremely lucky if he could bag a dozen in a day. Some years later, with much less effort, one could have shot fifty in a day, and there were records of 100 to a single gun. (Birds of Minnesota, p. 163, 1892.)

The former status of the bird in the East is well indicated by Audubon's classic observations at Henderson, Ky., in 1810. Audubon says: "In those days during the winter the Grouse would enter the farmyard and feed with the poultry, alight on the houses, or walk in the very streets of the villages. I recollect having caught several in a stable at Henderson, where they had followed some Wild Turkeys. In the course of the same winter, a friend of mine, who was fond of practicing rifle shooting, killed upwards of forty in one morning, but picked none of them up, so satiated with Grouse was he, as well as every member of his family. My own servants preferred the fattest fitch of bacon to their flesh, and not unfrequently laid them aside as unfit for cooking. . . . They could not have been sold at more than one cent apiece. . . . So rare have they become in the markets of Philadelphia, New York, and Boston, that they sell at from five to ten dollars the pair." (Ornith. Biog. II, p. 491, 1835.)

So far as the sportsman is concerned, the prairie hen is now extinct in Kentucky, and nowhere is the royal game bird even approximately so abundant as it formerly was in that State. There is little good chicken shooting east of the Mississippi. The best now to be had is in Kansas, Nebraska, Minnesota, the Dakotas, and Manitoba. Fortunately many people are actively interested in the protection and preservation of the prairie hen and excellent laws in its behalf already exist. There is a constantly growing sentiment in favor of non-resident hunting license and a legal limit to the day's bag, while some States afford the bird absolute protection for a period of years. (Illinois, Louisiana, and Oregon protect prairie hens until 1909, and Michigan and the Province of Ontario until 1910.) and their example should be followed wherever it is growing scarce. The passage of non-export laws in most of the States has been productive of much good. These State laws have been made effective by a recent Federal law—the Lacey Act—which prohibits interstate commerce in game killed in violation of local laws. Through its operation the sale of the prairie hen was virtually stopped in 1902 and 1903 in all the large cities of the East. Absolute enforcement of this law and successful prohibition of local sales must be effected before the safety of the bird is assured. The laws relating to the close season have been greatly improved, but in some States the open season (four months in Oklahoma and South Dakota) is still too long.

The preservation of the prairie hen is far more difficult than that of the bobwhite. The bobwhite is more prolific and does not require so extensive a range. Moreover, it is swifter of wing and habitually dives into the woods to escape the hunter. Before the hammerless gun and the wide-ranging bird dog the grouse of the open prairie falls an easy victim. It has to contend also with the trapper, besides predatory birds, reptiles, and mammals. Its most deadly enemy, however, is the prairie fire in spring, which destroys every nest within its sweep. E. W. Nelson informs the writer that in the early seventies in northwestern Illinois the farmers in many places burned the prairies in spring after the prairie hens nested, and often gathered for household use large numbers of the eggs thus exposed. Were it possible for stockmen to burn the grass a little earlier it would result in the saving of thousands of birds.

The prairie hen has the advantage, however, of yielding more readily to domestication than the bobwhite, and strong efforts should be made to establish preserves of domesticated birds for restocking country where the species is extinct. Successful enterprises of this kind would be profitable. That such domestication is possible and even feasible, the appended quotation from Audubon implies:

"The Pinnated Grouse is easily tamed, and easily kept. It also breeds in confinement, and I have often felt surprised that it has not been fairly domesticated. While at Henderson, I purchased sixty alive, that were expressly caught for me within twelve miles of that village, and brought in a bag laid across the back of a horse. I cut the tips of their wings, and turned them loose in a garden and orchard about four acres in extent. Within a week they became tame enough to allow me to approach them without their being frightened. . . . In the course of the winter they became so gentle as to feed from the hand of my wife, and walked about the gardens like so many tame fowls, mingling occasionally with the domestic poultry. . . . When spring returned they strutted, 'tooted,' and fought, as if in the wilds where they had received their birth. Many laid eggs, and a good number of young ones made their appearance." (Ornith. Biog. II, p. 495, 1835.)

There is great probability of success in the restocking of much of the former range of the prairie hen if

undertaken in the proper way and properly sustained by adequate protective laws. Successful results would materially add to the assets of every farm.

Food Habits.—For the purposes of this report the contents of 71 stomachs of prairie hens have been examined. Fortunately this material represents not only the shooting season, but all other months except July. Most of the stomachs came from the Dakotas, Minnesota, Iowa, Wisconsin, Nebraska, and Texas; Illinois and Ontario furnished the rest. The food consisted of 14.11 per cent animal matter and 85.89 per cent vegetable matter. The former was insects; the latter seeds, fruit, grain, leaves, flowers, and bud twigs.

Insect Food.—The insect food included 12.78 per cent of grasshoppers, 0.48 per cent of beetles 0.39 per cent of bugs, 0.12 per cent of ants and other Hymenoptera, 0.29 per cent of other insects, and 0.05 per cent of spiders. The ruffed grouse takes about one-sixth less and the bobwhite about one-third more of insects than the prairie hen. Although the bobwhite destroys injurious grasshoppers, the relative proportions of grasshoppers and beetles consumed by it and by the prairie hen are notably different. In the food of the bobwhite the grasshoppers are to the beetles as 3.71 to 6.92; with the prairie hen the ratio stands as 12.78 to 0.48. Indeed, grasshoppers constitute the bulk of the prairie hen's animal diet, the reason being probably that on the prairies the grasshoppers vastly outnumber all other sizable insects. For a gallinaceous bird the prairie hen is highly insectivorous from May to October, inclusive, insects constituting one-third of the fare of the specimens shot during this period. The species is particularly valuable as an enemy of the Rocky Mountain locust. During an invasion by this pest in Nebraska, 16 out of 20 grouse killed by Prof. Samuel Aughey from May to October, inclusive, had eaten 866 locusts—a creditable performance, economically rated. Some ornithologists believe that the diminution in the number of prairie hens is in a measure responsible for the ravages of certain insects. Farmers who know these facts must regret the extinction of the bird in States where it once thrived, and they may well support measures for reintroducing and protecting it.

Almost every kind of grasshopper and locust appears to be acceptable to the prairie hen. In a list given is named 13 species of short-horned grasshoppers identified in its food. The prairie hen eats also long-horned grasshoppers (*Xiphidium* sp., *Conocephalus* sp., and *Orchelimum* sp.) and crickets (*Gryllus* sp.) and tree crickets (*Oecanthus* sp.).

In its beetle diet the prairie hen makes up in variety what it lacks in quantity. Unlike our common small passerine birds, but like our other gallinaceous birds, it feeds on the harmful leaf beetles. It destroys also the potato beetle (*Leptinotarsa decemlineata*), in both adult and larval stages, and the injurious 12-spotted cucumber beetle (*Diabrotica 12-punctata*). The stomach of a bird collected by H. P. Atwater, November 7, 1893, in Aransas county, Tex., contained 16 of these latter insects. Among other leaf-eating beetles may be mentioned *Chrysomela pulchra*, *Chrysomela suturalis*, *Disonychia quinquevittata*, *Monoxia puncticollis*, and *Graphops pubescens*. The injurious May beetles (*Leucostoma* sp.) also are destroyed, as well as weevils (*Thecestermus humeralis* and other species). Like many other birds, the prairie hen is partial to ground beetles. It has been known to take such kinds as *Anisodactylus rusticus*, *Agonoderus pallipes*, *Amara* sp., and *Chloenius* sp. It probably feeds also on the different abundant species of *Harpalus*. Ladybirds are at times destroyed, as was attested by remains of *Hippodamia convergens* contained in one stomach.

Miscellaneous insects are eaten in small numbers, but are interesting because they include a number of the worst insect foes, such as the cotton worm (*Alabama argillacea*) (Fourth Rep. U. S. Ent. Commission, p. 88, 1885), the army worm (*Heliophila unipuncta*), several species of cutworms, the yellow bear caterpillar (*Diacrisia virginica*), cankerworms (*Geometridae*), the Angoumois grain moth (*Sitotroga cerealella*), and the chinch bug (*Blissus leucopterus*). The bird's habits of eating chinch bugs has been reported by B. F. Gault, of Chicago, and Prof. F. M. Webster, of the Bureau of Entomology. Other bugs, including stink bugs (*Euschistus* sp.) and the tree hoppers (*Stictoccephalus* sp.) make part of the food. In addition to ants, such as *Formica exsectoides*, the prairie hen occasionally eats other Hymenoptera, including *Tiphia inornata* and gall insects contained in the galls of *Cynipidae*. In its liking for galls and their contents the bird resembles the ruffed grouse and the British pheasant.

Further study of the food habits of the prairie hen will unquestionably add largely to the foregoing enumeration of insects, but our present knowledge, incomplete as it is, shows the general character of its insect food, and establishes the value of the species as a destroyer of insect pests.

Vegetable Food.—From October to April, inclusive, the prairie hen takes little but vegetable food. This element amounts to 85.89 per cent for the year. Fruit constitutes 11.79 per cent; leaves, flowers, and shoots, 25.09 per cent; seeds, 14.87 per cent; grain, 31.06 per cent, and miscellaneous vegetable material, 3.08 per cent.

Like the bobwhite and the ruffed grouse, the prairie hen is fond of rose hips, and the abundant roses of the prairie yield 11.01 per cent of its food. This fact perhaps may be a useful hint to anyone who attempts to introduce the bird or to improve its environment. The other fruit found was of little importance—merely 0.78 per cent. It was made up of domestic cherries, woodbine berries, sumac, poison ivy, huckleberries, strawberries, partridge berries, mistletoe, wild grapes, the berries of *Solanum* and *Symphoricarpos*, and cornel (*Cornus asperifolia*). Of the frugivorous habits of the prairie hen Audubon writes: "In the

western country, at the approach of winter, these birds frequent the tops of the sumach berries, to feed on their seeds, often in such numbers that I have seen the bushes bent by their weight." (Ornith. Biog., II, p. 501, 1835.)

It is important to note that often when deep snow causes scarcity of other supplies the sumac affords both the prairie hen and the bobwhite abundant food. As with the insect food, further investigation undoubtedly will extend the fruit list.

The prairie hen eats a much smaller proportion of seeds, with the exception of grain, than the bobwhite, and in this respect is less useful than the latter bird. It is, however, a better weeder than any other grouse, and its services in this particular are worthy of consideration. As before stated, seeds make 14.87 per cent of the annual diet. Of these, grass seeds form 1.03 per cent; seeds of various polygonums, 8.49 per cent, and miscellaneous weed seeds, 5.335 per cent. When the nature of the prairie hen's habitat is recalled it seems strange that the percentage of grass seed is so small. The bobwhite, in contrast, takes 9.46 per cent of grass seed. Like the bobwhite and other granivorous birds, the prairie hen often eats the seeds of the various species of panicums, the paspalums, and pigeon grass (*Choetochloa viridis*).

The seeds of different polygonums, or smartweeds, play an important part in the economy of the prairie hen. They form 8.49 per cent of the food. These plants grow profusely where illy drained regions of the plains are under water for a few months in the year. Black bindweed (*Polygonum convolvulus*) and smartweed (*Polygonum lapathifolium*), with the closely related dock (*Rumex crispus*), are included in the bill of fare. Of the 5.35 per cent of remaining miscellaneous seeds, ragweed (*Ambrosia artemisiifolia*) is the most important element, but is insignificant in amount when compared with the same element of the bobwhite's food. Other compositae are eaten by the prairie hen—wild sunflower, coreopsis (*Coreopsis grandiflora*), and others. The prairie hen has a liking for legumes, reminding one again of the bobwhite. It selects two of the latter's favorites—cassia, and the hog peanut (*Falcata comosa*). It takes also the seeds of a closely related plant, the prairie mimosa (*Acuan*). It has been known to feed on seeds of water willow (*Dianthera* sp.), the yellow false garlic (*Nothoscordum bivale*), blue-eyed grass (*Sisyrinchium graminoides*), shepherd's purse (*Bursa bursa-pastoris*), mercury seeds (*Acalypha* sp.), croton seeds (*Croton* sp.), and seeds of purslane (*Portulaca oleracea*), the seeded pods of the latter being plucked.

Grain.—As a grain eater the prairie hen heads the native gallinaceous birds. Everybody who has gone "chicken" shooting knows how closely the bird is associated with stubble fields. The stomachs and crops examined in the investigation contained 31.06 per cent of grain. The bobwhite, another busy stubble feeder, takes only 17.38 per cent. The stomach of a grouse shot in June in Nebraska contained 100 kernels of corn and 500 grains of wheat. J. A. Loring, formerly of the Biological Survey, during December in Nebraska found prairie hens feeding in wheat stubble, about straw stacks, and along the edges of cornfields. Doctor Hatch, in writing of their granivorous habits, says: "The grain fields afforded both food and protection for them, until the farmers complained of them bitterly, but not half so bitterly as they did afterwards of the bird destroyers who ran over their broad acres of wheat, oats, and corn in the order of their ripening it." (Birds of Minnesota, p. 163, 1892.)

Buckwheat, barley, oats, and millet are relished, but corn appears to be the favorite cereal, amounting to 19.45 per cent of the annual food. Other grain, principally wheat, was in the ratio of 11.61 per cent. Amos W. Butler reports that in Indiana, during September, fields of ripening buckwheat are favorite feeding grounds. There is reason to believe that sprouting grain is sometimes injured. Audubon speaks of such injury in Kentucky, where the bird was extremely abundant.

Like other gallinaceous birds, the prairie hen likes mast, though naturally it obtains much less than the ruffed grouse. The stomach contents showed the beaked hazelnut (*Corylus rostrata*) and acorns, including, among others, those of the scrub oak (*Quercus nana*) and the scarlet oak (*Q. coccinea*). Like the ruffed grouse, it swallows acorns whole. A bird shot in Minnesota in March had bolted 28 scarlet-oak acorns.

Leaves, Flowers and Shoots.—Like other grouse the prairie hen is an habitual browser, to the extent of 25.09 per cent of its food. This is divided as follows: Twigs or shoots, 0.55 per cent; flowers, 9.34 per cent, and leaves, 15.20 per cent. This is only half the amount of similar food taken by the ruffed grouse. Naturally the prairie hen is much less given to budding than the ruffed grouse, but it has been known to pluck buds of poplar, elm, pine, apple, dwarf birch (*Betula glandulosa*), and black birch (*B. lenta*). "I have counted more than 50 on a single apple tree," writes Audubon (Ornith. Biog., II, pp. 491 and 501, 1835), "the buds of which they entirely destroyed in a few hours. . . . They were, in fact, looked upon with more abhorrence than the crows are at present in Massachusetts and Maine, on account of the mischief they committed among the fruit trees of the orchards during winter, when they fed on their buds, or while in the spring months, they picked up the grain in the fields." This mischief was due largely to the abundance of the birds, a condition never likely to return.

The prairie hen shows a marked taste for flowers. A delicate pink rosebud had been plucked by a bird shot at Omega, Neb., in June. More than a thousand golden-rod heads were found in another. Additional composite flowers devoured were *Amphibachyris* (*Amphibachyris dracunculoides*), sweet balsam (*Gnaphalium obtusifolium*), and others. The flower and leaf buds of birch and apple also are taken. Small green ovaries of *Ruellia* and blue-eyed grass were noted in

a few cases. These birds eat leaves, including those of the buttercup, everlasting (*Antennaria*), red and white clover, and the interesting water milfoil (*Myriophyllum*), often grown in goldfish globes.

Food of the Young.—The economic value of the prairie hen is due mainly to its destruction of weeds and harmful insects, the latter constituting almost the sole food of the downy chick. Unfortunately only two stomachs of young birds were to be had for examination. The chicks were recently hatched Texas prairie hens (*Tympanuchus americanus attwateri*). They had eaten 1 tree cricket, 5 undetermined caterpillars, 1 imago of the very destructive Angoumois grain moth, 1 leaf beetle (*Monoxia puncticollis*), and 18 12-spotted cucumber beetles (*Diabrotica 12-punctata*), which do not always confine themselves to cucumbers, but injure more than a dozen other cultivated plants.

(To be Continued.)

Anglers Will Have a Preserve.

Messrs. Clarence Ashlin and Sam Wells, last week, in the interest of the California Anglers' Association, devoted several days to the inspection and survey of the territory along the line of the new Coast line electric road, between Santa Cruz and Waddell creek.

The result of the trip, it is probable, will be the securing of fishing privileges along the Waddell and the establishment of a clubhouse in the "new country."

In San Pablo Bay, on the flats off the mouth of Castro creek, a number of striped bass have been caught recently—one day sixty-one fish were landed. The bass are nearly all underweight and should be left alone for the time being.

The Pacific Striped Bass Club will hold the second annual opening of the club at Tiburon on Washington's Birthday.

A few striped bass are being caught in the San Antonio; conditions are not at present, however, of great encouragement for the rodsters.

A Business Change.

We acknowledge receipt of a communication from Messrs. Mac Kenzie and Underhill announcing the association of the two gentlemen in the real estate and insurance business at 218 Sansome street, this city.

Mr. Underhill has been for thirty years connected with the Selby Smelting & Lead Co. and for the past eight years manager of its extensive manufacturing operations and brings to the new firm a comprehensive knowledge of Pacific Coast affairs, commercial, financial and corporate, as well as a wide acquaintance.

'WODGOD NI SGNIOD San Francisco Show.

At a meeting of the San Francisco Kennel Club, held last Wednesday evening, it was decided to hold the club's tenth annual show on June 6th to 9th, inclusive.

The most suitable building in this city, the Mechanics' Pavilion, was not available for the club show, in May, hence the postponement.

The fact that the show is now an announced fixture is gratifying to local and Coast dogdom. There was a feeling in some quarters that the later dates this year would cut down the entries. We are inclined to doubt that it will have any other effect save that of increasing entries and creating a greater enthusiasm. The annual show of the San Francisco Kennel Club is enthusiastically looked for by a strong following of the fancy and has likewise a substantial position in the regards of the general public.

Mr. George Raper, who was with us in 1903, had the club's invitation to judge for the contemplated May show. If Mr. Raper's business engagements in June do not prevent, the original selection stands good and he will pass on the dogs.

Mr. H. H. Carlton, who had charge of the office at the club's initial show in '97 and who has acted as superintendent several times since, will fill the responsible billet in June—this selections is an all-round satisfactory one.

The bench show committee is composed of J. E. de Ruyter, Fred P. Butler, W. S. Kittle and J. Love Cunningham.

The Bull Terrier Show.

The one day show of the Bull Terrier Club seems to have a large number of supporters. The club is a new organization, not more than a month old, and counts on an entry of at least 65. This is a most encouraging outlook for the Bull Terrier men. The date set for the show is Saturday, March 17th, sanction for that day having been requested of the Bull Terrier Club of America. The show will be held in a commodious hall on the corner of Sutter and Powell streets.

The officers of the club are: J. C. Bone, president; George Flexnor, vice-president; Dr. W. H. Watkins, secretary-treasurer. A number of cups and specials have already been secured, among these being Breeder and Sportsman cup, Chas. Reid Thorburn cup, San Mateo Kennel Club trophy, Clifford G. Cook cup, Elliott Pierce cup, Richardson Bros. trophy, Davy Crockett trophy, and others.

The winners class rating will count four points for the tri-color dog. The show is worthy of the earnest support of all Bull Terrier breeders and fanciers and the recognition of the general fancy as well.

Seattle Show.

The dates for the annual show of the Seattle Dog Fanciers' Association are April 18th to 21st, inclusive. The bench show committee consists of John W. Ripplinger, Dr. C. W. Sharples, F. A. Pontius, E. A. Swift and Ed Stormfeltz. An effort will be made to secure the services of Ben Lewis as judge.

The officers elected for the ensuing year are. Dr.

C. W. Sharples, president; J. W. Ripplinger, vice-president; Chas. McAllister, secretary; Arthur Murphy, treasurer; Josiah Collins, R. M. Palmer and Julius Redelsheimer, trustees. Mr. Collins, L. B. Youngs, W. B. Bailey and P. J. Glennon were elected to membership.

The club at the recent meeting voted a reward of \$25 for evidence leading to the conviction of the men who have been poisoning dogs near Green Lake. A number of valuable dogs have been killed lately in that vicinity, and the club members are determined to hunt down and punish the guilty parties.

It is expected to make the bench show in April the largest and best ever held in Seattle. All the dog fanciers in the city are now working together in one club; past differences have been forgotten, and every man in the organization will work hard to make the show a big success. It is expected that there will be three hundred dogs on exhibition, and among them will be the best in the West. The show will be held under the auspices of the American Kennel Club.

Bulldog Notes.

Mrs. J. P. Norman has recently become the pleased owner of a promising young Bulldog bitch sired by Ivel Damon. If we are not mistaken, there will be a Bulldog kennels located in Berkeley and the popular secretary of the P. A. B. will be much interested in the same.

Mr. T. M. Stater's bitch Puddin'face (imp Clyde Nestor-imp Norma) is in whelp to Phil C. Meyer's Endcliffe Baron (Endcliffe Fralagan-Dark Virginia). The bitch, it is said, is a good looking one. She was served on January 9th.

Eye Treatment.

In answer to a communication from Mr. George H. Lent, Isleton, requesting treatment for his Irish Water Spaniel which is afflicted with "sore eyes and a mucous gathering in the corners of both eyes," Dr. W. F. Egan, V. S., advises as follows:

Bathe the parts daily with a solution of two drachms of boracic acid added to a quart of warm water.

Judges at New York.

The judges for the Westminster Kennel Club's thirtieth annual dog show, held in Madison Square Garden, New York, this week, were as follows:

Miss A. H. Whitney, Lancaster, Mass.—St. Bernards, Newfoundlands and Pugs.

G. Muss-Arnolt, Tuckahoe, N. Y.—Bloodhounds, Russian Wolfhounds, Pointers, Basset Hounds, Dachshunde and Japanese Spaniels.

H. W. Lacy, Wakefield, Mass.—Mastiffs, Deerhounds, Greyhounds, Poodles, Chows, Black and Tan Terriers, Dandie Dinmont, Skye and Bedlington Terriers, Schipperkes, Maltese Terriers, Chihuahuas, Papillons and Miscellaneous.

John Hartmetz, Brooklyn, N. Y.—Great Danes.

J. Marshall Henry, Brookneal, Va.—American Foxhounds.

Major J. M. Taylor, Rutherford, N. J.—Chesapeake Bay Dogs, English Setters, Irish Setters and Gordon Setters.

E. M. Oldham, New York City.—Irish Water Spaniels, Clumber Spaniels, Field Spaniels, Cocker Spaniels, Pomeranians, Yorkshire Terriers and Griffons Bruxellois.

John Sergeant Price, Jr., Chestnut Hill, Pa.—Dalmatians.

M. Mowbray Palmer, Stamford, Conn.—Collies.

H. T. Peters, Islip, L. I.—Old English Sheepdogs.

W. P. Earle, New York City.—Bulldogs.

W. N. Le Cato, East Orange, N. J.—French Bulldogs.

Daniel Buckley, Chestnut Hill, Pa.—Airedale Terriers.

W. J. Green, Philadelphia.—Boston Terriers.

S. Van Schalck, New York City.—Irish Terriers and Welsh Terriers.

W. B. Emery, Boston, Mass.—Scottish Terriers and Roseneath Terriers.

Thomas Shallcross, Providence, R. I.—Beagles and Whippets.

Boston Show Judges.

The judges announced for the New England Kennel Club show at Boston next week are the following:

Miss Anna H. Whitney, Lancaster, Mass.—Bloodhounds, Mastiffs, St. Bernards, Deer Hounds, Yorkshire Terriers, Toy Terriers, English Toy Spaniels.

Mr. James Mortimer, Hempstead, L. I.—Greyhounds, Foxhounds (English), Sporting Spaniels, Collies, Dalmatians, Poodles, Whippets, Bulldogs, French Bulldogs, Irish Terriers, Welsh Terriers, Japanese Spaniels, Miscellaneous.

Mr. J. O. Dutton, Leonia, N. J.—Great Danes, Dachshunde.

Mr. Frederic J. Lenoir, Greenwood, Mass.—Pointers. Mr. Horace A. Belcher, Somerville, Mass.—Setters.

Mr. George B. Post, Jr., New York.—Beagles.

Dr. John E. De Mund, Brooklyn, N. Y.—Russian Wolfhounds.

Mr. William C. Codman, Providence, R. I.—Scottish Terriers, Manchester Terriers, Pomeranians.

Mr. J. Willoughby Mitchell, Brooklyn, N. Y.—Airedale Terriers.

Mr. William A. Bragdon, Portsmouth, N. H.—Foxhounds (American).

Mr. Thomas Holden, Jr., Morristown, N. J.—Bull Terriers.

Mr. Thomas Benson, Jr., Boston.—Boston Terriers.

Mr. James J. Lynn, Port Huron, Mich.—Fox Terriers.

A Corrected List.

The list of officers of the San Francisco Kennel Club, as given in another paragraph, is a bit inaccurate and should be as follows:

John E. de Ruyter, president; William S. Kittle, vice-president; Fred P. Butler, secretary and treasurer; W. W. Richards and John L. Cunningham, directors. Bench show committee—John E. de Ruyter, chairman; William S. Kittle and Fred P. Butler.

A. K. C. NOTES.

Annual Meeting.

The regular annual meeting of the American Kennel Club was held in New York last Wednesday.

The Committee on Membership met Tuesday afternoon for the purpose of receiving and acting upon applications for admission to membership in the A. K. C., and for the approval of credentials of delegates whose names are to be submitted to the club at the annual meeting.

Nominations for Officers.

The names of the following gentlemen were proposed at the annual election of officers:

For President—August Belmont, Hollis H. Hunnewell.

For Vice President—Hillis H. Hunnewell, J. Sergeant Price, Jr., Dr. J. E. DeMund.

For Chairman Stud Book Committee—Marcel A. Vail.

For Chairman Constitution and Rules Committee—Gouverneur M. Carnochan, Edward Brooks.

For Chairman Field Trials and Coursing Meetings Committee—James W. Appleton.

For Chairman Finance Committee—William G. Rockefeller.

For Chairman Membership Committee—William B. Emery.

The result of the election Wednesday was not received before we went to press.

American Bred.

No action of the American Kennel Club since its inception, has aroused such a storm of controversy as the recent decision to limit the regular novice class to dogs bred in the United States. The kennel press is overwhelmed with letters from breeders and exhibitors, the majority of whom do not understand the facts of the case or are intentionally bringing up a false issue. Let us look at the matter calmly. The American Kennel Club provides for five regular classes, in any of which (with the one exception of the novice class) dogs of recognized breeds, no matter where they are bred, can be entered. Is it very unreasonable that one class out of five should be kept for competition among our own dogs? American breeders have for a long time fought for this very thing. The change then is not in the class, but only in the acceptance of the term American. If we allow this to include Canadian bred dogs, we defeat the object of the rule. Bench show committees have the privilege of adding as many classes as they see fit, with the proviso that they do not conflict with the regular classes. No bar of any kind is placed on Canadian dogs, except as to the novice class, and no restraint is placed upon specialty clubs. They are free as ever to give their specials to whom they please; only if they wish to include Canadian or any other dogs bred outside the United States they must not use the term American bred. Specialty clubs having members residing in Canada and desiring to open their specials to such members, should clearly state, "Open to American and Canadian bred dogs," which would come fully within the interpretation of the rule. If on the other hand, the specials are stated to be for "American bred dogs," a protest against the competition of any foreign bred dogs for such specials would have to be sustained.

It is very strange that the particular parties interested, the breeders and exhibitors of this country, cannot see the advantage of restricting one class out of the many for dogs bred in the United States. The rule excluding all foreign bred dogs from American bred classes is not a new one, as it has been in force since 1889; but as it has not been lived up to in the past, the recent action of the American Kennel Club is only an interpretation of the existing rule.

With calmer reflection the public will realize that this rule is not retaliation against the Canadian Kennel Club; it has nothing to do with any controversy or misunderstanding between the American, English or Canadian Kennel clubs; it is neither actuated by private spite, nor the result of ignorance of delegates acting without due deliberation. On the contrary it is a well timed and sensible rule to save one class out of the many for the use of American breeders, and the betterment of dogs bred in the United States.—A. K. C. Gazette.

Must Compete in All Classes.

The following important notice published in the January number of the A. K. C. Gazette, although calling for the attention of show officials, is none the less important to exhibitors, and is as follows:

"The following rule should be carefully read by bench show officials, secretaries and superintendents of shows:

"XV. Any dog entered for competition and received at the show building must compete in all classes in which he is entered, and for all specials for which he is eligible, and failing to do so, shall be subjected to a fine by the American Kennel Club equal to the entrance fee for each class. No dog eligible for special prizes can be withdrawn from competition unless it has been stated on the entry blanks, 'Will not compete for special prizes.'

"This rule has been misunderstood and the custom of entering dogs in regular classes 'for specials only' has become common. The dogs not being brought before the judges in the regular classes, no awards were marked against their names in the catalogue.

"A case, however, has been referred to this office where a dog entered the open class, and marked for specials only, was given reserve by the judge in the regular class. The owner objected to the award, which he could not do under the rule, as the wording is plain, 'a dog must compete in all classes in which he is entered.' It is therefore necessary that bench show officials should see that every dog entered in a class must compete in that class whether marked 'for specials only' or not. A provision is made in this rule for exhibitors who 'will not compete for special prizes,' but no provision is made for exhibitors to 'compete for specials only.'"

WARTS ON THE DOG.

Everyone is familiar with the small growths on the skin of the human being which are called warts, and dog owners frequently find the same excrescences on the skin of their animals, particularly on the head, the eyelids, ears, mouth, and lips being the most usual situation for their growth. The technical name for warts is verucca, which means literally an elevation. They are the result of an increased activity in the papillated structure of the skin, which leads to the secretion of an excessive amount of epithelial covering. There seems very little doubt that the tendency to excessive development of warts is hereditary, and certainly constitutional tendency is a strong factor in their growth. Warts not only appear on the skin of the dog and other animals, but also on the mucous membrane, particularly on the inside of the mouth, in some instances tongue, lips, and palate being thickly studded with them. In size and form warts exhibit great variety, those usually seen being small and round, but occasionally they grow to some length, and though, as a rule, they appear as isolated growths, cases are met with in which they are scattered so profusely over certain parts of the body that the skin has the appearance of the skin of an elephant instead of that of a dog. Frequent inquiries are made by correspondents as to the best method of treatment, and there is no doubt that this must vary according to the extent and situation and character of the growths. Among the most common forms in some animals is the pedunculated wart, by which is meant warts which have a stalk, and which hang from the skin like an apple or pear. This form when found in cattle often assumes an enormous size. Their removal is comparatively easy, a ligature, or the simpler method of tying a piece of string round the neck of the wart and snatching it away is frequently perfectly successful in the case of these pendant growths. Other warts are exactly the opposite of the pedunculated form, having a broad base, and being only slightly raised from the skin. These can be most easily removed by the scalpel; but this instrument can only be used when the skin is sufficiently loose to allow the contraction which necessarily takes place in the healing process.

Encysted warts are closely related to fibrous tumors, and only present the character of warts when they have attained a considerable size, and push their way through the skin, carrying a covering of cuticle with them. Some warts are highly vascular, and bleed freely when they are cut, and the popular idea that the blood from a wart would, if allowed to flow over the skin, cause the appearance of fresh warts is familiar to most of us, and there is at least ground for suspecting that this idea may be correct. It has, at any rate, been proved by experiment that papillomatous growths may be transmitted by inoculation, and various instances have been met with in which it appears at least probable that the scratching of a wart in some delicate part, and the consequent distribution of the blood which flowed from it on to the skin or mucous membrane, resulted in the appearance of a fresh crop of wart growths. Besides the use of a ligature and a scalpel, the application of caustic is a means of ridding the dog of the growths, nitrate of silver or acetic acid being frequently used. It is necessary before applying the caustic to scrape the surface of the warts, in order that the epithelial covering may be removed, as it would be useless to bring the agent, however powerful, in contact with the dense horny covering of the growth. Arsenic mixed with a little honey, and smeared over the surface of the wart after the central portion has been sufficiently scarified to cause a little bleeding, is often found successful. Great care, however, must be taken in the use of any of these agents, as the reckless application of either might easily cause extensive sloughing of the surrounding parts. [In the application of caustic or any corrosive agent, arsenic, etc., there is always danger of further complication impending from the dog's licking, with the tongue, any or all affected parts that can be reached. The prevention of this habit, for the time being, by whatever suitable means handy, would of course be readily understood by the person treating the dog.—Ed.]

The treatment of warts when they are found in delicate parts such as the eyelids, the inside of the mouth, etc., is naturally not easy, and our readers may be glad, observes a writer in the London Field, to be reminded that there remains yet another remedy, which has at least the advantage of being very simple, and which can be applied, especially in the case of the dog, when the situation of the wart forbids the use of scalpel, ligature or caustic. The application of fresh blood is, it is asserted by many who have tried it, a most effectual remedy. It is unusual for correspondents who ask for advice to inform us as to the success of remedies suggested, but in the case of the treatment of warts with the warm blood from freshly slaughtered animals, various correspondents have written after trying it to express their satisfaction with the results of the method. To apply the remedy effectively, the dog must be taken to the slaughter house, the blood taken from a recently killed animal while warm, and before coagulation has commenced, and the warty growths smeared with it. If they are inside the dog's mouth, his head should be thrust into the vessel containing the blood. He will naturally protrude his tongue, which will carry the blood back into the mouth and the mucous lining. In one instance this method was carried out on three occasions, with intervals of two or three days. The warts became brownish in color, faded and shrank rapidly, and finally disappeared.

It occasionally happens that the greater part of a dog's body is covered with small warts, and in this instance it is sometimes considered advisable to administer small doses of salicylic acid; but this must only be tried under proper supervision, and there is no question that the blood bath is by far the safest

plan, and might, at any rate, be given a fair trial before more stringent measures are employed. In former times the treatment of warts was carried on in less scientific ways than at present. With human beings, the most popular method was that of charming the growths away. A knot tied in a piece of string, which was then buried in the earth, was considered to be quite infallible; but was probably not tried with the lower animals, as the necessary faith in the power of the charm would not have been forthcoming. Two favorite devices for removing pedunculated warts from animals were the pincers and the bowstring. The use of pincers required no skill; the warts were merely seized and pulled off. The use of the string was more complicated. A strong piece about three yards long was used, a loop made in the middle, which was then slipped over the head of the wart. A man held either end of the string, and on a given signal the loop was pulled tight, inclosing the neck of the wart and cutting it through. In both these cases the wart usually bled, and this was stopped by a touch of a red hot iron. These very rough measures could only be excused on the plea that they were usually successful, and were applied to the larger animals, the horse and the cow. Occasionally warty growths appear in some of the canals and tubes of the respiratory organs, and cause serious and even fatal obstructions. They would, however, only be discovered on post mortem examination, and, even if it were otherwise, could not be treated.

A Novel Gun Attachment.

Alfred T. Wright of Roxton, Tex., is the patentee of a novel invention providing a handle which may be applied to rifles and shotguns to facilitate supporting the barrel end of the gun, says the Scientific American. In aiming a gun in the ordinary way, the palm of the left hand is upward, and in swinging the muzzle of the gun around at different times, the weakest and least used muscles of the arm are employed. Furthermore, the arm is held nearly straight from the wrist to the shoulder, preventing the use of the elbow joint, and brings into play muscles which are already developed and strengthened, thereby improving the aim of the operator, and relieving him from the fatigue of continually holding his arm in a strained position. The invention also provides a very comfortable and convenient way of carrying the gun, permitting the sportsman to carry it with the muzzle down, and the arm hanging freely at the side. The attachment comprises a clasp adapted to grip the gun barrel, and a depending handle, which projects below the barrel and may be readily grasped by the hand. The clasp consists of two metal plates, curved to embrace the barrel, and formed with depending shanks to which the handle sections are attached. The shanks are separated by a filler piece, and the outer faces of the shanks are covered with wooden sections, the whole being bolted firmly together. In practice the clasp sections may be lined with leather or soft material to prevent scratching the barrels, and to give a proper finish to the same. The clasp may be fixed at any position on the barrel by means of a thumb screw at the forward end, which may be tightened to clamp the clasp sections together. This handle also protects the hand from the heated or cold barrel, as well as giving the shooter a firm hold on the gun.

Oregon Anglers to Be Taxed.

At the recent annual meeting of the Oregon Fish and Game Protective Association, among the matters discussed was a proposition providing for the taxing of anglers for the purpose of raising funds to further the work of propagating trout in the different streams in the state. At present Oregon fishermen who delight in angling for these sportive denizens of the brooks and lakes are dependent on the government each year for the supplying and stocking of streams with eggs. According to the promoters of the new idea the association will be able to raise a suitable fund by arranging for the imposition of a small fee of 50 cents or \$1, which moneys could be used in the stocking of streams on a much larger scale than in the past. This proposition up north seems to meet with favor by most of the Nimrods, who express a willingness to pay such a small sum for something that will bring them better results than the present system of dependence on the government.

This tax, it is proposed, will not apply to boys under 18 years of age, and, therefore, will not work a hardship on any youth desiring to spend his time in the effort to lure the speckled beauties from their haunts. The success of the hunters' license whereby the state has acquired a suitable fund for the protection of the game interests, has served as an incentive for the new scheme, for it is argued that the fund to be secured by the taxing of the several thousands of fishermen in the state would aid in stocking the various streams throughout the state with trout to such an extent that the results would more than be satisfactory to the sportsmen.

Another measure introduced at the meeting was a proposed plan of reorganization, submitted by Secretary A. E. Gebhart. This plan is the proposal to form separate organizations of the association among the members residing in the different counties, which the author claims will stimulate more interest in affairs pertaining to game protection in the different localities, as they would be able to act independently on matters pertaining to their respective districts.

It was also recommended that the organization go on record as favoring a measure doing away with the exemption of farmers in the matter of taxation, for it is claimed that the game wardens have met with considerable difficulty in collecting fees from persons who lease preserves and claim exemption on the ground that they are entitled to hunt on their own ground.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

LET THE FISH LAWS BE REVISED AND ENFORCED.

The Modesto Herald strikes a keynote in sounding the alarm for early and active measures in the line of fish protection. That there should be a revision of the present law is patent to everybody who is at all cognizant of the situation. If there was provision made for the enforcement of the law, things would not be so bad. We will make this suggestion to our contemporary, that if the law is violated in Merced county as is intimated below, the county officials are lax in their duties. It is not absolutely necessary that police action, against fish and game law violators, be taken by a Deputy Fish Commissioner or Game Warden. The county officers have full power in the premises.

Merced county is quite a distance from the city, it is true, but right under the noses of the Fish Commission, a law that is plain and mandatory is violated week after week, systematically and persistently—we mean that provision of the statute which prohibits the fishing for and taking of salmon, shad or striped bass with nets on Saturdays and Sundays.

Just what particular right the Fish Commission has to place a construction on this section of the law entirely opposite to its intent and purpose is a puzzle that has been, as yet, unsolved by many.

The article first referred to above is the following: It is reported that the salmon are running up the San Joaquin river in greater quantities than ever known before. In this connection, it might be suggested that here is a place where the game laws might undergo a radical revision.

Last December it was demonstrated in this county that the salmon is a game fish in every sense of the word, and that they can be taken with rod and line. This is clean sport, and exciting sport. The present law gives but a short season for the catching of the salmon, for the reason that the common way of taking them is to put nets partly across a stream and spear the fish as they try to pass the barrier. While the law may be all right, it is generally unobserved. In the Tuolumne river last season, to the positive knowledge of the writer, there were several nets entirely across the stream, twenty-four hours in the day, while others were put entirely across while the owners were fishing, and then removed. In the San Joaquin, gill-nets were placed entirely across the river, in utter defiance of the game laws, preventing the fish from ascending the stream to spawn.

Should a law prohibiting the use of seines and regulating the size of nets, and prohibiting the taking of salmon and bass otherwise than with hook and line be passed, the waters of the Tuolumne and San Joaquin would within five years afford some of the finest fishing in the world. The bass are driving out the carp and kill off the young catfish. It has been shown also that the rod and reel enthusiast no longer needs to hie him to the waters of the Columbia river and its British Columbia tributaries to take the salmon with fly and spoon. He can have just as good sport within 125 miles of San Francisco, if the laws be made to properly protect the fish.

We would suggest, and will be enthusiastically seconded by all true Ike Waltons, that the fish law be so amended that salmon may be taken at any time of the year with the hook and line; that set nets of no kind be allowed in a stream for the purpose of preventing the free passage of the fish, and that seining be absolutely forbidden; also that wide awake game wardens be appointed and the laws stringently enforced.

The Tuolumne is becoming well populated with the gamey striped bass, and a few of the black bass are also found in its waters. But at the low water stage, market fishermen and "hogs" visit the "holes" with seines and clean out the fish, regardless of size or kind.

FLY-CASTING CONTESTS.

The dates arranged for the fly-casting contests of the San Francisco Fly-Casting Club at Stow lake this year provides for a series of ten Saturday and Sunday meetings at the lakeside, with two additional dates for casting up back scores as follows:

The dates for the Saturday events are: February 24th, March 10th, March 24th, April 7th, April 28th, May 12th, June 2d, June 14th, July 28th, August 25th, September 15th. The Saturday re-entry dates are May 12th and September 15th.

The dates for the Sunday contests are: February 25th, March 11th, March 25th, April 8th, April 29th, May 13th, June 3d, June 17th, July 15th, July 29th, August 26th, September 16th. May 13th and September 16th are Sunday re-entry dates.

The following gentlemen were elected to membership at the last meeting of the club. John H. Hopps, L. G. Burpee, H. Page, C. S. Moses, John Van Allen, W. H. Brophy and E. M. C. Whitney.

The rules in force last year in the club's contest on Stow lake will govern the events this year.

The initiation fee on and after May 1st will be \$50.

The sportsmen of Spokane, through the Spokane Rod and Gun Club, have addressed circulars to many farmers in Washington asking that the quail about their farms be fed during the winter months. It will be a paying investment for all concerned if the suggestion is carried out.

AT THE TRAPS.

A feature of the Washington's Birthday shoot at Ingleside will be the Phil B. Bekeart challenge cup race at 100 birds.

In the five man team race the best two out of three races will decide the ownership of the purse. This event has already been won once by a Golden Gate Gun Club team.

A gun club has been organized at Albion, Mendocino county, with a list of twenty-five members to start with. There is considerable rivalry between the Albion and Fort Bragg shooters. In consequence several trap shoots in the near future are talked of.

The Richmond Gun Club was recently organized across the bay at Point Richmond. Forty members are on the charter roll. Arrangements will be made for a number of trap shoots this season. The officers are: President, J. Q. Black; vice-president, V. A. Fenner; secretary, J. P. Arnold; treasurer, J. E. Moitoza; property holder, R. C. King.

The bustling town of Alton, Humboldt county, boasts a flourishing gun club, and a prize shoot is held every Sunday, weather permitting. It was organized quite recently with twenty-two members and the following officers: G. W. Cousins, manager; Grant Clark, captain; R. P. Nellist, secretary and treasurer. A good piece of ground has been rented from Charles Carr near the town, and the same is being fixed up appropriately with a house and platform soon to be constructed. The club purposes entertaining other clubs this season, and will provide pleasure and profit for their visitors. The scores made at the shoot of last Sunday was as follows. F. C. Hauck, 21 out of 25; C. Gould 20, C. T. Bryant 15, George Cousins 14, H. Christiansen 14, N. Hauck 11, R. P. Nellist 11, R. T. Bryant 10, M. Bailey 10, T. Fiest 9, B. Davis 8, A. Hazen 7, Charles Bryant 6.

The annual spring tournament of the Delaware State Trap Shooters' League under the auspices of the Wawaset Gun Club will be held at Wilmington, Del., May 9, 10. The secretary, Mr. W. N. Foord, will send program to any address requested as soon as issued.

Harvey McMurchy is due in this city next week.

The Pueblo Gun Club of Pueblo, Colo., has 112 members. J. W. Reger is president; E. G. Galloway, vice-president; J. C. Croft, secretary and treasurer, and John M. Killin, field captain. Jim Head of the U. M. C. Co. was a recent guest of the club.

The Kentucky Trap Shooters' League will hold its annual state championship tournament on the grounds of the Daviess County Gun Club, at Owensboro, Ky., May 23, 24. There will be added money in each event and a sterling silver cup will be offered for the state championship at 100 targets. Frank Pragoff of Louisville is secretary of the league. For programs or information about the tournament address James Lewis, secretary, Daviess County Gun Club, Owensboro, Ky.

The program for the coming tournament of the Detroit, Mich., Gun Club announces that the principal event for the first and second days will be the live bird trophy shoot for the Gillman and Barnes international trophy, valued at \$150, with \$100 added. The third day will be devoted to target shooting and there will be ten events. Any further information desired may be obtained by addressing Frank H. Patton, Celeron, Detroit, Mich.

The fifth annual Sunny South Handicap was held at Brenham, Texas, January 22-27. The program called for 1220 targets, not including the Sunny South Handicap of 100, which did not figure in the averages. Chan Powers, with 1180 out of 1220, was high amateur for the shoot. Mr. Powers shot remarkably well. Getting off the first day to a bad start (103 out of 120), he dropped but two the second day (218 out of 220), five the third day (220-215), three the fourth (220-217), eight the fifth (220-212), five the sixth (220-215). W. R. Crosby equaled this total, having 10 the best of Powers at the end of the first day's shooting. Frank Riehl, 1175, was next. H. G. Taylor, 1160, and T. E. Hubby, 1159, followed in order. Sixty-four shooters participated in the regular series of events. Shooter-seven men lined up in the Sunny South Handicap at 100 targets, 15 to 21 yards. Of these 33 finished with 90 or better. Thirteen finished in the 80s. There was only one in the 70s. W. R. Crosby, at 21 yards, the top distance, got 98. Maxwell, the Nebraska wonder, at 16 yards, tied this. On the shoot off Crosby got 22, Maxwell 21, and the O'Fallon, Ill., star took the cup. Among those present were: Luther Wade, L. E. Dinsmore, Frank Riehl, H. Dunneil, B. Stilling, J. R. Graham, Claude Binyon, W. H. Illian, H. S. McCloskey, J. W. Speight, E. L. Jones, A. Wilcox, L. E. Ross, Otto Sens, "S. A. C." T. E. Saxton, Dan Bray, G. A. Schroeder, Geo. W. Maxwell, Will Veach, Wallace Miller, Charley Young, Walter Huff, Lednum, W. R. Crosby, Chan Powers, John Burmester, R. O. Helkes, H. G. Taylor, Harry Scane, H. D. Bates, J. S. Day, Turner Hubby, Weatherhead, A. M.

Hatcher, Geo. Mackie, Lou Fisher, M. E. Atchison, Planck, Wm. Clayton, W. D. Townsend, C. A. Thorpe, Malone, Anderson, Dick Jackson, H. M. Jackson, E. J. Nalle, F. M. Gooden, C. D. Ellison, H. Murrell, J. A. Dryden, Mrs. A. Topperwein, Lige Woodward, Omer Pearn, W. Gilbert, H. E. Sherman, O. C. Guessez, J. B. Riddle, Stillson, R. Cook, D. Morrill, Dave Harrell and Harold Money and others.

Honolulu Kennel Club.

A strong kennel club, with 60 names on the charter roll, was recently organized in Honolulu, H. T. Mr. Will E. Fischer was temporary chairman and Dwight Stein temporary secretary at the preliminary meeting. Messrs. Chas. Hustace, J. Batchelor, Dr. Rowatt, Clarence Crabbe, C. Campbell and W. E. Fischer were appointed a committee on permanent organization.

Kennel affairs have gradually been coming to the front in the far away Pacific isles and now the fancy is strong enough to organize a club and hold bench shows. It is a fact not generally known that there are quite a number of well bred and good Pointers, English, Gordon and Irish Setters, Irish and Bull Terriers, Bulldogs, Scotties and a fair sprinkling of good Collies to be found in the islands.

Transfer of Kennel Name.

Sunset, the kennel name under which Dr. Fred W. D'Evelyn's good Fox Terriers were, not so long ago, familiar to the Coast fancy, will soon be the kennel name for John L. Hinkley's dogs, application for the transfer having been made to the A. K. C. at New York.

COMING EVENTS.
Rod.

Jan. 1-June 1—Closed season for black bass.
Feb. 24—San Francisco Fly-Casting Club. Saturday Classification Contest No. 1. Stow lake, 2:30 p. m.

Squier, third general average, 173 out of 190, shooting "DuPont"; O. Hohing, Lonaconing, Md., first amateur average, 164 out of 190, shooting "DuPont"; F. Billmeyer, Cumberland, Md., second amateur average, 163 out of 190, shooting "DuPont"; R. S. Denniker, Ruffsedale, Pa., third amateur average, 156 out of 190, shooting "DuPont."

WINCHESTER .22, MODEL 1906

CORROSION OF FENCE WIRE.

The Department of Agriculture at Washington has just issued a bulletin on the corrosion of fence wires which we commend to the attention of all interested on the subject, especially the manufacturers of wire. The author of the bulletin, Allerton S. Cushman, concludes: First, that modern Bessemer and open earth steel wire rust much more rapidly than iron wire; and, second that manganese unevenly distributed in the steel is at least in part the cause of it. The first proposition all will admit, and the second should be suggestive to the manufacturer. It has been the general impression that inferior galvanizing had much to do with the short life of modern fence wire, but this Mr. Cushman thinks is not the case, the fault being in the wire itself, though of course thickly galvanized wire is more durable than the same wire not so well galvanized. The solution of the problem lies with the wire manufacturer but not with him alone. He is seeking to make a cheap product, and as long as users of wire prefer this in kind he will naturally make it. If cheapness is made the main consideration in buying fence wire we must expect a wire that will not last long. What is needed now is a practical test by which the buyer of wire can tell just what kind he is getting; and a general realization of the fact that a durable fence wire will cost more than one made by the process now in use. The farmers of the country in recent years by their demand for iron nails have greatly increased their production; and if they will demand more durable wire and pay the price to secure it they will compel manufacturers to go back to iron wire or produce better steel wire. Some manufacturers claim to have solved the problem of a durable steel wire and we hope they have, because it is cheaper than iron wire. The best advice that can be given now is to avoid light steel wire, and do not try to get the cheapest but the best, on which a reasonable guaranty is given.

KEEP HOGS DRY.

The time of year is present when unusual care should be taken to keep hogs dry. Their sleeping quarters should be such that rain cannot fall into them. They should be raised above the outside ground sufficiently to keep water from draining from the outside in on them. No animal can be comfortable when damped and chilled for long periods at a time.

Dampness will also cause rheumatic troubles. Any one who is intelligent enough to understand that a hog cannot do well unless comfortable, will readily realize that such pains as a person suffers from rheumatism are enough to prevent a hog from making good returns to its owner. Swine do not need to be pampered, but nothing should be neglected that will make them comfortable and healthy.

No matter how the roof of the shelter looks, have it rain proof. Old hay or straw can make a very serviceable roof.

Warranted to Give Satisfaction.

Gombault's
Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

In the Kansas City Court of Appeals a fortnight ago four suits by shippers against a railroad for damages arising from delays in reaching market were decided in three of them. In the lower court the shippers had all obtained verdicts and three of them were successful on the appeal. The fourth decision however was reversed, the plaintiff having failed to prove damage.

The hen that lays eggs in winter does something else besides lay on fat. She must have egg-making food, which means meat, milk, clover, bran and vegetables, along with corn.

A HANDSOME PAIR OF COBBY BUILT coal black Geldings; five years old; 15 1/2 hands high. By a son of McKinney out of standard bred mares. This is a thoroughly high-class park or road team and has style and manners that would win in a show ring. They are broken to stand, walk and trot; are fearless of all objects on road and steam cars; guaranteed to drive single or double, or on the lead in four-in-hand, and sound and kind in every particular. Address
H. R. RAND, The Renaissance, corner Franklin and Fell Sts., San Francisco, Cal.

A GOOD MARE FOR SALE.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11-4

(Reg. No. 22449)

Sire, ELECTIONEER, sire of 166 in 2:30 and grandsire of Major Delmar 1:59 1/2.
Dam, LORITA 2:18 1/2 (dam of Alta Vela 2:11 1/2 and Palori 2:24 1/2) by Piedmont 2:17 1/2; second dam, Lady Lowell (dam of Ladywell 2:16 1/2 and Lorita 2:18 1/2) by St. Clair; third dam, Laura, dam of Doc, sire of Occident 2:16 1/2.

Address all communications to BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

FOR SALE OR LEASE.

Two Prince Airlie Stallions.

PORTOLA 37413, a handsome golden bay, 7 years old, 16 hands, weighs 1190 lbs.
MENIO BOX 37401, a magnificent brown with white points, 6 years old, 16 1/2 hands, weighs 1200 lbs.

These two horses are full brothers, being sired by Prince Airlie 2:04 1/2; he by Guy Wilkes 2:15 1/2, sire of Fred Khol 2:07 1/2, Hulda 2:08 1/2, Seymour Wilkes 2:08 1/2; first dam Signal by Del Sur 2:24; second dam Lady Signal 2:35 1/2 by Signal 3:27. Both of these horses are very fast for the amount of work, being only a few months last year, showing quarters around :34 and :35.

For further information apply to

P. H. McEVoy, Menlo Park, Cal.

WILLIAM HAROLD 2:13 1/2 FOR SALE

THE MECK ESTATE HAVING BEEN PARTITIONED, and the breeding of horses discontinued, the stallion WILLIAM HAROLD 2:13 1/2 is offered for sale or lease to a responsible party. William Harold is by Sidney 2:19 1/2, and his dam is Cricket 2:10 by Steinway. Cricket is one of the great producing mares of California, being already the dam of five in the list and has three more foals that will be given records. William Harold has had the most limited opportunities in the stud, yet is the sire of Janice 2:08 1/2 trotting, Dan Burns 2:15 and Judith 2:25 and several others in the list. He is in excellent condition, and as his get are all large, well made and nicely turned horses he should be a good money earner in the stud if in good hands. Apply to or address
H. W. MECK, San Lorenzo, Cal.

JACK FOR SALE OR LEASE.

WELL BROKEN AND QUICK TO ACT; will do his own teasing; 5 years old. Address
D. S. MATHEWS, Ryde, Cal.

Closing Out at Private Sale of the Sacramento Valley Stock Farm STALLIONS, BROOD MARES, and Young Stock Suitable for Training.

CH. STALLION, FOALED 1902, "DILLCARA."—Sire Sidney Dillon; 1st dam, Guycara, 2:18½, by Guy Wilkes, 2:15½; 2nd dam, Biscara (dam of 5 in list, 4 below 2:20), by Director 2:17; 3rd dam, Bicara (dam of 6 in list, including the great stallion Pancoast and other producing sires and dams), by Harold 413 (sire of Maud S); 4th dam, Belle (dam of Belmont, sire of Nutwood, McCurdy's Hambletonian 2:26½, and other producing sires and dams), by Mambrino Chief 11; 5th dam, Belle Lupe, by Bellfounder (Brown's), son of Imp. Bellfounder and Lady Allport by Mambrina, a son of Imp. Messenger, the next dam of Brown's Bellfounder being by Tippoo Sahib, son of Imp. Messenger, and the next dam by Imp. Messenger himself.

This young stallion's pedigree is unexcelled, his sire and the sires of his 1st, 2nd, 3rd and 4th dams having produced world-record holders, as well as many others the gamest and best of all times. In looks and make-up he is as great as his pedigree, unexcelled. Although never trained, his natural speed is phenomenal. For the production of world-record holders, he should excel his sire or the sire of his 1st, 2nd, 3rd or 4th dam, each of which enjoy fame in this respect. As a candidate himself for the record he is entitled to much consideration.

CH. STALLION, FOALED 1902, "FLOSSNUT."—Sire Nutwood Wilkes 2:16½; 1st dam, Flossie, by Cornelius (11335), sire of Connelita 2:10¼, etc., by Nutwood; 2nd dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 3rd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 4th dam, Emma Taylor by Imp. Glencoe; 5th dam, Lancess 4th dam of Palo Alto and 5th dam of Alcyone, Alcantara, etc., by Lance.

The blood lines in this young stallion's pedigree represented the male line of Nutwood Wilkes laid upon two crosses of Nutwood, one of Echo, one of Geo. M. Patchen Jr., and a thoroughbred female line tracing to Lancess, to which female line trace such great ones as Alcyone (sire of McKinney), Alcantara, Palo Alto, and many other great ones. The sires in the thoroughbred female line down to Lancess have each produced the dams of trotters. The high degree of natural speed, strength and size, Nutwood type of conformation and make-up of this young stallion make him worthy of use in the stud and worthy of the opportunity to earn a low record on the track.

BAY MARE, FOALED 1903, "FLOWERET BELLE."—Sire Monbells 2:23½, son of Mendocino 2:19½, by Electioneer and Beautiful Bells (world's greatest brood mare), by The Moor; 1st dam, Floweret (dam of 2 in list and full sister to Wildflower, Manzanita, etc.), by Electioneer; 2nd dam, Mayflower 2:30½ (dam of Wildflower, Manzanita, etc.), by St. Clair 16675.

The sire of this filly represents Electioneer's most famous speed producing line, the Electioneer-Beautiful Bells cross. The dam of this filly represents a great performing and producing line that first made Electioneer famous through the great Wildflower, Manzanita, etc., the Electioneer-Mayflower cross. This filly was bred to Dillcara in 1905, and the pedigree of the produce will be composed almost exclusively of the greatest bloodlines of the greatest producers in the trotting world. Her produce from such mating will always rank of the highest value for breeding purposes, as well as for racing.

CH. MARE, GRISSETTE, FOALED 1902.—Sire Marengo King 2:29½, son of McKinney 2:11½, and By By by Nutwood; 1st dam, Lisette by Abdallah Wilkes 7562 (sire of Wauco 2:14½, etc.), son of Geo. Wilkes; 2nd dam, Musette by Startle 290 (sire of 11), son of Hambletonian 10; 3rd dam, Beckie Sharp by Billy Denton (sire of 2), son of Hambletonian 10; 4th dam, Kent Mare by Black Hawk 5.

In this filly's pedigree we have almost exclusively the producing male lines of Hambletonian 10. Her sire traces to that speed progenitor through McKinney, crosses of Nutwood and Dictator being thrown in. We get to Hambletonian 10 in the male lines of the sire of the 1st, 2nd and 3rd dams very quickly through only one or two generations of producing sires, something phenomenal for close up breeding to Hambletonian 10. This filly was bred to Dillcara in 1905, and the produce will probably have in its pedigree more crosses of Hambletonian 10 than any other horse, following the suggestion, "The way to breed trotters is to get all the blood of Hambletonian 10 that you can, and then get more." Stout and well formed as this filly is, her produce should be not only speedy but useful in the racing game. Not broken to drive.

CH. MARE, FOALED 1902, "BESSIE SWEET."—Sire Diablo 2:09½; 1st dam, Bessie Roan by Hock Wilkes, son of Guy Wilkes; 2nd dam, Bessie by Ventura 2:27½; 3rd dam, Lady Emma 2:39½, by Paul's Abdallah, son of Hambletonian 10. The excellent brood mare sire Ventura 2:27½, a thoroughbred, being the sire of the 2nd dam, a real good half-thoroughbred son of Guy Wilkes being the sire of the first dam, Diablo 2:09½ being the sire of the filly herself, the 2nd and the 3rd dams having been about the best mares ever driven in San Francisco for speed at the Park, should make this filly most valuable for breeding purposes, she being of large size and stout and blocky. Was never bred or broken.

CH. MARE, FOALED 1889, "FLOSSIE."—Sire Cornelius 11335 (sire Carmelita 2:10¼, etc.), son of Nutwood 2:18½, and Jennie G. 2:26½ by Echo, he by Hambletonian 10; 1st dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 2nd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 3rd dam, Emma Taylor by Imp. Glencoe; 4th dam, Lancess (to whom trace in female line Alcyone, sire of McKinney, Alcantara, Palo Alto, etc.), by Lance, son of American Eclipse. In this pedigree we have top crosses of Nutwood and Echo, great brood mare crosses, laid upon a thoroughbred female line going to Lancess, the 4th dam of Alcyone (sire of McKinney), Alcantara, Palo Alto, etc., the sires in this female thoroughbred line being the most noted for producing the dams and grandams of trotters. Lodi, the sire of the 1st dam, produced the dam of Pedlar and others; Bulwer was by Grey Eagle, whose daughters and grand-daughters produced great trotting performers; Imp. Glencoe's grand-daughters produced several trotters. The dam of this filly was a sister to Ruth Ryan, who produced Strathern, sire of Plunkett 2:13½. Sons of Flossie, by well bred stallions, should become great sires, as well as performers. She is a very large, stout mare, of the Nutwood type. Bred to Dillcara in 1905.

BAY MARE, FOALED IN 1894, "FLOSSIE HOCK."—Sire Hock Wilkes, son of Guy Wilkes and Eda (thoroughbred), by Hock Hocking; 1st dam, Flossie by Cornelius 11335, son of Nutwood and Jennie G. 2:26½ by Echo. (See Flossie for continuation.) This pedigree represents a Guy Wilkes-Nutwood-Echo cross upon an excellent thoroughbred female line. Not bred in 1905. Never broken. A stout, well made mare. No living produce.

BAY MARE, FOALED 1894, "BESSIE HOCK." Bay Roan Mare, foaled 1895, "Bessie Roan"; Ch. Mare, foaled 1898, "Bessie Babe"; three full sisters; Sire Hock Wilkes, son of Guy Wilkes 2:15½, and Eda (thoroughbred) by Hock Hocking, son of Ringgold by Boston; 1st dam, Bessie by Ventura 2:27½, thoroughbred son of Williamson's Belmont; 2nd dam, Lady Emma 2:39½ to pole, by Paul's Abdallah, son of Hambletonian 10. These three mares, full sisters, are each stout, smooth turned, extra well formed; were never broken to drive or ride. Their sire, Hock Wilkes, was a very stout, speedy, though crippled, half-thoroughbred son of Guy Wilkes. Their 1st and 2nd dams were about the speediest and best road mares driven in San Francisco and speeded in the Park. In this pedigree we have a top cross of Guy Wilkes laid upon a female line with Ventura, a thoroughbred brood-mare sire, for the sire of the first dam, and a son of Hambletonian 10 for the sire of the second dam, extra stout bloodlines for the production of game trotting speed.

ALSO SOME TWO-YEAR-OLDS out of dams whose pedigree is given above, suitable for training and breeding purposes, and entered in Futurity Stakes. One grand 2-year-old stallion.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

The fire iron is uncertain; blistering is less effective, and both necessitate laying up the horse from weeks to many months; mercurial and poisonous compounds produce irreparable injury, "Save-the-Horse" eliminates all these factors.

"Save-the-Horse" Permanently Cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for copy and booklet. At druggists and dealers or express paid. Scores of letters to confirm and convince. Send for copies. Absolute and overwhelming evidence and certainties as to the unfailing power of "Save-the-Horse."

TROY CHEMICAL COMPANY, BINGHAMPTON, NEW YORK. Formerly TROY, N.Y.

D. E. NEWELL, Pacific Coast Agent, 519 Mission St., San Francisco.

Asbury Park N. J., Nov. 20, 1905.

Troy Chemical Co., Binghamton, N. Y.
Gentlemen—I have used "Save-the-Horse" in numerous cases, curb splints and ringbones. It was through my success "Save-the-Horse" was introduced into this city. I tried it on a bad case of thrush, poured it right into the affected part three times a week, and it healed it right up making a perfect cure. I highly recommend it to all my friends. Yours truly,

C. D. HAVILAND,
Livery and Sale Stables.

Troy Chemical Co.
Gentlemen—My horse went lame from side bones, or shell bones, on both feet, and was laid up for about three months. The growths extended entirely around the quarter. I used two bottles of "Save-the-Horse" and the horse is perfectly sound, and I have driven over the macadamized and paved roads, and she never shows the least particle of lameness; the growths have nearly all disappeared. I have owned horses for years, used them to build railroads and every kind of contract work, and have used remedies, blisters, fire iron and electricity, but never saw anything take hold and produce such a result as "Save-the-Horse" in these cases. Very truly,

D. C. BENNETT, Contractor Builder,
416 79th St., Brooklyn, N. Y.

Albion, Ind., Nov. 15, 1905.

Troy Chemical Co., Binghamton, N. Y.
Gentlemen—I purchased a bottle of Save-the-Horse last spring, to use on a curb that had been laming a horse for nearly a year. I had used several other remedies, but they failed to work. I only used Save-the-Horse a few times when all lameness stopped and the horse has been bothered with it no more. I had another horse go lame with a bad splint and a few applications fixed him all right. I think your cure is all O. K. and well worth the money, and costs less for results than some of the cheaper remedies. I remain, yours sincerely,

S. S. STEEL.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (2 y. o.) 2:21¹/₄, (3 y. o.) 2:12, (a) 2:09¹/₄, Leonora 2:12¹/₄, Polka Dot 2:14¹/₄, etc. Bay Stallion, 15³/₄ hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.Sire, ELECTIONEER 125, son of Hambletonian 10. First dam, MANO (dam of MENDOCINO) (3) 2:19¹/₄, Electant 2:19¹/₄, Morocco (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W. (3) 2:17¹/₄, Hyperion 2:21¹/₄, Memento 2:25¹/₄, Mithra (p) 2:14¹/₄) by Hambletonian Jr. 1882; third dam, Gilda (thoroughbred) by imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm.

Sire, MCKINNEY 8818 (record 2:11¹/₄). First dam, HELENA 2:11¹/₄ (dam of Wildnutting 2:11¹/₄; Dobbel 2:22, Hylta (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six to list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at PALO ALTO STOCK FARM. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.Mc KINNEY, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

Box 151, PALO ALTO, CAL.WAYLAND W. 22516. Record 2:12¹/₄.

ONE OF THE LEADING SIRE OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06¹/₄, leading money earning pacer of season 1905. Sire of Morosco 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:28, dam Lettie (dam of Wayland W. 2:12¹/₄, Welcome 2:10¹/₄, Maud Singleton 2:23) by Wayland Forrest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Anteeo or any of our great sires, he is the sire of Bolivar 2:06¹/₄, Nellie R. 2:10, Arthur W. 2:11¹/₄, Morosco 2:12, John A. 2:12¹/₄, Forrest W. 2:14¹/₄, Leland W. 2:16, Al Sandy 2:19¹/₄, Maud Sears 2:21, Bonita Wilkes 2:26¹/₄. Wayland W. will make the Season of 1906 at SANTA ROSA, at McGregor & Rocking Stables.

Terms \$40 for the Season. Pasture \$3.00 per month.

W. C. HELMAN, Owner.

The McKinney Stallion

KENNETH C. 2:17 {THREE
YEAR
OLD
RECORD}Sired by MCKINNEY: dam MOUNTAIN
MAID (dam of Tom Carneal 2:08¹/₄) by
Cresco 4908 (sire of Allie Cresco 2:13, etc.);
next dam by Cloud.

Will make the Season of 1906 at

PLEASANTON, CAL.

KENNETH C. was one of the fastest of an
exceptionally good lot of three-year-olds that
raced in California in 1905. He is a splendid
individual, has size, style and quality, and
the grandsires and granddaughters of McKin-
ney through Kenneth C. will be equal to any
in the land.Terms \$30 for the Season.
\$15 for single service.

Address

S. K. TREFFRY, Pleasanton.

MONTEREY 2:09 1-4

Reg. No.
31706(Sire of IRISH 2:08¹/₄, Fastest Four-Year-Old Pacer of 1904).By SIDNEY (grandsire of Lou Dillon 1:58¹/₄); dam, HATTIE (also dam of Montana 2:16) by
Commodore Belmont 4340. MONTEREY 2:09¹/₄ stands 15 3 hands, weighs 1200 lbs. and is one of the
finest individuals on this Coast. FEE, \$50 for the Season.YOSEMITE By MONTEREY 2:09¹/₄.
Dam, LEAP YEAR 2:26 (full sister to Iago 2:11) by Tempest 1881,
son of Almont 33.YOSEMITE is a very high-class young trotter, and as he will be trained this year he will be
allowed to serve only six choice bred mares. FEE, \$25 for the Season.

Will make the Season at SAN LORENZO and ALAMEDA.

I have leased a fine, roomy barn with 14 large box stalls on Sherman street, four blocks from the
race track, Alameda, and am prepared to do public training. Would like to get two good trotters
and a promising three-year-old to prepare for the races this season.

WINNER OF HARTFORD FUTURITY (\$8500) FOR 1905.

BON VOYAGE (3) 2:12½ is by Expedition 2:15½ by Electioneer 125; dam Bon Mot by Erin 2:24½; second dam Farce 2:29½ by Princeps 536; third dam Roma by Goldust 150. For breeding, individuality and racing qualities he is unsurpassed. He is a rich bay in color with black points, stands 15.3 hands and when matured will weigh 1200 pounds.

Season of 1906 at PLEASANTON RACE TRACK.

where he will be limited to twenty outside mares.

\$50 for the Season. USUAL RETURN PRIVILEGES. or money refunded should mare not prove in foal. A rare chance to breed good mares to an exceptionally high-class and highly bred young stallion.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam ALVIA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:22; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1. and high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11 GREATEST SON OF McKINNEY 2:11

Will make the Season of 1906, from February 1st to June 1st,

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Z-phyr 2:07½, timed separately in a race in 2:03½; Charley T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Bellemont three years old, record 2:15½, trial 2:14½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Dee Coe 2:19½, trial 2:13½; Lyle Zombro 2:21, trial 2:10; Lord Kitchener 2:24½, trial 2:19½; Zebious 2:50½, trial 2:20; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEO. T. BECKERS, 3949 Figueroa St., Los Angeles, Cal.

NEAREST 35562

RECORD 2:22½. Sire of Alone (4) 2:09½ (trial 2:06½). Just It (3) 2:19½ (trial 2:12½), High Fly (2) 2:24½ (trial 2:12½, last half in 1:00½) and full brother to the great John A. McKerron 2:04½, the second fastest stallion in the world.

By NUTWOOD WILKES 2:16½, sire of John A. McKerron 2:04½ (second fastest stallion in the world), Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes (4) 2:10½, George B. 2:12½, North Star (3) 2:13½, winner Pacific Breeders Futurity Stakes \$6000 Guaranteed of 1905 and 32 in 2:30 list; dam INGAR, the greatest producing daughter of Director; second dam Annie Titus by Echo 462; third dam Tiffany mare (dam of Gibraltar 2:23½) by Owen Dale, son of Williamson's Belmont. NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Will make the Season of 1906 at San Jose, with return privilege in case horse remains in California. For terms and extended pedigree address

THE STANDARD TROTTER STALLION Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station, LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I 2:08½ and RAY M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand finish, plenty of substance, excellent disposition. He has a stout back, strong loins and stifles good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF. H. B. FREEMAN, University Station, Los Angeles, Cal

KINNEY WILKES

Sired by McKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zoelock 2:05½, You Bet 2:07, Jennie Mac 2:09, etc.

First Dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of F. ed Kohl 2:07½, Hulda 2:08½, Lesa Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezella 2:10½, Katherine A. 2:11½, etc., etc., and grand sire of John A. McKerron 2:04½, second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:24, Native Son 2:26½ and Silver Spray 2:28) by Arthurton 365; third dam, Nancy by Gen. Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best bred of the McKinneys.

Will make the Season at

LEONARD STATION, Santa Cruz County.

Fee \$25.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED

NUTWOOD WILKES 2:16¹/₂ Sire GUY WILKES 2:15¹/₂

Dam LIDA W 2:18¹/₂

by NUTWOOD 2:18¹/₂

NUTWOOD WILKES 2:11¹/₂ is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12¹/₂ respectively. Who is it? 2:12, ex-champion three-year-old gelding of the world, reduced his record to 2:10¹/₂. John A. McKerron 2:04¹/₂ (2:12¹/₂ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04¹/₂ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09, Miss Idaho 2:09¹/₂, Who is It 2:10¹/₂, Stanton Wilkes 2:10¹/₂, Cresco Wilkes (4) 2:10¹/₂, George B. 2:12¹/₂, Claudius (4) 2:13¹/₂, North Star (3) 2:13¹/₂, Bob Ingersoll (4) 2:14¹/₂, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone (4) 2:09¹/₂ and Cavallero 2:09¹/₂.

His daughters produced Miss Georgie 2:10¹/₂, Mona Wilkes (3) 2:11¹/₂, Lady Mowry (4) 2:12¹/₂, Caroline L. 2:14¹/₂, Hoilo 2:15.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

Send for Tabulated Pedigree. For further particulars apply or address

MARTIN CARTER, Nutwood Stock Farm, Irvington, Alameda Co., Cal.

NUSHAGAK 25939

Sire of ARISTO 2:08¹/₂, winner of Occident and Stanford Stakes of 1902.

Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:20 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO 24586 Sire, PALO ALTO 2:08 3-4

Rec. 2:12¹/₄ Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and grand-dam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12¹/₄, Thomas R. 2:15, Vendoms 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$200⁰ when mare is bred and
2 available when mare is known to be in foal.

For further particulars address

H. S. HOGBOOM,
Woodland, Cal.

DUCK SHOOTERS! CAMPBELL'S

QUESTION---Why is it that so many excellent wing shots cripple fine birds?

ANSWER---Because they don't use

BALLISTITE

which never fails to kill clean.

REMEMBER---One (1) dead bird in the pocket is worth two (2) in the tulle.

EMOLLIO
IODOFORM

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1915 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

Read our "ad" on Campbell's Horse Foot Remedy in next issue of this paper.

THE REMINGTON AUTOMATIC

HAMMERLESS and SOLID BREECH SHOT GUNS. Price, \$30.

This new type of Shot Gun has been on the market for several months, and has been accepted as a success. Although sold at the moderate price of \$30, it represents gun luxury. It differs from ordinary repeating shot guns in that it loads itself and ejects the empty shells. The recoil is decidedly lessened, which will prevent flinching and do away with "shooter's headache." It is safe, having no hammer to catch and a solid breech, preventing accidents at that point.

Winners in 1905 or 1906, when three-year-olds and upward, of a race of the value of \$10,000 to carry 3 lbs. extra; of two such races, 5 lbs. extra. Non-winners of \$9000 at any time allowed 5 lbs.; of \$5000, 8 lbs.; of \$2500, 12 lbs.; of \$1000, 15 lbs. One Mile and a Quarter.

THE SARATOGA HANDICAP of \$10,000.

By subscription of \$200 each, half forfeit, or \$25 if declared by June 1st. To the winner \$3500, to the second \$1000, and to the third \$500. Weights to be announced ten days before the race. Winners of a race of the value of \$4000 after the publication of the weights to carry 5 lbs. extra. One Mile and a Quarter.

THE SARATOGA CUP of \$7500.

By subscription of \$100 each, or \$50 if declared by June 1st for entries made March 5th; and \$300 each for entries made July 2d, when the event shall close. Starters to pay \$100 additional. To the winner \$6000 and a cup of the value of \$250, to the second \$1000, and to the third \$500. Weight for age. One Mile and Six Furlongs.

THE MERCHANTS' AND CITIZENS' of \$3000. A Handicap.

By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$2400, to the second \$400, and to the third \$200. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. One Mile and Three Sixteenths.

THE CHAMPLAIN of \$3000. A Handicap.

By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$2400, to the second \$400, to the third \$200. Weights to be announced three days before the race. Winners after the announcement of weights to carry 5 lbs. extra. One Mile and a Furlong.

THE DELAWARE. A Handicap.

By subscription of \$25 each, or \$10 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of weights to carry 5 lbs. extra. One Mile.

THE AMSTERDAM. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for \$3000 allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1500. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. One Mile.

THE CATSKILL. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for \$3000, allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry box by the hour of closing entries on the day preceding the race. Seven Furlongs.

FOR THREE-YEAR-OLDS.

THE SARANAC of \$5000. A Handicap.

By subscription of \$100 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$4000, to the second \$700, to the third \$300. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. One Mile and a Furlong.

THE HURON. A Handicap.

By subscription of \$25 each, or \$10 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of weights to carry 5 lbs. extra. One Mile and Three Sixteenths.

THE SENECA. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for less, 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. Six Furlongs.

THE MOHAWK. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$5000. If for less, 1 lb. allowed for each \$200 down to \$3000; then 1 lb. allowed for each \$100 down to \$1500. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. One Mile and a Furlong.

FOR TWO-YEAR-OLDS.

THE SARATOGA SPECIAL.

By subscription of \$1000 each, half forfeit. A Piece of Gold Plate of the value of \$2500 to be added by the Association. Subscribers to name three horses by May 1st, and only one starter to be named for each subscription. Six Furlongs.

THE ADIRONDACK of \$5000. A Handicap.

By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$100 additional. To the winner \$4000, to the second \$700, and to the third \$300. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. Six Furlongs.

THE KENTUCKY. For Fillies. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for less, 1 lb. allowed for each \$100 down to \$1500. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. Five and a Half Furlongs.

THE ALBANY. A Handicap.

By subscription of \$25 each, or \$10 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. Six Furlongs.

THE TROY. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for \$3000, allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. Five and a Half Furlongs.

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

A CHAMPION OF TWO SEASONS.

The photograph of Bon Voyage, from which the half tone engraving on the front page of this issue of the Breeder and Sportsman was made, does not do the horse justice, but it was obtained under adverse conditions and was the best the photographer could do under the circumstances. Bon Voyage is a much handsomer horse than the picture would indicate, and in his individuality there is something that will lead any observer to the conclusion that he is looking at a great young stallion even though he should not be aware of his name, his breeding or his performances.

The writer was at Pleasanton track two weeks ago and met Ted Hayes, who has managed and trained the horses of Mr. W. A. Clark Jr. for several years. I had never seen the young champion Bon Voyage so Mr. Hayes said he would have him led out. "When you have looked him over," said Mr. Hayes, "write of him as you have seen him. Tell your readers just how he appeared to you and if there are any weak points don't be afraid to say so."

This was frank enough, certainly, and as we walked toward the sumptuous apartments formerly occupied by Searchlight 2:03¾, but now the home of Bon Voyage, I recalled these facts: Bon Voyage was the champion two-year-old trotter of any sex of 1904, when he won the two-year-old divisions of the Kentucky and Horse Review futurities and took a race record of 2:15. The two heats of the first named event were in 2:15 and 2:15½, and it takes a high class two-year-old colt to trot a race like that. Mr. Clark paid \$10,000 for him just after he won that event, and considered that the race fully justified his judgment of the colt, which it certainly did. In his three-year-old form Bon Voyage was the fastest three-year-old trotting stallion of 1905. He won the Hartford Futurity, and took a record of 2:12¾, while his winnings at the end of the season were over \$11,000. After these facts had passed through my mind, and I remembered that Bon Voyage was by Expectation 2:15½, one of the best bred sons of Electioneer, that his dam is the great brood mare Bon Mot, dam also of Endow 2:14¾ and Bequeath 2:20¾, in addition to being a very choicely bred mare, I thought to myself, a colt bred like this fellow and with such a list of performances to his credit, should be a high class individual. On reaching the stall, the door was opened by Billy Forbes, who came to California in the fall of 1903 with Budd Doble and Kinney Lou 2:07¾. There are no better caretakers than "Billy" and Bon Voyage was as well groomed as any horse I ever saw.

He is a beautiful dark bay, one of the richest I ever saw, and outside of the coronet of his near hind foot there are no white hairs on him. His legs are black, as black as coal, and he has a beautiful mane and tail that touches the ground. We had no standard to measure him, but he is full 15.3 and my guess at his weight was 1150 pounds, but Ted Hayes says I am about fifty pounds too high, but that he will weigh full 1100 and will take on the other fifty pounds before the season is over. There is no better boned horse in California. His head and front are remarkably like Electioneer, his grandsire. He is not a big bodied horse, but his back is short, his loins good, his hips and quarters smooth and muscular, and he stands on about the best set of legs one will see during a long inspection tour. After being trained and raced hard as a two and three-year-old, trotting all sorts of tracks and being driven so many fast miles, there is not a puff or a pimple on him. I would call his legs and feet perfect. His head is a strong, brainy one—a regular trotting head, and Hayes tells me that on the track Bon Voyage knows nothing else but trot, never making a mistake. I could not help thinking as I looked this young horse over what a grand stallion he will be to breed to Wilkes mares, of which there are so many in California.

Bon Voyage's pedigree is a most interesting study. His sire Expedition 2:15½ was by Electioneer, out of Lady Russell, an own sister to Maud S. 2:08¾. Lady Russell produced four standard trotters and one pacer, has three producing sires and two producing dams. Expedition has sired fifty standard performers, of which nine are in the 2:15 list.

The dam of Bon Voyage is Bon Mot, a great brood mare with three 2:20 trotters to her credit—Bon Voyage 2:12¾, Endow 2:14¾, and Bequeath 2:20¾. She was by Erin 2:24¾, a producing son of Belmont 64, the sire of Nutwood. Erin's dam was the great Eventide, dam of Kremlin 2:07¾, and two more in the list, five producing sons and a producing daughter.

The second dam of Bon Voyage is Farce 2:29¾ by Princeps 536, the sire of those famous trotters Greenland 2:12 and Trinket 2:14, and sixty-four more in the list. Princeps was by Woodford Mambrino out of Primrose by Abdallah 15, a rare good cross of game racing blood.

Roma, the third dam of Bon Voyage, is a great brood mare with three standard trotters to her credit, and she was by that handsome horse and sire of handsome horses Goldust 150, who was by Vermont Morgan. He sired Lucille Goldust 2:16¾, one of the old time champions, and has eighteen sons that have sired standard speed, while his daughters have produced twenty with standard records.

Bruna, the fourth dam of this stallion, was by Pilot Jr., that sired the dam of Maud S. 2:08¾, Jay Eye See 2:06¾ and thirty-eight more in the list.

A tabulation of the pedigree of Bon Voyage contains the names in the first three crosses of such mares as Green Mountain Maid, Miss Russell, Eventide, Roma and Bon Mot, truly a great showing.

We advise owners of good brood mares to visit Pleasanton and look this stallion over. Mr. Clark has put the service fee at \$50, a very low figure for a horse that has such individuality, breeding and race record. Mr. Hayes tells me that when he took Bon

Voyage East last year as a three-year-old, he could and did trot a quarter on the Denver track in 30 seconds. He will not be raced this year as a four-year-old, but next season he will be trained and raced on the Grand Circuit and a record of 2:05 or better is thought to be easily within his reach. Having been bred in the lines of extreme speed and shown conclusively that he has that quality besides great gameness and race horse qualifications, there is no reason why he will not transmit speed, and as Mr. Clark will breed a number of his choicest mares to him, and train and race the produce, breeders who are wise will see from these facts that Bon Voyage colts are certain to be good property, and act accordingly.

THE MATCH IS MADE.

A meeting of the representatives of last year's trio of noted trotters, Tiverton 2:04½, Wentworth 2:04½, joint holders of the champion record for trotting geldings, and Sweet Marie 2:04¾, was held at the Gilsey House in New York Monday night, February 12th, for the purpose of formulating the conditions and posting the money for the sweepstakes race next summer recently proposed by E. E. McCargo, trainer and driver of Wentworth. There were present besides Mr. McCargo, A. P. McDonald, of Albany, representing Sweet Marie, and John Howell, the trainer and driver of Tiverton, besides a contingent of local horsemen. After a discussion of the conditions the following agreement was drawn up and signed by the three gentlemen above named:

New York, February 12, 1906.

This is an agreement entered into by John Howell of New York, Alta P. McDonald of Albany, N. Y., and E. E. McCargo of Philadelphia, Pa., for a match race in which their horses, Tiverton 2:04½, Sweet Marie 2:04¾, and Wentworth 2:04½, respectively, will be the contestants, under the following conditions:

1. The race will be for \$2,500 a corner, play or pay, winner to take all.

2. Each party does hereby agree to deposit a forfeit of \$500 with the New York Morning Telegraph to bind said contract. Of the remaining amount of \$2,000 should be deposited with the stakeholder as follows: \$1,000 on or before midnight, June 1, 1906, and the balance \$1,000 before 7 p. m. the day previous to the date of the race.

3. The race to take place during the month of July, 1906 (between the dates of Monday, the 2d, and Saturday, the 21st).

4. Date of race and track to be selected by mutual agreement, and announced on the day the second payment falls due.

5. Race to be best two in three on the "Empire plan," in case of a split heat, only the heat winners to start in the third and decided heat.

7. The race to be under the rules of the association of which the track agreed upon may be a member.

Now that the affair has been settled by the signing of the above agreement and the posting of the forfeit, the race will begin to take on interest and the development of the contestants will be eagerly watched. It is safe to say that if all come to the post in their best form it will be one of the most sensational contests ever witnessed on a trotting course. All of the horses are game, all have class substantially alike, and all will have the advantage of the best handling, both prior to and during the race, to be secured, so that if nothing goes wrong with any of them in their development, the race should be one long to be remembered.—Trotter and Pacer.

HORSES FOR S. F. FIRE DEPARTMENT.

The Board of Fire Commissioners of the San Francisco Fire Department last week awarded the contract for furnishing horses to the department in accordance with the conditions advertised. In classes 1, 2 and 3 Joseph Levy was the lowest bidder and the contract for furnishing horses in those classes was awarded to him.

Class 1 is for horses suitable for engines and trucks, in the inside districts. These horses must weigh 1,600 or over. The price to be paid Mr. Levy for them is \$338.50 each.

In class No. 2, horses weighing 1,500 and upwards, suitable for engines and trucks in the outside districts, the price is \$317 each.

For class No. 3, which is for lighter horses suitable for all work, weighing from 1,500 pounds down to 1,200, the price is to be \$278 each.

Gus Lindauer was the lowest bidder on buggy horses for use in the department. These horses must weigh 1,200 pounds, and must be able to trot and pull a buggy at a 3:30 gait. These horses bring the top price of any horses used by the department; \$350 each was Mr. Lindauer's bid, and it was the lowest.

Plenty of snow and great snow racing down East, especially in Boston during the past week. The Boston Globe of February 12 prints a quarter of a page of pictures of the most sensational speed animals with elaborate account of the speed contests. We quote: "It seemed as if every man in greater Boston, who owned a horse and a 'pair of runners,' was out yesterday afternoon trying to find a glib place to speed on, eventually found their way to the Charles River speedway over which a steady stream of equipments were traveling in both directions all the afternoon. Supt. Gilman has the upper road in the finest condition. The last half, and particularly the last quarter just back of Soldiers' Field, is in ideal shape for all the fun there is to be obtained with horses on the snow. To-day the whole length of the road from the Arsenal bridge to the Harvard boathouse will be open and there will be plenty of racing."

Sober up on Jackson's Napa Soda.

A BIG FIRE which destroyed the plant of the San Francisco Electrical Company early Thursday morning of this week has put nearly every linotype and printing plant in this city out of commission and for this reason this issue of the BREEDER AND SPORTSMAN goes to its readers with four pages less than usual at this season. All of the regular advertising appears in this number, but four pages of late news and other reading matter is necessarily omitted.

NOTES AND NEWS.

The Pasadena Horse Show, which will be held on the 6th, 7th and 8th of next month, is attracting much attention and the entry list is already a large one.

Mr. J. H. Bohon, of Los Angeles, has purchased the 480 acre farm from Dr. D. K. Wise on the Redondo extension of the Santa Fe railroad, twelve miles from Los Angeles. Mr. Bohon, who is a fancier of blooded horses and owns several well bred trotters, will plant 100 acres of his new purchase to alfalfa and will keep his brood mares, of which he owns a number, on pasture there. Mr. Bohon owns two good young sons of Zolock 2:05½ in Bolock and Hylock.

John H. Thompson of Edna, with the assistance of a number of citizens of San Luis Obispo, contemplates building a new race track on land just west of the last named city. Quite a number have already come forward with generous subscriptions. The track will be used principally for training trotters and pacers.

Budd Doble has made a ten strike in securing fifteen acres of choice rye grass pasture just at the edge of the city limits of San Jose, where he will pasture the brood mares sent to his great trotter Kinney Lou 2:07½, this season. This pasture is divided into four fields, is well watered and has good substantial board fences with no wire. One of the most desirable things for a breeder to know is that the mares he sends to a horse are well cared for. Mr. Doble is prepared to give and will see that all mares sent to Kinney Lou get good care and are properly kept.

March 17th has been selected by the Riverside Driving Club as the date of its next matinee. In keeping with the day, the principal event will be for horses of the green class.

Dr. F. N. Folsom, of Forestville, Sonoma county, writes us that the stallion Silas Skinner 2:17, recently purchased by Oliver & Folsom of that place, is being liberally patronized. A company has just been formed in Forestville and the imported Percheron stallion Bon Coeur 40789 purchased. Although Forestville is the center of a fruit district much interest is being taken in horse breeding this year and more mares will be bred than formerly.

Mabel by Naubuc, the dam of that champion pacer Directly 2:03½, whose two-year-old record of 2:07½ has never been equalled, is for sale. She is in foal to Bonnie Direct 2:05½ and while the produce will be very closely related to Directly it will be better bred. See the advertisement in our business columns.

Jay McGregor 2:07½ was priced at \$20,000 last week. Evidently no one in the breeding industry has any fears of the future of the harness horse.

Famous Ambler Park, near Philadelphia, Pa., is soon to be a thing of the past. It is being surveyed and will be cut up into building lots. Years ago "General" John E. Turner, the great driver, purchased the grounds, and together with his son Frank, trained trotters there, bringing out many famous ones from there.

Walter Snyder will again serve as secretary of the Detroit Driving Club this season.

There will be at least twelve meetings in the Lake Erie Circuit this year.

Donald Wilkes 2:13½, who has figured in many stoutly contested races in the Northeastern Ohio Circuit, is an inbred Guy Wilkes 2:15¼.

Senator J. W. Bailey, of Texas, has purchased a tract of land containing 204 acres, adjoining his Kentucky farm, on the Versailles pike, for \$40,800, and he will continue in the breeding of trotting horses on a still more extensive scale than in the past. Evidently Senator Bailey believes that breeding the successful trotter is not inconsistent with the successful pursuit of statesmanship.

April 9 is the date selected for the annual Kentucky Stallion Show. The exhibition will be held on the fair grounds at Lexington and will be under the management of the Kentucky Stock Farm.

Owing to the big fall of snow and the cold weather in the ranges of the northern extremity of California and Southern Oregon this winter, range horses have been suffering greatly. Reports from the country around Madeline are to the effect that many horses have died. The heavy snows have robbed them of food and in many instances prevented them from breaking into new and better ranges. Stockmen south of Madeline say the suffering among the animals is very widespread, and that with the coming of spring there will be a revelation of great losses among the herds. A number of stockmen left Alturas a few days ago on snowshoes to round up a herd of snow-bound horses. Only twenty-seven animals out of a large band were found alive.

William McFarland, Port Richmond, N. Y., has a five-year-old sister to Borahna's Brother, that took a record of 2:12½ the last day of the old year, that has won six blue ribbons in the show ring and has never been beaten. She will be trained this season.

For the first time in more than half a century the New York State Fair this year returned a profit to the state treasury as the result of last season's exhibition at Syracuse. The legislature appropriated \$25,000 to finance the fair, and this was returned, with \$3000 additional. Trotting races and a horse show drew the crowds which made the profit. Now that the State Fair commissioners have had the good sense to get into the Grand Circuit and avoid a conflict of dates for their harness races and horse show the annual exhibition at Syracuse is coming to the front as one of the big sporting events of the season.

The Portland Rural Spirit of February 16th says: Lonzo, the five-year-old gelding by Zombro, out of an Altamont mare, died this week at Irvington track from blood poison, the result of castrating some months ago. Lonzo was one of the most promising green trotters in this part of the country, having worked miles last year close to 2:20 very handy. He was owned by P. J. Mann of this city, who at one time owned Altam 2:09½ and Trumont 2:21½, both of which Mr. Mann lost by death in their prime.

The great trotter Dr. Strong 2:05½ will not appear in the Grand Circuit in 1906, but will be used in matinee work by his owner, Mr. Pickering, Pittsburg.

It is reported that Directum Miller 2:05½, that went lame in a race at Readville last year, is jogging sound for Hugh Milan this winter, and it is thought will stand the work all right in 1906.

State Representative Russell has offered a bill in the Kentucky house of representatives proposing that racing upon any course in the state shall be limited to forty days in any calendar year. It affixes penalties of a fine of from \$500 to \$1000 daily for violation of the provisions of the bill.

Report comes from Vienna that the trotting stallion Wig Wag 2:16½, now considered about the best race horse in Europe, and who, it was one time reported, would be brought back to America for a campaign down the Grand Circuit this year, will serve twenty mares belonging to the Austrian government this spring.

The Kansas bred trotting mare, Bay Leaf 2:26 by Telephone 2:15½, is a member of W. A. Clark, Jr.'s, band of brood mares, now located at Pleasanton, Cal., and will be bred to Bon Voyage (3) 2:12 this season.

Indirect information was received last week by John J. Scannell that Idolita 2:09½, the stallion formerly owned by him, had changed owners since going to Europe at the reported price of \$20,000.

The Orleans county, N. Y., horseman, George Resseguie, owns a two-year-old colt that comes nearer being a brother in blood to Sadie Mac 2:06½ than almost any colt in the country. The youngster was sired by Peter the Great 2:07½, sire of Sadie Mac, dam Cocoa 2:29½ by Arion 2:07½, sire of the dam of Sadie Mac; second dam Zembia 2:11½, a daughter of King Almont. This colt is a big, handsome fellow, and although just nicely broken, can show enough speed at the trot to justify the belief that he will be a trotter of the Sadie Mac order some day.

The New York Horse Fair Association will not hold an exhibition next spring. This was decided at the annual meeting on Thursday. Members of the organization were opposed to paying \$5000 rental for Madison Square Garden, with a clause in the lease binding them not to award any prizes for show ring competitions. No other available place for an exhibition could be found.

Harry Stinson is jogging Alexander 2:09½ and will name him in all the early closing stakes to which he is eligible.

That Locanda 2:02 has qualities beyond most pacers, regardless of age or breeding, there is proof conclusive, as shown in his last year's races, especially at Lexington, Ky., where he took his present mark, generated by Tom Murphy, the young Glen Cove, L. I., trainer. Tom says that in the heat at Lexington in which the stallion took his fast mark, he trailed and got away behind and actually paced the mile in 2:01½, with the last half in 59¼ seconds, according to his watch. If exhibitions count for anything, Locanda stands a good chance of getting a 2:00 record against time another year in Tom's hands. He paced more miles right around 2:05 last year than any other pacer, not accepting Nathan Straus 2:03½. Mr. Borden, who owns the horse, is authority for this statement.

A Milwaukee, Wis., exchange states: In an interview with J. W. Flack, owner of Hazel Patch 2:02½, Mr. Flack was asked with reference to the rumors being circulated about his having disposed of his black stallion, and as to whether or not the horse would be brought back to Milwaukee. Mr. Flack asserted positively that he owned Hazel Patch at the present time, and stated that the horse would be shipped to Milwaukee from California during the fore part of March. Mr. Flack, as owner of Hazel Patch, on December 6, 1905, entered into an agreement with J. G. Sherman of Lake Geneva, Wis., by which Ed Sherman was to race Hazel Patch at Phoenix, Ariz., and in California on shares. This has doubtless been the cause of reports about the sale of Hazel Patch.

Dave McClary will not race Hal Direct this year. It is said that he has a standing offer of \$15,000 for him if he shows a trial mile this year in 2:05. Dave thinks it will be easy money, claiming that he will show in 2:02 at the very least.

Action is extremely important in light horses. It should be straight and true. At the trot it should be what is known as the straight line trot—no wabbling from one side to the other, or swinging the feet. The action from behind should be straight, the feet picked up smartly, the hock well flexed, and the feet or both fore and hind legs at each step placed immediately in front of the former position.

The owners of Direct Hal 2:04½ and Star Hal 2:04½ have opened a unique futurity to the value of \$1000. This is open only for mares bred this season to either of their stallions, to be raced for as three-year-olds, and no distinction made as to gait of foal, and no entrance fee charged.

Every mare should be mated with the idea of producing a colt of some definite type—roadster, carriage horse, draft horse, general farm horse—anything, in fact, for which there is special use and a steady demand. Such horses always bring good prices, while there are always too many that are not really suited to anything in particular. A difference in a few dollars in a service fee may make ten times the difference in the price of a colt. Above all things be sure the stallion has vigor and stamina.

It is quite a revelation to some sports to know that they can be punished if they cruelly whip their horses on the road.

The legs of the racing gelding Terrill S. 2:08½, who has won 112 standard heats, are said to be still as smooth as a colt's.

The trotting horse of today is an established breed, with strength and endurance, in many instances, superior to that of the runner.

By a recent decision of the French courts it has been decided illegal for any person to act for another in "placing" money in the pari-mutuels. Thus all the wealthy horse owners will be forced, if they desire to wager, to personally make their own bets. No exceptions will be made, even for royal personages, who are frequent visitors at French courses.

Items like the following from the Le Grande, Oregon Chronicle appear very frequently these days in the Northern California and Oregon papers: Horses, horses, is the fad and the rage. The demand is almost as strong as the time when Richard III offered to swap his entire kingdom for just one. A new buyer went to Elgin the fore part of the week to pick up a carload of the heavy grades. Ed Willard is also back from Portland to try to secure another car for that market. A man arrived Wednesday from Alberta and says he wants just one straight trainload of Grande Ronde horses. He wants the smaller kind, but is not so particular as to age and will take two-year-olds and on up. The matured animals, he says, can be disposed of for working purposes and the younger stock is to be put on the ranges. The demand for stout work horses is as brisk at this time as was the call for cavalry animals during the South African trouble.

A photo of the beautiful loving cup presented by the Kentucky Trotting Horse Breeders' Association to Mr. W. W. Savage in honor of the 1:55½ mile paced by Dan Patch at Lexington, October 4th last, has just been received from Mr. Savage, who says: "I certainly very highly appreciate this valuable remembrance of the fastest harness mile in horse history. I am sure that Dan was pleased on Christmas morning as he ate apples from this cup and if his Kentucky friends could have seen him at that time they would have noticed a specially gratified expression in his eyes as he crowded his nose to the very bottom in order to receive the last piece of apple."

GETTING READY AT APTOS FARM.

Among the horses that will be in the consignment of Mr. A. B. Spreckels from his Aptos Farm, and that are now being worked there by Sandy Smith, are two full sisters to the Cupid mare now in Budd Doble's string at San Jose that is as fast as a bullet. These mares are out of a McKinney mare, and are good gaited trotters. Another mare is a full sister to Venus II 2:11½ by Cupid, own brother to Sidney Dillon. Whoever gets this one will get a trotter. She has stepped quarters in 35 seconds. There is also a full sister to Harold D. 2:11½, by Dexter Prince, the horse Henry Dunlap bought at an Aptos Farm sale in 1902 for \$275 and sold last fall in the East for \$3,200. This filly Sandy says is just as good as Harold D. was with the same amount of work. There is also a full brother to Psyche 2:16½ that has the making of a great horse, and a colt by Dexter Prince out of Psyche that gives every promise of being as good a horse as Dexter Prince ever sired. He is a four-year-old and a pacer, was worked a little as a three-year-old, and can step an eighth in 16 seconds. Then there is a half-brother to Zambra 2:14½ that is a chestnut four-year-old this spring, a trotter that has as much speed as any horse that has not been trained any more than he has. A big bay mare, 16 hands, by Altivo, out of a Dexter Prince mare, stepped a mile for Sandy the other day over the farm's half-mile track in 2:33. She is so big she had a hard time getting around the short turns, but she is a dandy and always steps the last quarter in 35 seconds.

Mr. Spreckels is not keeping any of the good ones. All he will keep are the two-year-olds and younger. Lots of visitors have been calling at the ranch lately, among them Mr. Norris of the Norris & Rowe shows, who wanted to buy four that are in the consignment, as their conformation was so perfect. Mr. Spreckels refused to accept any offer for them, however, as all go to the sale.

BREEDING THE TROTTER.

Few subjects have been given greater consideration throughout the civilized world, but especially in America, during the last forty years and more, than has the problem of breeding the light harness horse for both road and track use. While opinions of leading thinkers have often greatly differed, marvelous progress has been made, especially in extreme speed breeding. The object of the trotting horse breeder has been two-fold, namely, to establish a distinct family, or breed, of trotting horses, and the production of extreme harness speed. Both results have been assiduously sought at the same time. Doubtless more effective and uniform results would have been accomplished had all efforts been centered, first, on the perfection of a breed of trotters, for in striving for extreme speed production the breed-perfecting operation has not only often been lost sight of, but has actually been impeded. A wise man indeed would be who could teach the science of trotting horse breeding in so short an article as this must of necessity be, but a reference to the subject is certainly appropriate in a trotting horse paper special number, such as this one is. The editor of The Western Horseman has always been a stickler for "fundamental principles" in trotting horse breeding. He has maintained not only that a breed of trotting horses may be established only through orthodox line breeding—in-and-in breeding—but that the greatest and most uniform success in breeding both uniformity of individuality and extreme speed comes through this very orthodox in-and-in breeding—piling trotting cross upon trotting cross and persistently avoiding outcrosses to "alien blood." While we have not succeeded in the half century, nay, a full century, in which we have been breeding trotters, in establishing a breed of trotting horses in the sense that we have a breed of running horses, a breed of draft horses or a breed of Jersey cattle, we have reached that stage of perfection of the structure which clearly "points the way" to ultimate an absolute perfection. To the orthodox mind the time is past for reaching out for outcrosses, new infusions and problematical expectancies. The foundation is beyond improvement; the body timber in sight is sound to the core, and all we have to do now is to match the pieces by proper selection, using the straight and sound timber and rejecting the spurious. Straight and sound timber, trotting horse timber, means, of course, our most stoutly bred trotting animal of the highest degree of individual perfection in points of size, conformation and soundness, and certainly our supply of these is ample. "Fads and fancies have no legitimate place in present-day trotting horse breeding, and he who indulges their use not only does so at his own expense, but at the expense of the trotting breed as a whole. Perfection has come slowly to the trotting family largely on account of the "side-stepping" of some breeders and some teachers. But fortunately for the problem of "perfecting a breed of trotting horses," the "side-steppers" grow less numerous as time passes. Trotting blood is the "wheat" in the light harness race horse kingdom, as real wheat is in the cereal kingdom. Wheat is not improved by "cross-breeding" it with rye, barley or oats, and trotting blood cannot be improved by cross-breeding it with other breeds of horses, and nothing is surer than that breed perfection in the trotting horse family must come only by eliminating, or "breeding out" the "yellow streaks" existing in the present-day imperfect trotting breed. Many present-day trotting bred horses have the required seven standard (trotting) crosses, but not one has seven uncontaminated trotting crosses, and hence we have not as yet produced the "thoroughbred trotter," and not until we do have thoroughbred trotters, "in plenty," will we have a fixed and perfected breed of trotters, with fixed and uniform characteristics. With "thoroughbred trotters," even, will not come uniform and extreme harness speed simply through the mating of thoroughbred trotting stallions with thoroughbred trotting mares, but such results will follow much more uniformly than they do now, and hence the more progress we make in breed perfection the more progress will we also make in uniform extreme harness speed production. Evidently, then, our trotting horse breeding operations should be carried on in straight lines, in trotting lines, using our best individual knowledge in the matter of individual mating. As has often been said in these columns, mating standard mares with standard stallions, nor even mating low record standard trotting mares with low record standard sires, is not sufficient to insure the production of an extreme speed trotting product. But plenty of trotting blood on both sides constitutes the first and most essential element, and acuteness in making compatible individual matings will do the rest. Stout speed producing blood lines should receive the first consideration, purity of gait and soundness should come next, and temperamental characteristics, a most essential thing in extreme speed production, should come next. We put the extreme speed essential last, for the reason that the omission of this consideration will not only probably not stand in the way of its being accidentally struck, but that the additional cross, with the other considerations followed, will result in a product which will be one cross nearer type perfection, and the operation will not be a losing one. A good many fine-spun theories regarding "dynamic conditions," old age superiority, certain crosses for high excellence in the male produce, others for superiority in female produce, and other "moonshine," are advanced; but busy and practical breeders have neither the time nor inclination to back therein, and hence they are not dwelt on here. With good, strong trotting blood, and plenty of it, on both sides, the most essential thing in speed production undoubtedly is temperamental mating. This of itself is no trifling study in its entirety, though uncomplicated temperaments, especially if strongly phlegmatic, or as plainly nervous, are easily

and readily recognized, and, fortunately, are the varieties most frequently met with in horses, at least more readily recognized. Sluggish, phlegmatic mares, however well bred, should not be mated with stallions possessing the same temperament, nor should excessively nervous, high-strung, "rattle-headed," if you please, mares be mated with stallions possessing like mental characteristics. Here is the one instance in which an "outcross," a temperamental outcross, is the saving clause so far as results are concerned. Sedate, "strong-minded," level-headed, phlegmatic stallions are the best gait controllers, while gimpy, snappy, nervous, high-strung mares—nervous even to "rattle-headedness"—impart to the offspring nerve force, gameness, rapidity of action and other extreme speed elements and race horse qualities. These qualities in a brood mare constitute the virtues sometimes found in thoroughbred mares as harness speed producers. The fruits of this phlegmatic-nervous temperamental cross are seen in the Hambletonian-thoroughbred cross, the Hambletonian-Morgan cross, the Hambletonian-Blue Bull cross, the Wilkes-Mambrino Patchen cross, and, reversed, in the Dr. Herr—"cold-blood" cross, and, again, reversed back, in the Argot Wilkes-Dr. Herr cross, not that Argot Wilkes is "cold blooded," but that he is sedate, phlegmatic, yet well bred, while the Dr. Herr mares are snappy, energetic and highly nervous, having the nervous temperament exaggerated. All along the line we find rich fruit from this phlegmatic-nervous temperament cross, and, with good breeding on both sides as a basic principle, the medium-depth student breeder can do no better than to let it be his guiding star in harness speed breeding.—Dr. J. W. Neal in Western Horseman.

BIG ROUND UP PLANNED.

The annual round-up this spring in Douglass county, Washington, promises to be one of the most picturesque and exciting that has ever been held in the west, says the Everett Tribune. Frenchman mountain, eighteen miles south of Quincy, has always been a bad place for range horses getting away from riders, and there is many a fine horse that has escaped its owners on that range for years. These are generally the best of the bunch, the strongest and swiftest of them all.

This year a plan has been suggested which, if carried out, will certainly bring in practically every horse on the range. Horsemen propose to unite in the round-up with ranchers and horsemen from other sections who have horses on this range, and put enough riders in the field on a certain date to practically drive all before them. A line of riders will on a certain day proceed leisurely south toward Frenchman hill, driving all before them. The east end of the line will swing around to Crab creek and then the line will gradually converge until they have the range horses all at the mouth of Crab creek, on the Columbia, or Red Rock coulee. Red Rock coulee is a natural corral which requires but a few men to hold as many as 5000 head, and it is probable that it will be fenced at the end as there is money enough in the treasury of the horsemen at this time to build a corral at Coyote spring and fence Red Rock canyon.

The country embraced in this plan is about thirty miles from east to west and nearly fifty miles from north to south, and there are said to be fully 6000 head of horses on the range at this time. Many ranchers have stray horses that will be found in the bunch and stockmen from other counties are also interested. The entire round-up will occupy less than a week and practically every horse in the country will be driven in.

LIVERMORE HORSE SHOW.

The annual horse show and stallion parade will come off at Livermore, Alameda county, this year on March 3d, one week from to-day. It is expected that this show will be ahead of anything yet given in that city and horsemen from all over this section of California will be in attendance. All horse owners are invited to make entries there being no charge for entering or showing horses. All horses must be ready to fall in line at 12:30 as the parade will start at 1 p. m. sharp with no delay. Music will be furnished by the Livermore band and if the weather is at all propitious the probabilities are that a very large crowd of people will be in attendance. The officers of the day are President H. M. Christensen, Vice-President John D. Collins, Treasurer John Sweeney, Grand Marshal Frank Fennon, Announcer William McDonald and Secretary Theo. Gerner. So many fine stallions are owned in Alameda county that the show should be one of the best ever seen in this section of the State. The 7:40 ferryboat from the foot of Market street, San Francisco, will connect with the Livermore train at Oakland Mole, which reaches Livermore about 9:30. Returning, there are two trains in the afternoon, leaving Livermore about two and five p. m. The Breeder and Sportsman editor acknowledges receipt of a very cordial invitation to be present.

Two very handsome photographs were received this week from our friend C. A. Harrison of the Hotel Driard, Victoria, B. C., who knows a good looking horse when he sees one. The pictures are of the mare Sophie McKinney by McKinney out of Bessie Wilkes, dam of Trilby Direct 2:08½, by Sable Wilkes, and a yearling son of hers that has been named Maple Wilkes. He is by Nutwood Wilkes and the picture shows him to be one of the grandest looking yearlings to be found anywhere. He was foaled on the 8th day of last April and is nominated in the Breeders' Futurity. The mare and colt are both owned by Mr. J. W. Kelly, Esq., of the Maple Glen Farm, Duncan's, B. C.

GOOD AVERAGE.

A New Yorker writing of the Midwinter Sale at Madison Square Garden says:

The Midwinter Sale, which is considered the season's prospective for trotting horse breeders and racing men, is now a matter of history, but the facts it produced are interesting. During the four days of the sale a total of 471 horses were sold to the highest bidder for the sum of \$167,360, or an average of \$355.33 per head. The latter figures may not impress the public as a very encouraging sign, but to experienced horsemen who were able to see the offerings as they appeared in the sales ring and the showing they made, the general average is far above that of any previous year for the same and perhaps a shade better quality of stock.

In trotting horse sales of the nature and magnitude of the Garden event just closed horses available for one of three purposes—professional racing, matinee driving or breeding farm—are the class from which an intelligent idea can be secured as to the real condition of the horse market as it concerns the American trotting horse for the turf and the stock farm.

A careful study of the sale summaries for the four days proves beyond all doubt that these classes not only sold at higher figures, but brought out such keen competition as has seldom been noticed in a sales ring. Buyers showed a readiness to pay any price for a trotter or pacer which came into the ring with an authentic fast trial and looked good as a racing prospect. This class made the best and highest average, in spite of the fact that they compose the most uncertain propositions of the harness turf.

Horses available for amateur racing and road or speedway driving found new owners at higher prices than have ever been the case formerly, with a larger number of buyers, while horses that had proved their worth as gentlemen's roadsters fetched better prices than their original cost. This was true of almost every horse known in local amateur circles that faced the auctioneer.

Stallions and mares of right breeding whose blood lines could be traced to some of the noted winners on the harness turf, were eagerly sought after by the owners of well known breeding establishments, while youngsters of approved breeding and with futurity engagements found ready buyers at paying prices.

The apparently low average for the total sale, therefore, is wholly due to consignments for which neither one of the classes mentioned had any use or demand. Had they been available for the purposes of the general horse dealer their owners would have received better returns for them, but even in this the majority of that class of stock failed to meet with general approval.

The initial sale of 1906 proved conclusively that the demand for trotters and pacers of the right quality will be greater in 1906 than it was last year and that owners of such stock can set their own prices on them, yet find more than one ready purchaser.

It is plainly to be seen that harness racing men are greatly in need of racing material from the way they were scrambling after offerings to their liking.

COLUSA SPRING RACES.

The race meeting to be given by Mr. E. C. Peart at Colusa, commencing Tuesday, April 24th, will come off rain or shine. There will be a program lasting three days and Mr. Peart extends an invitation to horsemen everywhere to enter in these events. The program arranged is as follows:

First Day.

Trotting and pacing, 3 minute class, best 3 in 5, \$100.
Trotting and pacing, 2:24 class, best 3 in 5, \$100.
Running, ½-mile dash, free for all horses, \$50.
Running, ¾-mile dash, free for all horses, \$65.

Second Day.

Pacing and trotting, 2:35 class, best 3 in 5, \$100.
Pacing and trotting, Farmers' Race, best 2 in 3, \$50.
Running, 1-mile dash, Novelty Race, \$50.

Third Day.

Pacing and trotting, free for all, best 3 in 5, \$150.
Pacing and trotting, 3-year-old, best 3 in 5, \$100.
Running, ½-mile dash, free for all horses, \$40.
Running, ¾-mile dash, free for all horses, \$65.
A special race for two-year-old trotting and pacing, one-half mile heats, \$25.

DISTEMPER CURED OR NO COST.

The fact that the proprietors of Dr. Craft's Distemper and Cough Cure have for many years been selling it under a guarantee to refund the money if the remedy ever failed is of itself the evidence needed for the unusual value of the remedy. When it is further found that during all this period the sale of the remedy has constantly increased until it is used by some two hundred thousand stock owners, it is time that those not familiar with it should investigate it.

Dr. Craft's Distemper Cure is regularly advertised in this journal and we call special attention to the pamphlet mentioned in the advertisement in this issue. This pamphlet, "Veterinary Pointers," contains much really valuable information for the stock owner aside from the special material in regard to curing distemper, epizootic, pinkeye, coughs, etc. Write for the pamphlet today to Wells Medicine Co., 18 Third St., Lafayette, Ind.

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich., July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

THOROUGHBRED DEPARTMENT.

(By Ralph H. Tozer.)

At last the stewards of the Emeryville track observed some inconsistent running (the case of Harbor is referred to), and in lieu of proof of fraud, will refuse the entry of the horse during the rest of the meeting. This course, after due warning to owners of the offending racers, should have been followed in the very flagrant cases of in-and-out running of Briers, Esherin, Oronte, Neva Lee, Bountiful, To San, Dr. Leggo, Shady Lad, Clydes, Martinmas, Red Light, Sir Edward, Hi-Caul Cap, Wexford, Graziallo, Gateway, Invictus, Dargin, Grasscutter, Hugh McGowan, Procrastination Romaine, Blumenthal, Haven Run, Pickaway, Oeyrohe, Sugarmald, Tavora, Ebel Thatcher, Ethel Abbot and Lucrece, all these form reversalists turning their flipflops since January 1, 1906. Verily this is a long list, not one involving many prominent owners, however, and if in the absence of direct evidence of fraudulent running of horses the stewards or judges should warn owners of inconsistent runners that form flipflops will not again be tolerated, I believe we would see a wonderful change for the better, much more formful racing and general satisfaction to those that really support "the game"—the general public. It is a mistaken idea that the giving out to the press of the doings of turf officials in the line of detecting turf frauds hurts "the gate." On the contrary, such matters, made public, show that the officials are hewing to the line and trying to keep the sport as clean as possible, all in the interest of the admission-payers.

The Ascot Park imbroglio, involving, if the charges of the accusing horsemen be true, Manager James W. Brooks, Owner C. T. Durnell and Handicapper Ed. Jasper, is the talk of turfdom. It seems that Presiding Judge Hamilton and Manager Brooks have been at daggers-drawn ever since the meeting began, late in November, and there have been horsemen who took sides against Brooks and formed a clique in opposition to him. It must have been a fairly strong combination, too, and the directors must have taken sides, or Brooks would not have been excluded from the judges' stand, as it appears he was, only when he had business with the judges. The accusing horsemen, most of them members of the new Horsemen's Protective Association, declare that Brooks and Durnell were in "cahoots" throughout the meeting, in fact that Durnell declared to J. J. McCafferty last fall that he was going to Los Angeles, where he had formed a favorable combination with Manager Brooks; that races would be put on the programme especially suitable to his horses and the weights in the handicaps so fixed that the Durnell horses would have more than a fair chance of winning. Formal charges against Brooks and Durnell have been made out but up to Wednesday had not been filed with the club's stewards, and, if their action does not suit the accusing horsemen, prominent among which are J. J. McCafferty, Henry McDaniel and C. T. Boots, the matter will be carried to the Pacific Jockey Club, if the Chronicle representative be correct. Owner Frank Van Meter declares that Brooks gave orders to the track superintendent to harrow the course deeply for the \$2,500 race between Bearcatcher, Handzarra and Cruzados, this being in the former's favor and against Van Meter's mare, Handzarra. Van Meter went to the judges and Director George Rose and Brooks' harrowing orders were revoked. Brooks laughs at this and can prove the contrary by many witnesses. Van Meter claims Handzarra was winning the race when Cruzados' rider deliberately ran into the mare, knocking her off her stride and winning the race for Bearcatcher, on which "Boots" Durnell had wagered \$5,000. Verily the racing pot is seething at Los Angeles. In this connection I want to point to an evil that should be remedied at once if fair dealing is the aim of the southern jockey club. Two of the judges were on the Board of Stewards at Ascot Park the last I knew. The Board of Stewards is supposed to be a sort of jury to hear testimony for and against accused persons. Now most of these accusations are handed in by the judges themselves, and when they take their places in the jurors' box they are acting as both judge and juror, all of which is not fair. With an unfair man acting as both judge and juror undue advantage is given, and men against whom the judge had a prejudice could be made to suffer through that prejudice. I well remember one case of utter unfairness, of making fish of one and fowl of another. A man named John Strite had been running up a lot of horses at the first Ascot meeting, and alleged detectives were put on his track to see if he did anything irregular. It was claimed a detective saw Strite and "Old Man" Johnson (of Johnson & Dodson) dividing up a considerable sum of money over one of the run-ups. The matter came up, and although both denied the truth of the detective's report, Strite was first suspended and then ruled off the turf and Johnson was suspended indefinitely, the latter being restored to good standing in a week or ten days, while Strite was not even allowed to sell his horses at auction until the last day of the meeting; in fact it looked as if the officials intended to outlaw all his horses for transgressing the rules regarding selling or claiming races. The Missouri horseman is still under the ban (he was a backwoodsman who seemed to run his horses to win always), while Johnson is quite prominent on the turf and the owner of many flyers with winning ways. This is just a sample of the sort of "justice" meted out by the Ascot Park stewards, a number of which, as said before, are judges as well as jurymen. If Strite violated the rules, Johnson was equally guilty, and in fact ought to have been more severely punished than Strite, for the reason that he had been racing on the big tracks of the country for many years, where they were particular, while the poor backwoodsman from Missouri

had raced almost entirely in "the bushes," where rules were "jokes."

Manager Brooks asserts that there is not a word of truth in the published statement of Horsemen J. J. McCafferty, Henry McDaniel and C. T. Boots alleging his ownership in certain horses at Ascot and that he has been in collusion with C. E. Durnell and W. T. Williams in the matter of fixing weights for the horses of these men in handicaps and stakes, and as proof of the handicappers' fairness shows that nineteen of the handicaps run up to the date of the "howl" had been won by horses run in nine different interests. Brooks furthermore declares that Handicapper Jasper was the first one the disturbers desired removed, and he believes in both Jasper's honesty and competency. Boots is undoubtedly the champion disturber in turf circles hereabouts. His trouble making began several years ago, when he was elected president of a Horsemen's Protective Association, and made himself decidedly unpleasant. T. H. Williams, Jr., finally ordered his badge taken up at a meeting in the Emeryville jockey room, and Boots has not raced a great deal over the N. C. J. C. tracks since. Several years ago the writer noted several of his attempts to "knock" so that he could get a man in the office of racing secretary of the San Francisco Jockey Club that would favor him. He finally succeeded in his plan, with the result that his horses won a number of races during the running off of the first programme made by his friend, the new racing secretary, whom he kept such close company that they were likened to the Siamese twins. Boots went around smilingly with his reciprocating friend, and it was not positively shown for a while whether Boots was the racing secretary or his new found friend for whom he had successfully "knocked." At length others who had used their hammers as well as Boots on Prince Poniatowski's door clamored for some of the patronage of the new racing secretary, with the result that the N. R. S. put on many races for the second and third division of Caledonian Clubbers, to the exclusion of the chief of the clan, who in the opinion of modest men had already gorged himself. This did not suit the turfman who had done such masterly work in the club-wielding department, and who had helped the new secretary along with his labors so well in his callow days, a split ensued, and the supposed Siamese twins were divided by a mountain of harsh words. It looks as if where this turfman lingers any length of time there turmoil and strife follows very shortly.

Manager Brooks declares that the case is similar to the one of several years ago, when Boots caused trouble in San Francisco on almost identical lines.

Judge Hamilton declares he knows nothing of the charges against Brooks outside of what he has read in the papers.

It seems that the Horsemen's Protective Association has been formed and a committee, consisting of J. J. McCafferty, Charles Boots and Henry McDaniel, was appointed to draw up the complaint.

The McCafferty-Durnell feud culminated in the following rulings, made by Judge Hamilton, but which however, has no connection with the Brooks affair: J. J. McCafferty and F. T. Wood were each fined \$1000 and W. T. Williams \$100 for practices derogatory to the best interests of the turf. C. C. McCafferty was the complainant and was sustained. He claimed J. J. McCafferty furnished money to Wood, who, in turn, loaned it to Williams on February 2d to claim Durbar. After the mare was awarded to Williams he sold her to Wood for an advance of \$170, and the latter subsequently sold her to J. J. McCafferty for \$70 less.

The judges annulled W. T. Williams' claim, ordered Durbar returned to her former owner. C. T. Boots' claim against Durnell was sustained, and Durnell was fined \$1000. Hamilton also disqualified Toupee in the four races which he ran at Ascot, and the money which the horse won in the said races is to be properly divided between second and third horses. It was also ordered that the claim of the mare Cutter, which Durnell took in a selling race December 21st, be annulled for the reason that he did not own Toupee at the time, and therefore had no right to claim Cutter, and the purse won was ordered returned and divided between second and third horses. Hamilton also fined Charles McCafferty \$1000 for being a party to the Toupee transaction.

Charles Boots claimed that Toupee was not the property of Durnell, and produced a letter in evidence from Charles to John McCafferty. A part read as follows: "I send Toupee to Los Angeles with Durnell, and have arranged for him to run in his name on account of his having a good apprentice jockey." Charles McCafferty, it was also proved, said on February 3d that Toupee was his horse at the time he ran under Durnell's colors. F. T. Wood and Henry McDaniel filed an affidavit with the judges that Charles McCafferty had stated the same thing to them at Ascot.

Durnell produced two bills of sale for Toupee, but the judges said these bills contradicted each other, and in their opinion were manufactured to suit the occasion, and that Toupee simply ran in Durnell's name to get the benefit of Wiley's apprentice allowance.

To show what bitter feeling has been engendered between Durnell and McCafferty it is only necessary to state that after McCafferty's horse, The Huguenot, had won the fifth event, Durnell bid him up and got him for \$800, and thereupon made a complaint that the horse had been "doped." The judges ordered the official veterinary to examine The Huguenot, and two other veterinary surgeons were called in, and after a lengthy consultation it was decided that the horse had been given some kind of stimulant or opiate. They however failed to determine just what had been used.

All of the above will merely hasten the end of winter racing in the southern metropolis, started under

none too favorable auspices, in view of the large majority of "goody-goody" in the community that they had to encounter, and with a hostile press for good measure, the management has indeed had a rocky row to hoe.

The magnificent stallion Goldfinch, it seems, was left at Rancho del Paso, and only late last week proceeded to the Elmendorf Stud of J. B. Haggin in Kentucky in a specially chartered private car and Superintendent John Mackey attending personally to his conveyance across the continent. Goldfinch is a chestnut horse by the unbeaten Ormonde from Thistle (dam of Common and Throstle), by Scottish Chief. Before leaving England Goldfinch sired Chelandy (the Oaks winner) and Hawfinch, while in this country he begot many stake-winners, Tradition being probably the best. When the Haggin yearlings go East to be sold in May the curtain will be rung down on Rancho del Paso as a breeding establishment.

RECORDS BROKEN IN 1905.

Several world's records were broken on the American running turf last year, and, judging from the desire among the eastern track owners for fast time, more new figures will be hung up this season, particularly at Belmont Park, which has come to be regarded as the fastest track in the world. Beginning at the shorter distances, a revised list of the records as they stand at present will be of interest to lovers of thoroughbred racing. It was in October, 1894, that Maid Marian ran five furlongs down the Eclipse course at Morris Park in 0:53½, a mark that has never been surpassed. McGee, a three-year-old, established a record of 1:05½ for five and one-half furlongs at Chicago in 1903, which still stands intact.

At six furlongs there are two sets of records made in straight-away races, and in races on circular tracks. Artful holds a record of 1:08 for six furlongs straight, made over the Eclipse course at Westchester, in October, 1904. Over the old Futurity course at Sheepshead Bay, Kingston hung up 1:08 for this distance on June 22, 1891. Roseben, carrying 147 pounds, ran the distance on a circular track last fall at Belmont Park in 1:11½. This mark will probably remain the top notch for many years to come.

At six and a half furlongs Martinmas holds a record of 1:18½, made on an eastern track in 1904, while The Musketeer hung up a world's record for seven furlongs when he ran this distance in 1:25 during the meeting of 1902. Back in 1890 Bella B., a fast mare, covered seven furlongs straightaway at Monmouth Park in 1:23½. Rag Tag, a four-year-old, ran seven and a half furlongs in 1:32½ in 1903, and the record stands unequalled. Last fall Klamesha, with a feather on her back, ran a mile around one turn in 1:31½, which equaled the record made in 1903 by the three-year-old Dick Welles, at Washington Park, Chicago. But Dick Welles carried more weight and ran around two turns.

Straightaway the best mile ever run was that of the famous Salvo, who in a match against time at Monmouth Park in 1890 hung up the figures 1:35½. Harrow, an English bred horse, was timed in 1:35½ over one of the British tracks in 1899.

At a mile and twenty yards Maid Marian's 1:40 flat, made in Chicago in 1893, remains unchanged. Grand Opera holds the best record for one mile and fifty yards, 1:41½, made in Chicago in 1903. Then at a mile and seventy yards Jiminez has the best figures, 1:42½, also established in the Windy City in 1901. Haviland, a six-year-old, ran a mile and 100 yards in Chicago in 1:44½ in 1903, which is a record, too, although Coruscate equaled it last July on one of the Western race courses.

The same time, 1:44½, stands as a record for one mile and a sixteenth, made by Glassful, a three-year-old, in 1903. Fort Hunter created the record of 2:01½ for a mile and three-sixteenths at Saratoga in 1904.

The fastest time for a mile and an eighth was made by Watercure at Brighton Beach in 1:51½, in 1900, the figures being equaled by Rochampton at the same track the next year. Brighton was the track on which the late S. S. Brown's Broomstick ran a mile and a quarter in 2:04½. That was not long after Irish Lad had created new figures for a mile and three-eighths at Sheepshead Bay, where on June 25 he was timed in 2:17½. Goodrich has held the record for a mile and a half—2:30¼—ever since 1898, when he made it in Chicago. Africander's 2:45½ for a mile and five furlongs, in 1903, is a best on record, while the erratic Major Daingerfield hung up 2:57 for a mile and three-quarters in 1903.

There are very few races at two miles nowadays. Ten Broeck, in a race against time in Louisville, 1877, ran this distance in 3:27½, a record that still stands, although Judge Denny equaled it in California in February, 1898. The peerless Ethelbert's record of 3:49½ for two miles and a quarter has never been equaled since he put it on the books by winning the Brighton Cup at the beach, August 4, 1900.

Drake Carter ran three miles at the Bay in 5:24 on September 6, 1884, but this is a distance seldom raced over now. At four miles Lucretia Borgia holds the record of 7:11, made against time at Oakland, 1897. The list is complete with the ten-mile record of 26:18, made in 1880 by Mr. Brown at Rancocas, N. J.

A carload of twenty horses were shipped from Pendleton, Oregon, to North Yakima, Washington, one day last week. They were all between five and eight years old, and weighed from 1200 to 1600 pounds. The carload brought \$180 per head.

Mule buyers are searching the interior of California for mules. Prices range from \$150 to \$300 per head, but the buyers have to have them.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Somewhat Disabled.

The destruction of the main electric power plant in this city on Thursday morning compels us to run one page less in this department for this issue. Matters of local interest, etc., in consequence, are of necessity postponed until next week.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

The Sharp-Tailed Grouse.

The sharp-tailed grouse (*Pedioecetes phasianellus*) is about the same size and has the general appearance of the prairie hen. Its range is wide, extending from Lake Michigan to northeastern California, and from northeastern New Mexico to Alaska. The sharp-tailed grouse varies in different parts of its range, and has been divided into two geographic forms in addition to the typical bird. These are the Columbian sharp-tailed grouse (*Pedioecetes phasianellus columbianus*), occupying the western part of the bird's range in the United States, and the prairie sharp-tailed grouse (*Pedioecetes phasianellus campestris*) which covers the plains east of the Rocky Mountains. In the northern part of the Mississippi Valley its range overlaps that of the prairie hen, and mixed flocks are sometimes seen, but the "spike tail" is seldom found in such large numbers as that species. It shows also much less adaptability to changed conditions and disappears more rapidly after the subjection of its range to agriculture.

In regard to its curious courtship, Professor Macoun writes of the Columbian sharp-tailed grouse: "The males collect in large numbers on some hill about the end of April or beginning of May to have their annual dance, which they keep up for a month or six weeks. It is almost impossible to drive them away from one of their hills when they are dancing. One day about the middle of May, I shot into a dancing party, killing two, and wounding another, which flew a short distance. I went to get it, and before I got back to pick up the dead birds, the others were back dancing around them."—(Cat. Can. Birds, pt. 1, p. 212, 1900.)

About a dozen eggs generally make a clutch, and but one brood is reared in a season. The eggs vary from buff to olive-brown and are usually spotted with brown.

From two to three months after hatching, the young are full grown and afford quite as good if not better sport than the prairie hen. They lie well to the dog, and usually rise with a noisy, clucking cry; after a short distance the flight changes to an alternation of rapid vibrations of the wings and gliding or sailing on stiffly outspread pinions. The flesh of the young, like that of young prairie hens, is light colored and deliciously flavored. After the birds begin to pack they afford little sport to the hunter.

The sharp-tailed grouse are partly migratory. In winter they take refuge in the highest trees, walking among the branches almost as nimbly as the ruffed grouse. Like the latter, the present species has a habit of plunging into the snow to spend the wintry night. It has many natural enemies in the winter, and in summer the golden eagle has been known to feed its young very largely upon its flesh. Its struggle for existence is unusually severe. Wherever it abounds, in accessible districts, it is pursued relentlessly by the sportsman; but where diminished to a certain point, as on its western and northern ranges, hunting it is largely abandoned. Probably some decades will pass, therefore, before it will be in danger of total extinction. As it does not readily accept civilization, it is not likely to become a popular bird in our growing game preserves, which each year become of greater economic importance.

Food Habits.—The food habits of the sharp-tailed grouse have been studied in connection with the present paper by the examination of forty-three stomachs. These were collected in every month of the year except January and March; most of them in Nebraska and the Northwest Territories, but some in Minnesota, North Dakota and Manitoba. The investigations showed that animal matter (insects) formed only 10.19 per cent of the food, while vegetable matter (seeds, fruit, and "browse") made 89.81 per cent. If subsequent study proves that these figures apply generally to the species, the sharp-tailed grouse is to be classed among the birds most largely vegetarian.

Insect food.—The insect material consists of bugs, 0.50 per cent; grasshoppers, 4.62; beetles, 2.86 per cent, and miscellaneous insects, 2.21 per cent in a total of 10.19 per cent of the food. Vernon Bailey, of the Biological Survey, found that three birds shot by him in Idaho August 29 had eaten chiefly insects, including grasshoppers, small bugs and small caterpillars. Baird, Brewer and Ridgway state that the Columbian sharp-tailed grouse has been known to feed on caterpillars and other insects that have been scorched by prairie fires.—(Hist. N. A. Birds, Land Birds, III, p. 439, 1874.)

The young of the sharp-tailed grouse, like those of other gallinaceous species, are highly insectivorous. A downy chick from 1 to 3 days old, collected on June 27, in Manitoba, by Ernest Thompson Seton, had eaten 95 per cent of insects and 5 per cent of

wild strawberries. The insect material consisted of a lepidopterous chrysalis and the remains of beetles and black ants (*Camponotus pennsylvanicus*). Another young bird, about 8 days old, taken by the same collector, had been exclusively insectivorous. It had eaten such beetles as weevils, ground beetles (*Harpalus herbivagus*), the ladybird (*Anisosticta seriata*), and the click beetle (*Dolopius lateralis*), also two cutworms, 9 sawfly larvae, such leaf hoppers as *Tetragonia* sp. and *Helochara communis*, and one leaf spider. The sharp-tailed grouse is fond of grasshoppers. Vernon Bailey shot three birds at Elk River, Minn., September 17, 1894, which had eaten, respectively, 7, 23 and 31 grasshoppers. The species is a destroyer also of the Rocky Mountain locust. Of nine birds collected by Professor Aughey from May to October, inclusive, six had eaten 174 of these pests. (First Rep. U. S. Entom. Comm., Appen. II, p. 47, 1877, 1878). The bird eats also a few crickets and, like other gallinaceous game birds, devours the Colorado potato beetle (*Leptinotarsa decemlineata*). It has been known to feed on the bugs *Oncometopia lateralis* and *Oncometopia costalis*. The lack of sufficient material to determine exactly the bird's relation to insects is to be regretted, but enough is at hand to demonstrate the fact that its insect food is much like that of its relatives.

Vegetable Food.—The vegetable food of the sharp-tailed grouse, so far as ascertained in the laboratory, comprises weed seeds, 7.39 per cent; grain, 20.50 per cent; fruit, 27.68 per cent; leaves, buds and flowers, 31.07 per cent, and miscellaneous vegetable food, 3.06 per cent, making a total of 89.81 per cent. The weed-seed element consists of the seeds of black bindweed (*Polygonum convolvulus*) and other polygonums, wild sunflower (*Helianthus* sp.), ragweed (*Ambrosia artemisiifolia*), peppergrass (*Lepidium*), blue-eyed grass, sedge and catchfly (*Silene antirrhina*). The seeds of a number of leguminous plants are eaten, including those of alfalfa. Like many other game birds, the species feeds on mast (largely acorns), including acorns of the scarlet oak (*Quercus coccinea*). Corn is eaten, but wheat is the favorite grain. It formed 17.21 per cent of the food. A thousand kernels of wheat were sometimes found in one stomach.

The sharp-tailed grouse is a great browser. It makes 31.07 per cent of its food of leaves, buds and flowers. Ernest Thompson Seton found it eating the buds of willow and birch. It feeds on the leaves of cottonwood, alder, blueberry, juniper, and larch; also leaves of quillwort (*Isoetes*), vetch, dandelion, grass, and rush (*Juncus*). Hearne says that in winter it eats the tops of the dwarf birch and the buds of poplars. Flowers form 91.90 per cent of its diet, the species leading all other birds in this respect. A half pint of the showy, bluish blossoms of the pasque flower (*Pulsatilla hirsutissima*) which brightens the western prairie are often taken at a meal, and those of the dandelion also are eaten. Inflorescence of grasses, alder, willow, maple and canoe birch are plucked along with leaf buds.

Like the prairie hen and the ruffed grouse, the sharp-tailed grouse is frugivorous, and fruit forms 27.68 per cent of its diet. Hips of wild rose alone form 17.38 per cent. Ernest Thompson Seton, who examined hundreds of stomachs of the sharp-tailed grouse, says that he cannot recollect an instance in which they did not contain the stony seeds of the wild rose (*Rosa blanda*). (Proc. U. S. Nat. Mus. XIII, p. 519, 1890, 1891.) The Biological Survey has found rose seeds in many of the stomachs examined, but in numerous instances it has recorded their absence. The fruit of both prairie rose and the sweetbriar (*Rosa rubiginosa*) are eaten. Mr. Seton states that in Manitoba where he has collected during the winter, gravel to pulverize the food is not to be had, and the stony rose seeds act in its stead. Rose hips appear difficult to digest, and, furthermore, are sometimes thickly set with bristles that would irritate the human stomach, but appear to cause no inconvenience to the grouse. The persistent bright-colored hips are readily seen above the snow, and they are a boon to the birds in wintry northern regions, where the struggle for existence is bitter. Other plants of the rose family furnish food for the sharp-tailed grouse, such as the thorn apple (*Crataegus* sp.), the wild strawberry, and the wild black cherry (*Prunus serotina*). It feeds on blueberries and cranberries and on the snowberry (*Symphoricarpos racemosus*), various species of manzanita, bearberry (*Arctostaphylos uva-ursi*), buffalo berry (*Lepargyrea argentea*), juniper berries, huckleberries, and arbutus berries. It takes also the partridge berry (*Mitchella repens*), a favorite with the ruffed grouse. Like many other species, it eats with relish the fruit of cornel (*Cornus stolonifera* and poison ivy (both *Rhus radicans* and *Rhus diversiloba*).

The Heath Hen.

The heather hen (*Tympanuchus cupido*), which, to casual view, appears like a small-sized prairie hen, inhabits the scrub oaks of the island of Martha's Vineyard, on the coast of Massachusetts. It was formerly abundant in Connecticut and the eastern parts of New York, New Jersey, Pennsylvania and Virginia.

As no stomachs of this now rare bird were to be had for examination, we must depend on the work of other investigators for knowledge of its food habits. Audubon quotes David Eckley as follows: "The bayberry, which abounds in many parts of Martha's Vineyard, is the principal food of the Grouse particularly

such as grows on low bushes near the ground, and is easily reached by the birds. They also feed on the boxberry, or partridge berry, the highland and lowland cranberry, rosebuds, pine and alder buds, acorns etc." (Ornith. Biog. II, p. 500, 1835.)

William Brewster in 1890 ascertained that, all told, there were probably only about 200 heath hens, and that they were confined to about forty square miles of the island of Martha's Vineyard. In speaking of their habits, he says: "At all seasons the heath hens live almost exclusively in the oak woods, where the acorns furnish them abundant food, although, like our ruffed grouse, they occasionally, at early morning and just after sunset, venture out a little way to pick up scattered grains of corn or to pluck a few clover leaves, of which they are extremely fond. They also wander to some extent over the scrub-oak plains, especially when blueberries are ripe and abundant. In winter, during long-continued snows, they sometimes approach buildings to feed upon grain which the farmers throw out to them." (Forest and Stream, XXXV, p. 188, 1890.)

If this bird can be saved from extinction and introduced into many of the Eastern States, it will be much more likely to succeed, on account of its woodland habits and narrow range, than the prairie hen, which require a more open country and usually does not take refuge in woods from its enemies. Experiments with the heath hen must be made soon, however, or it is likely to become extinct.

The Lesser Prairie Hen.

The lesser prairie hen (*Tympanuchus pallidicinctus*) is a smaller bird than the common species of the Mississippi Valley and is found from western Texas north to western Kansas. But little of its life history is known. It has been found breeding abundantly the first of June at Fort Cobb, Ind. T., and William Lloyd observed this grouse wintering in Concho and Tom Green counties, Texas. H. C. Oberholser, of the Biological Survey, found them common in August, 1901, in Wheeler county, Texas, where they frequented rolling plains overgrown with oak brush from 1 to 4 feet high. These oaks are evergreen, and the prairie hen feeds upon the buds and young shoots. At the time of Oberholser's visit the birds were in coveys of from fifteen to twenty, but, according to the people of that section, the prairie hens gather in flocks of hundreds in the late fall. At this season they are destructive to unthreshed wheat and oats, tearing off the surface of the stacks. In winter they visit cattle pens and corrals in search of food. During severe winters they are sometimes so numerous that they become a nuisance. Some idea may be had of their abundance during winter from the information secured by Oberholser that one man shipped 20,000 of them from this section in a single season.

(To be continued.)

Wild Animals Become Tame.

Wild animals and birds under favorable environments readily become used to man and his ways. In the Yellowstone Park, the raising of alfalfa for the winter feed of the wild animals in the park has proven a great factor in bringing the wild hoofed creatures closer to the observation of man. In this respect, Superintendent Pitcher of Yellowstone Park writes enthusiastically of alfalfa as a food for the wild animals in that great preserve. He says in his report:

"From a field near the Gardner arch 100 tons of fine hay will feed the antelope and other animals. The hay has been stacked near the soldiers' quarters. Three years ago deer were seldom seen anywhere about the Mammoth Hot Springs and only occasionally a few tracks could be seen in the snow, showing where they had crossed over the parade ground of Fort Yellowstone during the night.

"As a matter of experiment, and with the hope that some of these animals that passed through the post might be induced to come around where they could be seen, a few bales of alfalfa hay were scattered about the parade ground. The result was remarkable. From the second day after the hay had been put there about a dozen black-tailed deer appeared. Next day the number was doubled, and from day to day the number increased, until finally they numbered considerably over 100.

"It was extremely interesting to see how quickly these animals lost all fear of human beings, and even when the evening gun is fired within 100 yards of them they pay little or no attention to it, but show much more interest to the lowering of the flag from the staff, which is located in the center of their feeding ground.

"The mountain sheep, which are supposed to be the wildest of all western animals, have become even tamer and more fearless than the deer."

There are about 100 of them now within the confines of the park. These animals are rapidly disappearing in the west and this fact makes it more important to preserve those in the park. Antelope are also becoming rare. About 1500 of these little animals make their home in the park and seem to be increasing rapidly.

Last year 16,198 tourists visited the park.

John Benn's Trout and Salmon Flies.

The San Francisco Fly Casting Club is holding a raffle of the grand collection of John Benn's trout and salmon flies, exhibited at the World's Fair, St. Louis, and at the Portland Fair, receiving the gold medal at both expositions. The flies are now on exhibition at 801 Market street, corner of Fourth. Tickets are on sale at Claybrough-Golcher's, Olympic Arms Co. and Chas. H. Kewell Co.

On a hot day drink Jackson's Napa Soda lemonades and be refreshed.

Blue Rock Shoot

The first regular Golden Gate Club monthly shoot for this year will be held at Ingleside to-morrow.

Los Angeles Show

The Southwestern Kennel Club will hold the third annual bench show in Los Angeles April 11th to 14th inclusive. James Cole, of Kansas City, will judge all classes. Premium lists will be out March 1st. Entries close April 3d with George Albers, 50th Avenue and Marmon Way, Los Angeles.

Portland Show

The Portland Kennel Club has applied to the Pacific Advisory Board for the dates April 25th to 28th inclusive, on which to hold its annual annual bench show.

SAVE THE BIRDS.

The Breeder and Sportsman has repeatedly pleaded the cause of the feathered inhabitants of wildwood and field, urging that indiscriminate slaughter should be stayed for two reasons at least—their economic value, contrary to the general belief in that respect, and that they were not game birds. Our native birds are principally preyed upon by a horde of foreigners, European and Asiatic, a vandal lot of human locusts, who net, trap and shoot every variety of bird for the pot. These fellows flock to the hills and fields every Sunday and should be stopped some way or other. One effective method would be the concerted action of farmers and ranchers in keeping trespassers off their lands.

How most birds help the farmer and rancher is given below in an epitome of statistics, the result of scientific research, published by the Department of Agriculture, and shows what various birds feed upon and how, in consequence, they may be useful or detrimental to agricultural interests.

The Department of Agriculture, realizing the importance of correct information on this subject, has examined the stomachs of 26,000 birds of various kinds with the following results:

The bluebird is a good friend of the farmer, destroying harmful insects, and wild fruit can be planted to encourage his presence.

The robin is found to eat but little cultivated fruit, less than five per cent. Nearly half of his food consists of wasps, ants, spiders, grasshoppers, caterpillars, etc. He also destroys the March fly larvae which injures the grass in the hayfields.

The chickadee will in one day destroy 5550 eggs of the canker worm moth, and farms where this bird is encouraged to spend the winter are remarkably free from these pests.

The brown thrasher eats some cherries and grain, but these constitute only 11 per cent of his food, and he does great good by the destruction of many beetles which would do far more injury to the crops.

The house wren and butcher bird do great good in destroying caterpillars, bugs, crickets, spiders, grasshoppers, locusts, web worms, injurious beetles, etc.

The butcher bird and loggerhead shrike destroy grasshoppers, mice, etc.

The catbird is said to eat fruit, but while this is true in some parts of the country, one-third of its food consists of harmful insects. This bird prefers wild fruits to cultivated, such as berry-bearing bushes, red mulberry trees, etc.

The late Sylvester Judd suggested that crops of cherries and strawberries can be protected by "planting the prolific Russian mulberry, which if planted in hen yards and pig runs will afford excellent food for the hens and pigs besides attracting the birds away from more valuable fruit."

The vireos help the farmer in destroying harmful insects.

Cedar bird. More than one-half of its food consists of wild fruit and one-eighth of insects which are among the worst pests of the country, especially the elm leaf beetle.

Swallows, not only are the greatest fly catchers, but also destroy flying ants, beetles and weevils.

The rose breasted grosbeak is fond of potato-beetles, and is especially helpful to the farmer.

The meadow lark has been said to eat clover seed, but that seems to be a mistake, for 99 per cent of his food at clover time was found to be insects, mostly grasshoppers. It is estimated that the value of the grass crop saved by meadow larks on a township of 36 square miles, each month during the grasshopper season is about \$356.40. He also destroys other insects, among them some of the most injurious beetles. Professor Beal says: "Far from being injurious, it is one of the most useful of allies of agriculture, standing almost without a peer as a destroyer of noxious insects."

The red-winged blackbird is also a friend, destroying quantities of caterpillars, grasshoppers and weevils, and even when in the cornfields more than pays for the corn eaten by destroying the worms in the husks. In winter it destroys seeds of rag-weed, fox-tail grass and bird weed.

The crow blackbird destroys the rose bug, cucumber beetle, grasshopper, cricket and locust. These birds follow the store and feed on seeds. It is only when in rare instances these birds descend upon a field in hundreds of thousands that they may do much injury.

The crow is said to feed on the sprouting corn and corn in the milk, on cultivated fruit, and the eggs and young of poultry and wild birds. While it has been found that these charges are true to a certain extent yet the amount destroyed is small compared with the good done in destroying injurious insects and animals. The eggs and young of poultry constitute only one per cent of his food for the year. The

crow destroys injurious insects—grasshoppers, hay beetles, cut worms, etc., also mice. Moreover he does good service as a scavenger. Some farmers protect themselves by feeding to the crows old corn when the growing corn is in the milk, or tar the corn before planting, thus securing the services of the crow in destroying the insect pests that will surely injure the growing crop. The best methods of tarring are given in the "Crow Bulletin" which can be obtained of the Department of Agriculture, Washington, D. C.

The bluejay has been accused, like the crow, of eating corn and young birds and eggs, but it has been found that he prefers mast, seeds of trees, such as acorns, etc., and 22 per cent of his food consists of grasshoppers, caterpillars, etc., so that he does more good than harm.

The horned lark, or shore lark, does great good by eating weed seed and but little damage to grain crops.

The yellow-bellied fly catcher, wood pewee and phoebe are all helpful to the farmer by their destruction of harmful insects.

The kingbird has been accused of destroying honey bees, but examination proved that nearly all the bees were drones, and that he feeds upon the robber fly, the worst enemy of the honey bee, and known to kill 104 bees in a day. The kingbird also destroys the hairy and downy woodpeckers, chafers, clover, weevil, etc. He prefers wild cherries, elderberries, etc., to cultivated fruit.

The flicker has been wrongfully accused of eating corn. Nearly half its food consists of grasshoppers, and Professor Beal says that this bird, also the hairy and downy woodpeckers, should be protected and encouraged.

The red-headed woodpecker eats more grasshoppers than any other woodpecker, also eats June bugs, weevils, etc.

The woodpecker sapsucker. These birds are largely insect-eaters. It is only occasionally that an ornamental tree may be injured by them, and to protect these, the black alder, Virginia creeper, wild black cherry and juniper can be planted.

The cuckoo, black-billed cuckoo and yellow-billed cuckoo are very useful in destroying injurious beetles, grasshoppers, caterpillars, web worms, etc., etc.

Hawks and owls. These are among the best friends of the farmer.

Dr. Fisher says: "The birds of prey, the majority of which labor night and day to destroy the enemies of the husbandman, are persecuted unceasingly."

The marsh hawk is one of the most useful. It has a white rump and flies low over the meadows; it lives on meadow mice, etc.

Red-tailed hawk, hen hawk. The bird does not deserve the latter name; 66 per cent of its food consists of injurious mammals.

The red shouldered hawk, sparrow hawk, Swainson's hawk, are all most useful, destroying insects and mammals. It is said that 300 Swainson's hawks in one month save 60 tons of produce that would otherwise be destroyed by grasshoppers.

Only three kinds of hawks seem to be guilty of the charges made against them, the gos-hawk, Cooper's and the sharp-shinned, while all the rest are very helpful to the farmer and fruit grower.

The long-eared owl destroys mice and disturbs but few birds, and is said to do much good.

Barred owl. Only 4½ per cent of its food consists of poultry and game and it could do much less harm if chickens were shut up at night. Its food is mostly made up of injurious insects and mammals.

The screech owl destroys both insects, mice and rats.

The barn owl lives mostly on injurious mammals, gophers, moles, mice, rats, etc. It has been found that 93 per cent of its food consists of mice. Owls remain with us through the winter feeding upon the little enemies of orchard, garden and field.

King and Silver Salmon Fry.

Superintendent Shebley of the Brookdale hatchery is preparing to distribute about half a million king salmon in the Santa Cruz county streams during next month. He has about 67,000 steelhead eggs hatching now and has enough fish in the Soquel and Powder Mill dam ponds at present to get fully 700,000 more eggs. Mr. Shebley expects to receive a lot of silver salmon fry from Baker Lake, Wash., in the near future.

Fish Spearers Fined.

E. Erickson and D. P. Rollins, employees of the P. I. Company, near Monterey, were arrested last Saturday by Deputy Fish Commissioners W. R. Welch and E. E. Pedler. They subsequently pleaded guilty before Justice Lambert and were fined \$25 each.

The offense committed was spearing steelhead. The two men were caught in the act and had speared quite a number of fish. The statute prescribes the method of catching steelhead; the use of a fish spear for that purpose is illegal.

TRADE NOTES.

Averages Reported.

Blue Mound, Ill., January 24-25, J. S. Boa, first general average, 339 out of 365, shooting "DuPont." W. D. Stannard, second general average, 331 out of 365, shooting "DuPont." W. E. Keller, Taylorville, Ill., first amateur and third general average, 322 out of 365, shooting "DuPont." J. W. Robins, Blue Mound, Ill., second amateur average, 299 out of 365, shooting "DuPont." W. J. Manning, Morrisonville, Ill., third amateur average, 292 out of 365, shooting "DuPont." Hamilton, Ont., January 18-19, J. R. Taylor, first general average, 407 out of 440, shooting "DuPont." C. E. Doolittle, Cleveland, O., first amateur and second general average, 402 out of 440, shooting "New E. C." (Improved). J. A. R. Elliott, third general average, 397 out of 440, shooting "New Schultze." G. E.

Burns, Cleveland, O., second amateur average, 3392 out of 440, shooting "New E. C." (Improved). J. W. McMeans, Cleveland, O., third amateur average, 385 out of 440, shooting "New E. C." (Improved).

The Sunny South Handicap Tournament, Brenham, Texas, January 22-27. Handicap event was won by W. R. Crosby, shooting "New E. C." (Improved), who tied for the event with Geo. Maxwell, Holstein, Neb., shooting "DuPont," on 98 out of 100. In the shoot-off Mr. Crosby broke 22 out of 25 to Mr. Maxwell's 21. W. R. Crosby, shooting "New E. C." (Improved), tied for first general average for the whole tournament, with 1180 out of 1220. An amateur, also shooting "New E. C." (Improved), won first amateur average and tied for first general average with this same score. F. C. Riehl, second general average, 1175 out of 1220, shooting "New E. C." (Improved). H. G. Taylor, Meckling, S. D., second amateur and third general average, 1160 out of 1220, shooting "New E. C." (Improved). F. A. Weatherhead, Red Oak, Iowa, third amateur average, 1151 out of 1220, shooting "DuPont." Mr. F. C. Riehl made one run of 232 straight. **The Only One.**

Judging from the large number of inquiries and letters received recently in regard to the matter of the gold medals awarded the Smith gun and Hunter one-trigger by the Lewis and Clark Exposition, it would seem as if a statement as to the exact truth of the matter would not be out of place.

The L. C. Smith was the only gun awarded a gold medal by both the expert and superior juries, and the Hunter Arms Company has good reason to feel proud of this award, as the expert jury was composed of gentlemen of wide experience, both practical and theoretical. For instance, Major Hittinger is a government official and has charge of the testing of government guns. Senator R. D. Inman has been an enthusiastic sportsman ever since he was a boy, and is at present the owner of both Parker and Scott guns. Captain Meyers has been familiar with guns for years and is thoroughly conversant with gun mechanism and shooting in general.

The gold medal awarded was on the mechanical construction and remarkable simplicity of the Smith gun, as well as the Hunter one-trigger.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
Feb. 24—San Francisco Fly-Casting Club. Saturday Classification Contest No. 1. Stow lake, 2:30 p. m.
Feb. 25—San Francisco Fly-Casting Club. Sunday Classification Contest No. 1. Stow lake, 10 a. m.
April 1-Sept. 1. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-July 1—Dove season closed.
Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
Feb. 22—Blue Rock Tournament under the auspices of the Golden Gate and Union Gun Clubs. Ingleside.
Feb. 22—Pueblo Gun Club. Blue rock tournament. Pueblo, Colo.
March 4—Blue Rock Gun Club. Grounds foot of High street, Alameda.
March 11—Empire Gun Club. Blue rocks. Alameda Junction.
May 26, 27—Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, Floden Station.
June 19, 22—Interstate Association. Grand American Handicap target tournament. \$1000 added money. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary. Entries close Jan. 25.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary. Entries close Jan. 30.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary. Entries close Feb. 17.
Feb. 28, March 3—District of Columbia Kennel Club. Washington, D. C. Howe Totten, Secretary. Entries close Feb. 10.
March 1, 3—Southern Ohio Kennel Club. Hamilton, Ohio. Thos. Ball, Secretary. Entries close Feb. 12.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary. Entries close Feb. 25.
March 8, 10—Colorado Kennel Club. Denver, Col. T. W. Bartels, Secretary. Entries close —
March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary. Entries close —
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary. Entries close —
March 17—Bull Terrier Club. San Francisco. Entries close —
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary. Entries close March 10.
March 30 31—Haverhill Kennel Club. Haverhill, Mass. A. A. Balch, Secretary. Entries close —
April 11, 14—Southwestern Kennel Club. Los Angeles. George R. Albers Secretary, Los Angeles. Entries close April 3.
April 18, 21—Seattle Dog Fanciers' Association. Seattle, Wash. Chas. McAllister, Secretary. Entries close —
May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary. Brighton Beach, L. I. Entries close —
June 1 2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary. Entries close —
June 6, 9—San Francisco Kennel Club. 10th annual bench show. Fred P. Butler, Secretary. Entries close —
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary. Entries close —
Sept. 5, 5—Miami Valley Kennel Club. Piqua, O. Edwin A. Hiatt, Secretary. Entries close —
Sept. 8, 8—Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary. Entries close —
Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary. Entries close —
Sept. 29—Bryn Mawr Kennel Club. Haverford Pa. Henry D. Riley, Secretary, Stafford, Pa. Entries close —

HOW TO TREAT "LUMPY JAW."

It might be of interest to the farmer to know that it often pays him to treat his cattle afflicted with "lumpy jaw." This disease, technically termed actinomycosis, is caused by the "Ray fungus," a fungus found on the various awns of grasses and grains. This awn harboring the fungus may then find lodgment in the cavity of a shed milk-tooth or other lesions of the mucous membranes of the mouth, intestines, respiratory tract or skin, there often producing very extensive destruction of tissue and suppuration, eventually leading to a large "lump" from the surface of which oozes a yellowish pus. "Wooden tongue" is a form of this disease affecting the tongue, in which condition we will find the tongue swollen hard and stiff and find it very painful to the touch.

From our experience we find that when this disease is confined to the head and neck we can generally hope for a cure in the course of a few months or less, depending upon the stage and nature of the disease. When the tongue is affected the liberal application of Lugol's solution of iodine or tincture of iodine must be resorted to. This should be applied twice daily by means of a small brush. Internally the daily administration of four drams of potassium iodide dissolved in a pint of water should be persisted with for about two weeks, when it should be dispensed with for three or four days and again repeated as before. The daily dose can be gradually decreased as we see improvement in the animal. When the jaw is affected commence by cleaning the affected area with a solution of one part carbolic acid to 100 of water; then as much as possible scrape out suppurating area and by means of a small syringe (hypodermic syringe, if possible) inject liberal quantities of Lugol's solution of iodine once or twice daily, accompanied by the daily administration of four drams of potassium iodide as above. While this disease is not very fatal, we find that it very materially decreases the value of the animal for both beef and breeding purposes, and immediate treatment is to be encouraged.

BREEDING SPRING LAMBS.

There is still a lingering idea that a lamb is too young an animal to put to breeding. There was a belief, time ago, that a three-year-old ewe was the right animal to put with the ram, which should be five years old before it could be safely bred. It was said, in ancient times, that far in the future a thousand years should be as one day, and one day as a thousand years. Comparatively as this is to be understood this time has come, for in fact the prophecy has been fulfilled, says American Sheep Breeder. For it comes to the same thing that we may communicate with another person twenty thousand miles away in a moment, and travel more than a mile a minute. In this age we are pushing things, and in a colt is fit for the race course at a year old, and the greater part of the world's business is done by youths under twenty years old, we may very reasonably push things equally in all matters. Thus in conformity with

the modern methods, otherwise, we may very properly and safely breed the last year's lambs and so largely increase the product of our flocks; a full half anyhow.

The matter has been settled, however, and has passed the stage of discussion. At a year old lambs are now sheep. There are plenty of cows under two years old, and market heaves no older. Any full grown man may now remember when a steer was fed five years before it was thought fit for the butcher, but the farmer who should feed any animal in this way now would quickly find his only refuge in the poor house, or deservedly go to the asylum.

There is no good reason why last spring lambs may not be bred. It will increase the stock of sheep, which in fact needs replenishing, if it is true that we are five sheep short out of every hundred we had two years ago. But like the growth in substance, as compared with age, we may very reasonably breed the lambs of last year, and so practically almost double the breeding stock at once. The rest is a mere matter of feeding.

HOG FOR MARKET.

Breeders of swine will find the following suggestions from The Swineherd of practical value:

The object of hog raising and breeding is to produce the character of hog that best suits and profits the packer, being the kind of hog that meets his wants and trade. A breeder should have in his mind at all times the purpose for which hogs are raised and then improve the breed with this object in view.

The style of hog that best suits the market is not the same to-day that it was 30 years ago. There are changes in the requirements as there are in other things. One man will say it is because of progressiveness, while another may call that in question. However we have to deal with the facts as they are.

Forty years ago the farmer required 18 months to market his hogs. The pigs of this year were carried through the winter, with just feed enough to maintain and add some growth. Feeding was then commenced upon them early the next year and fed heavily as soon as new corn was ready, and put into the market averaging 300 to 600 pounds, according to the feeders' ability and the amount of feed used. At that time there was no summer packing. Here is the risk of 18 months of disease and the necessary feed to combat a severe winter to furnish the heat.

To-day the hogs can be marketed in from 6 to 8 months; less than half the time, at an average of 250 to 300 pounds. The expediting of the production of a marketable hog is certainly a vast improvement. It is the saving of feed, the saving of risk from disease and interest and time.

We have ample proofs from the tests of the experimental stations of the greater cost of the hog to produce to this age and size, and that it takes a very much greater percentage of corn to produce a pound of gain on a hog that weighs 300 pounds and upwards than one that weighs 50 pounds and upwards. There is a smaller increase in the gains from same amount of feed as the hog grows older and larger in size. Therefore, the cheapest meat production is on the younger hog.

When R. W. Clark of Utah fed a bunch of steers last season he found that they made a pound of gain from 115 pounds of alfalfa hay and 31.4 pounds of beet pulp at a cost of 2.8 cents. When the pulp was fed ad libitum with alfalfa to the steers, it had a value of \$1.85 and when similarly fed to sheep it was worth \$1.13 a ton. On a full ration of alfalfa and grain—bran and shorts in equal parts—the steers made a pound of gain at a cost of 4.93 cents. With another lot fed alfalfa, grain and beet pulp, a pound of gain cost 3.98 cents. When a full ration of alfalfa and pulp with a half ration of grain was fed, a pound of gain was made from 9.2 pounds of alfalfa, 2.03 pounds of grain and 19.1 pounds of pulp, the cost being 3.51 cents. When a full ration of grain and pulp was fed with a half ration of alfalfa, a pound of gain was made from 4.28 pounds of alfalfa, 3.65 pounds of grain and 21.3 pounds of pulp at a cost of 3.84 cents. Molasses in small quantities—four ounces a head daily—fed with eight pounds of grain and beet pulp ad libitum had a value of \$2.85 the ton.

Rock Island Sheep's Wool Spools, in all sizes, for vehicle washing and harness cleaning. At harness dealers, or delivered on receipt of price. S. ADDERLEY, 307 Market St., S. F., Cal.

Closing Out at Private Sale

of the

Sacramento Valley Stock Farm

STALLIONS, BROOD MARES,

and Young Stock Suitable for Training.

CH. STALLION, FOALED 1902, "DILLICARA."—Sire Sidney Dillon; 1st dam, Guy-cara, 2:18½, by Guy Wilkes, 2:15¼; 2nd dam, Biscarra (dam of 5 in list, 4 below 2:20), by Director 2:17; 3rd dam, Biscarra (dam of 6 in list, including the great stallion Pancoast and other producing sires and dams), by Harold 413 (sire of Maud S); 4th dam, Belle (dam of Belmont, sire of Nutwood, McCurdy's Hambletonian 2:26½, and other producing sires and dams), by Mambrino Chief 11; 5th dam, Belle Lupe, by Belldowner (Brown's), son of Imp. Belldowner and Lady Allport by Mambrino, a son of Imp. Messenger, the next dam of Brown's Belldowner being by Tippoo Sahib, son of Imp. Messenger, and the next dam by Imp. Messenger himself.

This young stallion's pedigree is unexcelled, his sire and the sires of his 1st, 2nd, 3rd and 4th dams having produced world-record holders, as well as many others the gamiest and best of all times. In looks and make-up he is as great as his pedigree, unexcelled. Although never trained, his natural speed is phenomenal. For the production of world-record holders, he should excel his sire or the sire of his 1st, 2nd, 3rd or 4th dam, each of which enjoy fame in this respect. As a candidate himself for the record he is entitled to much consideration.

CH. STALLION, FOALED 1902, "FLOSSNUT."—Sire Nutwood Wilkes 2:16½; 1st dam, Flossie, by Cornelius 11335, sire of Connelita 2:10¼, etc.; by Nutwood; 2nd dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 3rd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 4th dam, Emma Taylor by Imp. Glencoe; 5th dam, Lances 4th dam of Palo Alto and 5th dam of Alcione, Alcantara, etc., by Lance.

The blood lines in this young stallion's pedigree represented the male line of Nutwood Wilkes laid upon two crosses of Nutwood, one of Echo, one of Geo. M. Patchen Jr., and a thoroughbred female line tracing to Lances, to which female line trace such great ones as Alcione (sire of McKinney), Alcantara, Palo Alto, and many other great ones. The sires in the thoroughbred female line down to Lances have each produced the dams of trotters. The high degree of natural speed, strength and size, Nutwood type of conformation and make-up of this young stallion make him worthy of use in the stud and worthy of the opportunity to earn a low record on the track.

BAY MARE, FOALED 1903, "FLOWERET BELLE."—Sire Monbells 2:23½, son of Mendocino 2:19½, by Electioneer and Beautiful Bells (world's greatest brood mare), by The Moor; 1st dam, Floweret (dam of 2 in list and full sister to Wildflower, Manzanita, etc.), by Electioneer; 2nd dam, Mayflower 2:30½ (dam of Wildflower, Manzanita, etc.), by St. Clair 16675.

The sire of this filly represents Electioneer's most famous speed producing line, the Electioneer-Beautiful Bells cross. The dam of this filly represents a great performing and producing line that first made Electioneer famous through the great Wildflower, Manzanita, etc., the Electioneer-Mayflower cross. This filly was bred to Dillcara in 1905, and the pedigree of the produce will be composed almost exclusively of the greatest bloodlines of the greatest producers in the trotting world. Her produce from such mating will always rank of the highest value for breeding purposes, as well as for racing.

CH. MARE, GRISETTE, FOALED 1902.—Sire Marengo King 2:29½, son of McKinney 2:11¼ and By By by Nutwood; 1st dam, Lisette by Abdallah Wilkes 7562 (sire of Wauco 2:14½, etc.), son of Geo. Wilkes; 2nd dam, Musette by Startle 290 (sire of 11), son of Hambletonian 10; 3rd dam, Beckie Sharp by Billy Denton (sire of 2), son of Hambletonian 10; 4th dam, Kent Mare by Black Hawk 5.

In this filly's pedigree we have almost exclusively the producing male lines of Hambletonian 10. Her sire traces to that speed progenitor through McKinney, crosses of Nutwood and Dictator being thrown in. We get to Hambletonian 10 in the male lines of the sire of the 1st, 2nd and 3rd dams very quickly through only one or two generations of producing sires, something phenomenal for close up breeding to Hambletonian 10. This filly was bred to Dillcara in 1905, and the produce will probably have in its pedigree more crosses of Hambletonian 10 than any other horse, following the suggestion, "The way to breed trotters is to get all the blood of Hambletonian 10 that you can, and then get more." Stout and well formed as this filly is, her produce should be not only speedy but useful in the racing game. Not broken to drive.

CH. MARE, FOALED 1902, "BESSIE SWEET."—Sire Diablo 2:09¼; 1st dam, Bessie Roan by Hock Wilkes, son of Guy Wilkes; 2nd dam, Bessie by Ventura 2:27½; 3rd dam, Lady Emma 2:39½ by Paul's Abdallah, son of Hambletonian 10. The excellent brood mare sire Ventura 2:27½, a thoroughbred, being the sire of the 2nd dam, a real good half-thoroughbred son of Guy Wilkes being the sire of the first dam, Diablo 2:09¼ being the sire of the filly herself, the 2nd and the 3rd dams having been about the best mares ever driven in San Francisco for speed at the Park, should make this filly most valuable for breeding purposes, she being of large size and stout and blocky. Was never bred or broken.

CH. MARE, FOALED 1889, "FLOSSIE."—Sire Cornelius 11335 (sire Carmelita 2:10¼, etc.), son of Nutwood 2:18½, and Jennie G. 2:26½ by Echo, he by Hambletonian 10; 1st dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 2nd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 3rd dam, Emma Taylor by Imp. Glencoe; 4th dam, Lances (to whom trace in female line Alcione, sire of McKinney, Alcantara, Palo Alto, etc.), by Lance, son of American Eclipse. In this pedigree we have top crosses of Nutwood and Echo, great brood mare crosses, laid upon a thoroughbred female line going to Lances, the 4th dam of Alcione (sire of McKinney), Alcantara, Palo Alto, etc., the sires in this female thoroughbred line being the most noted for producing the dams and grandams of trotters. Lodi, the sire of the 1st dam, produced the dam of Pedlar and others; Bulwer was by Grey Eagle, whose daughters and grand-daughters produced great trotting performers; Imp. Glencoe's grand-daughters produced several trotters. The dam of this filly was a sister to Ruth Ryan, who produced Strathern, sire of Plunkett 2:13¼. Sons of Flossie, by well bred stallions, should become great sires, as well as performers. She is a very large, stout mare, of the Nutwood type. Bred to Dillcara in 1905.

BAY MARE, FOALED 1894, "FLOSSIE HOCK."—Sire Hock Wilkes, son of Guy Wilkes and Eda (thoroughbred), by Hock Hocking; 1st dam, Flossie by Cornelius 11335, son of Nutwood and Jennie G. 2:26½ by Echo. (See Flossie for continuation.) This pedigree represents a Guy Wilkes-Nutwood-Echo cross upon an excellent thoroughbred female line. Not bred in 1905. Never broken. A stout, well made mare. No living produce.

BAY MARE, FOALED 1894, "BESSIE HOCK."—Sire Hock Wilkes, son of Guy Wilkes, son of Guy Wilkes 2:15¼, and Eda (thoroughbred) by Hock Hocking, son of Ringgold by Boston; 1st dam, Bessie by Ventura 2:27½, thoroughbred son of Williamson's Belmont; 2nd dam, Lady Emma 2:39½ to pole, by Paul's Abdallah, son of Hambletonian 10. These three mares, full sisters, are each stout, smooth turned, extra well formed; were never broken to drive or ride. Their sire, Hock Wilkes, was a very stout, speedy, though crippled, half-thoroughbred son of Guy Wilkes. Their 1st and 2nd dams were about the speediest and best road mares driven in San Francisco and speeded in the Park. In this pedigree we have a top cross of Guy Wilkes laid upon a female line with Ventura, a thoroughbred brood-mare sire, for the sire of the first dam, and a son of Hambletonian 10 for the sire of the second dam, extra stout bloodlines for the production of game trotting speed.

ALSO SOME TWO-YEAR-OLDS out of dams whose pedigree is given above, suitable for training and breeding purposes, and entered in Futurity Stakes. One grand 2-year-old stallion.

AMERICAN HORSE BREEDER

\$10,000 FUTURITY

OPEN TO MARES BRED IN 1905. TO BE CONTESTED
BY TWO AND THREE YEAR OLDS IN 1908 AND 1909

\$6500 to Three-year-old Trotters

(\$4500 to Winner)

\$2000 to Three-year-old Pacers

(\$1300 to Winner)

\$1500 to Two-year-old Trotters

(\$1000 to Winner)

\$725 TO NOMINATORS OF DAMS OF MONEY WINNERS.

ENTRIES CLOSE MARCH 1, 1906

CONDITIONS.

Five annual subscriptions to the BREEDER, at \$2 each, or ten semi-annual subscriptions at \$1 each, money to accompany entry, entitles you to a free nomination of a mare; or, if you have not the time or inclination to secure year's subscriptions, a payment of \$5 on each mare will be accepted, and each \$5 payment entitles you to a year's subscription to the paper, which will be sent to a party or parties designated by you. Second payment, \$10, is due November 1, 1906 when color and sex of foal must be given. Nothing more is due until May 1, the year of the race. If you wish to start a foal in the two-year-old division, a further payment of \$10 is required May 1, 1908, and \$20 more thirty days before the race. On starters, \$40 evening before the race. In the three-year-old trotting division a payment of \$20 is required May 1, 1909, and \$40 more thirty days before the race. On starters, \$100 evening before the race.

If the foal is a pacer, a payment of \$20 is required May 1, 1909; \$20 thirty days before the race. On starters, \$40 evening before the race. The two-year old division of the purse will be mile heats 2 in 3; the three-year-old division, either trot or pace, mile heats, 2 in 3. In the two-year-old division \$1000 goes to the winner, \$200 to the second horse, \$100 to the third and \$50 to the fourth; \$90 goes to the nominator of the dam of winner, \$30 to the nominator of the dam of second horse, \$20 to the

nominator of the dam of third horse, \$10 to the nominator of the dam of fourth horse.

In the three-year-old division trotting money will be divided as follows: \$1500 to the winner, \$1000 to second horse, \$400 to third horse, \$200 to fourth horse, \$250 to the nominator of the dam of the winner, \$75 to the nominator of the dam of the second horse, \$50 to the nominator of the dam of the third horse, \$25 to the nominator of the dam of the fourth horse.

In the three-year-old pacing division money will be divided as follows: \$1300 to the winner, \$300 to second horse, \$150 to third horse, \$75 to fourth horse; with \$100 to nominator of dam of winner, \$40 to nominator of dam of second horse, \$20 to nominator of dam of third horse, \$15 to nominator of dam of fourth horse. With exceptions herein noted, rules of the National Trotting Association will prevail. If a nominated mare has no living foal on November 1, 1906, her nominator may substitute another mare and foal, regardless of ownership, but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries the name, color and pedigree of mare must be given, also the name of the horse to which she was bred in 1905. These races will be contested at one of the Eastern Grand Circuit Meetings in 1908-9.

For Entry Blanks Address

AMERICAN HORSE BREEDER PUBLISHING CO., 161 High Street, Boston

NOTE. Names of mares nominated, and their owners and the sires to which they were bred in 1905, will be published in the Breeder each week as they are received.

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

Asbury Park N. J., Nov. 29, 1905.

Troy Chemical Co., Binghamton, N. Y.
Gentlemen—I have used "Save-the-Horse" in numerous cases, curbs, splints and ringbones. It was through my success "Save-the-Horse" was introduced into this city. I tried it on a bad case of thrush, poured it right into the affected part three times a week, and it healed it right up, making a perfect cure. I highly recommend it to all my friends. Yours truly,
C. D. HAVILAND,
Livery and Sale Stables.

Troy Chemical Co.
Gentlemen—My horse went lame from side bones, or shell bones, on both feet, and was laid up for about three months. The growths extended entirely around the quarter. I used two bottles of "Save-the-Horse" and the horse is perfectly sound, and I have driven over the macadamized and paved roads, and she never shows the least particle of lameness; the growths have nearly all disappeared. I have owned horses for years, used them to build railroads and every kind of contract work, and have used remedies, blisters, fire iron and electricity, but never saw anything take hold and produce such a result as "Save-the-Horse" in these cases. Very truly,
D. C. BENNETT, Contractor Builder,
416 79th St., Brooklyn, N. Y.

Albion, Ind., Nov. 15, 1905.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen—I purchased a bottle of Save-the-Horse last spring, to use on a curb that had been laming a horse for nearly a year. I had used several other remedies, but they failed to work. I only used Save-the-Horse a few times when all lameness stopped and the horse has been bothered with it no more. I had another horse go lame with a bad splint and a few applications fixed him all right. I think your cure is all O. K. and well worth the money, and costs less for results than some of the cheaper remedies. I remain,
yours sincerely,
S. S. STEEL.

The fire iron is uncertain; blistering is less effective, and both necessitate laying up the horse from weeks to many months; mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors.

"Save-the-Horse" Permanently Cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boli, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for copy and booklet. At druggists and dealers or express paid. Scores of letters to confirm and convince. Send for copies. Absolute and overwhelming evidence and certainties as to the unfailing power of "Save-the-Horse."

TROY CHEMICAL COMPANY, BINGHAMTON, NEW YORK. Formerly TROY, N. Y.

Pedigrees Tabulated at This Office

CLOSELY RELATED TO JOHN A. MCKERRON 2:04 1-2.

T. C. 2:30 Trial 2:20

Sire, **NUTWOOD WILKES** 2:16½, sire of John A. McKerron 2:04½, Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes 2:09½, etc., etc.
Dam, **ZETA CARTER** by Director 2:17, sire dams of John A. McKerron 2:04½, Ozanam 2:07, Little Thorne 2:07½, Leonardo 2:08½, etc., etc.; second dam, Lida W. 2:18½ (dam of Nutwood Wilkes 2:16½, etc.) by Nutwood 600, greatest sire of broodmares that ever lived; third dam by Geo. M. Patchen Jr. 31; fourth dam, Rebel Daughter by Williamson's Belmont.

T. C. is one of the best bred young stallions in California. A two-year-old filly by him has been one of the sensational young trotters at Pleasanton this winter, and is as handsome as a picture. T. C. will make the season.

At Alameda Race Track.

Fee \$30 the Season.

with usual return privilege.

Excellent pasturage for mares at reasonable rates. Send to the undersigned for card containing tabulated pedigree and other information. I will take a few horses to train for road or track.

GEORGE T. ALGEO, 1207 Eagle Ave., Alameda, Cal.

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb," or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.
W. B. Eddy & Co., Whitehall, N. Y.

FOR SALE OR LEASE.

Two Prince Airlie Stallions.

PORTOLA 37413, a handsome golden bay, 7 years old, 16 hands, weighs 1190 lbs.

MENLO BOY 37401, a magnificent brown with white points, 6 years old, 16.1 hands, weighs 1200 lbs.

These two horses are full brothers, being sired by Prince Airlie 28045; he by Guy Wilkes 2:15½, sire of Fred Khol 2:07½, Hulda 2:08½, Seymour Wilkes 2:08½; first dam Signal by Del Sur 2:24; second dam Lady Signal 2:35½ by Signal 3327. Both of these horses are very fast for the amount of work, being only a few months last year, showing quarters around :34 and :36.

For further information apply to
P. H. McEVROY, Menlo Park, Cal.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam ALPHA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:23; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be played at with in a brush of breeches. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11 GREATEST SON OF MCKINNEY 2:11

Will make the Season of 1906, from February 1st to June 1st,

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:03½; Charley T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Belmont three years old, record 2:15½, trial 2:13½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Dee Cue 2:19½, trial 2:13½; Lady Zombro 2:24, trial 2:10; Lord Kitchener 2:24½, trial 2:19½; Zealous 2:56½, trial 2:20; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEO. T. BECKERS, 3949 Figueroa St., Los Angeles, Cal.

NEAREST 35562

(RECORD 2:22½)—Sire of Alone (4) 2:09½ (trial 2:06½); Just It (3) 2:19½ (trial 2:12½); High Fly (2) 2:24½ (trial 2:12½, last half in 1:00½); and full brother to the great John A. McKerron 2:04½, the second fastest stallion in the world.

By NUTWOOD WILKES 2:16½, sire of John A. McKerron 2:04½ (second fastest stallion in the world); Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes (4) 2:10½, George B. 2:12½, North Star (3) 2:13½, winner Pacific Breeders Futurity Stakes \$6000 Guaranteed of 1905, and 32 in 2:30 list; dam INGAR, the greatest producing daughter of Director; second dam Annie Titus by Echo 482; third dam Tiffany mare (dam of Gibraltar 2:22½) by Owen Dale; son of Williamson's Belmont. NEAREST is a dark bay, 15.3 hands and weighs 1300 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Will make the Season of 1906 at San Jose, with return privilege in case horse remains in California. For terms and extended pedigree address
Phone: Red 1431.

THE STANDARD TROTTER STALLION

Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station,
LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I. 2:08½ and Ray M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand build, plenty of substance, excellent disposition. He has a stout back, strong loins and stiff good feet and legs. His breeding is excellent, and with his individuality he presents a popular and special-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF. H. B. FREEMAN, University Station, Los Angeles, Cal.

KINNEY WILKES

Sired by MCKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zoelook 2:05½, You Bet 2:07, Jennie Mac 2:09, etc.

First Dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of Fred Kohl 2:07½, Hulda 2:08½, Lesa Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezella 2:10½, Katherine A. 2:11½, etc., etc., and grand sire of John A. McKerron 2:04½; second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:24, Native Son 2:26½ and Silver Spray 2:28) by Arthurton 365; third dam, Nancy by Gen. Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best bred of the McKinnies.

Will make the Season at

LEONARD STATION, Santa Cruz County.

Fee \$25.

Get the Blood that Produced the Champions, SWEET MARIE and LOU DILLON, by Breeding to

GRECO

BLACK COLT, FOALED 1900. Sire, McKINNEY 2:11 1/4, sire of SWEET MARIE 2:04 1/4, Kinney Lou 2:07 1/4, Charley Mac 2:07 1/4, Hazel Kinney 2:09 1/4, Th. Roman 2:09 1/4, Dr. Book 2:10, Coney 2:02, China Maid 2:05 1/4, You Bet 2:07, Jennie Mac 2:09, Zolock 2:05 1/4, Dam, ALLEN 2:26 1/4 (dam of Mowitz 2:20 1/4, Sister 2:30 and GRECO 2:32, trial 2:20) by Antee 2:16 1/4, sire of dams of Directum Kelly 2:08 1/4, Grey Gem 2:09 1/4, W. Wood 2:07, etc.

Grandam, LOU MILTON (dam of LOU DILLON 1:58 1/4, Redwood 2:21 1/4, Ethel Mack 2:25 and Allen 2:26 1/4) by Milton Medium 2:25 1/4 (sire of 2 and dams of 5) by Happy Medium 2:32 1/4, sire of Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:30 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address

CHAS. DE RYDER, Manager, Pleasanton, Cal.

IRAN ALTO

24586
Rec. 2:12 1/4

Sire, PALO ALTO 2:08 3-4
Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12 1/4, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$20 due when mare is bred and
\$20 payable when mare is known to be in foal.

For further particulars address

H. S. HOGBOOM,
Woodland, Cal.

KINNEY LOU IN THE LEAD

HAWTHORNE 2:06 1-4

BILLY BUCK 2:07 1-4

KINNEY LOU 2:07 3-4

KINNEY LOU 2:07³/₄ THE FASTEST TROTTING SON OF THE CHAMPION SIRE....

Will make the Season of 1906, commencing February 1st, ending July 1st, at

AGRICULTURAL PARK, SAN JOSE, CAL.

TERMS \$100. \$50 due when mare is bred and \$50 payable when mare is known to be in foal.

For further information, pedigree and description address
PHONE: JOHN 2481.

BUDD DOBLE, San Jose, Cal.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19³/₄Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idollita (2 y. o.) 2:21¹/₄, (3 y. o.) 2:12, (a) 2:09¹/₄, Leonora 2:12¹/₄, Polka Dot 2:14¹/₄, etc. Bay Stallion, 15³/₄ hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.Sire, ELECTIONEER 125, son of Hambletonian 10. First dam, MANO (dam of MENDOCINO) (3) 2:19¹/₄, Electant 2:19¹/₄, Morocco (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W. (3) 2:17¹/₄, Hyperion 2:21¹/₄, Memento 2:25¹/₄, Mithra (p) 2:14¹/₄) by Hambletonian Jr. 1883; third dam, Gilda (thoroughbred) by imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idollita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure galloped and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16²/₄ hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm.Sire, McKINNEY 8818 (record 2:11¹/₄). First dam, HELENA 2:11¹/₄ (dam of Wildnutting 2:11¹/₄; Dobbelt 2:22, Hyita (trial 2:19) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, L. M. by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKINNEY, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at PALO ALTO STOCK FARM. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.McKINNEY, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

Mention this journal when writing. The Empire City Farms, CUBA, NEW YORK.

McKINNEY.....DIRECTOR.....NUTWOOD

THE STANDARD-BRED TROTTING STALLION

UNIMAK 40936

y McKINNEY 2:11¹/₄; dam TWENTY-THIRD by Director 2:17; second dam Nettie Nutwood (dam of Hillsdale 2:15¹/₄) by Nutwood 600.

Will make the Season of 1906 at PALO ALTO, Cal.

Usual return privileges or money refunded at the option of the owner of the mare.

Terms, \$40 for the Season.

To Close June 1st

Address or apply to

Excellent Pasturage at Reasonable Rates. No barbed wire. Best of care taken of Mares, in any manner Owners may desire.

CAPT. C. H. WILLIAMS,
Box 161, PALO ALTO, CAL.WAYLAND W. 22516. Record 2:12¹/₄.

ONE OF THE LEADING SIREs OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06¹/₄, leading money earning pacer of season 1905. Sire of Morosco 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:25, dam Lettie (dam of Wayland W. 2:12¹/₄, Welcome 2:10¹/₂, Maud Singleton 2:28) by Wayland Forrest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Anteeo or any of our great sires, he is the sire of Bolivar 2:06¹/₄, Nellie R. 2:10, Arthur W. 2:11¹/₂, Morosco 2:12, John A. 2:12¹/₄, Forrest W. 2:14¹/₄, Leland W. 2:16, Al Sandy 2:19¹/₄, Maud Sears 2:21, Bonita Wilkes 2:26¹/₄. Wayland W. will make the Season of 1906 at SANTA ROSA, at McGregor & Rockins' Stables.

W. C. HELMAN, Owner.

Terms \$40 for the Season. Pasture \$3.00 per month.

KENNETH C. 2:17 {THREE YEAR OLD RECORD}

Sired by McKINNEY: dam MOUNTAIN MAID (dam of Tom Carneal 2:08¹/₄) by Cresco 4908 (sire of Allie Cresco 2:13, etc.); next dam by Cloud.

Will make the Season of 1906 at

PLEASANTON, CAL.

KENNETH C. was one of the fastest of an exceptionally good lot of three-year-olds that raced in California in 1905. He is a splendid individual, has size, style and quality, and the grandsons and granddaughters of McKINNEY through Kenneth C. will be equal to any in the land.

Terms \$30 for the Season.
\$15 for Single Service.

Address

S. K. TREFFRY, Pleasanton.

MONTEREY 2:09 1-4 Reg. No. 31706

(Sire of IRISH 2:08¹/₄, Fastest Four-Year-Old Pacer of 1904).By SIDNEY (grand sire of Lou Dillon 1:58¹/₄); dam, HATTIE (also dam of Montana 2:16) by Commodore Belmont 4340. MONTEREY 2:09¹/₄ stands 15³/₄ hands, weighs 1200 lbs. and is one of the finest individuals on this Coast. FEE, \$50 for the Season.YOSEMITE By MONTEREY 2:09¹/₄. Dam, LEAP YEAR 2:26 (full sister to Iago 2:11) by Tempest 1881, son of Almont 33.

YOSEMITE is a very high-class young trotter, and as he will be trained this year he will be allowed to serve only six choice bred mares. FEE, \$25 for the Season.

Will make the Season at SAN LORENZO and ALAMEDA.

I have leased a fine, roomy barn with 14 large box stalls on Sherman street, four blocks from the race track, Alameda, and am prepared to do public training. Would like to get two good trotters and a promising three-year-old to prepare for the races this season.

FOR THE IMPROVEMENT OF THE BREED OF HORSES

RACE COURSE:
Saratoga Springs, N. Y.OFFICE: The Windsor Arcade
46th St. and 5th Ave., New York City

Stakes for Summer Meetings of 1906-07 TO CLOSE ON MONDAY, MARCH 5, 1906.

FOR THREE-YEAR-OLDS AND UPWARD

THE GREAT REPUBLIC of \$10,000 Added.

By subscription of \$200 each, half forfeit, or \$50 if declared by June 1, 1906; with \$10,000 added, of which \$2,000 to the second and \$1,000 to the third. Winners in 1905 or 1906 when three-year-olds and upward, of a race of the value of \$10,000 to carry 3 lbs. extra; of two such races, 5 lbs. extra. Non-winners of \$200 at any time allowed 5 lbs.; of \$500, 8 lbs.; of \$2,500, 12 lbs.; of \$10,000, 15 lbs. *One Mile and a Quarter.*

THE SARATOGA HANDICAP of \$10,000.

By subscription of \$200 each, half forfeit, or \$25 if declared by June 1st. To the winner \$8500, to the second \$4000, and to the third \$2000. Weights to be announced ten days before the race. Winners of a race of the value of \$1000 after the publication of the weights to carry 5 lbs. extra. *One Mile and a Quarter.*

THE SARATOGA CUP of \$7500.

By subscription of \$100 each, or \$50 if declared by June 1st for entries made March 5th; and \$300 each for entries made July 2d, when the event shall close. Starters to pay \$100 additional. To the winner \$6000 and a cup of the value of \$250, to the second \$1000, and to the third \$500. Weight for age. *One Mile and Six Furlongs.*

THE MERCHANTS' AND CITIZENS' of \$3000. A Handicap.

By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$2400, to the second \$400, and to the third \$200. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. *One Mile and Three-Sixteenths.*

THE CHAMPLAIN of \$3000. A Handicap.

By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$2400, to the second \$400, to the third \$200. Weights to be announced three days before the race. Winners after the announcement of weights to carry 5 lbs. extra. *One Mile and a Furlong.*

THE DELAWARE. A Handicap.

By subscription of \$25 each, or \$10 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of weights to carry 5 lbs. extra. *One Mile.*

THE AMSTERDAM. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$1000. If for \$3000 allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1500. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. *One Mile.*

THE CATSKILL. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$1000. If for \$3000, allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. *Seven Furlongs.*

FOR THREE-YEAR-OLDS.

THE SARANAC of \$5000. A Handicap.

By subscription of \$100 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$4000, to the second \$700, to the third \$300. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. *One Mile and a Furlong.*

THE HURON. A Handicap.

By subscription of \$25 each, or \$10 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of weights to carry 5 lbs. extra. *One Mile and Three-Sixteenths.*

THE SENECA. Selling.

By subscription of \$5 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$1000. If for less, 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. *Six Furlongs.*

THE MOHAWK. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$1000. If for less, 1 lb. allowed for each \$200 down to \$300; then 1 lb. allowed for each \$100 down to \$100. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. *One Mile and a Furlong.*

FOR TWO-YEAR-OLDS.

THE SARATOGA SPECIAL.

By subscription of \$1000 each, half forfeit. A Piece of Gold Plate of the value of \$2500 to be added by the Association. Subscribers to name three horses by May 1st, and only one starter to be named for each subscription. *Six Furlongs.*

THE ADIRONDACK of \$5000. A Handicap.

By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$100 additional. To the winner \$4000, to the second \$700, and to the third \$300. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. *Six Furlongs.*

THE KENTUCKY. For Fillies. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$1000. If for less, 1 lb. allowed for each \$100 down to \$300. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. *Five and a Half Furlongs.*

THE ALBANY. A Handicap.

By subscription of \$25 each, or \$10 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 5 lbs. extra. *Six Furlongs.*

THE TROY. Selling.

By subscription of \$25 each, \$10 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$1000. If for \$3000, allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$100. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. *Five and a Half Furlongs.*

To Be Run at the Summer Meeting of 1907 THE GREAT REPUBLIC OF \$20,000 For Three-Year-Olds and Upward in 1907 (Now Two-Year-Olds and Upward)

For Now Two-Year-Old and Upward.
The Saratoga Association to guarantee the cash value of the race to be \$20,000; of which the owner of the second horse shall receive \$2000 and the owner of the third horse \$1000. Liabilities as follows:

For Now Two-Year-Olds.
By subscription of \$25 each. If left in after November 1, 1906, a further subscription of \$275 each, and if left in after June 1, 1907, a further subscription of \$100 each.

For Now Three-Year-Olds and Upward.
By subscription of \$50 each. If left in after November 1, 1906, a further subscription of \$100 each, and if left in after June 1, 1907, a further subscription of \$100 each.

STARTERS to pay \$100 additional. Winners in 1906 or 1907, when three-year-olds or upward, of a race of the value of \$10,000 to carry 3 lbs. extra; of two such races, 5 lbs. extra. Non-winners of \$2000 at any time allowed 5 lbs.; of \$500, 8 lbs.; of \$2500, 12 lbs.; of \$1000, 15 lbs. *One Mile and a Quarter.*

All entries should be addressed to the Secretary, Windsor Arcade, Forty-sixth Street and Fifth Avenue, New York City.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognise the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

QUINN'S OINTMENT

REMOVES SWELLING

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Cuts, Bruises and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the position of the cart and the broken-down horse market. Mr. C. E. Buckens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, sprains, windpuffs and all bunches it has no equal."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich, July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

MANY CHANGES IN THE RULES governing harness racing were made by the biennial congress of the National Trotting Association at its meeting held February 14th in New York. In another column will be found a report of the meeting giving the more important of these changes. The most radical departure from past methods is the concession granted a circuit of not less than five nor more than twelve tracks to have its racing supervised by a Board of Stewards to be appointed by the Board of Review, or its President, and to consist of five members selected from a list of names suggested by the associations comprising the circuit—each association to suggest the names of two persons. This is a concession to the Grand Circuit, which has for several years been trying secure "home rule." Another new rule is one requiring that no person shall act as starter at a meeting unless he has been regularly licensed, and numerous duties are assigned such persons. A rule that will be of most interest to drivers and trainers is one that prohibits the carrying of timing watches in races without the consent of the judges. The strict enforcement of this rule will make better racing and prevent the laying up of heats where a fast record is not desired. The new rule which prohibits any person or stable having in their employ in any capacity an expelled, suspended or disqualified person, is an aftermath of the Butler-Salisbury case which caused so much talk last year. It will now be impossible for any person to start a horse on an association track who has in his employ any person who is under suspension. An excellent new rule is the one which prevents any horse wearing hoppers in a race after starting without them, or permitting their removal after once starting with them. All in all the changes in the rules have been made to improve racing, and while they may not all work as well as expected, they should be firmly enforced and thus given a fair trial.

THE SECOND VOLUME of "The Morgan Horse and Register" by Jos. Battell, has been issued and we acknowledge receipt of a handsomely bound copy, which is welcomed as a very valuable addition to our library. The volume contains the names of all animals registered in volume I, with number of page where registered, together with the names of many other horses registered in conformity with the rules of the Morgan Register. A feature of both volumes is many beautiful half-tone engravings made from actual photographs of famous horses, and these in themselves are not only of much value but an actual guide to the breeder of to-day who is breeding horses to a type. Mr. Battell has expended a vast amount of time and money in preparing these volumes of the Morgan Register, and while he will never realize from their sale anything near the cost, he has accomplished something that is of vast value to the army of American horse breeders. The Morgan horse as a type is receiving much attention in late years, and all intelligent breeders are beginning to realize that the type is one that should have been preserved with greater care, and that the use of the blood, wherever found, is worth while. A horseman's library that does not contain the two printed volumes of The Morgan Register is not complete.

A SENSATIONAL ITEM of news about the San Jose race track and fair grounds appears on another page of this week's issue. It is from the San Jose Mercury and states that the track is to be cut up into town lots, and that all the horsemen stabling there have been ordered to vacate the stalls. It is possible that the sale of the track to L. E. Hanchett, representing a railroad company, may have its legality tested in the courts. At any rate it is stated by those who claim to know that there was a clause in the original deed from the owners of the property who gave it for an agricultural park and fair grounds, that the land should revert to them or their heirs if it was ever devoted to other uses. It is to be hoped that this clause was in the deed and that it will be declared effective by the courts.

THE OFFICIAL YEAR BOOK of the League of American Driving Club has just been issued, and the secretary of the league and compiler of the book, Mr. Geo. A. Schneider of Cleveland, will please accept our thanks for a copy. The work contains full summaries of all trotting and pacing events at matinees of 1905, also summaries of amateur events at public meetings during that year. There is also a list of officers and members of all the clubs in membership in the league, and an alphabetical list of the trotters and pacers owned by club members. The illustrations, which are very numerous, are splendid specimens of the engraver's art, and as the book is very handsomely printed it is an adornment to any library.

OHIO HORSEMEN are certainly "up against it good and hard." After polling their full strength against Governor Herrick and defeating him for reelection, placing the Democratic candidate, Pattison, in the chair, they are now told that the latter will see that the laws against betting are "enforced to the letter," and that he will veto any bill that passes the Legislature permitting betting on races. As a consequence there will be no meeting this year at the Glenville track at Cleveland, as the association will not take the chances of giving one without betting.

MURRAY HOWE, secretary of the Memphis Association, has been in California for the past week visiting Pleasanton, San Francisco, Los Angeles and other points, presumably getting testimony for the case which his association has brought against E. E. Smathers.

THE SPRING SOUVENIR NUMBER of the American Sportsman of Cleveland is one of the best of the many splendid editions of that journal. The cover design is very attractive and artistic.

REGISTRATION.

The Chicago Horseman points out that no more encouraging sign of the prosperity of the trotting business need be sought than the fact that the annual report of the American Trotting Register Association reveals the fact that an unusually large number of colts were registered in 1905. Just after the collapse of the celebrated boom breeders became discouraged and careless and neglected to register their colts as they should. This neglect, the Horseman continues, was due in a measure, too, to the fact that the breeders had overestimated the value of the "standard," or, at least, had so abused the word that it failed to carry the weight it had previously. Now, however, breeders recognize the fact that a certificate of registration is of value, the more so if the colt happens to develop into a high class horse, and if the colt happens to be sold for export the certificate is absolutely essential. If a breeder has not the confidence to register the produce of a trotting-bred mare and stallion, then there is something the matter with his system of breeding. A certificate is a guarantee to the public that the breeder is conducting his business in a proper and approved manner. The foreigner who purchases a trotter for export, if it is only across the line into Canada, is very apt to become suspicious if there is any trouble in securing the requisite papers from the American Trotting Association. He has been educated to the fact that properly bred horses of all the different types are registered in their respective stud books in his country, and is loth to take a story in place of the essential papers. And this is particularly true if the horse has been sold by the breeder and has passed through several hands. The professional dealer in trotting-bred stock, especially those located so as to command the Canadian trade, will, of course, prefer to purchase the properly registered colt if other things are equal, for he avoids delays and much bother if he happens to make a sale across the line. The breeder will have to recognize all this if he would prosper, for while the sale of one colt or horse may not amount to a great deal, the sale of half a dozen or a dozen to one dealer is a transaction to be desired. It would be a state of things much to be desired if all horses on the race tracks were registered and none allowed to start unless the proper papers were shown on demand. It would reduce the temptation to commit fraud by "ringing" to a minimum and would add a dignity to the sport, the breeder and to the trotter. With hundreds of country fairs each year, the races of which are made up of local horses owned and driven by "farmers' boys" of the neighborhood, it does not appear that the registration of all race horses could be enforced. Each and every breeder, however, will advance his own interests by having all of his colts properly registered.

Here is an opportunity to buy a high class brood mare and a prospective foal for a low price. Mr. R. P. M. Greeley of Fourteenth and Franklin streets, Oakland, is about to take a trip south for the benefit of his health and before going wishes to dispose of his horses. Winnie Wilkes 2:17 1/4 he offers for \$350. She is in foal to that great trotter Lecco 2:09 3/4 and the produce should be worth more than the price asked for the mare. Winnie Wilkes will be in the great brood mare list as sure as her produce are raced.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle Sept. 3 to 8
Salem Sept. 10 to 15
North Yakima Sept. 17 to 22
Spokane Sept. 24 to 29
Walla Walla Oct. 1 to 6
Lewiston Oct. 8 to 13

Everett was given the privilege to select such dates as they may decide on.

NOTES AND NEWS.

The Livermore horse show will open to-day at 1 p. m. With fair weather a strong showing of stallions.

The Western Horseman issued a splendid souvenir edition on the 9th of February. It contained more than 150 pages and was filled from cover to cover with interesting reading.

They are asking but \$50 for the service of Searchlight 2:03½ in Kentucky this season.

Los Angeles, Santa Rosa and Woodland will each year give good harness meetings this year. The Breeders' Association will hold a meeting at Fresno, and could be induced to give meetings at Pleasanton and San Jose if the tracks can be secured.

John Pender, of Portland, Oregon, has sold to J. H. Nickerson of Centralia the pacing mare Annigito 2:21 by Antrim, dam Nelly Blackwood by Blackwood Jr.

Empire City Farm has nominated thirty-five mares bred to McKinney 2:11½ in the Horse Review stake. Enterprise like that pays and pays well.

Rey del Valle, who was given his name by the editor of The Breeder and Sportsman, will be pointed for the C. of C. by Ed. Benyon. Here's hoping the son of Rey Direct will win it in straight heats.

Deveras 2:11¼, own brother to Rey Direct 2:10, is to be raced again this year at the Canadian meetings.

Dr. E. A. Pearce of Portland, Oregon, owns a Zombro four-year-old filly out of an Altamont mare, that is considered one of the greatest trotting prospects in the Northwest.

Nocturno 2:20, the handsome son of Alfonso, will make the season of 1906 at Salem, Oregon, where he will be in charge of W. H. Sloan.

Hollo 2:15 by Welcome 2:10½ will be raced again this year in all probability. He has been used as a road horse for a year or more by his owner, Mr. John Treadwell of Oakland, but is looking so well and has so much natural speed that he will be sent to Al McDonald at Pleasanton to get ready for the races.

A. Ottinger has sent his fast pacing stallion Daedalion 2:08½ to James Thompson at Pleasanton, and the son of Diablo may be seen racing on the Grand Circuit this year. If anybody can bring this fast stallion to the post fit to race for one's life, "Jeems" can do the trick.

One of the funny developments of Western ingenuity in cases of emergency is reported from Routt county, Colorado, where it seems the ranchers have this winter experienced considerable snow and then some, says Field and Farm. A genius named Charles McCormick of Hahn's Peak has perfected a set of web snowshoes for his horses so that they can get over the country without mashing around in the beautiful and wearing themselves out. The horses soon became accustomed to the shoes and travel with the same ease as a man does on skis. Mr. McCormick contemplates still further improvements on the shoes before applying for a patent and putting them on the market.

There is a possibility of Tucson being included in the Rocky Mountain circuit and the speedy pacers and trotters of the Southwest may race there possibly late in April. Among the cities which are mentioned in addition to Tucson as being on the proposed racing circuit are Phoenix, El Paso, Albuquerque, Las Vegas, Trinidad, Pueblo, Denver and Montana cities. It is planned to open the circuit in Phoenix where one of the best tracks in the country is located. If plans go through successfully, the horses may stop over at Tucson on their way from Phoenix to El Paso. The track is a half mile oval, but could be put in good condition for the races.

The small breeder and single brood mare owner, like the owner of a single high-class trotter or pacer, too often too greatly magnifies his disadvantages in the matter of making stake engagements. But facts and figures show that the single brood mare owner, at least the small breeder who makes few futurity stake nominations, has been an unusually fortunate individual. Secretary Horace Wilson, of the Kentucky Trotting Horse Breeders' Association, has prepared a wonderfully interesting little table on the subject, and, astonishing as it may seem, this table shows that of the twenty-five Kentucky Futurity winners to date, over half of the number were nominated by breeders who nominated three or less mares, and that six winners of seven races were out of the only mares named by their respective breeders in the great event, these being Peter the Great, Katherine A., Sadie Mac, Grace Bond, Miss Adbell and Lightsome. With these facts before him, the single brood mare owner can hardly hesitate to patronize a rich futurity on the score of the smallness of his chances for a starter in the race nor of raising the winner.

Mr. J. A. Jones, of Springbrook, Oregon, has purchased the brood mare Kitty Grace by Adirondack and will breed her to his McKinney stallion Captain Jones. Kitty Grace is the dam of Oliver J., a green prospect.

Kenneth C. 2:17 as a three-year-old, is being picked as another 2:10 trotter for McKinney. The ease with which he took his record last year showed conclusively that he was one of the best three-year-olds in the country. As his dam has produced three with records from 2:08½ to 2:20¼, Kenneth C. is bred for a sire, and will make a successful one with ordinary opportunities.

Hamline has a \$5,000 purse for 2:13 pacers, one of the same value for 2:21 trotters, a \$2,500 purse for 2:30 pacers, and one of \$2,500 for 2:35 trotters. Eight \$1,000 purses are also offered. The meeting will be in September and the entries close Monday, July 2.

The runner in front will not be permitted any more in record breaking performances, which is hardly fair to the horses that will try to lower the records of Lou Dillon and Dan Patch.

The Charter Oak stake will be a \$10,000 event for 2:09 trotters.

March 18 is the date set for the beginning of the trotting meetings at Vienna, Austria.

S. S. Bailey of Seattle has purchased the fast pacing mare Vinnie Mann 2:11½ and will race her this year. Lute Lindsey has her in charge.

The Great Western Circuit is growing and bids fair to rival the Grand Circuit in purses and attendance within a very few years.

Richmond Chief 2:11¼, the fastest trotting stallion that ever took a record at fifteen years of age, is looking well this season, and is a great favorite at Bakersfield where he is owned by Mr. T. H. Fogarty. Out of fifteen or twenty colts by him owned in the vicinity of Bakersfield that have been broken, every one is a trotter, not one that is inclined to pace. Five two-year-olds by him started in a race at Bakersfield on Washington's Birthday and made a nice race. Mr. Fogarty owns a very handsome filly by him out of Athenian, the dam of Stanley Dillon 2:07½, that is hardly broken yet, but she can trot your eye out, and is a great prospect. All the get of Richmond Chief are live trotters and seem to enjoy racing and take to it naturally.

It is reported that the great Oregon State Fair has succumbed to the "skindicate" and that the privilege for the big fair of 1906 has been let. We hope the report is not true, but that auctions and mutuels will be the system of betting permitted, because if he "skindicate" system rules, the end of good racing at Salem will soon be in sight.

Captain John, the British Columbia green pacing sensation, will be trained at Yakima, Washington, this spring by John Millington. Captain John is by Tenbysonian, a California bred stallion, out of that fast mare Fannie Putnam 2:13 that Charlie Jeffries campaigned a few years ago.

James W. Marshall of Dixon has shipped the mare Sophia by Robert McGregor 2:17¼, dam Ora Wood by Wildwood 141, second dam Lady Uterback by Mambrino Patchen Jr., to Nutwood Stock Farm to be bred to Nutwood Wilkes. Sophia is the dam of Coronet (3) 2:27½, and of Domino, the whirlwind pacer that stepped a half at Cleveland in 1:03½ and was sold for \$3400. In the same car was shipped a mare by Nutwood Wilkes, dam Abbie Woodnut, dam of Danwood 2:11, etc. to be bred to Zolock 2:05¼. This mare is owned by Mr. E. Murphy of Dixon. Mr. Marshall will send to Zolock this year one of the hand-somest mares in the country. She is by Domino 2:11½, brother to Don Derby 2:01¼, Diablo 2:09¼, etc., first dam Mamie Comet, dam of Comet Wilkes 2:21, and Macleay (2) 2:22¼, by Nutwood 600, second dam Black Betty by Sportsman, son of Eastern David Hill third dam by St. Clair, sire dam of Manzanita 2:16, etc. As has been heretofore stated Mr. Marshall has booked Trux, dam of Mona Wilkes (3) 2:11¼, by Nutwood Wilkes, to Star Pointer, and he states that if he only owned two more good mares that he could book to Bonnie Direct 2:05¼ and Zombro 2:11 he would be satisfied.

Those who were at Pleasanton track last Monday and saw Geo. A. Kelly working his trotting stallion, Bonnie McK., by McKinney, were loud in their praise of the way this young trotting stallion came through the stretch at the end of his miles, and predictions were freely made that if there is a green 2:10 trotter in California this horse is "it." No more perfectly gaited one was ever seen on a race track.

Mr. Frank J. Kilpatrick, of 35 Wall street, New York, who now has business connections in San Francisco, and spends considerable of his time here, is an enthusiastic road driver, and greatly enjoys our Park and ocean drives. Last fall he purchased the fast pacing mare, Virginia 2:09½, by Bob Mason, to drive on the road and speedway. Two weeks ago Virginia shipped a foal by Zolock, greatly to Mr. Kilpatrick's surprise and chagrin, as he did not know she had been bred and would not have purchased her if he had known it as he wanted her exclusively for fast road driving. Luckily the mare is all right and will soon be ready to show her speed when taken out. Mr. Kilpatrick has long been a prominent driver on the New York speedway and has enjoyed many brushes there with owners of fast trotters and pacers.

A dispatch from Williamsport, Pa., dated February 20th states that the noted pool seller Frank Herdle, died at his home there aged 63 years.

According to reports from the East, novel conditions will govern the Charter Oak stake at Hartford this year. It will be open to horses in the 2:09 class, and will consist of three heats, with an equal division of the money in each heat. For horses having records of 2:10 or faster the entrance fee will be 5 per cent. For those with slower records there will be a graduated entrance fee, running down as low as 1 per cent for the 2:30 class. The plan is similar in principle to the classification method in running races, where the handicap is supposed to equalize the chances of all contestants, regardless of natural form, the difference being, however, that in Mr. Welsh's plan a nominator is not required to pay more than his chances are considered worth. The idea is certainly a novel one and likely to prove popular with nominators at least.

A prominent breeder has said that advertising cuts the same figure in the success of a stallion owner as it does in that of a dry goods merchant, although a lot of stallion owners appear not to recognize the fact. The men who are on the lookout for stallions to patronize are, as a rule, close readers of the advertising columns of the turf papers. A sire may be of exceeding merit, but if his owner neglects to inform the public of his whereabouts and his claims to patronage, he is not likely to receive a large number of mares from the public. The stallions which get the pick of the mares owned by men who keep no stallion of their own are those controlled by men who recognize the value of publicity. This statement will be found to be true by anybody who will take the trouble to investigate it. In business advertising is a greater factor to be reckoned with than any other one thing, and the owner of such a stallion who does not recognize this will deprive him of taking the place he deserves among the sires of his time.—Kentucky Stock Farm.

DRAFT HORSES IN OREGON.

Five thousand draft horses have been shipped out of Eastern Oregon during the last twelve months, at prices ranging from \$70 to \$100 per head, is the estimate of a horse buyer in the city to-day, says the Oregonian.

The scarcity of good work horses is now being felt in all the farming districts of the Northwest, he declares, and it is necessary for somebody to begin growing horses to supply the home demand or it will be necessary for horses to be imported from the Central States for use on inland empire farms.

Of these 5000 horses gathered from the ranges of Eastern Oregon, it is estimated that two-thirds of them have gone to the cities of the Northwest, including Tacoma, Seattle, Portland and Spokane, to be used in heavy trucking and street work, and the remainder have gone in the farming districts where horse power is still used almost exclusively in place of steam.

Few raisers are now devoting their time to raising the regular draft breeds and there is a better opportunity to begin in this line in Eastern Oregon right now than ever before. The extensive purchases of heavy horses in Pendleton proves that many are now awake to the situation and that within a few years the supply for this section will again be equal to the demand.

MAKING HORSES INVISIBLE.

A special military commission is now sitting in Berlin considering the best means of making cavalry as invisible as possible in warfare. Harmonizing men's uniforms with natural conditions as much as possible is not enough, and the commission is now discussing the advisability of dyeing the horses or screening them with light canvas trappings.

An Express representative who made inquiries at the war office yesterday was told that several experiments had been made in this direction during the war in South Africa. One official said:

"Many horses were dyed, but it was found that the dye soon washed off all except gray horses. Several vegetable dyes and Condy's Fluid diluted were used, but the experiments proved of little value. Canvas trappings make the horses perspire and impede their movements, and besides, when the sun is behind the cavalry the horses' legs can be seen through the canvas.

"The best screen for cavalry used in South Africa was a combination of various heather-like shrubs, picked up on the veldt. These plants were in many cases strung upwards and downwards from the trappings, and gave the appearance, when cavalry were moving slowly across the skyline, of waving vegetation."—London Express.

THE READVILLE STAKES.

The New England Trotting Horse Breeders' Association has opened the following stakes, which will be decided on the three heat plan, every heat a race:

The Blue Hill, 2:30 class, trotting; \$4,500; divided \$1,050 to first, \$300 to second, \$150 to third, each heat. The Massachusetts, 2:14 class, trotting; \$9,000; divided \$2,100 to first, \$600 to second, \$300 to third, each heat.

The Ponkapong, 2:10 class, trotting; \$4,500; divided \$1,050 to first, \$300 to second, \$150 to third, each heat. Readville, 2:08 class, trotting; \$3,000; divided \$700 to first, \$200 to second, \$100 to third, each heat.

The Norfolk, 2:08 class, pacing; \$3,000; divided \$700 to first, \$200 to second, \$100 to third, each heat.

The Neponset, 2:06 class, pacing; \$3,000; divided \$700 to first, \$200 to second, \$100 to third, each heat.

The entrance fee will be 5 per cent of the purse, with nothing deducted from the winners of any part of the purse.

A GOOD DAY AT BAKERSFIELD.

The Bakersfield Driving Club held an afternoon of excellent racing on Washington's Birthday, which brought out a large attendance, over fourteen hundred paid admissions being taken at the gate. The weather was unfavorable, as it rained several times during the day, and the track was from ten to fifteen seconds slow, but as the racing was announced to come off rain or shine, everything came off according to program and all were well pleased.

The racing committee was made up of the following gentlemen: T. H. Fogarty, H. W. Klipstein Jr., Thos. O'Brien, Wm. Lutz, M. A. Lindburg, Wm. Baker and P. Klipstein.

Mr. J. W. P. Laird acted as presiding judge, with F. M. Schofield and Rowan Irwin as assistants. The timekeepers were M. A. Lindburg and Geo. Tilton. W. H. Thomas acceptably filled the position of starter and announcer and H. W. Klipstein Jr. was an excellent track marshal. The results of the races were as follows:

Three-year-old trot:

Blue Dick, bl. r. g. by Richmond Chief ..(Yancey) 1
Reginald, b. c. by L. W. Russell.....(Fogarty) 2
Bessie Wilkes, ch. f. by Hamb. Wilkes (Bevin) 3
Time—2:40 1/2.

Two-year-old trot for the get of Richmond Chief 2:11 1/4:

Doctor C. b. c.....(Baker) 1
Queen, b. f.(Lamb) 2
Topsy, blk. f.(Carson) 3
Valentine, br. f.(Gunther) 4
Jack, rn. g.(Attridge) 5
Time—3:20.

Trotting, 3:00 class:

Fly, b. f. by Almont Lightning.....(Kiger) 1
Richmond, gr. g. by Richmond Chief....(Fogarty) 2
Sport, br. g. by Del Paso.....(Granger) 3
Vernon, b. s. by Del Paso.....(Baker) 4
Time—2:53 1/2.

Trot or pace, 2:30 class:

Maud, ch. by Herald.....(Klipstein) 1
Johnny the Swede, ch. g. by Gossiper ..(Flickinger) 2
Annie Rooney, ch. m. by Happy Prince..(Colwell) 3
Time—2:35.

Trot or pace, 2:40 class:

Lady McGregor, b. m. by McGregor.....(Lamb) 1
Blue Ribbon Dick, ch. g. by Corbett Wilkes(Wilson) 2
Dick, b. g.(Hughes) 2
Time—2:50 1/2.

Pace, free for all, half mile dash:

Richard B. by Woolsey..... 1
Ferndale by Longworth 2
Time—1:12.

Running Events.

Quarter mile dash—Stockings won, Bay Dick second, Sandow third, Flier fourth. Time, 0:27.

Three-eighths mile dash—J. W. James won, Gen. Lee second. Time, 0:40 1/2.

Quarter mile dash—The Virginian won, J. W. James second, Gen. Lee third. Time, 0:28.

One mile, over seven hurdles.

Blue Ridge won, Flying Bill second, Stockings third. Time, 2:05.

LOS ANGELES MATINEE RACING.

Members of the Los Angeles Driving Club were the hosts at a matinee Washington's birthday at Agricultural Park. In spite of the recent rains the track was in good condition, and the sport was excellent.

The first heat of the second race furnished the thrills for that race. Curtis Colyear's Proctor was the favorite, but in the get-away B. H. Smith, driving Harry H. Jr. collided with H. J. Myers' Gladys M. The sulkies scratched twice before the tangle was straightened out.

Proctor had to be pulled up short to avoid a bad smashup, and Zollie, a handsome black mare driven by Mr. B. Mosher, went away in the lead, took the pole and came in easily. Proctor took the lead of the second section as soon as the tangle was straightened out, but the damage was done and he had no chance to win.

The results of the matinee were:

Pacing, 2:25 class.

Seigfried, b. f., F. B. Long owner..... 1 1
Laura G., b. m., George L. Pierce, owner..... 2 2
Time—2:27, 2:42 1/2.

Pacing, 2:20 class.

Zollie, bl. m., M. B. Mosher, owner..... 1 1
Gladys M., H. J. Myers, owner..... 3 3
Harry H. Jr., B. K. Smith, owner..... 4 2
Proctor, ch. g., Curtis Colyear, owner..... 2 4
Time—2:27 1/2, 2:21.

Pacing, 2:15 class.

Lohengrin, b. g., Dr. Dodge, owner..... 1 2 1
Conners, b. g., Geo. A. Pounder, owner..... 2 1 2
Time—2:20 1/2, 2:19 1/2, 2:21.

Trotting, 2:20 class.

Abe Miller, M. B. Mosher, owner..... 2 1 1
Zombretta, L. J. Christopher, owner..... 1 2 2
Time—2:22 1/2, 2:21 1/2, 2:26.

GOOD STAKES AT BOZEMAN.

Bozeman, Feb. 26, 1906.

The officers of the Interstate Fair Association have met and fixed the purses for the early closing stakes for the Gallatin county fair, which will be held here from September 17 to 22, inclusive. R. D. Steele is president of the association and Justin M. Smith is secretary. Following is a list of the stakes and the requirements:

Interstate fair stake, for \$2,000; 2:30 trotters, \$1,000; 2:25 pacers, \$1,000. The entries for these stakes close March 11 and the entrance fee is payable as follows: \$10, March 15; \$10, April 15; \$10, May 15; \$10, June

15; and \$10, July 15, when horse must be named. Five per cent from money winners. Money divided 50, 25, 15 and 10 per cent of the division of the stake; no race longer than five heats. The association reserves the right to declare off and return all payments made on or before July 15, provided any of the divisions of the stakes have not filled satisfactorily. A horse distancing the field shall be entitled to first and fourth money only, and in no other case shall a horse be entitled to more than one money. Rules of the American Trotting Association, of which this association is a member, to govern, except hobbles not barred on pacers over three years old.

Bozeman stake, \$1,000; trotters, \$500; pacers, \$500—Early closing stakes for foals of 1904 to be raced for in their two-year-old form, and the entrance fees are payable on the dates given above, except that it is \$5 a payment instead of \$10. Two out of three heats and the money divided as above. The association reserves the right to declare two starters a "walkover" and to divide the money 66 2/3 and 33 1/3 per cent. A horse distancing the field will be entitled to first and fourth money only and in no other case shall a horse be entitled to more than one money; hobbles barred.

Gallatin Valley stake, 2:40 class, \$1,000; trotters, 2:40 class, \$500; pacers, 2:40 class, \$500—Early closing stakes for foals of 1903 to be raced for in their three-year-old form. Conditions same as the Bozeman stake. Rules of American Trotting Association to govern in both the Bozeman and Gallatin Valley stakes, except hobbles barred.

Running, Bozeman Derby, 1 1/2 miles, purse \$500—Entries close April 15; entrance fee payable \$5 April 15 and on the 15th of May, June, July and August, when horse must be named. Ten pounds below scale; money divided 70, 20 and 10 per cent. Five per cent from money winners.

The officers of the association intend to make this year one of the best in the history of the fair and recently they increased the capital stock of the fair association from \$10,000 to \$25,000, and the number of directors from 9 to 13.

WANTS OTHERS TO HAVE THE SAME CHANCE.

Breeder and Sportsman—Gentlemen: I have just read the new rule adopted by the National Congress in regard to the pacemakers in time trials. This is a surprising decision to me, as it virtually places Lou Dillon and Dan Patch where they cannot be reached for many years to come. This does not seem a fair deal for other horse owners and on the face of things it looks to the general public as if Mr. Billings and I were jointly interested in building a fence around the records of our horses. I dislike very much to be placed in any such light, as I believe every horse should have an equal chance in time records as well as in racing.

When a horse comes to the front that is able to beat Dan Patch, I certainly think he ought to have exactly the same conditions enjoyed by Dan, and surely Mr. Billings would take the same fair position.

I do not know the true grounds for this new rule, but I do know that I like to see what is for the best interests of the general horse raising business. I cannot see how such interests will be benefited by shutting out other horse owners from an equal chance in lowering the paced records of Lou Dillon and Dan Patch, which have attracted more attention from the general buying public than anything that has happened for years. It is generally admitted that these two records have been of tremendous value to the horse breeding interests. These exhibition miles with pacemakers are all marked in the year book, so that they cannot cause any confusion. If we want to keep up the interest of the general public, we must give other horses a fair chance to lower the present trotting record of 1:58 1/2 and pacing record of 1:55 1/4. They should be lowered some day, and when the horses appear that are capable of doing the trick, I stand for them having the same chance as the present holders of these records.

As far as I am concerned I do not like to have the impression go over the country that Dan Patch needs a fence around his record to keep some other horse from winning the crown. In view of these facts, I want to go on record as not in favor of this new rule. I believe it will be detrimental to the renewed interest that is now being taken in the harness horses. To keep him properly before the public he must do great things. Breaking records keeps people interested and makes more buyers and breeders. Preventing the breaking of records, by putting up an almost impassable fence, will prove injurious to the horse business.

Yours very truly,

M. W. SAVAGE.

SIDNEY DILLON'S MEASUREMENTS.

Marque of the Horse Review recently put the tape line on Sterling R. Holt's stallion, Sidney Dillon, with the following results:

	Inches
Height at withers.....	59 1/2
Height at coupling.....	60
Length from point of shoulder to swell of quarter.....	63 1/2
Total length from poll to roots of tail.....	76 1/2
Length of head from poll to tip of muzzle.....	28 3/4
Length of neck from poll to notch in vertebra, at withers.....	30
Length of foreleg from point of elbow to ground.....	37
Length of front cannon from center of knee to center of ankle.....	12 1/2
Circumference of forearm at swell.....	16 1/2
Length from point of hip to point of neck.....	39 1/4
Length from point of hock to ground.....	24
Width of hips, point to point.....	22 1/2
Girth at heart.....	72
Girth at waist.....	72 1/2

BRED FOR A GREAT SIRE.

One of the neatest and most attractive stallion announcements issued this year has just been sent out from this office for Capt. C. H. Williams, owner of the McKinney-Director-Nutwood stallion, Unimak 40936. A half-tone engraving made from a recent photograph of this horse graces the front page of the Breeder and Sportsman this week. Unimak will make the season of 1906 at Capt. Williams' farm at Palo Alto, Cal., at the very reasonable fee of \$40. Breeders who are looking for sires that have strong individuality, natural speed, and are bred in the strongest producing lines, should not overlook Unimak. Our readers are more or less familiar with Unimak, through his being advertised in these columns, but we advise everyone who would like to have the horse's pedigree in tabulated form, together with a list of statistical facts in regard to his ancestors to send to Capt. Williams for one of these neat pamphlets.

One of the most successful men who has engaged in the breeding of trotters in recent years is Mr. Sterling R. Holt, of Indianapolis. Mr. Holt was the purchaser of Sidney Dillon at the New York auction when the sire of the champion trotter was sold, and the first year paid for the horse in service fees. This year Sidney Dillon's fee was increased, yet mares will be turned away. Mr. Holt is a man of business acumen and an excellent judge of a horse, consequently when it is stated that three years ago he visited California and purchased from Chas. Durfee an own brother of Unimak, that has since trotted in 2:16 1/4, and will be raced this year, breeders will realize that Mr. Holt considered the breeding about top notch for a McKinney. The combination of McKinney, Director and Nutwood blood cannot be improved on. The first two mentioned stallions were great race winning sires, and Nutwood is the greatest sire that ever lived, when the number of his get with standard record (174) is taken into consideration, along with the further facts that 977 of his sons are producers of standard speed and his daughters have produced 268 with standard records.

Unimak is a big, fine, bold-going trotter, intensely masculine and with 2:20 speed at the present time. He is now a four-year-old, but the Captain says he will not be trained for a low record until he is five, although he is given some work every year, and has always shown more speed than was expected of him. When he is five years old he will be given every opportunity to show the speed that is surely in him, and 2:10 will be within his reach, as he can show two-minute speed now. Unimak will be given but a limited number of mares and those desiring to breed their mares to him should book them early.

LOS ANGELES HORSE SHOW ASSOCIATION.

Articles of incorporation of the Los Angeles Horse Show Association have been filed. The organization includes over sixty well known residents of the Southern California metropolis who are subscribers to the capital stock of the company, which is placed at \$5,000, divided into 500 shares of \$10 each.

The Board of Directors for the first year are Walter S. Newhall, Byron Erckenbrecher, Col. John H. Norton, Ferd K. Rule, Howard G. Bundrem, A. E. Ashbrook, John G. Mott, Dr. M. L. Moore and W. J. Doran. The association will have offices at 311 Laughlin building.

Among those who have subscribed to the capital stock are representatives from all of the prominent towns of Southern California.

Secretary Ashbrook is preparing a list of prizes, which will be issued within a few days. The first show will be held in one of the parks near the city during the early part of April. All intending exhibitors are requested to communicate at once with the secretary, so that he may have this information before publishing his prize lists, which it is expected will include all classes from a Shetland to a four-in-hand team.

WHICH WAS THE WINNER.

Charley Scott, the well known horseman and farmer of St. Helena, Napa county, recently found the following document among some old papers that have been in his possession for many years:

Napa City, Sept. 16th, 1864.

This is to certify that Lewis E. Rowley and William Hoyt agree to trot a match race, three in five, to harness and to rule. The race is as follows: Rowley agrees on the first part, to trot Nathan Coombs' buggy horse known as Barb, against Hoyt's of the second part, horse of Charley Carter's known as Paddy Whacker, to be trotted on the 14th day of October, 1864, for one hundred dollars a side, half forfeit, the rest to be put up on the morning of the race. To be trotted on Nathan Coombs' private track in Napa county.

LEWIS E. ROWLEY.

WILLIAM HOYT.

Mr. Scott says the above agreement has been in his possession for a long time, and whenever he has run across it, he has wondered which horse won. We would not be surprised if our old friend and subscriber, Mr. Geo. Bement, of Melrose, could remember how the race terminated.

The polo and pony racing tournament which opened at Coronado this week promises to be the best event of the kind ever held in California. Over one hundred ponies were on the ground on the opening day, and the races which begin to-day are all well filled. Fred H. Chase of this city went down to operate the mutual machines for the club, the only means of betting permitted.

Sober up on Jackson's Napa Soda.

HOOF BEATS.

The Breeders' Association will hold a race meeting at Fresno this year. Every meeting held by this association at Fresno has been successful and this season's meeting will be no exception. The meeting will follow soon after the one at Los Angeles.

The Australian trotting champion Fritz 2:13 is now fifteen years old and has been taken to New Zealand to race. While he is not as fast as in his younger days, Fritz can show a mile below 2:20 very handily.

There is advertised for sale in this issue a bay mare three-years-old that should attract the attention of buyers. This mare is by William Harold 2:13½, son of Sidney, and is out of a mare by Direct 2:05½, second dam Dusk, dam of Fallacy 2:17½ by Mambrino Wilkes, third dam Centennial Belle, dam of Clipper 2:06, by thoroughbred Woodburn, fourth dam Bonnie Belle by Williamson's Belmont, fifth dam by Givens by imp. Langford. No more richly bred filly can be found in California and as she is stylish and a good looker, and can trot a 2:35 gait any day on the road without any training or rigging, she is a great prospect. The price asked for her—\$200—is not one-third of what she is worth.

A meeting of horsemen was held at Sacramento last Tuesday evening, the object being to organize a gentleman's driving club, to be known as the Fort Sutter Driving Club. The meeting was in every way successful and great unanimity was shown by those present. W. V. Pierce was elected temporary chairman and he appointed the following committee to interview horsemen who are likely to join, as well as those who have signified their willingness to become members; A. W. Morrison, John Riley, Ray Dittus and J. P. Callendine. The committee will meet again next Monday at a place to be shortly announced.

The Exeter Stock Breeders' Association held a meeting at Exeter Monday evening and a code of by-laws was drawn up and other business transacted. The following officers were elected: President, G. W. Kirkman; vice-president, C. E. Mackey; secretary, C. E. Balaam; treasurer, Bank of Exeter. The object of the association is for stock breeding purposes, but annual race meets will be held.

Nearly all the horsemen living in Colusa, Sutter, Yuba, Glenn and Butte counties are getting horses ready for the meeting to be given by Mr. E. C. Peart at the Colusa track, April 22d.

The trotting mare Lady Knapp, which was used as the instrument whereby George Whitney, a well known Western reinsman, practiced a series of wholesale frauds upon trotting associations in all sections of the country, has been located in Lincoln, Nebraska. A. C. Pennock of Cleveland, Ohio, who has been investigating at the instigation of the American Trotting Association, positively identified Lady Knapp the other day as the same animal which in 1904 won two races in the 2:15 class in the East under the name of Mildred. A Lincoln capitalist and horse enthusiast, C. L. Hooper, purchased the mare a year ago for breeding purposes. He will make no effort to resist the animal's expulsion by the trotting association.

There is much talk around Pleasanton track of a little pacer by Gossiper that M. Henry is working. The writer saw Mr. Henry drive the youngster through the stretch last Monday and the reason for the speed conversation about him was evident. A sweeter gaited one was never hooked up and he moves easily and gracefully and seems to enjoy it. He'll be a race horse sure.

Zolock 2:05¼ is getting some very high class mares at Pleasanton. Although the breeding season has not fairly begun, Zolock's book is rapidly filling with the names of some of the best mares in the country. Zolock takes much of his exercise on the trot, and a nicer gaited horse at this gait one rarely sees. If he were trained and raced as a trotter he should get a very low record.

Geo. A. Davis of Pleasanton has booked three mares to Bon Voyage 2:12¾, one of them the famous mare Sidlette by Sidney. James Coffin of this city has booked two mares to the same horse, and Fred Davis has booked two McKinney mares. Henry Hahn of this city and several others have also sent mares to this young stallion. Mr. Chas. Griffith, owner of Bonnie Direct 2:05¼, contemplates sending a Bonnie Direct filly to the court of Bon Voyage. Mr. I. L. Borden will send one of his best mares to Mr. Clark's stallion. Ted Hayes, who has charge of all Mr. Clark's horses at Pleasanton, is called upon many times during the week to have Bon Voyage led out.

It is reported that Mr. A. W. Bruner of Los Angeles has resigned his position as secretary of the Los Angeles Driving Club and associated himself with Dr. Carver in the Chutes Park attraction at the southern metropolis.

Mr. E. C. Chase of 123 Taylor street, this city, has a Monterey colt in the hands of trainer Williams at Alameda that is one of the best gaited and most promising young trotters in that neighborhood. Mr. Chase is having him trained with the idea of racing him later on.

The Pleasanton horsemen will hold an afternoon of racing on Saturday, the 17th inst. Three or four races will be held and a good day's sport is assured. The entries and further particulars will be announced next week.

Kenney, the blkeman, received day before yesterday four brand new latest model McMurray long shaft, low seat, speed carts. One is a royal blue, another orange yellow, and two carmine in color. Get out to his place at 531 Valencia street as early the possible if you want your pick of the four, as they will not be there many days.

We advise every reader of the Breeder and Sportsman who contemplates entering upon the breeding of coach and carriage horses, to read the very interesting and able address delivered by Mr. Geo. M. Rommel of the U. S. Department of Agriculture at Lincoln, Nebraska, recently. It will be found on the 8th page of this issue.

Thos. Kell of 95 South Market street, San Jose, offers to lease for next season the two producing mares, Babe, dam of Just It 2:19½, winner of the Occident-Stanford Pace, and Fanny Menlo, the dam of Claudius 2:13½. Both mares are now in foal to J. R. C. See advertisement.

Rose McKinney, the dam of Alameda 2:22¼, has been registered as standard under rule 3 by the American Trotting Register Association. Her son Frank Covey by Mendocino, owned by Dr. DaFoe of San Jose has also been registered under rule 1, with the number 46,200.

A pleasant episode occurred in this city last Sunday when Mr. Laud C. Gates, the well known farmer and horse owner of Modesto, was united in marriage to Miss Ena, daughter of Mr. and Mrs. J. W. Zibbell, of this city. The happy couple will have the best wishes of a host of friends and admirers.

Fred Chadbourne, of the firm of Sutherland & Chadbourne, Pleasanton, has been working the two-year-old filly Bernice by Owyhee 2:11, out of Bertha, dam of Don Derby 2:04¼, Diablo 2:09¼, etc., for L. C. Crellin, for some time this winter, and two weeks ago the firm became so enamored of the handsome and fast filly that an offer was made Mr. Crellin for her, which offer was accepted. Bernice is one of the finest prospects in the training school, and in addition should be one of the greatest of brood mares when her racing days are over. We understand \$1600 was the figure at which she changed hands. We expect to see Fred ride a fast mile behind her some day.

HOW DOBLE PRACTICED HYDROPATHY.

In all probability Budd Doble was the originator of the swimming system of training a trotter. In 1871 he had the trotter Hotspur in his string and had him entered in a \$6000 stake to be trotted at Buffalo. Ten per cent was the entrance money in those days, and when in his early training Hotspur went wrong in one of his hind legs Mr. Doble stopped work on him and nursed the lame leg very carefully in hopes to effect a cure and save that money if possible. After a while the filling went out of the leg and Hotspur was started up again, but in a few days the leg again fevered up and the horse showed lameness. Doble was training him at the old Fashion course at Long Island, and one day conceived the idea of swimming the horse in the salt waters of Flushing Bay, which was close at hand. He hired a man with a rowboat and took to the beach rub-rags, scrapers, body wash and everything generally used in those days in cooling out and caring for a horse after a heat. Taking a seat in the stern of the boat, and holding Hotspur's halter in his hand, he ordered the boatman to row about the bay. Hotspur took to water like a duck and Doble watched him closely to see how his wind held out in the effort of swimming. When the horse gave evidence of tiring he would take him ashore, and the swipes would get to work on him just as though he had worked out a fast mile. This was kept up several weeks, the swims increasing in length, and Hotspur's entire training was given him to halter from the seat of the boat. His leg rapidly improved and the horse never trotted a step on a track or a road until the day of the race, which was on August 10th. There were four other starters, Myron Perry, Thos. Jefferson, Pilot Temple and Byron. The last named won the first heat in 2:25½, but Hotspur took the next three and the race in 2:25, 2:25½ and 2:25. His leg did not bother him in the least and he trotted as good a race as he ever did in his life. This was probably the first time a horse was ever trained as a swimmer to win a trotting race, but the system has been advocated many times since as effective with "dickie" horses.

A PROFITABLE STALLION TO PATRONIZE.

During the few years that the get of Seymour Wilkes 2:08½ have been old enough to place on the market, it has been a very common remark among dealers that there has never been one that could not be sold at a good profit as soon as it was three years old. They are all such large, well turned, stylish roadsters, either bays or browns, and with such cool heads and good manners, that buyers want them as soon as they are offered for sale. Seymour Wilkes is himself one of the handiest stallions in the State, and was one of the gamest race horses that ever went through the California circuit. He weighs 1200 pounds, stands 16 hands, and is a very symmetrical horse. His service fee has been placed at \$30 which is exceedingly low for a horse of his class. There are a number of the get of Seymour Wilkes owned in San Francisco, which his owner, Mr. J. W. Gregory of the St. George Stables, 408 Bush street, will be pleased to show prospective buyers. Seymour Wilkes will make the season at Lakeville, Sonoma county, in charge of Thos. Roche, who can be addressed for further particulars.

CALIFORNIA HORSES IN AUSTRALIA.

From a copy of the Australasian received by the last steamer, we take the following account of The Ranch, a trotting horse breeding establishment maintained by Mr. W. B. Veirs, an American gentleman now engaged in business in Melbourne:

Outside the studs of thoroughbreds there are a few light-horse breeding establishments in Victoria, and of these the most interesting one that I know of is that maintained by Mr. W. B. Veirs, at the Ranch, on Moonee Ponds Creek, near Glenroy railway station. I know of no pleasanter outing from Melbourne than an afternoon spent in the fields at the Ranch, looking at the trotting dames and their foals. The stallions kept at the Ranch are Digitals (imported), a well-known prize taker at most of our leading shows. He is a bay horse, standing 15.3, with plenty of substance and a record of 2:25½. He was sired by Daly, a good performer, and a sire of good performers. His grandsire was General Benton, a famous sire in the States, and his dam was Cygnet. In the third line in his pedigree the four horses and four mares all distinguished themselves at the stud. Dixie Alto (foaled March 24, 1900), imported by Mr. Veirs, has a splendid pedigree; scarcely a name is mentioned but what is of the very highest class. Among the sires are Electioneer (125), Palo Alto (5353), Piedmont (904), Electioneer (125), and Nutwood (600) in the third line. The most noted of the female names in this pedigree are Green Mountain Maid (twice) Miss Russell, and Dame Winnie (thoroughbred), dam of Palo Alto. Dixie Alto is a handsome horse, of a bright bay color, and has much the appearance of a thoroughbred. Another stallion is Governor Tracy, bred by Mr. John Grigg, of Longbeach, N. Z. He is of a rich bay color, stands 15.3, and is strongly built. He comes of a great trotting family, his pedigree combining the strains of Hambletonian, Red Wilkes, Mambrino Chief, and Pilot. He is half-brother to General Tracy, one of the fastest trotting horses in Australia. Of the brood mares, I like Diana Rose the best. She is a perfect harness mare, of good size, excellent shape, action that leaves nothing to be desired, great pace, an admirable disposition, and perfect manners. She is by Daly, the sire of Digitals, her dam Baby Buttons, by Alexander Button, second dam Lady Buttons, by Alexander, one of the best strains of trotting horses in America. Another imported mare is Mary Daly, sister to Digitals. She was a performer of the highest class. Two other imported mares are Coney Island and Santa Rosa. Molly Whips is from Mary Daly by Willie Whips, who was selected in America by Mr. Veirs for Messrs. Hunter Bros., Burnewangpark. The Whips family are highly thought of in America, and are inbred to Electioneer (125), whose record at the stud is of the very highest. The imported mares have all been put to Dixie Alto, and their foals are very promising. A mare that would attract attention in any company is Winona (imported), the property of Mr. A. S. Patterson, and selected for him by Mr. Veirs. She is a sister to Digitals, and has a splendid foal at foot by Dixie Alto. Among the Australian-bred mares are several good performers; they are mostly of fair size, good bone, and well shaped. Altogether there are about thirty brood mares belonging to Mr. Veirs on the Ranch. Most of the young stock are at present on a property Mr. Veirs has on the Goulburn. Lately he has imported a full sister to Diana Rose, which in every respect closely resembles her beautiful relative. The Ranch and the stud are left entirely under the management of Mr. Alec Robertson.

A SIRE OF SPEED AND GOOD LOOKS.

The announcement of the Guy Wilkes stallion Lynwood W. 32853, two-year-old trotting record 2:20, appears in this issue. This horse will make the season of 1906 at Santa Rosa where he has been kept for several years past, and where he is one of the most popular of stallions. Lynwood W. is one of the fastest natural trotters ever bred in California, is a very handsome horse, and is siring speed, good looks and size with great uniformity. He never covered but eight standard mares prior to 1905, but he has to his credit Dumont S. 2:20, Clipper W. 2:24¼, Sonoma Queen 2:25 and Sonoma May 2:29¼, all trotters. Charley Belden, the most sensational green trotter in the State, is by him, and is showing 2:12 speed at Pleasanton. Sonoma Girl, trial 2:15, with a last quarter in 30 seconds, is another of his produce and many others that have shown extreme speed. Lynwood W. is out of the producing mare Lindale by Sultan Jr., second dam Flora Pierson 2:33 by Gen. McClellan 144, third dam by Langford, son of Williamson's Belmont. At the low fee of \$25 asked for the services of Lynwood W., he is one of the best stallions to breed to in California and owners of good mares will find it profitable to send them to him at Santa Rosa. For further particulars address H. A. Carlton, Santa Rosa.

STAKE WINNER IN THE STUD.

Mr. M. L. Lusk of Sacramento has leased the handsome colt trotter and stake winner, Almaden 2:22¼, by Direct 2:05½, dam by McKinney 2:11¼, and will keep him at the new Agricultural Park, Sacramento, for the season of 1906. Almaden is now five years old and is not only one of the best bred but one of the gamest and best gaited trotting stallions in California. He won the two-year-old division of the Pacific Breeders' Futurity in 1903, and the Occident Stake in 1904, the latter being a seven heat race and one of the closest contests ever seen at the State Fair. Almaden is a black horse of handsome proportions, and combines the blood of two of the greatest racing families, the Directors and the McKinneys.

THOROUGHBRED DEPARTMENT.

By Ralph H. Tozer.

Racing in California and in the Middle West must be conducted along different lines, or it will be legislated against, as in Missouri, Illinois, Wisconsin, Pennsylvania and other States. There has been too much catering to the bookmaker and the horse-owner in recent years, and old Mr. Vanderbilt's famous saying, "the public be d—d" has been thought to be about right by race track management, apparently. Because a bookmaker had on one or more books throughout a meeting was no reason he should do many suspicious things (the talk of race-goers), and never have an investigation of his doings. Because a man had a fine string of horses was no good reason why he should run his gallopers Z-fashion all season and never be called to task by the stewards, even though they ran first to-day and last yesterday, and were roundly cursed therefor by the burners of midnight oil, and admission-payers generally. Racing judges, in the absence of positive proof of fraud, should use their "thinkers" more and say to owners of "in-and-outers": "We do not know that you laid your horse up with a bookmaker yesterday and tried to win to-day, but we do know that your flyer is very inconsistent, and any further running of this sort will result in our at least refusing the entry of this particular Biblical runner." If officials don't call the owners of the zigzagers down and try to keep the racing clean the opponents of the sport will throw mud on it that will be hard to scrape off in the halls of legislation. In short, it is with the turf officials, in a large measure, whether winter racing shall live or die in this section. If they keep it clean, hewing to the line and letting the chips fall where they may, goring the recreant ox, no matter whose brand it bears, all in the interest of the people who pay the fiddler, it will thrive. If favorites are to be played and those favorites are allowed to run their horses as their selfish, snaky minds dictate, the fate of racing in Missouri, Illinois and other great States will be the fate of California racing.

Whether there be much whitewashing or not at Los Angeles, it is claimed that several official heads will be snickersneed. The water in a shallow creek never gets clearer through stirring up the soft mud at the bottom, and in many cases one does not often have to go deep before much black mud is encountered. Barney Schreiber seemed to have more sound sense than all the Los Angeles racing coterie combined. He knew what the mud-stirring did in Missouri, Illinois and other States, and he took train and hurried to Los Angeles to take the sticks away from the game-killers before they tore up the entire bottom of the creek and got down to hard pan. There was a pronounced "hush" soon after his arrival, a cessation of hostilities, but the fire was only smoldering, and when he left there was no one to throw water on the embers, and it broke out again.

"Cy" Mulkey was seventy-four years of age last Monday, and few men have been in "the game" longer than Mr. M. His career began in Missouri, his native State, with "quarter horses," in 1843, when eleven years of age. In 1847 he came across the plains from Missouri to Oregon, there being a few race horses in his folks' "outfit." In 1854 Mr. Mulkey cut quite a figure in Oregon racing and in 1860 brought to California a fast horse called Frenchman's Pony. Many years later he trained the renowned winners, Joe Howell (the "Iron horse" of his time) and the fleet mare Premium, and not so very many seasons ago conditioned for the racing fray the frequent winner Tim Murphy and the phenomenal Sinfax. As the trainer of the Palo Alto and A. B. Spreckels flyers the veteran reached the top of the ladder of fame as a conditioner of gallopers in this part of the world, and no trainer alive is as well known on this Coast as Cyrus Mulkey.

Dick Williams, satisfied that he would not be allowed to race in the far East undisturbed, decided to sell off his entire string of gallopers. Fireball and Alencon were sold last Monday to "Boots" Durnell. The former was held at \$6,000 not long since and it is probable that at least \$8,500 was realized for the pair of fleet ones. Williams owns a fine farm of 900 acres in Oklahoma, and in the last few years fully \$40,000, I am told, has been spent in improvements there, so that Richard is in no immediate danger.

The exodus from Los Angeles to Emeryville has begun. Recent arrivals are Bob Harris (with W. H. Carey, Lotta Gladstone and Mr. Budd), H. Walker (with Matador, Oasis, Hattie Crews, W. P. Palmer and Lucien), and ex-Jockey Charley Van Dusen with Hippocrates and one other. The stables of W. P. Maxwell (which includes Eugenia Burch) and J. F. Newman (including Don Domo), Denny Bros. and George Dodge are due to arrive any time now.

Ebony, a black horse by Hamilton II-Cricket, bred at Antioch, is about the best horse at Ascot over a distance of ground these days. Last Monday he ran a mile and fifty yards in 1:42½, easily, with 110 pounds up, the first mile being run in 1:39½. The black horse's entry was refused at Emeryville a season or so ago for inconsistent running, but he seems to have mended his ways.

In order to show that the Sains are a "staying" tribe, Barney Schreiber will start his three-year-old colt Nealon in the Thornton Stakes, at four miles, a race never won by a horse of this tender age.

Ed Gaylord, Denver's well-known racing man, last Thursday purchased Rubric and Lustig of Dick Wil-

liams. The first-named was held at \$4,000, it was understood, and should prove a "star" performer at the coming Overland Park meeting. Hector and Wee Lass were purchased of Williams by Hall & Marshall, and W. P. Magrane secured the excellent filly, Silver Sue. The return to the Williams farm in Oklahoma was begun last Thursday with the stallion Reservation and four brood mares, and the discredited turfman will probably confine himself to breeding racers in future.

Col. A. F. Walcott, a big figure in the Eastern turf world a few years ago, when of the firm of Walcott & Campbell, died in New York last Monday of heart disease.

It looks as if there could be race meetings given without interference in St. Louis county, Mo., for by a decision of the Supreme Court last Monday the St. Louis police are denied authority to act except in the confines of the city. Kinloch is in the county and part or all of the Delmar track is outside the city limits.

The famous race horse and sire, Longstreet, died last week.

The person who got through the rule in the American Turf Association allowing three pounds to apprentice riders in handicaps is to be admired for his determination if not for his good sense. I always thought handicaps were made to bring horses together at the finish, yet this rule would make it appear otherwise, and now it's hard to say what handicaps are for.

There ought to be a swift change made in the claiming race rules. They are mere farces now, with the owner of the third horse given the first claim. I believe any one in or out of "the game" ought to be allowed to claim a horse if he is willing to give the price set by the rules, and in case of more than one claim being made for a racer, the new owner should be decided by lot, the judges settling the matter, for they have more time than the clerk of the scales. This would prevent a large share of the fraudulent claiming (many times, perhaps, for a consideration) that one sees in these commercial days. Why should an "outsider" not have as much right to claim a horse he thought entered at too cheap a price as to run one up after it has won? These races, if run under the plan I have set forth, would be all right, but they are radically wrong under the present rules.

Mr. S. S. Eakle of Williams reports a bay filly foaled February 19th by Claude out of Mercelle by imp. Prince Rudolph, second dam imp. Wandilla. This is one of the few foals by Claude on this coast.

BEAUTIFYING THE FAIR GROUNDS.

(Sacramento Union.)

In preparation for the annual State Fair to be held next fall a score of workmen and a dozen teams yesterday commenced work in the new park. Graders and plows will be in operation for a month or more, it being deemed advisable to take advantage of the recent rains in performing the task outlined.

Despite the liberal use of the bolo by Governor Pardee, who vetoed many of the improvements recommended by the directors, it is stated that an economical use of the funds he is disposed to allow will enable the society to greatly beautify and improve the park by the beginning of the State Fair. It is proposed to grade and level all the unimproved territory lying between the Stockton road and the race course and barns. When this work is completed the entire area will be planted to grass and trees, in order that they may obtain as early a start as possible.

By this fall it is expected that the grounds on both sides of the entrance surrounding the grandstand, the cattle barns and all places where people congregate, will be green lawn. Arrangements have been made to procure from the Capitol Commission all the Bermuda grass roots unearthed in the thinning out the present growth in the park.

Scarcely a week passes without the arrival or a number of four-footed guests for the harness horse quarters. Over fifty head of trotting and pacing stock are now quartered at the track, and a fee of \$2 per month is paid by each owner. Because of the glowing accounts of the track that are circulated by horsemen, owners at a considerable distance are preparing to winter their animals here in the future.

ANSWERS TO CORRESPONDENTS.

W. G. L., Bakersfield.—There are trotting bred, pacing bred and thoroughbred mares by the name of Flora D. If you can give us a little more definite information as to the mare whose pedigree you want, we may be able to find it.

William Leach, Marysville.—The thoroughbred horse Red Buck was sired by Red Boy and his dam was Norma by Norwich, son of Lexington, second dam by Oregon Charlie. Red Boy was by War Dance out of Neilson by imported Sovereign.

J. G. Belt, D.D.S., Safford, Arizona.—Electioneer died December 3d, 1890. He was foaled May 2d, 1868.

R. L. B., Oakland.—Riflemen, sire of the gray gelding Col. Lewis 2:18½, was a thoroughbred horse. He was foaled in 1855, and was by imported Glencoe out of a mare by Rodolph.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

ATTEMPT TO CLOSE SAN JOSE TRACK.

(San Jose Mercury, Feb. 25.)

The tenants of Agricultural Park have been notified to vacate their quarters at once as L. E. Hanchett, the present owner of the property, will take full possession on April 1, and desires the Park to be free from occupants. The notices were issued from the offices of the San Jose and Santa Clara Street Railway Company and were signed by L. E. Hanchett and A. B. Southard. It is evidently the intention of the railroad people, to abolish the track and to cut the track into town lots in the near future. Although the horsemen had intimations that they would be compelled to leave, the notices came much sooner than they were expected and caused intense consternation.

It is now known for a certainty that the Agricultural Park race track will be abolished. There are now between 75 and 100 horses in training on the local course. They will be taken to the other tracks of the State. In the opinion of the San Jose horsemen, the closing of the Agricultural Park race track is one of the greatest calamities that has fallen to the turf for many years. San Jose is a favorite with fanciers as a winter resort for their stock, the location and climate being the best in the State.

The Agricultural Park tract contains between 84 and 86 acres. The Rose Carnival Pavilion and the base-ball park will not be touched. The racing course, training quarters and fair grounds, it is stated, will be immediately surveyed and cut into lots for an Alameda sub-division. L. E. Hanchett, the President of the San Jose and Santa Clara Street Railway Company, purchased the property some months ago from the Agricultural Association. He visited the property about three weeks ago and at that time hinted that it would be divided. A short time afterward a preliminary survey of the land was made. Since that time nothing has been done.

It was understood by Budd Doble that no action would be taken until July 1, at the very earliest. The horsemen have only about one month to remove their stock and property and will consequently be inconvenienced greatly. This is the only open training track in this part of the State. The trainers do not care particularly to go either to Santa Rosa or Fresno. The track at Pleasanton is crowded. Among the horsemen who are in San Jose at the present are the following: J. S. Phippen, 20 head; John Gordon, 10; John Groom, 8; P. W. Hodges, 12; Budd Doble, 8, besides Kinney Lou; Siljan, 6; Williams, 8; William Cecil, 3; O. L. Housley, 2; T. W. Barstow, 6; C. A. Durfee, 2. In addition to these there are many more horsemen with smaller strings.

H. R. Ward, who has had a number of pacers in training here, left yesterday for Pleasanton. Others will leave within a short time. The notices of removal were served to the men this morning by Deputy Constable Charles Marcen. They expressed considerable regret and do not want to leave at all. The San Jose race track is considered to be one of the safest and fastest in the State when it is in proper condition. Its closing will mean the dropping of San Jose from the circuit. Of the 75 horses that are now in training, all are in splendid condition, and for this reason mainly the horsemen object strenuously to leaving.

Some of the horsemen think that the change will not be made. Others understand that the track cannot be abolished. When the property was placed in the hands of the Santa Clara and San Mateo County Agricultural Association, it is said a clause was inserted in the transferal papers whereby the property reverted to the hands of the heirs if the race track was ever abolished or its disuse indefinitely continued.

CHALLENGES HEATHERBLOOM.

Heatherbloom's right to be called the champion high jumper, with a record of 7 feet and 8 inches, has been questioned by Mme. Marantette of Mendon, Mich., who owns the noted fencer St. Patrick. The Western horsewoman is out with a challenge to match the Michigan jumper against any horse in the world for \$1,000 a side, each of the owners to select a judge and the two judges so selected to choose a third. Mme. Marantette stipulates that the bars of the trial shall be placed at 6 feet 6 inches for the first jump and that each horse shall have five trials. The bars are then to be raised to 7 feet 10½ inches, and after that each owner may raise them as he sees fit for his own horse until the match is decided. She further specifies that each owner may hold the bars for himself, but they are to be strapped to the posts. D. H. Harris, the manager of St. Patrick, says that horse has jumped 7 feet 10½ inches in public and is now the champion.

DON'T WAIT FOR DISTEMPER.

The season is at hand when distemper, gripe, epizootic, colds, pinkeye and a variety of catarrhal ailments are apt to prevail among stock. When these diseases start, it may be too late to take preventive measures. In any case there will be loss and trouble that should if possible be avoided. It will pay to have the right remedy on hand ready for use when need arises. We believe our readers would be wise to provide themselves with some of "Dr. Craft's Distemper & Cough Cure," which is advertised in another column. This remedy has a record of many years back of it. It is sold under the agreement to refund the money if it ever fails. If any of our readers are not familiar with it, we suggest that they write at once to The Wells Medicine Co., 13 Third St., Lafayette, Ind., for a copy of their valuable pamphlet, "Veterinary Pointers."

The Terre Haute Trotting Association which has not given a meeting since its disastrous failures in 1901 and 1902, will give a meeting the coming summer, probably in July. It will not be in the grand circuit, but the week before Detroit is talked about.

GOVERNMENT HORSE BREEDING.

(Address by Geo. M. Rommel, U. S. Department of Agriculture, at Lincoln, Neb.)

The first work in horse breeding to be undertaken by the United States government was begun late in 1904 by the bureau of animal industry of the Department of Agriculture in co-operation with the Colorado experiment station. Foreign governments have been interested in horse breeding for many years, either actually engaging in the business or fostering the industry in a substantial way. In nearly all these cases, however, the remounting of armies has been the principal object of this work; in our own case breeding horses suitable for the army is merely an incidental consideration.

The immediate purpose of the American work is the evolution of a breed of American carriage horses from native material, the more remote but broader purpose the improvement of the general utility horse, and the ultimate one is raising the standard of the entire light horse stock of the country. By the first it is hoped that a remedy may be found for the present shortage in the supply of carriage horses and that the tendency of the native stock to produce fine carriage horses may be preserved by systematic breeding; by improving the general utility horse a horse will be provided which will do more efficient work for light farming, family and general work, and by improving the entire light horse stock every market which draws on this type for its horses will be indirectly benefited, including the army.

Work of this kind is pertinent. During the financial depression of ten years ago horse breeding suffered a most serious decline in the United States. The farmer with a large number of mares on his hands was at a positive disadvantage, because he bred them as a rule and hence had a constant increase which had to be disposed of, usually at a loss. When the depression was most severe foreign horsemen found that we had an excellent supply of horses here and began to buy. The growth of the export trade was followed by the improvement in business conditions in the United States, and soon we had two strong demands for our horses, the domestic demand calling for them in larger numbers than ever before, and the foreign demand, which was practically a new one. When the European demand was at its height the British war office began its purchases for South Africa, taking in all approximately 150,000 horses. These animals were of an inferior type, the ones we could best afford to sell. Their exportation was a blessing to the horse industry and the general standard has been perceptibly raised by it.

The shortage of carriage horses in our markets is the most evident reason why.

Since the Boer war the trade has witnessed a contest between the home and foreign demand for American horses, and the home demand has won. From 1899 to 1904 the average price of horses on the Chicago market has increased as follows: Drafters, \$22; carriage horses, \$32.50 (pairs \$65); drivers, \$10; horses for general use, \$35; busses and trammers, \$25; saddlers, \$10, and southern chunks, \$14. During this time the export of horses fluctuated from 64,722 during the fiscal year ended June 30, 1900, to 103,020 during the year 1902, and 34,822 during 1905. The year 1902 included some 80,000 horses to South Africa. The decline in the export of horses of the marketable types to the United Kingdom during this time is the best indication of the real state of this trade, as that country has always been our best customer. The trade reached its height during the fiscal year 1900, when 30,232 horses were exported. Since then it has declined rapidly, until during the year ended June 30, 1905, only 1,635 horses were sent to the United Kingdom. This decline has been caused by the great increase in prices shown above. The domestic trade can pay more for horses than the foreign, and foreign buyers have been practically driven out of the market. The trade with the United Kingdom is an index of the situation, particularly concerning the better classes, because that country always buys good horses. It is even true that the current has set in the opposite direction and a certain amount of importing of fine horses for market purposes is now being carried on by Englishmen. There is nothing in this situation to alarm us. The foreign trade stands ready to buy our horses whenever domestic prices decline to a sufficient extent, and, therefore, an over supply or a slack demand will have a less serious effect on the American industry than it would have had twenty years ago.

To supply the demand horses by the thousands have been imported for breeding purposes. The draft breeds have been in the majority, and their use is generally satisfactory. Only once have we had anything approaching a native draft breed, and that has been completely lost. This was the Conestoga draft horse of Eastern Pennsylvania. They were dappled gray or nearly white in color, other colors being rare. They weighed from 1,200 to 1,400 pounds and stood from 16 to 17 hands. Some specimens weighed 1,500 pounds and occasionally ones 1,800 to 2,000 pounds. They are described as smart draft horses and rare good walkers. They were used in the cities of the east and in the freighting business across the Alleghenies before the days of railroads. The development of railroads seems to have sounded their death knell. They have vanished. No one seems to know whence they came or what has become of them. They could have been made the nucleus of a native draft breed, but their existence has no value for us now except to show that drafts breeds can be developed that are peculiarly suited to American conditions. All the draft horses on our markets at present are grades of the foreign breeds, and with the large numbers of foreign draft horses on our soil this problem can best be solved by adapting them to our conditions and reaching by systematic and well directed efforts a position of independence of foreign breeders.

The breeding of the lighter types of horses is an entirely different situation. We have developed two more or less distinct breeds of light horses in the American trotter and the American saddle horse. The trotter has been developed solely for speed, the saddle horse for practical saddle use and for pleasure, with a conformation and gaits specially suited to saddle purposes; both breeds transmit these respective qualities with considerable uniformity. The American thoroughbred is a direct offshoot of the English thoroughbred and very little native blood has been mixed with it.

Foreign breeds of the carriage type have been imported in large numbers, but their use on the native stock has not resulted in a satisfactory supply of carriage and general utility horses, nor have the pure breeds of these breeds been able to show uniformly marked superiority over the native horses. The vast majority of the carriage horses on our markets and in our horse shows are trotting bred and many are standard bred and have been campaigned on the race track. Dealers generally prefer a trotting bred horse to a grade of a foreign coach breed or a cross between one of these breeds and trotting stock, with one possible exception—the cross between a hackney stallion and a standard bred mare makes an excellent carriage horse, and some hackney breeders go so far as to admit that the American blood is necessary to secure the best results. The foreign breeds generally excel the native stock in conformation and action, but they are nearly always lacking in speed and endurance; they "soft," to use the horseman's phraseology. Furthermore, with the exception of the English breeds, they do not breed true to type. The continental European breeds have been developed first by crossing thoroughbred stallions on native mares, and later by continuing this cross with the use of crosses of hackney and other European coach breeds. The horses retained for breeding purposes have been selected according to type, with little regard to pedigree, a system almost exactly the reverse of that of American breeders. Furthermore, nearly all the European coach breeds have been developed under government supervision for military purposes, and the desired type is one more suitable for saddle than for carriage. This is particularly true of the French Demi-Sang, known here as the French coach horse. The German coach horses are perhaps somewhat exceptional. The type that seems to be approved there is one more nearly approaching the draft types, this being the general tendency of the German judges at the St. Louis Exposition. This being true, the continental breeders who sell to American importers must either breed especially for the American demand and ignore the local demand, or sell horses to the American trade that they cannot use in their own breeding operations.

The worth of the native American stock for carriage purposes has been established in the face of the import trade in European breeds, but unfortunately no breeders of trotting stock have worked especially with this end in view. The trotting horse is the national horse of America, just as the thoroughbred is the national horse of Great Britain. Where you find an American you will find trotting horses, just as sure as you will find thoroughbreds wherever you find an Englishman. Generally, however, they are bred for speed. Now, breeding for speed is all right if you can get the speed, but unfortunately speed is not an easy thing to get, and it must be extreme speed to be profitable.

The trotting bred carriage horses on our markets are generally what might be termed accidents in breeding. They are picked up by buyers who scour the country for horses of the right type. These buyers know where the accidents are most likely to occur. They are familiar with the stallions whose get become suitable carriage horses and are ready to buy these colts at maturity. In a great many cases they buy trotting stallions of carriage conformation and action, castrate and dock them and convert them into heavy harness horses. The constant occurrence of these accidents of breeding in sufficient numbers and with sufficient regularity to supply the demand for carriage horses certainly shows that with careful selection and concentration of effort this tendency can be made a certain one and the production of trotting bred carriage horses a profitable industry. At the same time the public should be shown the value of trotting bred carriage stallions for breeding purposes, and the emasculation of these horses should cease. The farmer should be educated to know that it is far more profitable to breed to trotting horses for soundness, conformation, size and action, with speed as a minor consideration, than to breed with speed as the sole object and everything else secondary.

There is a large proportion of our farmers who prefer to use light horses in their farm work. They own mares of trotting blood and usually breed to trotting stallions. It is to save this carriage tendency in the trotter to the country and show the small farmer who uses light horses in his farm work how he may choose sires to the best advantage, as well as to assist in solving the immediate carriage horse problem, that the Department of Agriculture has inaugurated experiments to study the possibility of developing a breed of carriage horses from an American foundation.

Thus far eighteen mares and one stallion have been purchased. Six of the mares were carefully selected from a band of about 300 in Wyoming owned by G. D. Rainsford of Diamond, Wyoming. The original stock was brought from the East about twenty-five years ago and consisted of standard bred and Morgan mares, on which have been used thoroughbred and standard bred stallions. Conformation, action and quality have been the sole standards of selection; speed was out of the question. The owner maintains a stable near New York city, where his surplus is sent each year to be developed for the city trade. These horses give us excellent material for the purpose. They are large and well proportioned, with

splendid bone, muscle and feet. They have fine action and the constitution that comes from life in the high altitude and dry climate of that section.

Twelve of the mares were purchased from M. H. Tichenor & Co., of Chicago, by a board composed of Prof. C. F. Curtiss, director of the Iowa experiment station; Prof. W. L. Carlyle of the Colorado experiment station, and the writer. The Tichenor firm has developed its carriage horse business by handling practically nothing but trotting-bred horses. They have given instructions to their buyers to keep a lookout for suitable mares to submit to the purchasing board on its arrival. Other dealers on the Chicago market were asked to submit mares for the approval of the purchasing board and did so. For the selection of a stallion advertisements were placed in leading live stock papers asking for descriptions of suitable stallions and quotations on them.

The mares purchased in Chicago were bred in the States that supply that market—namely Kentucky, Indiana, Michigan, Wisconsin, Illinois, Missouri and Iowa. They are from such families as the Wilkes, Harrison Chief and Morgan. The stallion purchased was one submitted by M. H. Tichenor & Co.—Carmon 32917, American Trotting Register. He was bred by Hon. Norman J. Colman, of St. Louis, Mo., ex-Governor of Missouri, and the first Secretary of Agriculture. Carmon was shown by Thomas W. Lawson, of Boston, Mass., as a wheel horse in his famous four-in-hand under the name of "Glorious Thundercloud." He is by Carnage 8405, a son of Robert McGregor. Carnage was out of Annie Nutwood, by Nutwood, her dam being Annie Watson, by Vermont Boy, a Morgan horse otherwise known as French Charlie. Carmon's dam was Monitor Maid, by Monitor, a son of Merchant, by Belmont, out of Lady Mambrino, by Mambrino Chief. Monitor's dam, Trojano, runs to Morgan and thoroughbred stock. The dam of Monitor Maid was Clara C., by Seth Warner, a son of Ethan Allen. The dam of Clara C. was Grace, a granddaughter of Adallah 15, out of a daughter of Old Bull.

The more detailed pedigree follows: Carmon 32917, by Carnage 8405, by Robert McGregor 647, by Major Elsal 211, by Adallah 15, son of Hambletonian 10. Carmon's dam Monitor Maid, by Monitor 1322, second dam Clara C., by Seth Warner 281, third dam Grace, by Adallah, Jr., 5720; fourth dam Glencoe Bell, by Old Bull, son of Pacing Pilot.

The great worth of this pedigree from a carriage standpoint lies in the fact that the prominent sires have been noted for good conformation. Robert McGregor was a horse with particularly well-made croup, quarters and thighs; Adallah 15 had an especially fine head and neck, and the Morgan, Mambrino Chief and the Clay stock have been noted for breeding excellent conformation and beauty. Carmon traces once to Adallah 15 in the fourth generation and three times in the fifth, twice to Morgan stock in the fourth generation, and once in the fifth, once to Mambrino Chief in the fifth generation and twice in the sixth, and once to Andrew Jackson in the seventh generation. Any tendency to pace is a great objection in a carriage horse, and it is worthy of note that there are only two strictly pacing crosses in the pedigree, and they are remote—in the sixth generation. Further, the great sires in the pedigree are not in any way entitled to be called sires of pacers.

All of these horses were selected strictly according to type. Considerable latitude was exercised as to height, but when a small mare was accepted she had to be of the desired type. Conformation, action and quality were the first considerations. Speed was only incidental, but was regarded as an important point. That is to say, a mare which plainly could not sustain a three-minute gait for some distance and travel ten or twelve miles an hour without undue fatigue was rejected.

Pedigree was considered only so far as it showed that the horses selected were from parents of similar type, and therefore likely to transmit the type with reasonable certainty. The breeding of the stallion was known, but the pedigree was not fully worked out until after his purchase. Therefore it cannot be said to have had more than an incidental influence. It was the individual, not his pedigree, that we were after. Now the fact that a horse was purchased practically on his individuality alone, and that after his purchase we find that his pedigree is an ideal one from a carriage standpoint, seems to me to be one of the greatest importance to breeders. It shows that individual excellence in the selection of breeding animals is the only safe guide to follow, and that selection for individual excellence, continued generation after generation, will result in fixity of type. There are exceptional cases where an individual will prove to be a superior breeder, but these exceptions merely prove the general rule. I do not mention this as a great discovery, nor, indeed, as anything new. This is the practice of all successful breeders. A great breeder of Berkshires said to me recently in response to a request for information regarding his methods: "I make my breeding selections in my barnyard, with the animals before me, rather than in my parlor with their pedigree before me." Many small breeders, however, regard pedigree as all in all, and many of our breeds of live stock have been seriously injured by pedigree "booms."

The method which will be used in developing this type will be to breed up by selection. The most rigid culling will be practiced and no animals retained for breeding which do not come up to the required standard.

There will undoubtedly be many obstacles to overcome. The trotter is not perfect as a carriage horse. Although individuals of outstanding excellence can be obtained, the breed as a whole have very serious faults for this purpose. It has speed and endurance, which are lacking in all foreign breeds of light horses but the thoroughbred, but speed has often been bred for without due consideration to soundness, beauty of conformation and symmetrical action. Hambletonian

10, the fountain head of the breed, was anything but a handsome horse, but his sons had speed and could transmit it. Yet many of his descendants inherit his big head. Ungainly necks, heavy shoulders and withers, flat croups, light quarters and crooked hocks are common among our trotters, even the fastest ones not being exempt. The horses purchased for the department's work are remarkably free from these defects, but we have no means of knowing that some of the ancestors of the mares did not have them, and it would not be surprising to find them cropping out in the progeny. This tendency to revert to undesirable types may be strong at first, but it is hoped that it can be overcome by proper selection. Prepotency is perhaps the greatest thing to be obtained. At present the man breeding to a trotting stallion is not sure enough of what he will get. There is a certain amount of lottery about it. By persistent selection this also can probably be obtained.

The development of the work in the future will depend on the funds provided for it. The large ranches of the West provide an abundance of material of great value. In Wyoming, Montana and on the Pacific Coast there are many ranches where trotting horses have been bred for years and where more than the usual amount of attention has been paid to selection and conformation. Throughout the central West there are a great many stallions whose colts are watched by buyers as possible carriage horses. These stallions should be located, their pedigrees studied and the point ascertained if possible whether there is a family relationship between them. Further, the work needs more mares, and if possible the services of the trotting bred carriage stallions which are so prominent in the show rings should be obtained for a limited number of selected mares.

AN OLD-TIME MAINE HORSE RACE.

When Col. T. S. Lang took the stallion Gen. Knox to Maine in 1858 or 1859 the most popular horses, in that State, especially within a radius of many miles of Bangor, were the Drews. Many of the Drews were blood-like in appearance and were excellent roadsters. They were hardy, wiry animals and some of them could trot fast for that early day. As a rule they were lighter in the jaw and cleaner in the throat than Gen. Knox and his get. They were also as a rule lighter in the barrel.

The Drew family originated in Maine, and was founded by a horse raised by a man named Hiram Drew, who at that time lived in Exeter, Maine. It has been stated that this horse was bred by Mr. Drew, but Mr. D. did not claim any credit at the time, for, though he owned the dam her foal was an unpremeditated presentation, as he was got by a three-year-old colt that reached the pasture in which the mare was grazing by jumping the fence, much to the disgust of Mr. Drew. This three-year-old colt that got the Drew Horse 114, was brought from the Province of New Brunswick by the late A. G. Hunt, who then lived in Exeter. Mr. Hunt claimed that this three-year-old colt was a thoroughbred. A Mr. Ried of Fredericton, N. B., who was considerably interested in horses and well posted on the breeding of horses in his section, investigated the matter and became convinced that the Hunt colt was Young Buzzard, by Sparrow Hawk, a son of imported Buzzard. He colt was gelded and raced successfully as a runner for a time in Maine by Mr. Hunt, who finally sold him to parties outside of the State for racing purposes. The dam of Drew Horse was Boston Girl, by Sir Henry, son of the Brewster Horse, by the famous American Eclipse. The second dam of the Drew Horse was Lady Jane, by Winthrop Messenger, and it has been stated upon apparently good authority that his third dam was the Adams mare, by Winthrop Messenger. This being the case it is not difficult to account for the inclination shown by the get of the Drew Horse to stick to the trotting gait.

There was a sharp rivalry for years between the Knoxes and Drews. Each family had its firm friends and when the horses met in a contest the race was for blood. One of the most exciting races that ever occurred in Maine was between Gen. Knox 2:31½ and the stallion Hiram Drew 2:31½, then the fastest trotter, by the Drew Horse, that could be found in Maine. This race took place before either General Knox or Hiram Drew had made his best record. One who witnessed the race gave the following account of it in a Maine paper last summer:

"Older Waterville residents remember the hottest race in the history of the old Waterville driving park, now converted into portions of Pine Grove and Calvary cemeteries. It was in 1862 when a race was scheduled between General Knox and Hiram Drew. That it was to be a hot race and for blood as well as the stake, everybody knew for counties around. Not only did people come from all over the State of Maine, but also from New Hampshire and Massachusetts.

"The old-fashioned grand stand, without a cover, would hold about 500 people if all sat close. When that grand stand was filled and a reasonable number were scattered around, the finish on both sides of the track, the association managing the race meets considered they had cash enough coming to meet all expenses. But when General Knox and Hiram Drew met on that eventful day in the summer of 1862, the crowds that came to see the match stretched more than halfway around the course on both sides of the park and kept up a continual howling during the scoring for each race.

"I should say the crowd was about equally divided for favoritism. You see the crowd which came from away outnumbered our folks. We, of course, were for General Knox, Tom Lang and Foster Palmer. Heats were started and the most of the crowd never knew it until the horses were getting into the second quarter. Then the greatest excitement I have ever seen

occurred.

"Men cheered, threw their hats in the air, jostled and pushed. Small fights were started by men trying to oust others out of a good position. Hats were lost, clothing torn, faces scarred, tempers spoiled, money won and lost, and, in fact, we had the biggest time in the history of Waterville.

"When the final heat was over and General Knox had won, Babel and Pandemonium combined would have run and hid for the racket that ensued. True, we have faster time now, but we never have the exciting times we had way back in the days when Foster Palmer was in his prime and General Knox was the king of horses among Maine horsemen."

It is doubtful if there is a stallion now standing for service in Maine that is a direct descendant in the paternal line of the Drew Horse, and but few that trace directly through their sires to General Knox, while in nearly every county in the State may be found stallions that are representatives of the Wilkes or Electioneer family. General Knox and the Drew Horse both helped improve the horse stock of Maine and the good qualities which they transmitted will long continue to be manifested in the horse stock of the Pine Tree State. The best stallions there to-day are not more highly esteemed than were General Knox and the Drew Horse in their day, and the most successful race driver there is not more popular than was the late Foster S. Palmer when in his prime.—American Horse Breeder.

IMPORTANT CHANGES IN THE RULES.

Many changes were made in the rules of the National Trotting Association at the twenty-third congress held in New York February 14th. Among the more important were the following:

Rule 2, Section 9 now reads: A nominator is liable for entrance on each horse entered in a purse or stake. All entries must be paid for but the terms can be fixed by the member and must be published in the conditions.

Rule 4 was changed so that five entries are now required to fill and three to start.

Rule 24 was amended by adding the following sections:

Section 3. No person shall be permitted to start horses in a race or performance against time on a track in membership with the National Trotting Association, unless he holds a license from said association as starter.

Section 4. Upon the recommendation of two members and other information showing the good character, knowledge of trotting rules and ability of an applicant to do the work, license to start horses shall be issued by the board of review, or the president, pending its action, to a sufficient number of persons.

Section 5. In addition to the duties heretofore required of the starter, he shall give information as to the practical application of the rules, when called on by track officers and employees, and shall always endeavor to have racing and performances against time conducted fairly according to rule, and in all cases where any material thing is done against the equality of racing, that an alert expert might reasonably know of, he shall report the same to this association with the names of the responsible parties and the witnesses. For a failure to vigilantly use his opportunities to promote honest racing and faithfully perform his duty, his license shall be revoked by the president of this association.

Section 6. Time made in a race or performance against time shall be a bar and not a record, unless the starting shall have been done by a licensed starter, as herein provided.

Section 7. The starter shall be paid by the member, such compensation as may be agreed on.

Rule 28 was amended by adding the following sections:

Section 5. A driver or rider cannot be suspended for non-payment of entrance except when he is also the nominator or owner.

Section 6. No driver or rider shall use a timing watch when driving or riding in a race, without the consent of the judges.

Rule 29, Section 1: Amended by cutting out the word "and" in the tenth line, by changing the word "in" to "and" in the eleventh line, and inserting the word "commenced" after the word "race" in the same line.

Rule 29 was amended by adding the following section:

Section 2. No horse shall wear hobbles in a race unless he starts in the same in the first heat, and any person found guilty of removing or altering a horse's hobbles during a race for the purpose of fraud, shall be suspended or expelled.

Rule 33, Section 3, requires that after the first heat the horses shall be called five minutes prior to the time of starting. Another section has been added to this rule as follows:

Section 4. If the judges tolerate any divergence from this rule or fail to order out all the horses and start the heat within the time as required by the rules, they, the judges, shall be fined, suspended or expelled.

Rule 43, which governs time records and bars, has had Section 12 struck out and the following sections inserted in place thereof:

Section 12. A regular meeting is hereby construed to mean a meeting advertised in at least one newspaper published and circulated in the vicinity, not less than one week before the commencement of said meeting, at which meeting no less than two public races actually take place on each day of the meeting. In this connection a public race is a contest as defined in Rule 42, Section 1, and said contest must be a bona fide and the performance subject to all the rules of the National Trotting Association governing public races or contests, and any officials or members or

judges or timers who shall tolerate any divergence from the rules of the National Trotting Association, shall be fined, each and every one, not less than \$100, nor more than \$500, or shall be suspended or expelled, as the case may warrant.

Rule 51 amended by adding the following section:

Section 3. Whenever the penalty of expulsion is prescribed in these rules, it shall be construed to mean an unconditional exclusion and disqualification from any participation, either directly or indirectly, in the privileges and uses of the course and grounds of a member during the progress of a race meeting.

Rule 51 amended by adding the following section:

Section 5. No person or persons or stable having in his, their or its employ in any capacity an expelled, suspended or disqualified person, or persons, shall be eligible to compete after written or printed notice to said person, persons, stable or authorized agent of either from the secretary of the National Trotting Association, in a race or races on the grounds of a member or members, except in cases where a limited penalty is imposed by judges during the progress of a meeting against a man working under a written contract; but nothing in this exception shall be construed so as to permit a suspended person to drive, ride, train or assist in the care or racing of any horse or horses on the ground or grounds of a member during the progress of a race meeting or meetings.

Section 7. An expelled, suspended, or disqualified person cannot act as an officer of a member. A member shall not, after notice from the secretary of the National Trotting Association, employ or retain in its employ an expelled, suspended or disqualified person. Any member found violating this rule shall be fined any sum not to exceed \$500.

The following was adopted as Rule 52:

Rule 52.—Circuit and Board of Stewards.

Section 1. A regularly organized circuit shall be composed of not less than five nor more than twelve associations in membership with the National or American Trotting Associations. Each and every member of said circuit so formed, shall annually recommend for appointment not less than two persons, and from the list of names so recommended, the board of review, or its president, pending its action, shall select and appoint five persons from the names thus recommended, and the persons so appointed shall constitute the board of stewards of said circuit, whose powers and duties are defined in Rule 53, Section 1.

Rule 52, changed to Rule 53.

Rule 52, Section 2, changed to Rule 53, Section 1, and amended to read as follows:

Section 1. All decisions and rulings of the judges of any race, and of the several associations and proprietors belonging to the National Trotting Association, may be appealed before the close of the meeting to the board of review, to a district board in the proper district, or a board of stewards of a regularly organized circuit, and shall be subject to review by the board appealed to, upon facts and questions involving the proper interpretation and application of these rules; provided, that parties to be affected thereby shall be notified, as the board appealed to shall direct, of a time and place when such appeal will be acted on; and provided further, if the appeal relate to the decision of a race, immediate notice shall have been given to the judges of the race of the intention to so appeal. Findings of a district board or a board of stewards shall be subject to appeal to the board of review, and all evidence or other testimony filed or taken by either of them shall be forwarded, together with the finding, which must be signed by a quorum of the said board, to the secretary of the National Trotting Association within two weeks of the close of the meeting at which the matter was acted upon occurred.

Rule 58, Section 3, struck out and the following adopted as Rule 50, Section 3, in place thereof:

Section 3. No horse sold or bargained for conditionally or otherwise after 7 p. m. of the day preceding an engagement is eligible to compete in it. Any person violating this rule shall be fined, suspended or expelled.

N. T. A. WILL HEAR THE CASE.

The alleged "doping" of Lou Dillon at Memphis in 1904 will be thoroughly investigated by the Board of Review of the National Trotting Association. This action was decided upon by the Biennial Congress of the National Trotting Association in session at New York last month. It is expected that the case will be decided at the next meeting of the Board of Review, which will be held in May.

E. E. Smathers, who it is alleged entered into a conspiracy to "dope" Lou Dillon, visited Major P. P. Johnston, the president of the National Trotting Association, and requested an investigation into the charges made by Murray Howe, secretary of the Memphis Trotting Association. He was instructed to submit the request in writing, which he did later in the day. The complaint, after reciting the charges, characterizes them as false and malicious, and absolutely groundless, and demands that they be made the subject of an investigation without delay.

President Johnston advised C. K. G. Billings, owner and driver of Lou Dillon in the race in which it is alleged the mare was "doped," of Mr. Smathers' action. An interview between Mr. Billings and President Johnston followed; in which the former promised that Murray Howe would file a request at once for an investigation. This was done, and in it Howe charges that Mr. Smathers was guilty of conspiracy to accomplish the defeat of Lou Dillon in the race for the Memphis gold cup in 1904 by "doping" her.

Secretary W. H. Gocher of the National Trotting Association has instructions to begin at once an investigation of the facts.

Jackson's Napa Soda does not tangle the feet.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Jan. 1-June 1—Closed season for black bass.
March 10—San Francisco Fly-Casting Club. Saturday Classification Contest No. 2. Stow lake 2:30 p. m.
March 11—San Francisco Fly-Casting Club. Sunday Classification Contest No. 2. Stow lake, 10 a. m.
April 1-Sept. 1. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
Sept. 10-Oct. 16—Closed season in tidewater for steelhead.
Sept. 10-Oct. 16—Closed season for salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Closed season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-July 1—Dove season closed.
Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
March 4—California Wing Club. Live pigeons. Ingleside.
March 4—Blue Rock Gun Club. Grounds foot of High street, Alameda.
March 11—Empire Gun Club. Blue rocks. Alameda Junction.
March 18—Union Gun Club. Blue rocks. Ingleside.
March 25—Golden Gate Gun Club. Blue rocks. Ingleside.
March 25—Vallejo Gun Club. Blue rocks. Floden Station.
April 14, 15—Los Angeles Gun Club. 18th semi annual tournament. \$500 added money.
May 26, 27—Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, Floden Station.
June 19, 22—Interstate Association. Grand American Handicap target tournament. \$1000 added money. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary. Entries close Jan. 25.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary. Entries close Jan. 30.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary. Entries close Feb. 17.
Feb. 28, March 3—District of Columbia Kennel Club. Washington, D. C. Howe Totten, Secretary. Entries close Feb. 10.
March 1, 3—Southern Ohio Kennel Club. Hamilton, Ohio. Thos. Boli, Secretary. Entries close Feb. 12.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary. Entries close Feb. 25.
March 8, 10—Colorado Kennel Club. Denver, Col. T. W. Bartels, Secretary. Entries close.
March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary. Entries close.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary. Entries close.
March 17—Bull Terrier Club. San Francisco. Entries close.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary. Entries close March 10.
March 30 31—Haverhill Kennel Club. Haverhill, Mass. A. A. Batch, Secretary. Entries close.
April 11, 14—Southwestern Kennel Club. Los Angeles. George R. Albers, Secretary. Entries close April 3.
April 18, 21—Seattle Dog Fanciers' Association. Seattle, Wash. Chas. McAllister, Secretary. Entries close.
April 25, 28—Portland Kennel Club. F. E. Watkins, Acting Secretary. Entries close.
May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary, Brighton Beach, L. I. Entries close.
June 1 2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary. Entries close.
June 6, 9—San Francisco Kennel Club. 10th annual bench show. Fred P. Butler, Secretary. Entries close.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary. Entries close.

San Francisco Fly-Casting Club.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage (b) delicacy percentage; (c) net percentage. Event 4—Lure casting percentage.

The fractions in lure casting are 15ths.

AT THE TRAPS.

The local schedule for the season's trap shooting has been agreed upon as follows: First Sunday of each month, California Wing Club, live birds, at Ingleside; second Sunday of each month, Empire Gun Club, Alameda Junction, Alameda; third Sunday, Union Gun Club; fourth Sunday, Golden Gate Gun Club, both to shoot at Ingleside. The Blue Rock Gun Club will shoot the first Sunday of each month on the grounds at the foot of High street, Alameda.

The Fresno Gun Club boys opened up on the 18th inst. just for a season's starter. Rain stopped the sport before the card was shot out. The club proposes to shoot regularly this season on the Polasky trap grounds. The scores made were the following:

Ten targets—Lewald 6, Schlueter 9, Holdscaw 7, Ickes 9 and 7, O'Neill 8, 8.

Twenty targets—Lewald 12, 11, Schlueter 18, 18, 16, 17, Holdscaw 18, 20, 14, Ickes 15, 15, 17, 15, O'Neill 19, 18, 12, Donell 15, 14, 15, Ellert 18.

The club is using an automatic trap this year.

The first regular monthly blue rock shoot of the Vallejo Gun Club will take place on the club grounds at Floden station on the 25th inst. The fourth Sunday of each month has been selected as the day for the club program shoots this season.

The bustling town of Alton, Humboldt county, now boasts a flourishing gun club, and a blue rock shoot is held every Sunday, weather permitting. It was organized quite recently with twenty-two members and the following officers: G. W. Cousins, manager; Grant Clark, captain; R. P. Nellist, secretary and treasurer. A suitable piece of ground has been rented from Chas. Carr near the town, and the same will be fixed up appropriately with a house and platform, etc. The club purposes entertaining other clubs this season, and will provide pleasure and profit for their visitors. The scores as made at the shoot of Sunday, February 4th, were as follows:

F. C. Hauck 21, C. Gould 20, C. T. Bryant 15, G. Clark 15, Lela Bryant 15, Geo. Cousins 14, H. Christiansen 14, N. Hauck 11, R. P. Nellist 11, R. T. Bryant 10, M. Bailey 10, T. Fiest 9, B. Davis 8, A. Hazen 7, Chas. Bryant 6.

On Sunday, February 11th, the scores in a 25-target race were:

G. O. Ransan 19, G. Clark 18, G. Gould 17, W. Russell 16, H. Christiansen 15, F. Hauck 14, T. Bryant 13, G. W. Cousins 12, A. Hazen 11, H. Douglas 10, N. Hauck 7, M. Bayle 7, T. Bullard 7, C. Floyd.

Up to twenty birds it was a tie between Messrs. Clark, Gould, Ransan and Christiansen, each having fourteen birds to their credit. The last five birds settled it, however, Ransan breaking straight.

The Folsom Gun Club held a blue rock shoot February 4th. The average of those who shot at 100 targets was as follows:

O. Ferguson .790, J. Broder .727, M. Surbaugh .709, J. E. Joerger .700, R. Keefe .680, G. Gerber .550, Geo. Wilson .540, O. Miller .536, P. Joerger .500.

Secretary Chas. Van Valkenburg writes us: "The Los Angeles Gun Club will give its annual tournament April 14th and 15th. The program will call for ten 20-bird events each day, \$25 added, total \$500 added money for two days. The money will be divided Chick system, three monies. Will also shoot off club trophies, championships and Tuft-Lyon medals, and two team events. I will send you some programs in a few days."

The Los Angeles Gun Club will hold the club's eighteenth semi-annual tournament on April 14th and 15th. There will be \$500 in added money. Secretary Chas. Van Valkenburg, American National Bank Building, Los Angeles, will furnish further information, programs, etc., on request by mail.

The California Wing Club program for the season of 1906 calls for seven monthly shoots, beginning with March 4th and ending on September 2nd. Each race will be at 12 live birds and the club purse will be \$75 for each shoot. Handicaps in the race will range from 24 to 32 yards. The money division will be the same as last season—one money for every three entries. This event will be the initial one for the day and will start promptly at 10 a. m.

In addition, there will be a club shoot for medals and prizes. This contest will be started at 1 p. m. after the conclusion of the purse race.

The medal shoot will be a series of seven monthly contests, each race at 12 birds, all contestants to shoot at 30 yards' rise. Four medals will be awarded to the four high guns at the end of the season, "the next six to receive a merchandise prize which will be selected by a committee."

The first Sunday of each month is the day selected on which the club shoots will be held. "All back scores must be shot up prior to club events." But two back scores, and no more, can be shot up by any member.

The distance handicaps as arranged by the board of directors are the following:

M. O. Feudner 30 yards, C. C. Nauman 30, Edw. Donohoe 29, W. J. Golcher 29, H. C. Golcher 29, P. J. Walsh 29, C. A. Haight 29, A. M. Barker 29, S. E.

Knowles 28, A. T. Derby 28, G. W. Gibson 28, E. G. McConnell 28, Edw. Schultz 28, W. E. Murdock 28, A. J. Webb 28, P. B. Bekeart 28, W. E. Green 28, E. Glevesahl 27, A. M. Shields 27, J. V. Coleman 27, T. Prior 27, C. D. Laing 26, Wm. Hanson 26, E. A. Fano 26, J. K. Prior 26, J. Birmingham 25, T. P. Bodkin 25, Frank Turner 25, W. L. Gerstle 24, Achille Roos 24, W. E. Duzan 24.

The Golden Gate Gun Club started the blue rock ball rolling last Sunday. The attendance of shooters was good and the weather conditions all that could be desired. Thirty-one guns lined up in the club match. This race is at 100 targets in 25 bird sections, and the shooters are divided into four classes. There will be a series of seven monthly shoots and the club purse for each meeting is \$100. The high guns last Sunday were: Champion class, M. O. Feudner 95, Dick Reed 95, W. J. Golcher 94, C. C. Nauman 93, Ed Schultz 91. First class, M. J. Iverson 87, Prior 86, W. E. Murdock 81, W. S. Wattles 79, F. Schultz 77. Second class, H. P. Jacobsen 82, J. Masterson 76, F. Knick 76, C. D. Harvey 71, J. Bruns 71. Third class, Dr. Sylvester 77, B. Patrick 70, Lynch 46. There were but four men in the third class and they received \$17, three moneys.

Following the club race the initial shoot for the trophy donated by A. M. Shields took place. This was a distance handicap race at 25 targets. The shooter winning the event oftenest this season to retain the trophy. Nauman and Feudner (20 yards each) and Terrill (14 yards) tied on 23 breaks. On the shoot off Terrill, a new figure at the local traps and a clever shot, cracked 9 out of 10 against 8 apiece for the other two. Feudner and Reed were first and second high guns for the day. The scores follow:

Club race, 100 targets, champion class—				
Feudner	23	24	24	24—95
Reed	23	25	25	22—95
Golcher	24	23	23	24—94

Shields' Handicap trophy race, 25 targets, distance handicap—

Terrill, 14 yards, 23 breaks; Nauman 20-23, Feudner 20-23, F. Schultz 14-22, McMurphy 16-22, Iverson 18-21, Webb 18-21, Wattles 14-21, Donohoe 14-21, G. Sylvester 20-20, Ed Schultz 20-20, Jacobsen 16-20, Harvey 14-20, Reed 20-19, Golcher 20-19, Holling 18-19, Pisani 14-19, Prior 18-18, Harpham 14-18, Masterson 14-17, Fano 14-17, Potter 16-16, Lewis 14-11.

The Empire Gun Club program for 1906 is practically the same as last year, except in some minor details. The club will shoot regularly on the second Sunday of each month at Alameda Junction.

The first event is the club championship race, 25 birds, entrance 75 cents. A \$50 purse will be divided among the four high guns at each shoot. The high average gun for the season will receive a gold championship trophy. The second event is the money match, free to members, distance handicap. Shooters will be classified on scores made in the first race. A \$15 purse will be divided among the one high gun in each of the four classes.

The open to all events are the special cash prize and the Sweeney record medal race. Both events are distance handicap races with side pools made up from a portion of the entrance money. These two shoots were very popular last season.

Two score of shotgun artists on the firing line before the Ingleside bluerock traps Washington's Birthday was a most auspicious opening of the local trap shooting season. The shoot was under the auspices of the Golden Gate and Union Gun Clubs of this city. Five events at 15 targets, one at 20 targets, and a special race at 100 targets was the card for the day. "Dick" Reed of this city, who missed but six clay pigeons out of 95 shot at, was high average for the day, 93 per cent. Emil Holling and C. C. Nauman came next with 92 per cent.

The Phil B. Bekeart challenge cup race was postponed, a special event at 100 birds being shot instead. The shooters and scores were: E. Holling 94, E. Schultz 94, M. O. Feudner 88, Harvey, McMurphy 87, F. Schultz 79.

The shooters and scores in the four fifteen and one twenty-bird races were: Dick Reed, 15, 14, 14, 14, 18;

W. J. Golcher, 13, 12, 12, 11, 12, 16; A. J. Webb, 12, 15, 10, 13, 14, 17; D. W. King Jr., 13, 13, 12, 12, 12, 15; W. S. Wattles, 10, 8, 9, 11, 15; "Reading," 13, 12, 10, 12, 10, 13; Harvey, 12, 12, 9, 15, 14, *; Greene, 14, 10, 9, 14, 13, 17; Terrill, 5, 11, 12, 12, 11, 12; Robinson, 7, 12, 9, 11, 10, 17; Dr. Pitres, 7, 7, 7, 13, 11, *; Guggenheim, 8, 5, 6, 11, 5, *; Patrick, 8, 11, 12, 13, *, *; Prior, 13, 14, 13, 12, 12, 14; M. O. Feudner, 12, 12, 9, 15, 17; C. C. Nauman, 12, 13, 15, 15, 14, 19; E. Holling, 13, 14, 13, 14, 14, 20; W. E. Murdock, 9, 10, 9, 11, 10; J. B. Hauer, 12, 7, 9, 11, 8, *; T. L. Lewis, 4, 8, *, *, *, *, Kelly, 14, 8, *, *, 14, *; Dr. Sylvester, 9, *, 10, 10, *, *; Pickersgill, 7, *, 11, *, *, *, *; George Sylvester, 11, 13, 14, 14, 14, 18; M. J. Iverson, 12, 9, 9, 10, 14, 16; E. Schultz, 13, 13, 13, 15, 11, 18; F. Schultz, 11, 12, 2, 13, 12, *; Dr. Bodkin, 6, 7, 6, 9, 7, *; F. L. Carter, 12, 7, 12, 12, 10, 15; H. M. McMurchy, 13, 11, 13, 12, 14; R. W. Hesse Jr., 7, 11, 11, 10, 8, *; Ed Donohoe, *, *, 10, 9, 12; Johns, *, *, 6, *, *, *; C. Ashlin, 10; J. Masterson, 11; R. Haas, 11; G. Barber, 10; Schneider, 13.

Among those who shot straights were Holling 20, C. D. Harvey 15, Feudner 15, Nauman 15, 15; Webb 15, Wattler 15, Reed 15, D. W. King Jr. 15, E. Schultz 15, F. L. Carter 15.

The California Wing Club shoot at live pigeons will be the program at Ingleside tomorrow. Among the participants will be Mr. Harvey McMurchy, a sportsman who is known to the fraternity throughout the United States and Canada. Since he year 1886 Prince Mac has taken part, as a guest of the club, in the opening shoots of this, the oldest trap shooting organization in the United States, for nineteen consecutive years.

Blue rock shooting in the raisin belt this season will have a healthy stimulus, judging from the following, which we cull from a Fresno exchange:

"The Reedley Gun Club has organized for active shooting this season. Probably the biggest shoot of the season for the club will be the one tomorrow (February 22). Blue rocks will be shattered as they have not been shattered for a long while. The organization now contains about thirty members, all enthusiastic nimrods, and some of the best shooters in the county belong with the club. J. E. Sheibley is manager. Fresno marksmen have been invited to shoot with Reedley tomorrow.

The Fresno Gun Club shooting this season will be under the management of Lewald and Schlueter. Prospects are that the sport will be better kept up this season than it has in two or three years. The Fresno gunners expect a meet with the Reedley men very shortly. The two clubs contain about thirty men apiece. Fresno's will have shooting on the Pollasky depot grounds every Sunday the weather permits."

The trap shooters of Vallejo and vicinity are looking forward to a great season this year. The opening shoot will take place on March 25th. Several of the members of the Vallejo Gun Club went out last Sunday to work on the new grounds, which are a little north of those they had last year.

The big event of the season will take place May 26-27, when the Pacific Coast Trap Shooters' Association, of which Dr. Turner is president, will meet in that city as the guests of the Vallejo club. There will be some 200 members present and an order has been already placed for some 50,000 blue rocks for the two days' shoot.

The San Jacinto Gun Club was organized on February 24th with a charter roll membership of twenty-five. The officers of the club are: President, J. F. Hards; vice-president, Chas. D. Cram; captain, C. A. Loud; secretary and treasurer, Arthur Wright.

A committee is at work preparing traps and getting the grounds ready. A number of Hemet men have joined the club.

The Riverside Gun Club members propose to hold a series of club shoots on the East Eighth street grounds this season. A lively shoot was pulled off on February 22nd. Among the visitors attending were: Hip Justins, Hagerman, Chas. Van Valkenberg, Guy Lovelace and Sam Smith of Los Angeles, J. L. Davis of Corona and members of the Arlington Gun Club.

Powder burning in the south promises to be pyrotechnical this year.

A redivivus of trap shooting at San Jose under the auspices of the Fish and Game Protective Association is scheduled for this year.

We recall the time when a Garden City team was a doughty factor in the general results at a tournament. Dr. Barker, Coykendall Brothers, George Anderson, Johnny Carroll and several other crack shots used to keep the boys on the firing line up to the top notch tension. With the exception of the genial doctor, the others mentioned have not been much in evidence at the traps for several years. Nevertheless, the sport has been regarded with a warm feeling by a number of Santa Clara valley sportsmen and we predict that the "old guard" and the new recruits will not take second place with any coterie of shotgun devotees on the Coast, for among the Santa Clara sportsmen, we state without reserve, there is a representation of shotgun manipulators second to none in any section of the United States.

Green Valley Shooting Club.

At a recent meeting of the above named organization the following officers were elected: President, Henry Martin; vice-president, Peter Siebe Jr.; secretary and treasurer, G. L. Mason; directors, Clyde Drake, C. M. Hall and Walter Sink.

DOINGS IN DOGDOM.

A. K. C. Meeting.

The regular annual meeting of the American Kennel Club was held Wednesday afternoon, February 14. About seventy-five delegates were present. The only business of importance done was the re-election of all the officers. These are August Belmont, president; Hollis Hunnewell, vice-president, and A. P. Vredenberg, secretary. H. K. Bloodgood was re-elected president of associate members, and Dwight Moore was appointed chairman of the committee on rules, succeeding Major G. M. Carnochan. The reconsideration of the standing of American dogs was submitted to the committee on rules, and that committee will also hear the protest against the decision of the Westminster Kennel Club in the Eastover Launcelot case.

Parlor Bench Show.

The Victoria, B. C., fanciers have the right idea in keeping interest and enthusiasm alive. The parlor bench show held on the evening of February 9th under the auspices of the Victoria Kennel Club proved a great success. Every class was well represented and the competition was very keen. The following is the list of prize winners:

English Setters—Novice dogs, C. F. Banfield's Rex; open dogs, E. Hoosen's Prince; open bitches, E. Hoosen's Lady of Lyons. Irish Setters—Puppy dogs, Geo. Jay's Prince William; puppy bitches, J. Hammond's Kathleen; novice bitches, J. Hammond's Kathleen; open dogs, 1 Geo. Jay's Mike, 2 A. Fairfull's Mickey Green; open bitches, 1 Dr. Garesche's Victoria Noreen, 2 A. Fairfull's Jess, 3 Dr. Garesche's Kathleen. Best Irish Setter—Geo. Jay's Mike, res Dr. Garesche's Victoria Noreen. Gordon Setters—Puppy bitches—A. E. Johns' Queenie; open dogs, R. Wall's Jack; best Gordon Setter—R. Wall's Jack. Pointers—Open dogs and bitches—C. F. Banfield's Judy. Collies—Novice dogs—Mrs. E. B. Paul's Randy; novice bitches, W. Rosie's Heather Bell; best collies, W. Rosie's Heather Bell. Cocker Spaniels—Puppy dogs, E. Cole's Chase; puppy bitches, T. Harley's Queen; open dogs, 1 Dr. Garesche's Victoria Chum, 2 Dr. Garesche's Victoria Rooney; open bitches, black, 1 P. Goodwin's Maryella, 2 Miss Walker's Jet; red, 1 C. A. Goodwin's Little Dods, 2 Dr. Garesche's Victoria Ruby; best Cocker Spaniel, Dr. Garesche's Chum; res P. Goodwin's Marella. Field Spaniels—Puppy dogs and bitches—Dog, S. Benson's Jerry; bitch, J. Little's Lady; special, S. Benson's Jerry. Fox Terriers—Puppy dogs, 1 J. K. Angus's Swagger Mac, 2 J. R. Saunders' Togo; puppy bitches, J. K. Angus' Swagger Halfpenny; novice dogs, Miss Davies' Wings; open dogs, 1 G. Florence's Puget Speedy, 2 Miss Tom's Sunshine; open bitches, J. R. Saunders' Vex; best Fox Terrier, G. Florence's Puget Speedy; res J. K. Angus' Swagger Mac. Irish Terriers—Open bitches, 1 E. Carlow's Saanich Irish Poplin, 2 W. Webster's Noah. Bull Terrier—R. Wash's Blarney. Black and Tan—Miss McDonald's Tiny.

New York Show Notes.

The thirtieth annual show of the Westminster Kennel Club this month was undoubtedly the greatest bench show ever given in America; 1951 dogs, 3013 entries in 538 classes, broke all records. Quality was of a high standard throughout and big classes were the rule; wins under these circumstances were worthy of consideration.

The attendance was better than ever and that is saying a deal. The smart set of New York, Philadelphia and Boston were much in evidence during the four days.

The judges—all well known Eastern fanciers—seemed to get the dogs just about right, with perhaps less than half a dozen notable exceptions.

The management under Mr. James Mortimer was everything that could be desired. Cash premiums for the regular classes amounted to \$13,000, and this sum was equaled in money value by the special prizes.

Field and Fancy makes the following statement: "It is a significant fact that many of the dogs recently imported were thrown down in the hardest kind of style. The past seasons, under the English judges, dogs of this kind have been invincible, and the way the American wearers of the ermine overlooked them seems to give color to the story that the Englishmen favor the British dogs. Or is it that the Americans are also prejudiced, but in just the opposite way?"

E. Shelley of Lamar, Miss., had charge of the Western and Southern winning field trial dogs, nine of them. The entries of working bird dogs at the show were conceded to be the most valuable collection of Pointers and Setters ever benched. One of the most interesting features of the judging was the competition in the field trial classes—for dogs that had been placed at any public trial in the United States or Canada. Among the entries were dogs of international fame. Three of the dogs, however, Baby Ale, "probably the most noted Pointer ever seen at work," Lemon's Rodfield and Lanark Lad, two English Setters, arrived too late to be shown, more's the pity.

Major J. M. Taylor judged the field trial classes. The awards were:

English Setters—Field Trial Class—Dogs and bitches (that have been placed at any public field trial in the United States and Canada)—Open—1 G. N. Clemson's Pioneer, 2 J. Sherwood's Jessie Rodfield's Count Gladstone, 3 J. Lemon's Canada II, res, J. Thompson Jr.'s Ramona; v h c W. W. Lindley's Young Bob's Tony, Jas. Thompson Jr.'s Freda.

Pointers—Field Trial Class—Dogs and bitches—

Open (that have been placed at any public field trial in the United States or Canada)—1 A. M. Masters' Hard Cash, 2 H. A. Waldron's Norwald Primrose, 3 R. K. Armstrong's Don, res W. J. Gordon's Launcelot; v h c Motschenbacher and Dutton's Tloga Sam, C. E. Pier-son's King Woolton, h c Thomas Johnson's Manitoba Mike, c Jas. Thompson Jr.'s Evell.

A matter of much interest to the Coast fancy was the winning of the Wandee Kennels. The Fox Terriers did not, contrary to the usual custom, turn up many sensational performers. The exception was Wandee Florence, a smooth bitch puppy who went through in a sensational manner, taking first puppies, open and winners. In smooth dogs the Wandees did well, but Sabine Ruler got away with the tri-color. W. Coast-guard held down the wire-haired dogs in good shape. The winners were as follows:

Foxterriers—Smooth Dogs—Puppies—1 Wandee Kennels' Wandee Menlo, 2 Sabine Kennels' Sabine Raven, 3 E. H. Ingwersen's Warren Radicant, res A. A. Macdonald's Aldon Colonel, v h c Sabine Kennels' Sabine-Rival, h c Major G. M. Carnochan's Cairsmuir Orion, c H. O. Tlemyer's Springhill Hackett. Novice—1 Wandee Menlo, 2 Sabine Raven, 3 Warren Radicant, res Sabine Rival. Limit—1 Wandee Kennels' Norfolk All Blue, 2 Sabine Raven, 3 Macdonald's Aldon Tipster, res W. Rutherford's Warren Recorder, v h c S. Kennels' Sabine Reynol. Open—1 S. Kennels' Ch. Sabine Ruler, 2 Wandee Kennels' Wandee Knight, 3 Aldon Tipster, c Cairsmuir Orion; (bred in the United States or Canada), 1 Wandee Knight, 2 Sabine Raven, 3 Aldon Tipster, res Warren Recorder, v h c Cairsmuir Orion. Winners—1 Sabine Ruler, res Wandee Knight.

Bitches—Puppies—1 W. Kennels' Wandee Florence, 2 S. Kennels' Sabine Favor, 3 W. Rutherford's Warren Remedy, res Rutherford's Warren Destiny. Novice—1 Sabine Favor, 2 Rutherford's Warren Cadence, W. Kennels' Wandee Varilla. Limit—1 Sabine Kennels' Sabine Figent, 2 W. Kennels' Wandee Music, 3 Warren Cadence. Open—1 W. Kennels' Wandee Doris, 2 Rutherford's Warren Jenny; (bred in the United States of Canada), 1 Wandee Florence, 2 Rutherford's Warren Jenny, 3 Sabine Figent, res Wandee Music. Winners—1 Wandee Florence, res Wandee Music. Brace—1 W. Kennels' Team, res W. Rutherford's Team.

Fox Terriers—Wire-haired—Dogs—Puppies—1 Thomas' Endcliffe Prevail, 2 Mrs. R. F. Mayhew's Fox Hills Pirate, 3 Primrose Kennels' Primrose Bell Boy. Novice—1 Endcliffe Prevail, 2 Maj. G. M. Cairnsbully Bully, 3 E. H. Ingwersen's Niola Gift. Limit—1 Thomas Endcliffe Pennant, 2 R. E. Strawbridge's Radnor Criterion, 3 Rowsley Kennels' Rowsley Jester, res P. Kennels' Primrose Buttons, v h c Mrs. R. F. Mayhew's Raby Sensation, h c R. Kennels' Rowsley Joker. Open—1 Wandee Kennels' Wandee Coastguard, 2 R. E. Strawbridge's Ch. Kennels' Rowsley Siren, res Thomas' Endcliffe Precilla, v h c Carnochan's Cairnsbully Powder Puff. Open—1 Rowsley Hope, 2 Rowsley Courtly, 3 Wandee Kennels' Wandee Manila, res Rowsley Siren; (bred in the United States or Canada), 1 Endcliffe Precision, 2 Cairnsbully Banshee. Winners—1 Rowsley Hope, res Rowsley Courtly, Brace—1 R. Kennels' Brace, res Wandee Kennels' Brace. Team—1 R. Kennels' Team.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

The Ruffed Grouse.

The ruffed grouse (*Bonasa umbellus*) is widely distributed over the wooded parts of the United States and Canada, and ranges from northern Georgia, Mississippi and Arkansas north to Hudson Bay and central Alaska, and from Maine to the coast of Oregon. The different conditions of environment prevailing over this great range have had their effect in modifying the colors of the ruffed grouse so that several forms may be distinguished. The ruffed grouse is separable into four forms: The common bird of the Eastern States (*Bonasa umbellus*), the Canadian ruffed grouse (*B. u. togata*) of the spruce forests along the northern border, from Maine to British Columbia; the gray ruffed grouse (*B. u. umbelloides*) of the Rocky Mountains, north to Alaska; and the Oregon ruffed grouse (*B. u. sabini*) of the humid west coast, from northern California to British Columbia. The color differences between the bird of the southern Rocky Mountains and the Oregon ruffed grouse of the humid west coast are especially marked. The latter is the most richly colored of the North American grouse, and is notable for its handsomely contrasted black and reddish brown colors, set off by immaculate white.

The ruffed grouse is one of the most highly prized of American game birds. It is known in New England as the "partridge," but in the Southern States it is usually called "pheasant." It is distinctively a bird of the woods, imparting the spirit of the wilderness to every sylvan retreat that it inhabits. In Virginia and

Maryland, near the city of Washington, the species is, or was until recently, not uncommon along the rocky palisades of the Potomac and in deep gorges lined with laurel thickets. In Essex county, N. J., it frequents the crest of a wooded basaltic dike known as the Orange mountains, where the picturesque rocky woods with a good stand of deciduous trees and an undergrowth of blueberry, second-growth white oak, wild grape and bittersweet vines and beds of partridge berry (*Mitchella repens*) furnish a congenial home. That ruffed grouse usually prefer deciduous to evergreen growths was particularly noticed by the writer in 1892 and 1898 at Chocorua, N. H., a hamlet between Lake Winnepesaukee and the White mountains. On his tramps through heavy spruce forests remote from houses or clearings he seldom came across grouse. He frequently met them, however, in woodland near farms or in clearings, and particularly along wood roads. A favorite ground in August was the clearing of an abandoned farm, 200 feet above Chocorua lake, which lies at the foot of Chocorua Mountain. The fields are separated from one another by little trout brooks and have grown up to young spruces. Here in bowlder-strewn pastures was an abundance of blackberries, blueberries and grasshoppers, with old apple trees, birches, and poplars for winter budding. On this old farm the writer never failed to flush from three to eight grouse, and on several occasions he saw hen birds with young. In a sandy spot of the road leading up to the house the grouse had dusting wallows, which they used habitually. During October birds were found in hemlock woods with an undergrowth of osmunda ferns or other vegetation.

The ruffed grouse does not congregate in large coveys, like the plumed quails or the prairie chicken, but is found in companies of from two to eight, usually members of a single brood. It does not spend the night on the ground, but perches on a tree. When the weather is very cold, however, it often plunges into the snow and passes the night as snugly as an Eskimo in his igloo.

The bobwhite whistles, the prairie chicken booms, and the blue grouse hoots, but the ruffed grouse drums. The drumming is one of the most interesting and attractive of all bird performances. It may be heard at every season, but is at its best in spring. The cock, then in full vigor, mounts his drumming log, droops his wings, raises his fantail, and struts along the log with his crest and glossy black neck tufts erect. He begins beating his wings slowly; then faster and faster, till their rapid reverberation becomes a tattoo, rolling out a challenge to rival cocks and a love call to the hens.

Nesting takes place in the latter part of April, or more often early in May. In a makeshift nest scratched in a hollow are laid ten or a dozen or even more creamy white or buffy eggs, usually unspotted, but sometimes with fine specks of brown. The young look like little brown leghorn chicks. Only one brood is raised in a season. On July 4, in New Jersey, the writer has seen young birds as large as woodcock. The cock grouse assist neither in incubation nor in rearing the young, but after the eggs are laid assemble in small companies by themselves. The hen is amply able to care for her little family, and Mr. Sandys tells how a mother forced to headlong and unvalorous flight a young Pointer that had designs on her brood. (Upland Game Birds, pp. 118-119, 1902.) The notes of the grouse during the breeding season are interesting. When the brood is surprised the hen utters several clucking sounds, one of which may be described as "quit, quit, quit." Mr. Sandys, in writing of the call of the parent birds to scattered chicks, says: "In about ten minutes there sounded a low musical chirruping, very like the sound emitted by a red squirrel between the coughing, sputtering notes." (Ibid., p. 119, 1902.)

Major Bendire, quoting Doctor Ralph, says that a disturbed mother grouse utters a sound like the whine of a young puppy. (Life Hist. N. A. Birds (1), p. 62, 1892.)

Of the habits and general attractiveness of the ruffed grouse Major Bendire writes as follows: "The ruffed grouse is naturally tame and unsuspicious, and let it once realize that it is protected, it becomes almost as much at home in the immediate vicinity of man as a domestic fowl, and quickly learns to know its friends. At the fine country residence of the Hon. Clinton L. Merriam, near Locust Grove, N. Y., especially during the winter, it is not an unusual sight to see several of these handsome birds unconcernedly walking about the shrubbery surrounding his home, and even coming on the veranda of the house to feed. They, like many other animals about the place, have learned that here at least they are among friends, and plainly show their full confidence in them. Even during the mating season a cock grouse may frequently be seen in the act of drumming within 50 yards of some of the outbuildings." (Ibid., p. 60, 1892.)

Bird Lore for May-June, 1904, has an account of a wild hen grouse which was so tame that it would come out of the woods at call and allow itself to be picked up, thus displaying the most unbounded confidence in its human neighbors. To lovers of nature the aesthetic value of this beautiful bird is very great, and its value is none the less, although it can not be measured in cash.

The ruffed grouse affords grand sport; indeed, with not a few sportsmen it holds higher place even than bobwhite. In flight it is one of the swiftest of upland game birds, and considerable skill, a quick eye, and a steady hand are needed to shoot it on the wing. Most shots must be made in cover, and the bird's habit of putting a tree between itself and the sportsman as it flies away adds to the difficulty. As a rule it does not lie nearly so close to a dog as a bobwhite, but before a well-trained, cautious animal it lies fairly well. When brought to bag the grouse is a noble prize. From six to nine birds may be called a good

day's bag, worth more than several times as many bobwhites. The excellence of this grouse as a table far short of the demand, and the price is always high. If the bird could be successfully bred in captivity, it would furnish a most valuable food.

Preservation and Propagation.—The ruffed grouse has a number of potent enemies. Most dangerous of all is probably that destructive biped, man. Writing from Minnesota, Dr. P. L. Hatch says: "Nowhere was the ruffed grouse more abundant than in all the deciduous forests of this state, until mercilessly slaughtered by the pot hunters. * * * But their glorious day is passing away as fast as about 300 dogs and 700 double-barreled breech-loading shotguns can accomplish their annihilation." Birds of Minnesota, p. 160, 1892.)

Many market hunters of the grouse use a little cur dog trained to tree the game and to bark until the gunner approaches within range. Of the numerous natural enemies, hawks, owls, crows, skunks, minks, wild cats, and foxes are very destructive, and in certain localities a species of tick often infests the birds. Among the birds of prey, the Cooper hawk, goshawk, red-shouldered hawk, barred owl, and great horned owl are their worst enemies. At Marshall Hall, Md., the writer found a crow plundering the nest of a grouse. Almost everybody who is personally familiar with the habits of the fox has found it feeding on game birds. At Chocorua the writer came upon the den of a red fox about which were strewn tail feathers of the ruffed grouse. Owners of shooting preserves will do well to destroy systematically all vermin injurious to game. The bird should have better protection also from man. Massachusetts still permits land-owners to snare grouse on their own lands during October and November. Such destructive and unsportsmanlike practices should be prevented everywhere by well-enforced laws. The abominable practice by summer campers of potting grouse when they have young should also be punished by a strict enforcement of the law. In sections where grouse are decreasing under persistent gunning the open season should be further limited or even eliminated for a period of years until the birds have recovered something of their former numbers. (In Ohio the season has been closed until 1908, in Illinois until 1909, and in Missouri until 1910.) A reasonable limit to the day's bag should be set by law. Kansas, Maine, and Wisconsin restrict the number to 15; Montana and Oregon to 10, Ohio to 6. Vermont, Pennsylvania and Connecticut have a limit of five grouse per day to a gun, and in the latter state, as well as in New York, no more than 36 can be taken in a year. By similar laws other states can aid in the preservation of the bird.

The grouse in captivity often becomes tame. Sometimes, indeed, it takes kindly to the henhouse. It has laid in captivity, and its eggs found in the woods have been hatched under domestic hens, but thus far nothing like successful grouse culture has been approximated, though there appears to be no reason why under proper conditions it should not be successful. Comprehensive knowledge of the bird's food habits should assist in solving the problem.

Food Habits.—The food habits of the ruffed grouse have been investigated in connection with the present paper by the examination of 208 stomachs and crops. This material represents food taken in every month, but chiefly in the colder half of the year. New York supplied more material than any other section; Canada, Pennsylvania, and Massachusetts came next; and Nebraska, Virginia, Maryland, Kentucky, New Hampshire, Iowa, Illinois, Minnesota, Michigan, Wisconsin, and South Dakota each contributed a smaller part. Analysis of the food showed 10.92 per cent of animal matter and 89.08 per cent of vegetable matter. The animal food is almost all insects. The vegetable food consists of seeds, 11.79 per cent; fruit, 28.32 per cent; leaves and buds, 48.11 per cent, and miscellaneous vegetable matter, 0.86 per cent. The insect food proper includes grasshoppers, 0.78 per cent; caterpillars, 1.15 per cent; beetles, 4.57 per cent, and miscellaneous insects, 3.86 per cent. Some miscellaneous animal matter, made up of spiders and snails, is also eaten. The ruffed grouse eats a somewhat smaller proportion of insects than the bobwhite, but, like it, feeds on them to a large extent in the breeding season.

Insect Food.

Insect Food.—Grouse shot by the writer at Chocorua, N. H., in Sept., 1898, were feeding largely on the red-legged grasshopper, which was unusually abundant in pastures where the birds foraged. They had picked up also long-horned grasshoppers and a few black crickets. Crickets often swarm in fields during fall, and offer tempting morsels to birds. The ruffed grouse occasionally eats such caterpillars as cutworms, army worms, cotton worms, the red-humped apple worm, and the oak-leaf caterpillar. A number of observers, among them Doctors Fisher and Weed, report that it feeds on oak caterpillars.

The ruffed grouse, like the bobwhite, prefers beetles to any other insects. It takes almost as many of them as of all other kinds put together, including even such small ones as the clover weevil. It likes also the injurious leaf-eating beetles, destroying even the notorious potato beetle. It eats the pale-striped flea beetle as well as many other leaf beetles, including *Systema hudsonias*, *Disonycha caroliniana*, *Choetocnema* sp., *Galerucella sagittariae*, and the grapevine pest, *Adoxus vitis*. By scratching, the grouse unearths many pests not found by other birds, notably beetle larvae, click beetles, and May beetles, including *Lachnosterna hirsuta*. It also consumes another injurious beetle, *Dichelonychia* sp., closely related to the May beetles and resembling them in habits and appearance. It scratches up many ground beetles belonging to *Pterostichus*, *Anisodactylus*, *Harplus*, and other genera. Beetles of other families also—fireflies, metallic wood borers, and *Calitys scabra*—are in the food list.

The grouse feeds also on such miscellaneous insects

as flies, bugs, ants, and such other Hymenoptera as sawflies and ichneumon flies. A large proportion of the flies are slow-flying species, like crane flies, which are preyed upon by many other kinds of birds. Bugs, however, are much more often destroyed by bobwhite and the ruffed grouse than by other birds. The ruffed grouse has been known to prey on the chinch bug, which at times is the most injurious insect in our country, and seldom destroyed by any except gallinaceous birds. Farmers who permit market hunters to rob them of their game should remember this fact. The grouse picks up also many other bugs, among them predaceous species like the ambush bug and the assassin bug. They eat also homopterous insects, including leaf hoppers and buffalo tree hoppers.

Like many other birds, the ruffed grouse eats ants, frequently including such large species as *Camponotus pennsylvanicus*. Among small ants may be mentioned the pavement ant. Several species of the useful parasitic ichneumons are occasionally taken, and as an offset such foliage-destroying insects as sawflies, including adult forms of *Nematus* sp. and larvae of *Lophyrus* sp. A peculiar long-bodied hymenopteron (*Pelecinus* sp.) also has been noted. The queerest article of food, perhaps, is the galls produced by insects (*Cynipidae*). The ruffed grouse shows a marked liking for these odd growths, which contain a few tiny larvae. The common semidomestic pheasant of England has the same taste. The grouse usually selects galls growing on oaks, often those produced by species of the genus *Amphibolips*. A bird shot in Lunenburg, Mass., in October, had eaten twelve of these oak galls, although at that time other food was abundant.

Few invertebrates other than insects were found in the investigation of the food of the grouse. The miscellaneous animal food, however, included representatives of such Myriapoda as the thousand-legs, of the order Diplopoda, and such Arachnida as harvest spiders, jumping spiders, and ground spiders; snails of the genus *Helix*, and also shell-less snails, or slugs, including *Limax* sp. and *Tebennophorus carolinensis*. (To be Continued.)

TRADE NOTES.

Averages Reported.

Bay City Texas, Jan. 31 to Feb. 1.—F. C. Riehl, first general average, 432 out of 440, shooting "New E. C." (Improved); W. R. Crosby and H. B. Money, both shooting "New E. C." (Improved), tied for second general average, 424 out of 440; first amateur average and third general average was won by an amateur, shooting "DuPont," 423 out of 440; F. A. Weatherhead, Red Oak, Ia., second amateur average, 422 out of 440, shooting "Infallible;" A. M. Hatcher, Bristol, Va., third amateur average, 419 out of 440, shooting "DuPont."

Columbus, O., Feb. 1.—J. R. Taylor, first general average, 224 out of 250, shooting "DuPont;" C. O. LeCompte, shooting "Infallible;" R. L. Trimble shooting "DuPont," and Geo. Burns, Cleveland, O., shooting "New E. C." (Improved), tied for second general average on 220 out of 250; Mr. Burns also won first amateur average, with this same score; R. S. Rhoads, Columbus, O., second amateur and third general average, 218 out of 250, shooting "DuPont;" H. E. Smith, Columbus, O., third amateur average, 216 out of 250, shooting "DuPont."

At Detroit, Michigan, February 14th to 16th last, the Gillman & Barnes International Pigeon Trophy was won by J. R. Taylor, Newark, O., who scored 25 straight. Mr. Alex. Tolson of Detroit, Michigan, was second with 24 out of 25. Both the above shot "DuPont" smokeless.

As Usual, Winchester Shells Lead.

The Sunny South Handicap, the most important trapshooting event of the South and the prize eagerly sought after by all Southern shooters, was won by W. R. ("Billy") Crosby from a very large field of contestants. Mr. Crosby also captured the high professional average for the entire shoot, which was held at Brenham, Texas, January 22nd, 23rd, 24th, 25th, 26th and 27th. Mr. Crosby, as usual, shot the celebrated Winchester "Leader" shells. The high amateur average for this shoot was also won with Winchester "Leader" shells. Thus the shells that have been first in records and averages for the last six years start another year with victories.

Turning to the North, the Hamilton Tournament, the big Canadian shoot, saw a clean sweep for Winchester shells. Mr. J. R. Taylor and Mr. J. A. R. Elliott won first and second high professional averages, and Mr. C. E. Doolittle and Mr. George Burns captured first and second high amateur averages for the tournament, and in the big live bird event Mr. J. R. Taylor, Mr. M. E. Fletcher and Dr. W. W. Green won first, second and third. It is needless to state that all these gentlemen shot the Winchester "Leader" shells exclusively.

Mr. Ralph Trimble, shooting Winchester "Leader" shells, did some extra fine shooting at the annual mid-winter tournament of the Columbus, Ohio, Gun Club, on February 1st. Out of 225 targets shot at on average he scored 220 breaks.

At the Cumberland, Maine, mid-winter tournament, which took place on January 18th, and the Montclair, New Jersey, mid-winter tournament, which was held on January 20th, there were present as the shooting stars of these tournaments shooters that used the time tried and reliable Winchester "Leader" shells, the "shells the champions shoot," and the ones that are not only "Leaders" by name, but leaders by nature.

WOOL AND MUTTON.

Keep salt before the flock all the time.
Dip the ticky lambs if you would have them grow.

Keep some of the best of the young sheep to take the place of the old ones.

Early maturity is just as advantageous to the breeder and feeder of sheep as to any other stockman in the world.

Don't allow the sheep to rush or squeeze through doors or gates. It may injure the unborn lambs.

Don't house the sheep too closely. Cold is not as bad as damp, foul air. Give shelter instead of warmth.

Sheep and wool are ruling very high. Let the beginner keep a level head and start at the bottom and learn the business.

You should be feeding for the lamb crop. The ewes must grow wool lambs and mutton all at once. Feed accordingly.

The best way to clean a wood pasture where the young sprouts are becoming troublesome is to turn in the sheep.

Mutton breeds of sheep do not depend on waste lands and hillsides to become profitable. Good sheep require good pastures, and pay well. Wool is simply a product of the sheep, and no farmer can make sheep pay who depends on wool only for his profit.

To make early lambs grow, provide a pen into which the lambs can go, but which restrains the ewes from entering in the pen. Place a pan of ground oats and let the lambs help themselves; the ewes should also be fed on ground oats.

SAVED \$100.00

Hazelhurst, Miss., March 21, 1906.
DR. R. J. KENDALL CO.,
Gentlemen—I have a \$100.00 horse that a friend of mine gave me for \$10.00 provided I would take him out of town and save him from paying to have him hauled out when dead. The horse had Sweeney, both shoulders, but your Spavin Cure brought him out all O. K. Respectfully, L. G. Bird.

The remedy that endures, curing thousands of horses annually is
Kendall's Spavin Cure.
The standard for two generations of Spavins, Curbs, Splints, and all forms of Lameness.

Price, \$1.00 for \$5.00. Greatest known liniment for family use. All druggists sell it. Accept no substitute. The great book, "A Treatise on the Horse," free from druggists or

Dr. B. J. Kendall Co., Enosburg Falls, Vermont.

FOR SALE.

A HANDSOME PAIR OF COBBY BUILT coal black Geldings; five years old; 15 1/2 hands high. By a son of McKinnery out of standard bred mares. This is a thoroughly high-class park or road team and has style and manners that would win in a show ring. They are broken to stand, walk and trot; are fearless of all objects on road and in am cars; guaranteed to drive single or double, or on the lead in four-in-hand, and sound and kind in every particular. Address H. H. RAND, The Renaissance, corner Franklin and Fell Sts., San Francisco, Cal.

SEYMOUR WILKES REG. No. 0232.
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:10 1/4 and Joe Eviston (3) 2:22

Will make the Season of 1906 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race at a game racehorse. No horse in California can show a greater proportion of large hands, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds and is 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be known to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer and Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George 8ables, 408 Rush st. San Francisco

LINWOOD W. 32853

RECORD AS A 2-YEAR-OLD 2:20 1-2

Sired by GUY WILKES; dam, the great blood mare LINDALE by Sultan Jr. 12771

LYNWOOD W. was a sensational colt trotter and is fast proving him self to be a great sire, although he never covered but eight standard bred mares prior to 1905. Still he has to his credit Diamond S 2:30, Hipp r W 2:24 1/2, Sonoma Queen 2:45, Sonoma May 2:24 1/2, all trotters with records made in 1905. The following are the only colts that ever had any training. They have worked as follows: R W P 2:12 1/4, Charles B-Iden 2:12 1/4, Sonoma Girl 2:15, Sir H (3) 2:16 1/4, Diamond S 2:17, Ayres 2:18, Sonoma May 2:19 1/2, Jim V 2:25, Ella V (3) 2:21, Clipper W. 2:21, Sonoma Queen (3) 2:22, Sonoma Star (3) 2:27 1/2, Dennis 2:30, Frank G. (2) 2:30.

Will make the Season of 1906 at Santa Rosa.

SERVICE FEE \$25 H A CARLSON Owner, Santa Rosa, Cal.

ALMADEN 2:22 1-4 by DIRECT 2:05 1-4

Dam by McKINNEY 2:11 1-4

A perfect colt trotter, winning the Breeder two year-old stake in 1904 and Occident Stake (7 heats) in 1904. Will make the Season at Sacramento Race Track in charge of M. L. LUSK. Address 631 K St., Sacramento, Cal.

CLOSELY RELATED TO JOHN A. McKERRON 2:04 1-2.

T. C. 2:30 Trial 2:20

Sire, NUTWOOD WILKES 2:16 1/4, sire of John A. McKerron 2:04 1/2, Tidal Wave 2:09, Miss Idaho 2:09 1/4, Who Is It 2:10 1/4, Stanton Wilkes 2:10 1/4, Cresco Wilkes 2:10 1/4, etc. etc. Dam, ZETA CARTER by Director 2:17, sire dam of John A. McKerron 2:04 1/2, Ozanam 2:07, Little Thorne 2:07 1/4, Leonardo 2:08 1/4, etc. etc. second dam, Lida W. 2:18 1/4 (dam of Nutwood Wilkes 2:16 1/4, etc.) by Nutwood 600, greatest sire of broadmareds that ever lived, third dam by Geo. M. Patchen Jr. 31; fourth dam, Rebel Daughter by Williamson's Belmont.

T. C. is one of the best bred young stallions in California. A two-year-old filly by him has been one of the sensational young trotters at Pleasanton this winter, and is as handsome as a picture. T. C. will make the season

At Alameda Race Track. Fee \$30 the Season. with usual return privilege.

Excellent pasturage for mares at reasonable rates. Send to the undersigned for card containing tabulated pedigree and other information. I will take a few horses to train for road or track.

GEORGE T. ALGERO, 1207 Eagle Ave., Alameda, Cal.

CRABET ARABIAN STUD

CRABET PARK, THREE BRIDGES, SUSSEX, ENGLAND.
and
NEWBUILDINGS, SOUTHWATER.

The largest breeding stud of Arabians in the world. The conditions under which these horses are bred at Newbuildings produce a type unrivalled for quality and hardiness. The unique knowledge of the breed gained by the owners in Arabia enables them to guarantee purity of blood of the choicest strains, some of which are now extinct in the East. Stallions and mares constantly supplied to breeders throughout the Colonies and on the Continent. A few mares suitable for polo, hacks and quiet in harness generally for sale. For further particulars address
GUY CARLETON, Manager, Carpenters, Southwater, Sussex, England.

THE NEW ENGLAND BREEDERS CLUB

ANDREW MILLER, President.

R. T. WILSON JR., Vice-President.

OFFICE: The Windsor Arcade, 46th Street and 5th Avenue, New York City.

RACE COURSE: Rockingham Park, Salem, N. H.

Stakes to be Run at the Summer Meeting, 1906
TO CLOSE ON THURSDAY, MARCH 15, 1906.

THE NEW ENGLAND HANDICAP, Guaranteed Cash Value \$5000, for Three-Year-Olds and Upward

of the

Sacramento Valley Stock Farm

STALLIONS, BROOD MARES,
and Young Stock Suitable for Training.

CH. STALLION, FOALED 1902, "DILLCARRA."—Sire Sidney Dillon; 1st dam, Guy-cara, 2:18½, by Guy Wilkes, 2:15½; 2nd dam, Biscara (dam of 5 in list, 4 below 2:20), by Director 2:17; 3rd dam, Biscara (dam of 5 in list, including the great stallion Pancoast and other producing sires and dams), by Harold 413 (sire of Maud S); 4th dam, Belle (dam of Belmont, sire of Nutwood, McCurdy's Hambletonian 2:26½, and other producing sires and dams), by Mambrino Chief 11; 5th dam, Belle Lupe, by Bellfounder (Brown's), son of Imp. Bellfounder and Lady Allport by Mambrino, a son of Imp. Messenger, the next dam of Brown's Bellfounder being by Tipton Sahib, son of Imp. Messenger, and the next dam by Imp. Messenger himself.

This young stallion's pedigree is unexcelled, his sire and the sires of his 1st, 2nd, 3rd and 4th dams having produced world-record holders, as well as many others the gamest and best of all times. In looks and make-up he is as great as his pedigree, unexcelled. Although never trained, his natural speed is phenomenal. For the production of world-record holders, he should excel his sire or the sire of his 1st, 2nd, 3rd or 4th dam, each of which enjoy fame in this respect. As a candidate himself for the record he is entitled to much consideration.

CH. STALLION, FOALED 1902, "FLOSSNUT."—Sire Nutwood Wilkes 2:16½; 1st dam, Flossie, by Cornelius (11335), sire of Connelita 2:16½, etc., by Nutwood, 2nd dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 3rd dam, Eva Bulwer, son of Grey Eagle; 4th dam, Emma Taylor by Imp. Glencoe; 5th dam, Lancesse 4th dam of Palo Alto and 5th dam of Alcyone, Alcantara, etc., by Lance.

The blood lines in this young stallion's pedigree represented the male line of Nutwood Wilkes laid upon two crosses of Nutwood, one of Echo, one of Geo. M. Patchen Jr., and a thoroughbred female line tracing to Lancesse, Alcantara, Palo Alto, and many other great ones. The sires in the thoroughbred female line down to Lancesse have each produced the dams of trotters. The high degree of natural speed, strength and size, Nutwood type of conformation and make-up of this young stallion make him worthy of use in the stud and worthy of the opportunity to earn a low record on the track.

BAY MARE, FOALED 1903, "FLOWERET BELLE."—Sire Monbells 2:23½, son of Mendocino 2:12½, by Electioneer and Beautiful Bells (world's greatest brood mare), by The Moor; 1st dam, Floweret (dam of 2 in list and full sister to Wildflower, Manzanita, etc.), by Electioneer; 2nd dam, Mayflower 2:30½ (dam of Wildflower, Manzanita, etc.), by St. Clair 16675.

The sire of this filly represents Electioneer's most famous speed producing line, the Electioneer-Beautiful Bells cross. The dam of this filly represents a great performing and producing line that first made Electioneer famous through the great Wildflower, Manzanita, etc., the Electioneer-Mayflower cross. This filly was bred to Dillcara in 1905, and the pedigree of the produce will be composed almost exclusively of the greatest bloodlines of the greatest producers in the trotting world. Her produce from such mating will always rank of the highest value for breeding purposes, as well as for racing.

CH. MARE, GRISETTE, FOALED 1902.—Sire Marengo King 2:29½, son of McKinney 2:11½ and By By by Nutwood; 1st dam, Lisette by Abdallah Wilkes 7562 (sire of Wauco 2:14½, etc.), son of Geo. Wilkes; 2nd dam, Musette by Startle 290 (sire of 11), son of Hambletonian 10; 3rd dam, Beckie Sharp by Billy Denton (sire of 2), son of Hambletonian 10; 4th dam, Kent Mare by Black Hawk 5.

In this filly's pedigree we have almost exclusively the producing male lines of Hambletonian 10. Her sire traces to that speed progenitor through McKinney, crosses of Nutwood and Dictator being thrown in. We get to Hambletonian 10 in the male lines of the sire of the 1st, 2nd and 3rd dams very quickly through only one or two generations of producing sires, something phenomenal for close up breeding to Hambletonian 10. This filly was bred to Dillcara in 1905, and the produce will probably have in its pedigree more crosses of Hambletonian 10 than any other horse, following the suggestion, "The way to breed trotters is to get all the blood of Hambletonian 10 that you can, and then get more." Stout and well formed as this filly is, her produce should be not only speedy but useful in the racing game. Not broken to drive.

CH. MARE, FOALED 1902, "BESSIE SWEET."—Sire Diablo 2:09¼; 1st dam, Bessie Roan by Hock Wilkes, son of Guy Wilkes; 2nd dam, Bessie by Ventura 2:27¾; 3rd dam, Lady Emma 2:39¾, by Paul's Abdallah, son of Hambletonian 10. The excellent brood mare sire Ventura 2:27¾, a thoroughbred, being the sire of the 2nd dam, a real good half-thoroughbred son of Guy Wilkes being the sire of the first dam, Diablo 2:09¼, being the sire of the filly herself, the 2nd and the 3rd dams having been about the best mares ever driven in San Francisco for speed at the Park, should make this filly most valuable for breeding purposes, she being of large size and stout and blocky. Was never bred or broken.

CH. MARE, FOALED 1889, "FLOSSIE."—Sire Cornelius 11335 (sire Carmelita 2:10¼, etc.), son of Nutwood 2:18½, and Jennie G. 2:26½ by Echo, he by Hambletonian 10; 1st dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 2nd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 3rd dam, Emma Taylor by Imp. Glencoe; 4th dam, Lancesse (to whom trace in female line Alcyone, sire of McKinney, Alcantara, Palo Alto, etc.), by Lance, son of American Eclipse. In this pedigree we have top crosses of Nutwood and Echo, great brood mare crosses, laid upon a thoroughbred female line going to Lancesse, the 4th dam of Alcyone (sire of McKinney), Alcantara, Palo Alto, etc., the sires in this female thoroughbred line being the most noted for producing the dams and grandams of trotters. Lodi, the sire of the 1st dam, produced the dam of Pedlar and others; Bulwer was by Grey Eagle, whose daughters and grand-daughters produced great trotting performers; Imp. Glencoe's grand-daughters produced several trotters. The dam of this filly was a sister to Ruth Ryan, who produced Strathern, sire of Plunkett 2:14½. Sons of Flossie, by well bred stallions, should become great sires, as well as performers. She is a very large, stout mare, of the Nutwood type. Bred to Dillcara in 1905.

BAY MARE, FOALED IN 1894, "FLOSSIE HOCK."—Sire Hock Wilkes, son of Guy Wilkes and Eda (thoroughbred), by Hock Hocking; 1st dam, Flossie by Cornelius 11335, son of Nutwood and Jennie G. 2:26½ by Echo. (See Flossie for continuation.) This pedigree represents a Guy Wilkes-Nutwood-Echo cross upon an excellent thoroughbred female line. Not bred in 1905. Never broken. A stout, well made mare. No living produce.

BAY MARE, FOALED 1894, "BESSIE HOCK." Bay Roan Mare, foaled 1895, "Bessie Roan"; Ch. Mare, foaled 1898, "Bessie Babe"; three full sisters; Sire Hock Wilkes, son of Guy Wilkes 2:15½, and Eda (thoroughbred) by Hock Hocking, son of Ringgold by Boston; 1st dam, Bessie by Ventura 2:27¾, thoroughbred son of Williamson's Belmont; 2nd dam, Lady Emma 2:39¾, by Paul's Abdallah, son of Hambletonian 10. These three mares, full sisters, are each stout, smooth turned, extra well formed; were never broken to drive or ride. Their sire, Hock Wilkes, was a very stout, speedy, though crippled, half-thoroughbred son of Guy Wilkes. Their 1st and 2nd dams were about the speediest and best road mares driven in San Francisco and speeded in the Park. In this pedigree we have a top cross of Guy Wilkes laid upon a female line with Ventura, a thoroughbred brood-mare sire, for the sire of the first dam, and a son of Hambletonian 10 for the sire of the second dam. extra stout bloodlines for the production of game trotting speed.

ALSO SOME TWO-YEAR-OLDS out of dams whose pedigree is given above, suitable for training and breeding purposes, and entered in Futurity Stakes. One grand 2-year-old stallion.

BUDD DOBLE, San Jose, Cal.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (2 y. o.) 2:21¹/₄, (3 y. o.) 2:12, (a) 2:09¹/₄, Leonora 2:12¹/₄, Polka Dot 2:14¹/₄, etc. Bay Stallion, 15.3¹/₂ hands; weight 1100 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.Sire, ELECTIONEER 125, son of Hambletonian 10. First dam, MANO (dam of MENDOCINO) (3) 2:19¹/₄, Electant 2:19¹/₄, Morocco (3 y. o. trial 2:23) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W (3) 2:17¹/₄, Hyperion 2:21¹/₄, Memento 2:25¹/₄, Mithra (p) 2:14¹/₄) by Hambletonian Jr 1882; third dam, Glida (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm. Sire, MCKINNEY 8818 (record 2:11¹/₄). First dam, HELENA 2:11¹/₄ (dam of Wildnuttling 2:11¹/₄; Dobbel 2:22, Hyta (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at PALO ALTO STOCK FARM. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.McKinney, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

KENNETH C. 2:17 {THREE YEAR OLD RECORD}

Sired by MCKINNEY: dam MOUNTAIN MAID (dam of Tom Carnal 2:08¹/₄) by Cresco 4908 (sire of Allie Cresco 2:13, etc.); next dam by Cloud.

Will make the Season of 1906 at

PLEASANTON, CAL.

KENNETH C was one of the fastest of an exceptionally good lot of three-year-olds that raced in California in 1905. He is a splendid individual, has size, style and quality, and the grandsires and granddaughters of McKinney through Kenneth C. will be equal to any in the land.

Terms \$30 for the Season,
\$15 for Single Service.

Address

S. K. TREFRY, Pleasanton.

MONTEREY 2:09 1-4 Reg. No. 31706

(Sire of IRISH 2:08¹/₄, Fastest Four-Year-Old Pacer of 1904).By SIDNEY (grandsire of Lou Dillon 1:58¹/₄); dam, HATTIE (also dam of Montana 2:16) by Commodore Belmont 340. MONTEREY 2:09¹/₄ stands 15.3 hands, weighs 1200 lbs. and is one of the finest individuals on this Coast. FEE, \$50 for the Season.YOSEMITE By MONTEREY 2:09¹/₄. Dam, LEAP YEAR 2:26 (full sister to Iago 2:11) by Tempest 1881, son of Almont 33.

YOSEMITE is a very high-class young trotter, and as he will be trained this year he will be allowed to serve only six choice bred mares. FEE, \$25 for the Season.

Will make the Season at SAN LORENZO and ALAMEDA.

I have leased a fine, roomy barn with 14 large box stalls on Sherman street, four blocks from the race track, Alameda, and am prepared to do public training. Would like to get two good trotters and a promising three-year-old to prepare for the races this season.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 2:19 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½. Son of Electioneer 1:25; dam AL HA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:32; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season \$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGH AND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11

GREATEST SON
OF
McKINNEY 2:11½

Will make the Season of 1906, from February 1st to June 1st,

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:05½; Charley T 2:13½, trial 2:10½; Italia 2:11½, over half-mile track, trial 2:08½; Belmont three-year-old record 2:15½, trial 2:12½; Zombrowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:55½; Tea Day 2:19½, trial 2:13½; Lady Zombro 2:21, trial 2:10; Lord Kitchener 2:24½, trial 2:19½; Zealous 2:56½, trial 2:30; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats to standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEO. T. BECKER, 3949 Figueroa St., Los Angeles, Cal.

NEAREST 35562

THE STANDARD TROTTER STALLION

Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station,
LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I. 2:08½ and 7 others in the 2:15 list); dam Anna Belle (3) 2:27½ (dam of Robert I. 2:08½, Maud Murray 2:12, MURRAY M. 2:14 and La Belle (3) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8. MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hand and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand finish plenty of substance, excellent disposition. He has a stout back, strong loins and stifles good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF. H. B. FREEMAN, University Station, Los Angeles, Cal.

KINNEY WILKES

Sired by McKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zolock 2:05½, You Bet 2:07, Jennie Mac 2:09, etc.

First dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of Fed Kohl 2:07½, Hulda 2:08½, Lesa Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezella 2:10½, K. Thelma A. 2:11½, etc., etc., and grand sire of John A. McKerron 2:04½; second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:21, Native Son 2:20½, and Silver Spray 2:28) by Arthurton 3:35; third dam, Nancy by Geo. Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best bred of the McKinneys.

Will make the Season at

MAMBRINO CHIEF JR. 11622

Sire of Dilligan 2:15½, George Washington 2:16½ (sire of Stella 2:15½, Campaigner 2:26½ and Princess W 2:29½), Trilby 2:21½ and Sweet Rosie 2:28½. By McDonald Chief 3583 (sire of 4 and sire of dams of 7 in 2:30); dam, Venus by Mambrino Patchen 58.

Terms, \$20 for the season; usual return privileges. Good pasturage \$3 per month.

Both of the above
Horses at my barn.

THOMAS SMITH,

1021 Georgia St., Vallejo, Cal.

More Standard Performers Than Any Other SIDNEY Stallion in California.

SIDMOOR 2:17¾

SIRE OF

ENOCH 2:12½, GENERAL 2:14½, TEDDY THE ROAN 2:17½, LITTLE MISS 2:17½, MARCHIONESS 2:29, LILLIAN SIDMORE 2:24½ and TIP OQUANNO (trial) 2:09½, SID ABBOTT (trial) 2:18, JAKE F. (trial half mile) 1:08.

SIDMOOR 2:17¾ is a dark bay stallion and a grand individual in every respect. He is one of the best producing sons of Sidney, and with the right cross will get Lou Dillon speed.

Season 1906 at Concord Race Track and at Pacheco.

Fee \$30 for Season.

Address

JOHN OTT, Pacheco, Cal.

CONSTRUCTOR 39569

By McKINNEY 2:11½. Dam and Grandam Great Brood Mares.

FULL BROTHER TO TOM SMITH 2:13 1-4

First dam DAISY S. (dam of Tom Smith 2:13½, General Vallejo 2:20½, Little Mac 2:27½, Sweet Rosie 2:28½) by McDonald Chief 3583; second dam Fanny Rose (dam of Columbus S. 2:17, George Washington 2:16½, who sired Stella 2:15½, Campaigner 2:26½, etc.); third dam Jenny Lind (dam of Prince Allen 2:27 and also dam of Fanny McGill, dam of Scotty 2:19½, Trilby 2:21½, etc.).

CONSTRUCTOR is one of the handsomest sons of the great McKinney on the Coast. He stands 15 hands 2¼ inches over the withers and 15 hands ¾ inches over the loins and weighs 1100 pounds. He never made a regular season in the stud, but was bred to several mares when three years old and all of his got are of good size and good lookers.

Will Make the Season of 1906 at Thomas Smith's Barn, Vallejo, Cal.

Service Fee \$25, with usual return privilege.

For further particulars address

JAS. A. SMITH, 1021 Georgia St., Vallejo, Cal.

McKINNEY'S FASTEST ENTIRE SON

ZOLOCK 2:05¼

Reg. No. 34471.

Great Race Horse and Producing Sire.

SIRE OF

Ambush (3) 2:14½
Delilah (3) 2:14½
Bystander 2:14½
Sherlock Holmes 2:15½
Dixie S 2:27
Conchita 2:29

Has 10 Three-year-Olds that worked trials in 1905 as follows: LILLIAN ZOLOCK 2:14, KINNEY WOOD 2:18, CLOPATRA 2:15, RED LOOK 2:18, ZOLLIE 2:18, IN AUGURETTA 2:22, HYLOCK 2:25, MAJELLA 2:25, ADALANTE 2:26, BOLOCK 2:27, and 3 Two-Year Olds as follows: WENZA 2:24, BONNIE JUNE 2:27, IZALCO 2:30, and 12 others now in training that can show quarters in from 33 to 36 seconds.

ZOLOCK'S Sire is the Great McKINNEY 2:11 1-4

His Dam is the great broodmare GAZELLE 2:11 1-2 (by Gossiper 2:14½) dam of ZOLOCK 2:05¼, Z-phyr 2:07½; second dam the great broodmare Gipsy (by Gen Booth 2:30½) dam of Gazelle 2:11½, Delilah (3) 2:14½, Ed Winslip 2:15, Willets (mat.) 2:17, Dixie S 2:27, and grandam of Col Green (trial) 2:10½, third dam Echo Belle (grandam of Conn 2:15½) by Echo 4:02; 4th dam by Lumox and 5th dam by Grey Eagle.

ZOLOCK stands 16 hands, is a beautiful brown and a horse of grand proportions. All his colts are good-headed, and there has never been one that went lame.

Will Make the Season of 1906 at PLEASANTON, CAL.

Terms for the Season, \$75. Season starts February 1st and ends June 1st. Mares will be cared for in any manner desired, but no responsibility for accidents or escapes.

Also, the Three-Year-Old Stallion

IZALCO

by ZOLOCK 2:05¼; dam GIPSEY dam of Gazelle 2:11½, Delilah 2:14½ and three more in the list. IZALCO is a full brother to Delilah (3) 2:14½.

Get the Blood that Produced the Champions, SWEET MARIE and LOU DILLON, by Breeding to

GRECO

BLACK COLT, FOALING 1906. Sire, McKINNEY 2:11½, sire of SWEET MARIE 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, Th. Roman 2:09½, Dr. Hook 2:10, Coney 2:02, China Maid 2:05½, You Bet 2:07, Jennie Mac 2:09, Zolock 2:05½.

Dam, ALLEN 2:26½ (dam of Mowitza 2:30½, Sister 2:20 and GRECO 2:32, trial 2:30) by Anteo 2:16½, sire of dams of Directum Kelly 2:08½, Grey Gem 2:09½, W. Wood 2:07, etc.

Grandam, LOU DILLON (dam of LOU DILLON 1:58½, Redwood 2:31½, Ethel Mack 2:25 and Allen 2:26½) by Milton Medium 2:25½ (sire of 2 and dams of 5) by Happy Medium 2:32½, sire of Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:30 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO 24586

Rec. 2:12¼ Sire, PALO ALTO 2:08 3-4
Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12½, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$20 due when mare is bred and
\$20 payable when mare is known to be in foal.

For further particulars address

H. S. HOGBOOM,
Woodland, Cal.

DUCK SHOOTERS! CAMPBELL'S

QUESTION---Why is it that so many excellent wing shots cripple fine birds?
ANSWER---Because they don't use

BALLISTITE

which never fails to kill clean.
REMEMBER---One (1) dead bird in the pocket is worth two (2) in the tulle.

EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.
The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.
It is very adhesive and easily applied to a watery as well as a dry sore.
Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1905 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.
It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

Cincinnati, O., Sept. 24-29.

THE STATE BOARD OF AGRICULTURE has an opportunity before it by which it can do a vast amount of good for the State of California, and realize for the taxpayers some of the results that were expected when the people paid its debts and established it in new and commodious quarters. Railroad officials all predict a very large immigration to California this summer from the Eastern States, and as the prospects for good crops of all kinds are most excellent, the opportunity to make a showing of the State products at this fair was never better nor so easy to realize. Oregon has been giving a State Fair for years that puts ours to the blush, and yet California's population and resources are immensely greater than those of our sister State. The men who have managed the Oregon fair, however, have been imbued with the proper spirit and have made the exposition of their State's resources the main feature of their fair. Great rivalry has been developed between counties and the county exhibits have been very fine and drawn hundreds of people to see them. The displays of live stock have been made as complete as possible, and auction sales of the same during the fair have been a profitable feature. The plain people, those that are working with hand and brain to build up the State of Oregon and make its homes numerous and prosperous, are the ones that are catered to first. Horse racing they have had regularly, and it has been of good class and popular with the people, but the gamblers and touts and skin game fraternity are allowed no place on the fair grounds. The writer visited the Oregon fair two years ago and saw nearly every church in Salem running luncheon rooms on the fair grounds during the day and evening. Instead of selling the restaurant privilege to one person, as they do in California, anyone was permitted to serve meals by paying a nominal license, and the church people availed themselves of this opportunity to make a little money. We mention this to show that the Oregonians have seen the wisdom of getting all classes interested in their fair, and that they have succeeded. California can have as good a fair and a much larger one if the directors will bend their efforts toward giving one. It must be an exhibit of the State's resources and not a week of running racing with a "skindicate" book. It must be conducted along the same lines that have made other State fairs so popular and successful and not in the manner which has brought the California State Fair into bankruptcy and disrepute. It can be done. There is money enough appropriated—\$5000 in excess of the amount the Oregon State Board receives. Governor Pardee professes to a great desire to see the California State Fair made what it was originally intended. There are about six directors of the board whose terms have expired. Surely the Governor should be able to find six men to fill these places who can make the fair a success. It should not be a very difficult task, and it is up to him.

MR. F. W. DURBIN, of Salem, Oregon, the hustling secretary of the Oregon State Fair Association, is in California visiting live stock breeders, horsemen and others and explaining to them the advantages of making exhibits or racing their horses at the Oregon fair next September. The Oregon State Fair is one of the best managed and best patronized fairs held in the United States. It is not unusual for twenty thousand people to pass through its gates in one day, and the sales of live stock held during the fair are always very successful. While in Sacramento last Monday Mr. Durbin attended the meeting of the California State Board of Agriculture, and gave the directors many pointers on the proper way of managing a fair, at the same time using his best efforts to induce the board to make the California State Fair a member of a Pacific Coast circuit of fairs, a suggestion that should be favorably acted upon. Mr. Durbin is certain that many of the leading Oregon breeders of cattle and other livestock can be induced to exhibit their herds at the California State Fair, and that California, Oregon and Washington fairs can organize a circuit that would be one of the most important and successful in the whole country. A committee of three members of the California State Board, consisting of Directors F. H. Burke, Geo. W. Kingsbury and H. B. Stabler, were appointed to confer with Mr. Durbin on his return next week from Los Angeles, when he will more fully explain to them some of the plans which have made the Oregon State Fair so successful.

TRAIN YOUR TWO-YEAR-OLDS. There will be some good purses for two-year-old trotters and pacers in California this year, that will make it worth while for owners to train their colts and fillies of that age

and race them. In the Breeders' Futurity for foals of 1904, there have been 125 two-year-olds paid up on. Of course quite a number of these are already being worked with the idea of starting them in the two-year-old trotting or pacing divisions this year, for which the stakes are \$1250 and \$750 respectively, but a large number will not be started until the three-year-old events are called next season. In the Occident and Stanford stakes for 1907 there are many colts and fillies named that are not entered in the Breeders' Futurity and to give them and other two-year-olds an earning capacity the California State Board of Agriculture proposes to give two rich stakes this year—\$1000 for two-year-old trotters and \$1000 for two-year-old pacers.

This is the best move in the interests of the breeders and owners of light harness horses the State Fair Association has made in some time. We do not advocate giving two-year-olds long and hard campaigns, but moderate training and racing will benefit any colt and the events that will be provided for them by the Breeders' Association and the State Fair will give owners a chance to start their colts and earn a goodly sum. Those who have two-year-old trotters or pacers should begin to work them with the idea of starting them this year as the purses and stakes will be worth winning.

A LETTER from our friend, Mr. George Bement of Melrose, states that he is unable to give us any data as to the race which took place at Napa in 1864, which was mentioned in these columns last week, as he did not locate in Napa until four years later. We are very sorry to hear that Mr. Bement is still confined to his house, he having been seriously indisposed for several months. We hope the spring weather will bring back his health and enable him to get out on the road with some of the descendants of his old champion 30-miler, General Taylor, several of which he still owns. Such men as Mr. Bement can ill be spared, as their example and counsel are guide posts which the younger generations can follow with profit to themselves and the community.

BIG STAKES FOR FAST HORSES are offered by the Oregon State Fair this year. Two thousand dollars is offered for 2:15 class pacers and the same amount for 2:17 class trotters. There are many other good stakes for other classes. These close early, May 15th, and soon after a big program of additional purses for trotters and pacers will be announced. See the advertisement.

STERLING R. HOLT, the enterprising owner of Maywood Farm, the home of Sidney Dillon, has just issued a new catalogue of his farm stock, including pedigrees, descriptions and pictures of the 25 head of Sidney Dillons he recently purchased and that are now at Pleasanton in charge of Millard Sanders. The new catalogue is very handsomely printed and is a credit to the compiler as well as the printer.

ANSWERS TO CORRESPONDENTS.

A. Rosa, San Francisco.—The chestnut mare Alas by Herald, dam Alasco, by Alarm, is registered. She was foaled in 1897 and bred by E. D. McSweeney.

I. F. Bekert, Petaluma.—The record of Marengo King by McKinney, dam By By by Nutwood, is 2:29¼, and was made when he was three years old. He was sold to Eastern parties and died, but worked a mile in 2:13½ after leaving California. The sire of Dan Patch 1:55¼ is Joe Patchen 2:01¼.

S. E. Hanford.—Colonel C. by Glenway made his record of 2:13¼ at the Breeders' meeting at Petaluma August 29th, 1903, when he won the first heat of the \$500 purse for pacers without records. Edwin S. won the next three heats and the race.

G. J. H., Rio Vista.—Lady Hoodoo, brown mare, foaled 1892, is registered in Volume 15, A. T. R. She is by Prompter 2305, dam Vixen by Privateer 8135, second dam Grace, dam of Dredation 2:08¼, etc., by Buccaneer 2656, fourth dam Mary by Flaxtail 8132, fifth dam by Bright Eyes, running bred. If you have lost the registration papers you can get a certificate of registration by sending 50 cents to the American Trotting Register Association, 355 Dearborn street, Chicago.

Through an advertisement in the Breeder and Sportsman, Mr. Graham E. Babcock has sold his stallion Strathway 2:19, sire of John Caldwell 2:08½, Toggles 2:08½, Homeward 2:13¼ (sire of George G. 2:05½), and many other fast ones. The purchaser is Mr. James C. Wallace of San Diego, who will place Strathway in the stud there at a fee of \$40 for the season of 1906. Strathway is by Steinway out of Countess, the dam of Dawn 2:18¼, by Whipples Hambletonian. Strathway inherited speed from both sire and dam and has proven himself one of the best sires of extreme speed in this State.

NOTES AND NEWS.

Floradora 2:18½ by Sable Steinway is in foal to Kinney Lou and will be bred back to McKinney's.

Mr. Ronan, owner of the Pleasanton track, is training Birdman for the races next Saturday and as he drove his horse a mile in 2:31 the other day, "the boys on the fence" are beginning to think he knows a little something about the training business, and may win that cup.

Mr. Henry drove Ed Kell by Educator a mile in 2:20 this week at Pleasanton, the last quarter of the mile being in 32 seconds, a 2:08 gait.

Of the fifty-one mares bred to Kinney Lou in 1905, forty-three are known to be in foal. Of the remaining eight, five were bred after August 1st, and it cannot yet be positively determined how many of them will prove in foal, but as far as can be judged at this time they are all safe. This is a remarkable showing.

Geo. Helman, who has Mr. Minor's horse Morosco 2:12 at Pleasanton, has been stepping him along about a "forty" gait lately and the gelding acts like a 2:10 trotter. His gait is better than it ever was, and the horse was never in such good shape. Last year when Morosco was sent East he had the misfortune to get in the same car with several afflicted with distemper and contracted the disease. He was not right during the whole season. He should reduce his record this year if no accident happens him. Helman has been training Frederickburg 2:12½ and has him in nice shape. He has also been breaking for Mr. Minor a few colts by Glendale, son of Wayland W. 2:12, that are good prospects.

Monterey, Mexico, must be a red-hot sporting town. A race came off there one day last month in which the prize was a six-shooter and fifty cartridges.

The horsemen at San Jose track do not seem to be very much worried over the notices to vacate sent them by L. E. Hanchett. They are nearly all of the opinion that San Jose's fine track will not be cut up into building lots this year nor next.

Geo. Simpson of Walla Walla, Washington, recently sold ten head of Clydesdale horses, consisting of nine mares and a stallion for \$3000. The purchaser was offered \$4000 for the bunch a few days later, but declined the offer.

The Yuba and Sutter Driving Club of Marysville is arranging to hold a meeting in April just after the close of the Colusa meeting. It is thought enough horses can be secured for a three or four days' program.

That little pacing filly by Highland out of Reina del Diablo by Diablo that Ted Hayes has in his string at Pleasanton, like all fast females, is causing lots of talk. Last Monday Hayes drove her a quarter in 45 seconds with the last eighth in 22 seconds. For a foal of 1905 that "never had no chance" this little miss is about the speediest thing in the country. She is just beginning to pick up and get a little flesh on her bones, but her ribs are still in evidence and her form needs padding in several places. She has the frame for a high class one, however, and speed enough to bet on. After a month or two more of the care and feed she is getting she will look as well as she acts.

Guy Abbott is the name of a 19 months old colt by Searchlight 2:03½ that is attracting much attention and admiration from Oakland horsemen. The colt is well bred, his dam being Melba by Gossiper 2:14½, second dam by Director 2:17, third dam by Nutwood 2:18½, fourth dam by Sam Purdy 2:20½. Guy Abbott was bred and is owned by Andrews & Abbott and is being trained by the senior member of the firm, Mr. G. Andrews.

The great pacing mare Much Better 2:07½, will be bred this spring to the great trotting stallion Kinney Lou 2:07½. The produce will not only have a great speed inheritance, but will be most fashionably bred.

The standard and registered mare Gracie S. by Waldstein, dam Sadie Moor by Grand Moor, was bred to Greco, son of McKinney, this week. Gracie S. is owned by Rev. W. L. Speers of Rocklin.

Byron Erkenbrecher of Los Angeles has sent his McKinney mare Rita H. 2:11½ pacing, 2:14½ trotting, to the court of the champion pacer Star Pointer 1:59½. The mare arrived in Pleasanton last week and has been bred.

G. A. Wahlgreen, secretary of the Denver-Overland Racing Club at Denver, Col., has selected June 16th to July 7th as the time for the race meeting to be given at Overland Park. The officers of the Denver-Overland Club are: President, E. A. Colburn; secretary and manager, G. A. Wahlgreen. The intention is to have a number of stakes for special races. A \$2000 stake for 2:24 trotters, and one of \$1500 for 2:21 pacers, are likely to be the best, but others of \$1000 each will be scattered through the program.

Last Monday James Thompson drove Col. J. C. Kirkpatrick's pacer by Waldstein a mile at the Pleasanton track in 2:16½, the last half being in 1:05½ and the last quarter in 30 seconds. This pacer will go East to race on the Grand Circuit.

The management of the Dixon Driving Park will hold a race meeting over that excellent half-mile track on Tuesday and Wednesday, May 1st and 2d. There will be four events for colt trotters and pacers, besides, races for aged horses. The races for two-year-olds will be for \$100, with entrance money added. The races for three-year-olds will be for the 2:30 classes, \$100, with entrance money added for each event. Entrance money is \$25, of which \$5 is due March 10th, \$5 April 2d and \$15 April 21st. Rowland Moss, Dixon, is Secretary.

Dr. H. N. Berthiaume of Providence, R. I., has lost by death his young McKinney stallion, Ruskin, that was bred at Santa Rosa Stock Farm and out of Russie Russell by Bay Rose. The doctor has another McKinney colt by McKinney, however, which he purchased here at the same time he bought Ruskin. This one is four years old and is called Carakina, and is out of the great brood mare Biscarl by Director.

Goshen Jim, 2:08½, is dead. He was one of the contestants in a race over the ice at Minneapolis last month, and just before the second heat was started fell dead in his stall. It was in 1900 that this son of Moses S. was campaigned for the first time by the well-known trainer James Thompson, now of Pleasanton. Goshen Jim was a big horse and had a world of natural speed. He came out in 1900 without a record, and raced through the California circuit. He was owned by Tim Judge of this city, and was bred on the Shippe farm, being by Moses S. 2:19, son of Hawthorne. Goshen Jim's dam was Brown Tempest, dam of Tempest, 2:19, by Chieftain 721, grandam Old Tempest, dam of John C. Shelley, 2:29½, by Morgan Rattler.

The campaign of 1900 opened at Colusa July 28th. Goshen Jim was a starter and won his race in straight

The stallion Greco, by McKinney, dam Allen by Anteeo, second dam Lou Milton, the dam of Lou Dillon, is improving right along in Chas. De Ryder's hands. He worked a mile in 2:16 last Monday and trotted it like a race horse, coming the last quarter in 31½ seconds as if he liked the sport.

Some years ago a Buffalo street car company which owned 500 horses demonstrated the value of clipping in this way: They clipped 250 horses and kept a careful record of results. Of the unclipped horses 153 were troubled with colds or pneumonia, while not one of the clipped horses suffered.

The Hollister Advance says: There is a little San Juan boy living near the foot of the Salinas grade, who will turn out a hustling financier. Recently he saw two large automobiles start up the grade on a rainy day. He hitched up a team and followed along. Very soon he came up with the two machines stuck fast in the mud and was asked for a tow. His price was \$10 each, which was promptly paid. He is the sort of a Johnny-on-the-spot that will do.

Dr. H. J. Ring of Ferndale, Cal., is the owner of a very handsome black filly by Bonnie Direct 2:05½, that is now two years old and is just being broken. She is gentle and level-headed, with any amount of natural speed and gameness. The doctor has named her Maid of California, her dam being California Maid by Waldstein. This filly, while showing much speed, will not be raced this year, but reserved for her three-year-old engagements next season. She is entered in the Breeders' \$7000 futurity.

Al McDonald of Pleasanton made a trip to Suisun last week, and says he was surprised to see so many enthusiastic trotting horse owners as Suisun contains. While there he was shown a four-year-old pacer owned by Mr. H. B. Muzzy of Bird's Landing that is just about the best looking and most promising pacer he has seen for some time. Mannie Reams, who brought out the fast three-year-old Mannie R. in

GOSHEN JIM

heats. At Red Bluff the following week he again won first money in three heats, and at Chico a week later he repeated the same story. At Marysville he had a walkover on August 23rd, and at Woodland the next week won right off the reel, but when he reached Sacramento and started in the 2:11 class against Kelly Briggs, Myrtha Whips, I Direct, Daedalion and several other fast ones, he got the flag the first heat. At Stockton, after dropping a heat to Georgie B., he won the next three heats and took a record of 2:10½, which was his fastest mile that year. He started ten times and won seven races in 1900. The following year Thompson took Goshen Jim east, but did not win a heat with him, and finally sold him at a good figure. In 1902 the horse was raced again, but only won one heat. In 1903 Goshen Jim was started in a cup race at the big fair at Hamline and astonished everybody by beating Angus Oh So, Prince Stevens and Red Strath in straight heats, pacing the second mile in 2:08½. He was a great pacer on the ice, and is said to have paced a half in 1:00½ on that sort of going.

Walter J. Snyder, formerly secretary of the Detroit Driving Club, has been appointed racing secretary of the Michigan State Fair Association. G. W. Voorhies has been appointed superintendent of the State Fair track, which is located in Detroit.

The Washington Birthday program of races, which was arranged by the San Bernardino Driving Club, but had to be postponed, has been rearranged and will be held this afternoon at the San Bernardino track.

S. A. Elder and John R. Dally of Missoula have purchased from the Bitter Root Stock Farm the trotting stallion King Amos by Prodigal. It is the intention of the new owners to breed King Amos to a few good mares during the coming season, and later place him in training and make the Montana circuit with him.

1904, has this pacer in charge. McDonald says the four-year-old is a beautiful dark brown horse, with a good sensible head, fine eye, a short back, muscular quarters and, in short, good all over. He is by Demonio, 2:11½, out of a mare by Gossiper, 2:14½, and will be raced this year. He worked miles close to 2:12 last year as a three-year-old.

* \$125,000 in stakes and purses is worth training horses for. That is the amount which the Montana Fair and Racing Circuit of 1906 has hung up for trotters, pacers and runners to compete for, and a large portion of it will be in early closing stakes which are advertised in this issue to close April 10th. The first meeting on the Montana circuit will be at Butte, opening August 22d. There are three \$1000 stakes for trotters and three for pacers, besides smaller purses. The Butte meeting will continue ten days. Then will come the Livingston meeting, four days, with two \$1000 stakes; the Billings meeting, four days, with four stakes of \$1000 each; the Bozeman meeting, five days, with two stakes of \$1000, and four of \$500, then Big Timber, whose stakes will be announced later, then Great Falls where four \$1000 purses are offered; then the Montana State Fair at Helena, opening October 1st and continuing five days, with five stakes of \$1000 each, and then the meeting at Missoula will wind up this excellent circuit with four days of racing closing October 11th, during which there will be four stakes of \$1000 each. Here are eight weeks of harness racing provided for with no less than twenty-seven stakes of \$1000 each for trotters and pacers. All these races will be on the three heat plan. Each member of this enterprising circuit has a good track, plenty of stable accommodations and good hotels, and there is excellent shipping facilities and no long, expensive jumps. Five per cent entrance, and five per cent additional from first and second horses only. Read over the advertisement in this issue.

PAYMENTS MADE ON 125 TWO-YEAR-OLDS.

The Pacific Breeders' Futurity Stake No. 4, \$6000 guaranteed for foals of 1904, has a very healthy look. Fourth payment on these two-year-olds was due and payable March 1st, and no less than 125 colts and fillies have been paid on, which is evidence of great interest in this stake among owners and breeders. As will be readily seen by a perusal of the following list of foals on which fourth payment was made, a more royally bred lot of youngsters has never been named in a stake in California. For the first time since the stake was inaugurated, however, there is not a son or daughter of McKinney in the stake, that great horse having left California the winter before these foals were sired. His sons are very largely represented, however. The list of foals now remaining in the stake is as follows:

(*) Indicates substitution.

Clemente R. Arques' bl. c. Sprylight by Searchlight, dam Spry Ruth by Boodle.
Clemente R. Arques' br. c. Dixielight by Searchlight, dam Dixie by Chas. Derby.

S. B. Wright's b. f. Winifreda by Lynwood W., dam Hattie Fowler by Robin.
*J. H. Wagner's c. Don Gentry by John R. Gentry, dam The Donna Inez by Stranger.
J. W. Zibbell's b. c. Teddy Mac by Tom Smith, dam Kate Lumry by Shadeland Onward.

MATINEE AT SANTA ANA.

A large crowd saw some excellent sport at the Santa Ana track, March 3d, when the Orange County Driving Club held its matinee. The judges were Messrs. Geo. Ford and A. J. Wood, the starter was Mr. W. E. Baker, while Messrs. A. E. Waern and W. W. Walker acted as timers.
The Orange County Driving Club is only two years old, but has already won its way into popular favor by its method of furnishing the lovers of "good horse flesh" clean sport. Betting is not tolerated at the track, and the meetings are all conducted in such a manner that the public gives its support and endorsement. The results of the day's races were as follows:
The three-minute trot was won in straight heats by tables and won in straight heats in 2:28 and 2:26½.
In the 2:45 pace Mr. G. Moesser's Baldy was the winner. Best time, 2:33.
The star attraction of the day was the 2:45 trot in which there were but two starter, but keen rivalry existed as Mr. Chandler's Flash has beaten Mr. Wagner's McKinney on two former occasions after close finishes. This time the McKinney horse turned the tables and won in straight heats in 2:28 and 2:26.
There were three heats in the 2:40 trot. Ell, owned by Mr. N. Nicholas, won two out of the three, however, the last heat by a nose in 2:29½, the fastest heat of the race.
The 2:30 pace went to Mr. McNeil's Prince in straight heats. Time, 2:27 and 2:26.

A NEW AND NOVEL STAKE.

It is the earning capacity of thoroughbreds which gives them the greater part of their value. It is not surprising that thoroughbred yearlings bring such good prices at auction when it is within the capacity of a two-year-old to win over \$100,000 in one year in stake races. Trotting and pacing colts would have just as high a value had they the same opportunity to win such an amount. Every good stake offered for trotting or pacing colts therefore deserves the patronage of stallion owners and breeders, as the larger the earning capacity of colts the better prices they will bring, the higher stallion fees can be raised, and the more breeding will be done. One of the best of the new stakes for trotters and pacers that has been offered in recent years is the Stallion Representative Purse, which has been inaugurated by the Horse World of Buffalo. When Manager C. R. Bentley of that publication was on this coast a few weeks ago he outlined to us the features of this purse, the conditions of which the proprietors of the journal have since completed and published. The purse is for the foals of mares bred this year to nominated stallions, regardless of ownership. Stallions to be eligible must be named on or before December 1st, this year. The nominating fees for stallions are graded: For those whose service fee is \$35 or less the nominating fee is \$30; for those whose fee is \$50 and not less than \$40, it is \$50; for those whose fee is \$75 and not less than \$60, it is \$75, and for those whose fee is more than \$75 the nominating fee is \$100. All private stallions shall also pay \$100. Every foal of 1907 from mares bred to these nominated stallions in 1906 will be considered as entered in this purse, and there will not be one cent to pay on them until April 1, 1910, when they will be three years old. On that date a payment of \$25 will be required from owners who wish to keep their foals eligible to the event, which amount shall in each instance be added to the original guarantee of \$7500. No further payments will be required until the day before the race, when \$100 must be paid as a starting fee in the trotting division and \$50 fee in the pacing division, which amounts are also added to the purse. The purse will be divided 80 per cent to trotters and 20 per cent to pacers. The money divisions will be 60 per cent to the winner, 25 per cent to second and 15 per cent to third. Both the trotting and pacing events will be for three-year-olds only.

This purse has great possibilities. Every stallion owner should nominate his horse in it, as winning the race will be a great card for the sire of the winner. Should 500 stallions be nominated at an average fee of \$40 each, the purse would reach \$20,000 without any further addition, and the payments on three-year-olds with the starting fees would make it a richer stake event than the Kentucky futurity. We hope that many of our California stallion owners will nominate their horses in this purse, as no better means of making a horse popular with breeders has been devised than this one of making all his colts eligible to a big purse without cost to the owner until the colt is three years old.

RACES AT PLEASANTON NEXT SATURDAY.

The horsemen at Pleasanton do not propose to allow St. Patrick's day to pass without celebrating. They have been given the use of the famous track there by Mr. Ronan, the owner, and have arranged a program of three races which will be worth going to see as the horses are believed to be very evenly matched and there is no doubt but each and every one will be driven to win. Some of the horses are roadsters in use every day and others are green track horses on which much time and money has been spent. All may not have race horse speed, but their owners will not be convinced of this fact until after the races are over.

Mr. Hansen, proprietor of the Pleasanton Hotel, will give a handsome silver cup to the owner of the horse that has the fastest average for two winning heats. Millard Sanders, who knows the racing game and appreciates the fact that it is a most difficult proposition to win races while keeping one's horses in the slow class will give a silver cup for the horse that has the slowest average for two winning heats. The entries to the races are as follows:

First race—
Fred Hellwig names Fred W.
C. L. Griffith names Tom Sharkey
Thomas Ronan names Birdman
J. C. Kirkpatrick names The Judge
Joshua Chadbourne names Hattie C.
Second race—
A. Goulart names Hal Welcome
Larkin Locke names Husker
R. C. Peach names Roan Dick
Sears Enos names Unknown
G. A. Davis names Unknown
Third race—
M. V. Perry names John L.
Fred Nagel names Unknown
Lee Wells names Major
C. L. Crellin names Searchwarrant
L. A. Colestock names Orlana

The Great Falls, Mont., association has offered \$1000 for 2:20 trotters, and \$1000 for 2:14 pacers. The three-heat plan will be adopted for races on the Montana circuit this year.

Statistics show that the baby trotters were unusually plentiful during the season of 1905. Twenty-seven two-year-olds entered the 2:30 list, just three times as many such youngsters as earned a position

HOOF BEATS.

There will be four brushes on the speedway in the park next Sunday between horses owned by members of the San Francisco Driving Club. Some splendid sport is promised as the horses are all closely matched. The fun will begin at 1 o'clock.

De Lance Truax of Alameda purchased a Flower City cart this week from the San Francisco Wheel and Novelty Company, which he will use in driving a full sister to Robert I, 2:08½ that he owns.

Dr. F. H. Shanks of Susanville, Lassen county, has ordered a McMurray sulky built to order for him at the factory, Marion, O. The order was made through the Kenney Manufacturing Company, and will be up to date in every particular.

Charles De Ryder has in his stable for sale a seven-year-old stallion bred at Palo Alto by Mendocino, out of Princess by Nutwood. This horse has trotted a mile in 2:18½ with two months' work, and is offered for sale on account of the illness of his owner. Horse is city broke and well enough bred for a sire. Will be sold reasonably.

Alta Vela, 2:11¼, son of the great Electioneer, and one of the most perfect as well as one of the most beautifully gaited trotters that ever wore harness, will be in the stud this year at the Park Stable, Twenty-fourth avenue and Fulton street, this city, close to the Casino. Hans Frelson has him in charge and the horse is in fine condition.

Nutwood Wilkes, 2:16¼, sires money-getters. His son North Star, 2:13¼, won more money than any horse on the Pacific Slope last year, being unbeaten, and winning the three richest trotting stakes given for three-year-olds. His daughter, Trix, producer Mona Wilkes, 2:11¼, winner of the three-year-old pacing division of the Breeders' Futurity and his daughter, Miss Idaho, 2:09¾ won two seven-heat races. Blood will tell.

George Algeo of Alameda, who recently purchased the Nutwood Wilkes stallion T. C., 2:30, from Martin Carter, is showing him to numerous visitors at Alameda track and has already booked a number of mares. This young horse is one of the best bred ones ever produced on the Nutwood Stock Farm and is a fine individual and fast. His get, though not very numerous as yet, are all fine looking and very promising. Louise Carter, a two-year-old filly by him, is not only one of the best trotting prospects but one of the most beautiful fillies soon on the Pleasanton track this year.

George W. Berry, superintendent of Mr. A. B. Spreckels' Napa stock farm, was in the city this week and reports that up to March 1st twenty-one foals had been dropped this season at the farm, all strong lusty looking youngsters. While Mr. Berry's time is taken up with the thoroughbreds he still has a strong love for trotters, and took the occasion to run over to Pleasanton last Wednesday. He saw Millard Sanders drive S. Christenson's two-year-old colt C. F. Kapp a full mile in 2:37½, with the last quarter in 36 seconds, and says there is a young stake winner if he ever saw one. He also held his watch on Mart Rollins' bay gelding, Charley Belden, by Lynwood W., while Joe Cuicello stepped him through the stretch in 30½ seconds, and then repeated the performance in the same notch. A sweeter-gaited trotter George says he never saw.

It is a pretty good test of the popularity of a stallion when his get sell readily. Woodland Stock Farm has sold a number of the get of Nushagak this year at good prices at private sale. They were all two-year-olds, and buyers are content to wait until they mature. Nushagak gets fine-bodied colts that have good legs and feet. He has sired a big money-winner and magnificent trotter in Aristo, 2:08¼.

The owners of Monterey colts and fillies are all highly pleased with them, as they show speed in nearly every instance. P. J. Williams, owner of the fastest son of the great Sidney, has the horse in the stud in Alameda county, and breeders should not overlook this fact. Monterey has sired a four-year-old 2:10 performer, and is producing speed from all classes of mares.

Willeroo 28021, the son of McKinney, formerly owned by Mr. Frank Burke of this city, is now in the stud at Hamlet, Ind., where he is owned by J. F. Fancher, who purchased him from Mr. Burke last fall.

In casting about for a high-class stallion, breeders should remember that Zolock, 2:05¼, the fastest entire son of McKinney, is in the stud at Pleasanton. Zolock is sure to lower his record if he is raced. Last year he suffered from three quarter-cracks, which every horseman who saw them said would stop most any horse, but Zolock paced his fastest miles when they were very bad and never flinched. He is game as they make them and is already a great sire.

San Franciscans who have mares they would like to breed to a good stallion this year, but do not want to send them away from the city, have the opportunity to mate them with I Direct 2:12¼, one of the best bred horses in California, as well as one of the fastest. Dan Leiginger of 801 Devisadero street has him in charge, and will be pleased to show him at any time.

Mr. J. M. Ferguson, of Santa Cruz, owner of Inferno, three-year-old race record 2:15, by Diablo, drove this pacer over to Aptos Farm one day last month, and saw Sandy Smith working the horses he is preparing for the sale to take place in San Francisco soon. Among those Sandy worked that day was a fine looking bay mare five years old by Cupid 2:18, own brother to Sidney Dillon, and out of Lilly S. by Speculation. This mare is a trotter and is a full sister to Venus 2d 2:11¼. Mr. Ferguson accepted Sandy's invitation to work Inferno a mile with her. The track is a half mile oval and rather slow, but they made the mile in 2:31 with the last quarter in 35 seconds, a 2:20 gait. Mr. Ferguson thinks this mare is a good prospect for a 2:10 trotter, and says that Sandy has as fine a lot of good looking, good gaited horses as he ever saw.

When Dan Misner was at San Bernardino last fall he traded for Mr. Horace Orear of this city the latter's handsome black mare Mayola for a three-year-old gelding by Zolock 2:05¼; whose dam is by Raymon 12007, second dam a full sister to Valentine 2:22, by Kentucky Clay Jr., third dam Queen, a mare brought to this state from Iowa, whose pedigree is not known. The Zolock gelding is a large, open gaited fellow that gives every prospect of being a fast trotter. Misner has him at Pleasanton and will put him in shape for Mr. Orear to drive on the road.

A pouring rainstorm spoiled the Livermore Horse Show, last Saturday, and kept several hundred people at home who would have otherwise attended. About fifty horses that were on the ground the day before were shown, but more than twice that number that had been entered were not on hand. The Livermore association is entitled to better luck next time.

Iran Alto, 2:12¼, is, we believe, the only son of Senator Stanford's great horse Palo Alto, 2:08¾, that is standing for service in California. Iran Alto has been a great race horse himself. His sire was one of the greatest ever produced at the Palo Alto farm, and his dam was a champion in her day. Besides all this, Iran Alto is a producer of early and extreme speed. H. S. Hogoboom has this horse at Woodland, and he should be patronized.

John O'Keefe of this city will drive his pacing mare Centereye an exhibition mile at Pleasanton next Saturday during the matinee races, in an effort to beat 2:10.

Siva 4, 2:13¾, the beautiful daughter of Guy Wilkes 2:15¼, and the first four-year-old trotter to win the \$10,000 M. & M., foaled on February 18 a fine bay stallion, with star and both hind feet white, by Parole 2:16. Much should rightfully be expected from this blue-blooded young aristocrat. Siva will again be bred to Parole.

Wayland W. 2:12¼ will be at Petaluma every Tuesday and Wednesday during the season of 1906. The sire of Bolivar 2:06¼, etc., is in fine condition.

COUNT HANNIBAL.

One of the grandest individuals ever sired in this state by McKinney is Count Hannibal, whose likeness is on the title page of the Breeder and Sportsman this week. This horse was bred by Prof. E. P. Heald, president of the Pacific Coast Trotting Horse Breeders' Association, and is still owned by him in partnership with Mr. L. Leadbetter of Napa, who will manage the horse during the coming season at that

place. Count Hannibal is coal black, with a beautiful glossy coat, stands 16 hands and weighs 1100 pounds. He is sound in every particular and has the best of legs and feet. His dam is by Secretary, son of Director, second dam by Alcona Clay 2756, third dam Flora Belle by Alcona 730, fourth dam Fontana, dam of 3, including Silas Skinner 2:17, sire of Ole 2:10¼.

Through his sire, McKinney, he traces twice to Hambletonian 10 and twice to Mambrino Chief, while through his dam he traces six times to Hambletonian 10 and six times to Mambrino Chief. His third dam, Flora Belle, was a good race mare in her day, and his fourth dam, Fontana, dam of that great horse, Silas Skinner and two others, was one of the best mares ever imported to California from Kentucky. His fifth dam was by that wonderful sire, Abdallah 15, and she was also a producer, being the dam of Bay Chieftain 2:28¼. Count Hannibal thus has five standard bred dams, rather unusual at the present day, and back of that his dams are strictly throughbred for sixteen generations.

Count Hannibal should become a great sire of speed. He sired a few colts at three years old, which are now yearlings. They are all exceedingly promising, both as to speed and good looks. Their owners have entered them in the colt stakes and intend to train them. He is yet untrained but shows great bursts of speed. It is confidently believed he can now show a 2:20 gait. His season in the stud will end on June 1st as it is intended by his owners to train and race him this year.

NEW ENTERPRISE IN YOLO COUNTY.

By referring to the advertisement in another column, a reproduction of a picture of a very fine Hackney stallion, called Manchester, will be seen. Some idea of the conformation and style of this horse can be formed from the picture, although he is a heavier animal than the photograph would lead one to imagine, as he weighs 1300 pounds and stands fifteen hands and two inches in height. Manchester heads the Woodland Hackney stud of Messrs. DePue & Sprague, whose farm is at Woodland, Yolo county. He was twice a blue ribbon winner at the New York Horse Show, and horsemen who have looked him over say that he is a very fine model of a coach horse sire.

The breeding of carriage and coach horses is attracting more attention in this country at the present time than at any previous period, the United States Government even being interested to the extent of aiding in establishing an American breed of carriage horses. Many of the most successful breeders have secured good results by mating trotting bred mares to Hackney stallions and Messrs. DePue & Sprague are pursuing this course. They have secured as manager of their stud Mr. A. H. Brinton, a man who is thoroughly acquainted with the breeding as well as the education and management of carriage horses. Mr. Brinton states that Manchester bears a strong resemblance to and comes nearer being the type of the sensational Hackney horse Forest King than any horse he has ever seen. Forest King, it will be remembered, took the champion ribbon at the recent National Horse Show in New York and is considered the best Hackney ever imported to this country.

Owners of mares of the carriage or coach type should patronize Manchester, and as the fee asked is very low—\$25—the experiment can be tried with small expense. Woodland Hackney Stud has carriage pairs, saddle horses and gig horses for sale and invites correspondence. Address A. H. Brinton, manager, Woodland.

HEDON SQUIRE
A Hackney Coach Type

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER,

The decision of the Ascot Park stewards in the cases of Durnell, J. J. McCafferty and J. W. Brooks will not do the turf any good. Either Durnell or McCafferty were guilty or not guilty of the charges preferred against them, and in the case of the latter there is no middle ground. The law is explicit in the matter, and says that anyone found guilty of administering drugs to a horse to stimulate it in a race is ruled off the turf (not may be). According to the testimony of three veterinarians of good reputation, the clever jockey-trainer had "doped" The Huguenot good and plenty. Durnell's crime was even more serious than McCafferty's, in the minds of most persons. He had run Alderman Batt in heavy training shoes one day, when he was beaten away off, and when he won, a very short time later, and against pretty much the same horses, the flyer wore racing plates. If a worse case of fraud or "Biblical running" than this can be found I would like to hear of it. Durnell ought to have been ruled off for life, as well as McCafferty, and a fair board of stewards should see no other course open to them. The \$1,000 fine and year's suspension meted out is farcical. The sum spoken of is perhaps but a tithe of the amount won through the fraud practiced upon the public, and probably the strings of horses will be turned over to some friend and trained upon the plans of Messrs. Durnell and McCafferty, working no hardships whatever upon these turf buccaneers, who will in all likelihood be at their old trade again when their term is up with new schemes to fill their own pockets at the expense of the fair name of racing. Great good would have resulted if these men had been ruled off for life and kept off all race tracks, and the Ascot Park track would be talked of as a place where justice was dealt out, no matter how high or mighty were the offenders. It appears that McCafferty owed George Rose a large sum of money, and not desiring to lose it, it would not have caused much of a stir if the Texas turfman had been exonerated and his horses allowed to earn the coin for the obliging pencil who owns a large slice of Ascot stock and controls another large slice. Another thing that is hurting the Ascot track is the knowledge possessed by the general public that bookmakers control this course and dictate the policy of the management, or at least try to. A manager should not be hampered as Manager Brooks is, and should be given power to manage the institution, not told that he can do this, but he mustn't do that. The charges against Brooks made by Boots, Van Meter et al., of the horsemen's association, were passed over by the Board of Stewards as in the main untrue, but a few little things he did were deplored. I suppose one of the things was the cashing of a check so that a turfman could claim a certain horse. I want to say right here that I do not consider that Brooks did anything wrong if he did cash this check. Horses are there to be run up or claimed, and to my mind it is no person's business where the money is secured that buys the horse by the claiming route or the run-up route either. It is my belief that horsemen should change their ideas anent the selling race business and adopt the English idea—that it is a compliment and not a slap when a man runs up or claims your horse. These races are made for selling platters, and when a person enters a handicap of stake horse in a selling race for about a fourth of its value, and is run-up to something like the right price, he should not squeal "Spite!" but should come to a realization that there are some wise and courageous men in the game that know their business. There must be a decided change at Ascot if the racing is not to be made suffer. It must be seen too that the bookmakers lose control, that the manager is all that the name implies, and that they have a Board of Stewards with no judges upon it or to sway it in any manner. The judges may be lynx-eyed, but they should not be judge and juror, as in the past. It is un-American, unfair and against the constitution of the country. With a rectification along the lines spoken of above confidence in "the game" may be restored, but it will go to the demnition bowwows with different cliques doing the tug-of-war act with the manager and with stewards who will not hew to the line.

Several high-class performers have come up from Ascot recently, the list including the Bannockburn-Miss Lynch colt, Horace E. (pronounced by experts to be the best two-year-old on the Coast), Ray Egan and Native Son (the two good Stover colts), and Lucian (a winner last Tuesday).

Leslie Coggins sold his good three-year-old Abe Meyer this week, and is now out of "the game," as far as ownership is concerned.

Prince Brutus defeated a good field of sprinters at City Park, New Orleans, last Tuesday, and old Bon Mot, a former winner of the Los Angeles Derby in the colors of "Doc" Rowell, won a fast mile race. This ancient galloper seems to have secured his second wind, and is running some nice races these days.

It is understood that Dick Dwyer will do the starting at Seattle this season, and with a doing away with the syndicate ring that has been the curse of racing at new places, the metropolis of the Northwest should have far and away the best meeting in its history.

W. D. Randall's most excellent Salvator stallion, Salvation, sire of Chantilly, Preservator, Shellmount and other good winners, will make the season at C.

W. Clark's place, San Mateo, at \$50, with return privileges, and at this figure he should be well patronized.

Frankfort, Ky., March 6.—The Kentucky Senate to-day adopted the Chinn bill for the creation of a State racing commission to control the running racing tracks of the State.

Frankfort, Ky., March 6.—Representative Simmons to-day reported that all copies of his bill to suppress poolrooms have been stolen from the records of the State Senate. Investigation will be made.

SOME EARLY RACE TRACKS.

R. M. Laycock writes as follows regarding some of the early race tracks and racing in this country, which will be read with interest:

Race street (then called Sassafras) was once a race course where Philadelphia horses were speeded, and later, when the population of the city became greater, a two-mile track was laid out in the tract of land now bounded by Race, Eighth and Spruce streets and the Schuylkill river. It was a circular course, and wound about among the trees. Pacers were the race horses of those days, trotters being considered horses of base breed. To saddle or bareback was the racing rig, for there were no vehicles that were not so heavy as to constitute a great handicap to the horse pulling it.

Watson's Annals, volume 1, page 277, under the title of "Sports and Pastimes," says horse racing started at a very early date and brought with it the usual "evils" hard to control, evidently meaning gambling and drinking. Continuing, Watson says: They were at an early date performed out on the street, so popularly called because of it being a street leading to the race grounds, cleared for the purpose through the forest trees."

In 1726 the grand jury presented: "That since the city has become so very populous, the usual custom of horse racing at fairs in the Sassafras (Race) street is very dangerous to life; it is an evil to erect the booths in that street and sell all sorts of liquors."

Thomas Matlack says in his recollections: "In the early days the woods were in commons, having a circular course ranging through the trees. All genteel horses were pacers; a trotting horse was deemed a base breed. All the Race-street races were mostly pacing races, to saddle or bareback."

In 1761 the first public advertisement of a race at Governor's Woods was published. The racing continued up to the year 1775, but after the war such races were made unlawful.

Porter's Spirit of the Times, dated December 20, 1856, says: "The first time ever a horse trotted in 'public' for a stake was in 1818, at Baltimore, and that was a match against time for \$1000, in which Boston Blue trotted against time (three minutes) and won cleverly."

Old Hunting Park was probably the first inclosed race course in Philadelphia, but writers differ as to the date of its building. Coates' "History of the American Trotting and Pacing Horse" is authority for the statement that Hunting Park was established in 1828. Wallace in his researches gives an account of a race on May 15, 1828, when Screwdriver went to the saddle three miles in 8:02, and on May 21, 1828, Ephraim Smooth beat Topgallant in a three-mile race, to saddle, in 8:02, over the course. This would indicate that the course was built the year previous, or in 1827.

James B. Welsh of Roxborough (still living) states that when a boy of twelve years (1822) he lived in the locality of the track, which was then called "Allen's Race Course," after the proprietor of the hotel at the track, Samuel Allen. He states that most of the races at that period were to saddle, and he still has a vivid recollection of the old-time races, when such performers as Topgallant, Charlotte Temple, Columbus, Sally Miller and Mount Holly were the stars. He is of the opinion that the first mile to harness, trotting, was made over the course by Sally Miller on November 21, 1834. This mile is on record in Chester's Records.

In the American Turf, which gives an account of racing in the United States, it is stated that Columbus on his second voyage brought several horses for breeding purposes. The early settlers of the American colonies in 1610 brought several horses. The early statutes of all the New England colonies imposed penalties on horse racing in 1778. But the Narragansett pacer became a distinct breed early in colonial times. In 1801 an advertisement appeared in the Columbian Sentinel and Massachusetts Federal announcing a race at the park of Joel Herriman, one and one-half miles north of Haverhill bridge.

The first regular running race meeting of which account was kept was in New England, and occurred in 1665, when Governor Richard Nicolls inaugurated a race course at Hempstead Plains, L. I.

Among the first tracks built in the United States was the one at Harlem, N. Y. It was there that Yankee trotted to saddle in 2:59½, August 21, 1806, it being the first time on record that a horse beat three minutes.

It is also recorded by an unknown turf writer that Boston Blue, in 1810, trotted three miles under saddle at Baltimore. This conflicts with Porter's Spirit of the Times, which places the performance of Boston Blue in 1818 at Philadelphia.

Hunting Park, Philadelphia, and Centerville, L. I., appear to have been the next tracks built. At Centerville on September 7, 1829, in a two-mile heat, Bowery Boy is credited with going the distance under saddle in 5:04½, and in October of the same year the pacer Stranger paced to saddle two miles in 5:10.

At Hunting Park, October 14, 1829, St. Peter trotted four miles to harness in 11:23, and on October 18,

1829, Whalebone trotted under saddle in 11:17, and the same day Topgallant reduced the record to 11:04.

Baltimore is credited with having a race course as early as 1830; Charleston, S. C., in 1837. Union Course, L. I., had races in 1833. Beacon Course, N. J., was probably in existence prior to 1839. There was a race track at New Orleans in 1841; at St. Louis in 1853, and at San Francisco in 1854.

On July 2, 1839, Aaron Burr trotted to wagon over Centerville Course, beating Columbus in 2:44½. Dread, under saddle, went a mile at Hunting Park in 2:51 on October 21, 1831, and Topgallant is credited with a mile in 2:43½ to saddle at Jamaica L. I., in 1821.

JAPAN BUYING HORSES IN AUSTRALIA.

The Sydney Stock and Station Journal says that Mr. Masuda, a Japanese horse buyer, has been in Australia several months buying horses, and his movements have been so rapid as to be almost untraceable. He made points 10 miles off the railroad, in the wilds of North Queensland in twenty-four hours, buying horses for army and breeding purposes. One day he is inspecting horses in Victoria; soon after he is seen in Queensland buying horses from Bergl, Australia. Then in a day or two he is back again in Sydney where he had his headquarters for the general superintendence of affairs. The animals he secured were shipped to the Far East, lot after lot, in a dozen steamers, until they reached the number of 10,139. They consisted of 104 stallions, 200 superior hacks (apparently for the use of officers), 3337 remounts and 6498 gunners. The comparative ratio of horses and mares being 56.44. Judging from the manner in which he bought this live stock, it seems to have been his intention to get a great number of mares to utilize for breeding purposes after the termination of the war, but to avoid any objection on the part of the public, regarding the exportation of mares, he started by taking about 20 per cent mares and 80 per cent geldings, and gradually increased the percentage of mares until at last he took only mares. Just as he expected, public opinion was aroused against the exportation of breeding stock. But by that time, he had already got what he wanted, and then started to buy stallions. The stallions he purchased consisted of eighty-three thoroughbred, eight half-bred, and thirteen Clydesdales, and the choice he made in securing these stallions was governed by consideration of the classes and qualities of mares he had previously obtained. In selecting stallions he made two distinct divisions, viz: Stallions for the breeding of utility horses, and stallions to mate with superior mares to breed horses suitable for stud purposes. In examining horses the Japanese buyer followed an admirable principle. As to remounts and gunner's horses, a defect of any description, even the slightest, insured rejection; but in securing stallions, the chief feature sought was the animal's suitability for breeding purposes, and defect of an unhereditary nature were freely passed.

COMING BACK TO RACE.

For the first time in the history of trotters four American-bred horses arrived back in this country after being taken to Europe, writes Palmer Clark. D. J. Raybould, the Toledo trainer, who went abroad some time ago in charge of a number of trotters and pacers, returned with Katherine A., 2:11¼; Evelyn W., Sandalwood, and another.

The first named will be raced in this country next season, while the rest are to be sold. The daughter of Wiggins was considered a good racing proposition during the training season of 1904; but she proved rather a disappointment. During the grand circuit meetings at Empire City and Brighton Beach that year she was pitted against Sweet Marie and Aristo, and the best she did was to come in a close second at the latter track, when the other two trotted a dead heat in 2:08¼, a world's record.

It was reported that Mr. Raybould would take the place of Eddie Mitchell in the stable of Louis Winans of London as trainer and driver, but it is now announced that George H. Ketcham, the former owner of Cresceus 2:02¼, will drive Mr. Winan's horses the coming season, and the theatrical horseman will be seen in the sulky quite extensively on the Continent.

Gonzales Tribune: A San Francisco horse buyer has been here several days this week buying draft horses for the city. Although he has been offering the highest prices paid for many years, the farmers do not, as a rule, care to sell, for they will need them all to harvest the expected big crop.

Almaden, 2:22¼, will make the season of 1906 at Whisky Hill, in charge of M. L. Lusk. The address of Mr. Lusk will be 631 K street, Sacramento.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle	Sept. 3 to 8
Salem	Sept. 10 to 15
North Yakima	Sept. 17 to 22
Spokane	Sept. 24 to 29
Walla Walla	Oct. 1 to 6
Lewiston	Oct. 8 to 13

Everett was given the privilege to select such dates as they may decide on.

MORGAN, CHARLES, alias Jack Henderson, plasterer, late of Sydney, Australia, please write Frank Taverna, 28 Elizabeth Street, Sydney, Australia.

TALK ON THE AMERICAN COACH HORSE.

At the recent convention of the livestock breeders held at Columbia, Mo., Norman J. Colman, editor of Colman's Rural World, spoke on horse breeding, the following being a portion of his remarks:

"The United States Government has established a breeding farm in Colorado, for the breeding of the American trotting-bred coach horse; a horse to be sixteen hands high, of good style, of good color, of good size, of good breeding, and after a commission was appointed to endeavor to secure the highest type of such a horse, a horse that could be useful for all purposes, and particularly for a coach and a road, park and carriage and farm horse, and after advertising for a typical coach stallion and receiving letters from all sections of the country, saying the writers had just such a stallion, and after a thorough examination the commission finally selected a horse that was raised upon Missouri pastures, fed upon Missouri corn and oats and hay, and drank Missouri water. That horse was a Missouri-bred horse, and I had the honor of breeding it. (Applause.)

"Now, then, what sort of horse fills the bill best for the average Missouri farmer? What sort of a horse should be bred to be most useful to the farmer? What type of horse is in greatest demand? Will bring the highest price in market? That is the question that you want to consider. If the farmer is going to erect a building, he is careful beforehand to study the size that he wants, the style he wants, the purpose for which he wants it. He has that all in mind. He would not think of going on in a helter-skelter way to put the building together. I want to know, when you come to breed a horse, if you should not have the type of horse in your mind that you want to breed; you should know something about the size you want, the color you want, the action that you want, the temperament you want, the purposes for which you can use it, and after determining in your own mind what you want, then go to work and breed it.

"What sort of a horse is that? I think that nine farmers out of ten would say, 'for my purposes—to go to church, to ride to the village postoffice, to drive in the buggy, in the cart, before the carriage, anywhere and everywhere, the horse that I want to work upon the farm, must be intelligent, of good color, good action, proper spirit, about sixteen hands high and weighing about 1200 pounds.' That is the horse that the Government has decided to breed. That is the horse that can be used upon the farm in any way that you think proper—in plowing, in harrowing, in cultivating, in hauling, under the saddle, he is just the horse that you want; but how few of us think of breeding just such a horse! We will be satisfied with some nondescript that has no action, no pedigree, no breeding; one not registered; and the farmer who lives nearest will patronize that horse when perhaps a few miles farther there is a horse duly registered, of good size and action and good style; one that is a pleasure to drive, to breed, a pleasure to handle. The farmer will neglect the latter because it costs a little more to breed to him. That sort of work, here in Missouri, ought to be abandoned. If I can establish and root in your minds the necessity of forming an idea of what horse you want, and if I can likewise establish in your minds the idea that the great law of breeding, that like produces like, or the likeness of some ancestor, you will be more careful as to what you breed—as to what stallion you patronize, because like does produce like.

"The farmer is well situated for breeding the trotting horse. I think it is the best class of horse to work, and I work two teams continually of standard-bred trotting horses on my farm for all kinds of work, and although not quite as large as I have been describing, yet I have found them very suitable for all kinds of work on the farm. I say the farmer is well situated for raising the standard-bred trotting horse, and he can raise his colts at such a season of the year as to scarcely feel their cost. Some will say, 'I don't want to breed my mares in the spring, because I have my farm crops to take care of.' If you have no more mares than are necessary to do your work, perhaps it is necessary to breed them later. Some of the best horses I have ever raised have been born in the fall; they run with the dam during the winter, when there is not much work to be done, and are then turned out and weaned in the spring. They have the green herbage to feed upon and are no trouble to wean. I think every farmer should keep a half dozen mares, because if you raise the right quality of horses there is always a demand for them. It costs no more to raise them than it does to raise steers, and they will bring double, treble and sometimes quadruple the price if of the right quality. I have eighty head now on my farm. Horses are no more trouble to raise than so many sheep, if you have pasturage for them. It is true I have a never-failing stream of water running through the center of my farm, so that I am not compelled to water them; and I want to tell you that a good stream of water fed by springs that run continually during the year is a most valuable feature on a farm. Every stock breeder knows that—he does not have to depend on windmills or gasoline engines, or anything else. The price of standard-bred horses is very satisfactory always, if they are of proper quality. How many of them, even those raised by farmers, have brought several thousand dollars each? If a farmer has been able to raise one of these he has got a mortgage-lifter, or a good sum of money to deposit in the bank. I don't want to go into it for gambling purposes (and most of them do not). You can use the colts on the farm when they are about two or three years old; if you

want to run little errands, you can drive them, and in that way you are developing them; and if they show any unusual action or speed or style, there is always some sharp man who keeps his eye on them and will pay good prices for them; and men like good horses. Our fairs are not successful unless we have the attraction of races. Man was created to admire, next to a beautiful woman, a beautiful horse. Kentucky is noted for its beautiful women and magnificent horses, and you will never find a Kentuckian whose admiration doesn't turn in that direction, and people from other States are much like Kentuckians in that respect.

"In raising horses, it is just like raising any other kind of stock; the young stock especially should have good care and good treatment; they should be housed in the winter, especially over night; they should have good feed. I have found no forage that produces so much growth in the young animal as alfalfa hay; it is an indispensable thing to have on every farm.

"I might talk to you a great deal more about raising horses and raising colts, about breeding them. The great law is, as I have stated, that like produces like, or the likeness of some ancestor. There is a great deal in that 'some ancestor.' That is why pedigree is essential. Sometimes an animal will be produced like an ancestor which existed four, five, six or even ten generations back. I have known of horses that have been marked like their ancestor six generations off, even to glass eyes, when none of their progeny had been marked in this way before. This law of breeding is a most mysterious law—hence, you want pedigree. You want to know the history of the generations preceding the animal which you breed from. You want to be very careful. If you are going to marry, you are careful. You study the history of the family with which you are going to unite. You want to know whether the men have been of good character, and whether the women have been of good character; whether there has been any weakness in the family. Another thing that we don't pay enough attention to, and that is, we want good mothers, good dams, of all kinds of stock. You have never seen a great man that did not have a good mother, a mother of ability, in some lines, either natural or acquired; and these young men who have not married should bear in mind that if they want their children to be an honor to them, they want to marry women with good minds and good morals and good ancestors and good physical development. Everything depends upon a good mother—every farmer knows that. I know it from the breeding of horses for the past forty years."

RACING WITHOUT BETTING.

Mr. J. M. Johnson, the new president of the New England Trotting Horse Breeders' Association is, according to the Boston American, firmly of the opinion that light-harness horse racing can be made popular without betting. His views, according to the American, are:

He shows that in the States of Maine, Vermont and portions of New York and Canada, crowds flock to the tracks to see the races with never a thought of there being any betting on the results, as there is none.

All of this is in country sections where there is not the population to draw from, as has the tracks in the vicinity of Boston, and the managers of the tracks are satisfied to average five starters to a class, while here the fields run from five in the fast classes to a dozen and fifteen in the slower events.

The one great reason why the public keep away from the races whenever pool selling has been stopped can be laid to the horsemen themselves, as in their general talk they have led the public to believe that without speculation the racing can be of no account.

This is proven by a poor play coming to a theater. In no time the news gets all over the city, with the result that there is no attendance, but a good show comes the week following, and the house is packed every evening.

When the public finds that the racing is just as good, the finishes equally as close, the drivers trying as hard to win, when there is no pool selling as when there is, then will the grandstands be filled.

Mr. Johnson correctly gives the facts when he says that not 1 per cent of those who attend the races at Readville ever buy a pool on the result of a race nor even go down under the grandstand where they are sold.

Thousands attended the bicycle races at Charles River Park a few years ago, and there was no opportunity to buy pools, or bookmakers there to take money on the events. They went to enjoy the sport. It is not betting that causes the crowds to go to baseball games, nor to see college football played.

Last season at Readville there was no pool selling. In the Massachusetts stake Sadie Mac was made to trot in the fastest time ever made by a five-year-old, 2:06½. Then, too, the three-year-old event was the best ever seen so early in the racing season as the month of August. Twelve started, and the winner, Katherine L. was obliged to trot in 2:12½ to barely win over a half dozen which finished right at her saddle each heat.

Get the best horses to be had in the country; judges who will make the best horse win, and race right to rule; have hotly contested racing; advertise the attractions to be seen, and there is no doubt the public will know a good thing when they see it and patronize the tracks.

Jay Bird, twenty-eight years old, has just been announced once more as a public stallion at Maplehurst Farm, near Paris, Ky. This is his twenty-fifth consecutive season in the stud.

ACTION AND HOW TO BREED IT.

It is pretty well understood at this stage of the horse-breeding business that action of the sensational kind can be transmitted from ancestors and then carried on to perfection as a horse reaches maturity, or a close imitation of it can be acquired after careful training by horses that were bred from stock used for an entirely different purpose, says an exchange. It has been so difficult for people in ordinary circumstances to obtain, at reasonable prices, horses that possess the heredity action that many breeders and dealers have set about the education of stallions and "stags" in the hope of catching an appreciative market.

That they have been more or less successful is now a matter of history; in fact some of the most phenomenal prices have been obtained for horses taught to act high within a few weeks or months after their selection as likely pupils. On the other hand not a few breeders who have tried to produce high-stepping horses by mating coaching stallions with any old mare have found to their cost that the system is a failure.

Further, it has been proved time and time again that it will not do to select as a sire a stallion that can only act high in front, and it is a waste of time to mate mares with him that only possess similar action or no action at all. Too little attention has been paid to hind action. Many breeders do not seem able to see that a stallion or mare moves poorly behind so long as the knees flash up and down sensationally. When they do realize it they resort to all sorts of dodges to improve it, and generally end by persuading themselves that nobody else will ever notice the defect, and that the sire will rectify what is wrong.

Action largely depends upon that of the stallion, of course, but unless a mare has it to some degree it is ridiculous to suppose that the male can transmit it all. That the sire will transmit most of his defects, however, is thoroughly understood by practical breeders of long experience. If he paddles or "dishes" with his hind feet, spreads his hind legs, goes in a stilted manner, etc., the chances are that his colts will do the same.

Everything that causes the sire pain and trouble in action will surely "come through," as the saying goes. Action is the result of nervous tension and only shows its most pronounced form in colts high strung and nervously constituted. A lunk moves invariably like a poor plow horse, and no amount of training or trouble with patent appliances will improve his gait.

In selecting a sire to get high-acting colts, the breeder should note his action all around, from the side and from front and rear views. He must not only move high, but with precision, giving the one, two, three, four rhythm; and most important of all, he must go straight on every leg, not paddling in or dishing outwardly. His hocks must be lifted with snap, his fetlocks must flex sharply and he must put one hind foot well under his body so as to sustain his weight while his front legs have time to snap up and out, so that his front feet go to the ground lightly as though he was on springs.

Pounding with the front feet will not do; neither will the straight up-and-down pumping of the knees and the consequent short movements of the shoulders. He must literally tread on air and bounce as would a rubber ball, so to speak, and he must do it all as if he liked it, not because he is forced to do it. The entrancing aspect of a high-acting stallion as he looks about him while at the top of his gait can not well be described on paper. It must be seen to be thoroughly comprehended. The action of a mature stallion shown to halter, just as he is starting off on a trot, will show plainly what it means by elasticity and aspect.

While the first cross of a high-acting stallion with a low-acting mare is somewhat unsatisfactory as a rule, in some cases the back breeding of the mare has helped her to produce to such a cross a fairly presentable offspring. But it is the second cross on such a mare that tells the story in behalf of the sire's action. The foal from this second trial is much improved in action over her first produce, and on many stock farms can to-day be compared four, three, two, one-year-olds and sucklings, the younger of which have the desired action naturally, while the older colts have to go under training to improve the little they possess. Many of the most successful breeders in the United States have secured high-acting horses by mating mares that had natural action with Hackney stallions that possessed this qualification in a superlative degree. Breeders should select mares with the Hackney conformation as near as possible, and that have plenty of nerve force and intelligence. The good Hackney is certainly the typical high actor, and the breed can be improved by the introduction of strains of good trotting blood that has proven endurance as well as other desirable qualities.

Secretary C. M. Jewett states that the New England Trotting Horse Breeders' Association will revive the old-time Stallion Produce stakes that were a feature of the Breeders' meetings at the old Mystic Park in the early days of the association's history. Such an event is "stake" in the exact meaning of the word, as the prize will not be a stated sum, but for the entire amount subscribed. The event differs from the futurities of the present day in that each stallion owner contributes a sum equal to that of the service fee of his stallion, which goes to form the nucleus of the stake; then each nominator of a colt by the stallion entered pays a nomination fee of \$1, likewise a stated amount some few days prior to the race.

PROF. REDFIELD EXPLAINS HIS THEORY.

The theory of Dynamic Development as advanced by Prof. C. L. Redfield through the columns of the turf press has attracted much attention. The majority of breeders and turf writers have attacked the deductions of the professor, and in some instances without understanding just what his theory is. In the last number of the Horse World appeared the following explanation of the theory from the pen of Prof. Redfield himself:

There have been quite a number of criticisms of the theory with which my name has become associated. Many of these are so wide of the mark that they are called criticisms only by courtesy. Some are merely vituperation. Instead of replying to these various comments in kind I think that it will be more enlightening to review some of the essential elements of the theory and some of the facts used in support of it.

The theory relates to the inheritance by offspring of the characters acquired by parents. I have pointed out that the characters which an animal acquires are those which he develops by exercising them, and consequently that an acquired character does not mean the acquirement of a new character, but the development of a character already in existence. I have, therefore, substituted for "acquired character" the term "acquired development." I have also pointed out that a development acquired by exercise is in its nature dynamic, hence I have used the term "dynamic development."

Here we have a new term based on the definition and a process of reasoning. The term is used because it is believed to be explanatory. So far no one has attacked this process of reasoning as unsound, nor has anyone demonstrated that the term "dynamic development" is inaccurate, improper or misleading.

The next step was that if the dynamic development acquired by the parent is inherited by the offspring, then the amount of such inheritance should be proportional to the amount of the acquirement. This simply means that if the child is to inherit the dynamic development which the parent acquires, then the parent should acquire the development before he begets the child. Or, to state the matter in another way, the child can not inherit anything which the parent acquires after the child is born.

This last argument has been characterized as unsailable, and I do not see how it can be disputed. At all events no one has arisen who has attempted to deny its reasonableness.

I then pointed out that as dynamic development is acquired by exercise, and as active animals continue to exercise during their whole lives, therefore old and active animals have acquired more dynamic development than have young or inactive ones. In other words, I argued that the amount of dynamic development which an animal has acquired is a quantity to be determined by considering the age of the animal and the degree of its activity taken together. From this I drew the conclusion that if acquired dynamic development is transmitted from parent to offspring, then those animals which have, by natural inheritance, a fine dynamic quality, must be descended from a line of progenitors which were either old or highly developed by special training.

Here we have the final step of the main part of the theory. If the theory is to be attacked at all this is the point at which the attack should be directed. Yet of all the mass of criticism leveled at me not a single writer has attempted to show or has hinted that this argument is unsound. In fact, as far as I am aware, no one has attacked the main part of the theory in any way whatever. There has been much bluster and talk about the theory being completely demolished, but if there has been any serious argument advanced against the foregoing line of reasoning I will be thankful for having my attention called to it. The steps in this reasoning are simple and easily followed, and the theory stands today exactly as I published it three years ago. What I have had to say since has been in the way of illustration and explanation.

Before I take up the secondary part of the theory I will turn my attention to some of the things which I have set forth as facts. I have said that I took 1000 registered standard stallions alphabetically from the Index-Digest of the Register, and calculated the ages of their sires at the times when these registered stallions were foaled. From these I determined that the average time between generations in the male line was 10.43 years, which would give the average age of sires as 9.43 years at time of service. I then said that, making all reasonable allowances for errors, the average time between generations in the male line might be set down as between ten and eleven years, and that this period might be used as a standard in testing the age part of the theory. So far no one claims to have tested the accuracy of my calculations; no one claims that the figures I gave were wrong; and no one has said that these figures cannot properly be used as standard. Yet if I am to be controverted one of the first things to be done is to dispute the accuracy of my standard.

I then took the entire list of 2:10 trotters as an appropriate class of animals to be used in testing the inheritance of dynamic development, and I calculated the ages of their male progenitors for four generations. The number of animals involved was over 5000, and I gave the average time between generations in the male lines for the production of our 2:10 trotters as being approximately 14.00 years. This is an average of nearly 40 per cent over the standard average determined from the register, and my explanation of this remarkable difference was that it indicated the inheritance of acquired dynamic development. So far no one has disputed the accuracy of my computation, and no one has attempted to give any other

explanation of such an unusual divergence from the natural order of things. Am I right or am I wrong? If I am wrong will some one please come forward with a better explanation?

I then separated from the others the most prominent sires—those animals which by reason of the extra fine quality of their inheritance became great progenitors and founders of families, and I found that they were by sires and grandsires averaging over fifteen years of age. My explanation was that the still higher ages of the sires of extra choice animals was a further indication that the superior amount of dynamic development which old animals have over young animals was transmitted in a superior degree to their progeny. So far no one has reviewed the horses which I selected as great progenitors for the purpose of showing that I acted dishonestly or unfairly in making my selection. No one has said that the ages of the sires and grandsires of great progenitors was other than I gave them. And no one has offered any explanation other than the one I gave.

I then went to the Trotting Register and determined as accurately as I could the percentage of registered stallions which were sent to the track and given standard records. Taking those registered stallions which were contemporaneous with the sires and grandsires of our 2:10 trotters, I estimated that about 10 per cent were given records. I then compared this with the percentage of record horses among the sires and grandsires of our 2:10 trotters, and I found that the latter were from three to seven times as numerous as in the standard. In other words, I found that the 2:10 trotters were descended from male progenitors which were trained and raced much more than the average horse of the trotting breed was trained and raced. My explanation was that the development which these progenitors acquired was transmitted to offspring. No one has disputed my statement that 2:10 trotters come more from developed than from undeveloped progenitors, and no one has attempted to give a different explanation of why it should be so.

I then divided the male progenitors of the 2:10 trotters into two classes—those having records and those having no records. I found that those having no records entered the pedigrees of the fastest horses at a higher average age than those having no records. My explanation was, that development in ancestors is important to the production of fast descendants, and that unless this development is obtained by training and racing it must be obtained by many years of life before breeding. No one has disputed what I stated to be a fact, and no one has given any other explanation of this fact. Yet this is a matter to which critics should pay special attention if it is to be shown that the facts do not square with the theory.

The secondary part of the theory involves an extension of a previously well known principle of heredity. It is well known that certain characters are transmitted by sex, that is, from sire to son or from dam to daughter, and never from sire to daughter or from dam to son. Characters which are thus transmitted by sex are called "secondary sexual characters." The beard on the face of man, the heavy neck on the bull, and the ornamental feathers in the tail of a rooster are secondary sexual characters.

The peculiarity about these secondary sexual characters is an ordinary character transmitted by that animals but always develop after the animal becomes mature. The theory is that development acquired as the result of exercise while the animal is immature is an ordinary character transmitted by that animal equally to progeny of both sexes; but that development acquired after the animal is mature follows the law relating to other characters and becomes a secondary sexual character. It is also well known that a male which is castrated while immature never inherits the secondary sexual characters which his sire had.

From the fact that an animal does not reproduce until after he has arrived at sexual maturity it follows from this that the age of the sire has nothing to do with the qualities of a daughter or a castrated son, and that the age of a dam has nothing to do with the quality of an uncastrated son. Also that while an unusual amount of development acquired by a young male will affect his daughter and castrated sons, any development acquired after maturity will affect only uncastrated sons. Likewise, early development in females will affect sons and daughters alike, but late development will affect only daughters and castrated sons.

So far no one has analyzed this argument, and no one has presented reasons why this theory should not be true. Several biologists have conceded that the argument is logical and believe it is sound, while some others admitting its reasonableness have doubted the fact. I have cited a long series of facts bearing upon this point and Dr. Haworth of the University of Kansas has furnished other facts, all of which support the theory. No one has cited facts to the contrary, but a number of writers on the horse have given long lists of fast mares and geldings by young and undeveloped sires and have called that a refutation of the Redfield theory! It is certainly quite remarkable and very amusing to see would-be critics straining themselves to demolish the theory and really doing nothing more than furnish examples of one part of it.

As illustrating this part of the theory I have said that old and highly developed horses have become the best parents of sires, and I have given many examples illustrating it. The most conspicuous example is the case of George Wilkes, who was trained longer and more than any other horse before being put to breeding, and I have said that his sons form the most remarkable group of sires that has been produced. No one has denied this statement and no one has attempted to show that this case is not applicable to

this part of the theory.

The theory holds that while the age and the training received in mature life does not affect the daughter as an individual it goes through her and affects her sons. In support of this I cited the daughters of George Wilkes and said that their ungelded sons were better trotters than their daughters and gelded sons. No one has denied this statement and no one has given a similar case showing contrary results.

As carrying out the logical deductions of the theory, I have said that the undeveloped sons of an old and highly developed horse are much better as sires of mares and geldings than they are as sires of stallions, and that the same qualities pertain to all stallions which are trained when young but which are permitted to get "soft" after they are mature. I have cited the sons of George Wilkes, and a long list of other horses as examples of this. No one has attempted to show that this is not a legitimate deduction from the original premises of the theory and no one has cited the cases of any horses which have not followed the rule with exactness.

The theory is quite simple in its main features, and is easily understood. It is only in its deductions that it appears complicated. I have, from time to time, given many of these deductions and have cited numerous cases in which the production of trotters has borne out these deductions. I have done this for the purpose of showing that the theory furnishes the groundwork from which we can determine, with a high degree of accuracy, nearly every result of a dynamic character.

Beginning with the old development theory, with which every one is familiar, the new theory declares that the age of the animal and the conditions of its development at the time of breeding are elements which must be considered. To this it adds that development which occurs in the youth of the parent is of the ordinary kind and is transmitted in the way in which all development is supposed to be transmitted, but that development occurring after the animal is mature is transmitted in a special way—from sire to son and from dam to daughter. (In this last castrated sons are classified with daughters.) The next item of the theory is that a large amount of that kind of development which is originally transmitted by sex may, and in later generations does, become transmitted in the ordinary way. The final point of the theory is that added age in the parents increases the length of life of the offspring and thus furnishes a groundwork upon which still greater development may be built.

There is nothing difficult or abstruse about this, and no one caring to understand it need have any difficulty in doing so. If it is true it has great value to breeders. If it is not true they can quickly determine that fact from the records of the trotting horse. I have gone deeply into these records and have had a good deal to say about the most prominent horses which go to form the breed. Critics have found that I once confused two horses of the same name and gave the date to one of them which really belonged to the other, and they have found perhaps a half dozen other errors of the same magnitude. On such a basis as this some of these critics have gone into frenzy over my "unreliability," but at the same time they have been very shy about attacking the essence of the theory on its merits. In what I have already said herein I have pointed out this essence and have indicated what needs to be answered if the theory is to be refuted. Their attention is again called to the fundamental arguments and facts bearing upon the theory and they are invited to review and analyze the specific points mentioned.

THE NEW YORK MARKET.

The New York Commercial of February 21st contained the following items: The number of horses shipped to the New York market during the past ten days has been phenomenally large. Heavy business horses are selling easily at \$160 to \$225, and well-matched pairs of heavy draughts are offered at \$500 to \$650. The light harness classes are showing increased strength on a broader demand from all quarters. Well-acting drivers are in demand at \$300 to \$650, and, if trained by professional stables and have exceptional style and action, bring from \$850 to \$1100. Fiss, Doerr & Carroll's regular weekly sale on Monday at the East Twenty-fourth street mart disposed of over 400 head of fine commercial horses. A large crowd of buyers were on hand, and the bidding was spirited. Among the offerings which were well liked and brought very satisfactory prices were a carload of heavy draughts from Ohio; fifty-six head of choice delivery wagon horses from Iowa; two carloads from Indiana, among which were some well-matched heavy working teams, and a carload from Missouri weighing from 1200 to 1550 pounds, and suitable for express and heavy delivery work.

A five-thousand-dollar free-for-all will be given by the Wisconsin State Fair management if the owners of Hazel Patch and The Broncho will consent to enter. Wisconsin people think that Hazel Patch is unbeatable despite the fact that the mare was victorious in both of the races in which she met him last season. In their minds, however, this does not count. The Wisconsin Fair management is willing to let the race go if these two will enter, although, of course, none of the other free-for-all pacers in the country will be barred. In fact, they will be welcomed with open arms, but the people of Wisconsin do not believe that a free-for-all would be a race up to its name without Hazel Patch and The Broncho. This pair certainly drew a big crowd at the last fair at Milwaukee.

Jackson's Napa Soda does not tangle the feet.

ROD, GUN AND KENNEL.

Conducted by J. K. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
March 10—San Francisco Fly-Casting Club. Saturday Classification Contest No. 2. Stow lake, 2:30 p. m.
March 11—San Francisco Fly-Casting Club. Sunday Classification Contest No. 2. Stow lake, 10 a. m.
April 1—Sept. 1—Oct. 15—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
April 1-Nov. 1—Open season for taking steelhead above tide water.
Sept. 10-Oct. 15—Close season in tidewater for steelhead.
Sept. 10-Oct. 15—Close season for salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-July 1—Dove season closed.
Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
March 11—Empire Gun Club. Blue rocks. Alameda Junction.
March 11—Capital City Blue Rock Club. Kimball & Upson grounds, Sacramento.
March 18—Union Gun Club. Blue rocks. Ingleside.
March 25—Golden Gate Gun Club. Blue rocks. Ingleside.
March 25—Vallejo Gun Club. Blue rocks. Near Flosden Station.
April 1—California Wing Club. Live pigeons. Ingleside.
April 1—Blue Rock Gun Club. Grounds foot of High street, Alameda.
April 14, 15—Los Angeles Gun Club. 18th semi-annual tournament. \$500 added money.
May 26, 27—Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, near Flosden Station.
June 19, 22—Interstate Association. Grand American Handicap target tournament. \$1000 added money. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary. Entries close Feb. 25.
March 8, 10—Colorado Kennel Club. Denver, Col. T. W. Bartels, Secretary. Entries close —
March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary. Entries close —
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary. Entries close —
March 17—Bull Terrier Club. San Francisco. Entries close —
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary. Entries close March 10.
March 30 31—Haverhill Kennel Club. Haverhill, Mass. A. A. Balch, Secretary. Entries close —
April 11, 14—Southwestern Kennel Club. Los Angeles. George R. Albers, Secretary, Los Angeles. Entries close April 3.
April 18, 21—Seattle Dog Fanciers' Association. Seattle, Wash. Chas. McAllister, Secretary. Entries close —
April 25, 28—Portland Kennel Club. F. E. Watkins, Acting Secretary. Entries close —
May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary, Brighton Beach, L. I. Entries close —
June 1 2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary. Entries close —
June 6, 9—San Francisco Kennel Club. 10th annual bench show Fred P. Butler, Secretary. Entries close —
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary. Entries close —
Sept. 3, 5—Miami Valley Kennel Club. Piqua, O. Edwin A. Hiatt, Secretary. Entries close —
Sept. 3, 6—Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary. Entries close —
Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno. G. Bates, Secretary. Entries close —
Sept. 29—Bryn Mawr Kennel Club. Haverford Pa. Henry D' Riley, Secretary, Stafford, Pa. Entries close —

AT THE TRAPS.

The card for local blue rock shooters tomorrow will be the opening shoot, for this season, of the Empire Gun Club at the Alameda Junction grounds. Four events are programmed as outlined in last week's issue. The indications for a large attendance are promising. Among the shooters there will be a number of new recruits.

The California Wing Club live bird shoot last Sunday at Ingleside was carried out under favorable weather conditions and with an attendance for the club's initial shoot that argues a lively pigeon trap season for 1906.

In addition to the regular 12 bird club race there has been added an extra 12 bird race for medals and prizes, as outlined in last week's issue. This makes a total of 168 birds per member, as against the individual quota of 100 pigeons for many past seasons. The innovation, no doubt will add a decided impetus to the sport.

A strong lot of birds supplied was the cause for a number of goose eggs in several ambitious scores. As it was, twelve shooters, practically 50 per cent, who participated in the opening event were in the money division of the \$75 club purse. They were: Pete J. Walsh (29 yards), 12 straight; T. Prior (27 yards), 12 straight, and Phil B. Bekeart (28 yards), Dr. A. T. Derby (28 yards), E. Donohoe (29 yards), C. C. Nauman (30 yards), Dr. A. M. Barker (29 yards), N. L. Nielson Jr. (25 yards), Ed Schultz (28 yards), each of whom scored 11 pigeons out of the 12. Harvey McMurchy (30 yards), guest, 11 birds.

In the afternoon the club members shot in a medal and prize contest at 12 pigeons. Guests were eligible for the side pool or birds as desirable. Sixteen guns

competed in this race, as against 25 entries in the morning club shoot. Harvey McMurchy of Fulton, N. Y., was the only shooter to score straight. Messrs. T. Prior, Walsh, M. O. Feudner and Ed Schultz each grased 11 pigeons. Seven shooters scored 10 birds, Messrs. Donohoe, Dwyer, Bekeart, Nauman, Duzan, Webb and Turner. Nine was the record for Nielson and Barker, 8 for the ex-San Diegan shooter, Fano, and Roos put a cravenette overcoat over half a dozen pigeons only. The same distance handicaps prevailed as were in vogue during the forenoon.

In the final pool shoots at seven pigeons luck in odd numbers prevailed with McMurchy, Dwyer, Walsh, Fano and Nauman; all scored straights and divided the purses.

In the club shoots, A. J. Webb, the crack blue rock artist, tried his gun on "feathers." Being somewhat out of practice at pigeons, he failed to connect with three of his two dozen. When he strikes his "gait" there will be something doing. A summary of scores follows:

Club match, 12 pigeons, distance handicap, \$75 added, high guns—
Prior, T. 27 yds—212222112111—12
Klevesahl, E. 27 yds—011121120221—10

Fano 2201020—4
Nauman 1121220—6

The Capital City Blue Rock Club Friday evening, March 2, reorganized for the season with a membership of fifty enthusiastic shotgun artists, and elected the following officers: President, John N. Blair; secretary and treasurer, E. D. Adams; captain of team, Andrew Just.

The opening shoot was to have taken place last Sunday, but at a conference between several of the members it was decided that rain would probably prevent an enjoyable day's sport and the shoot was postponed until tomorrow morning. It is to take place upon the Kimball & Upson Company's ground on the Riverside road, which was fitted up with traps during the week.

Regular contests will be held every other Sunday until the end of the season. The members will contest for three medals upon every occasion. The first is the Kimball & Upson medal, the second is the trophy offered by the Washington Gun Club, and the third is an award of three medals to be given for the three-man team shoots. Each award must be won three times to become the permanent property of the contestant. Some of the members have to their credit one or two medal victories scored last season.

The first tournament shoot of the Redlands Blue Rock Club was held February 22nd at the club

grounds and some excellent sport was enjoyed by those who participated. The threatening and rainy weather kept the attendance down, only about fifteen of the forty odd members being present, but they made up in enthusiasm what they lacked in numbers, and Washington's birthday was fittingly observed.

The highest score was made by Mont. P. Chubb, who broke 250 out of 296 targets, which made his average 85 per cent. He was accordingly awarded the first merchandise prize, a gun case. Chubb also won first honors in the second merchandise shoot, his trophy in this instance being another gun case. The Peters trophy was carried off by Charles Lukens, who broke 24 out of 25 targets, with Chubb a close second with 23 breaks.

In the first merchandise contest C. F. Hersee won the second prize, 100 shells, the third prize in this event, a hunting coat, going to Chas. Lukens.

In the second merchandise shoot Chas. Lukens won the second prize, a shooting jacket. Chas. Hersee took the third prize, a hunting knife, while M. F. Pierce consoled himself with the fourth prize, 50 shells.

Luncheon was served on the grounds at noon and a continuance of the shooting was only stopped by the rain of the afternoon.

The scores made were as follows: Chubb, shot at 296, broke 250, 85 per cent; Lukens, 302-247-82; Hersee, 292-206-71; Holmes, 176-124-70; Mudge, 131-85-65; Dugan, 110-86-76; Gernish, 96-63-65; Parr, 95-51-64; Boberick, 62-37-60; Whittemore, 41-30-73; Kirkpatrick, 30-19-63; Pierce, 25-15-60; Lyman, 20-15-75.

Among the visiting shooters at Ingleside last Sunday at the Wing Club shoot were: Harvey McMurchy of Fulton, N. Y.; W. A. Layfield of Wilmington, Del.; J. S. Troy and Starter "Dick" Dwyer.

The Fresno Gun Club held its best shoot in many months on February 25th. There was present a large crowd of spectators, and fifteen shooters, the most in a long time. A feature of the day was the first appearance of a lady shooter. Mrs. Phalen, wife of one of the members of the club, tried in two events, and acquitted herself with credit, breaking five targets out of a possible ten in the first event, and eleven out of a possible fifteen in the second.

The scores were as follows:

Targets—	10	10	15	20	20	20	20	20	20
Eilert	8	..	13	..	18	15	16	17	16
Eilert	..	..	..	..	..	..	..	..	15

"Slim"	7	..	16	..	..	..	..	..	..

The Folsom Gun Club's big medal shoot, billed for February 18th, was postponed by reason of stormy weather. On Washington's Birthday several members made the following averages: M. Surbaugh .846, P. Joerger .640, E. Kipp .572, J. Biggs .640.

The Riverside Gun Club held its first shoot of the year on Washington's Birthday. The event called together a good number of clay bird artists, including visitors from Los Angeles, Ocean Park and Ontario. Los Angeles was represented by Smith, Justins, Quinn and Vaughn; Ocean Park by Bungay, and Ontario by Walker and Diebert.

Justin and Vaughn were representatives of ammunition houses, hence their scores were not counted. This gave first money to Bungay of Ocean Park. For the locals, Dr. Taber made the best record, getting 67 birds out of a possible 75.

The scores in detail were as follows:

Events	1	2	3	4	5	6	7	8	9	10
Targets	10	15	10	15	10	20	10	15	10	15
Smith	9	14	9	13	8	7	14	8	125—110

Verrill	7	10	..	..	..	..	..	..	..	7

The Santa Rosa and Sonoma county sportsmen who are members of the gun clubs that enjoy the sport of smashing blue rock pigeons, are anticipating the coming season with much pleasure. Last year the Santa Rost club members smashed thousands of blue rocks at the various team and trophy shoots and an interesting program of events is being arranged for this year.

The people of Reno and Plumas county, California, will invite President Roosevelt to hunt bear in the Grizzly Valley in Plumas county, California.

GOSSIP FOR SPORTSMEN.

Trout Spawn Controversy.

Morrill and Elliott, who have a permit from the County Commissioners to take trout spawn from the Truckee river for the California Fish Commission and a number of private interests in California, have declined to stop work at the command of the Attorney General and the State Fish Commission. They declare they hold a permit from Washoe county, Nevada, and that they will continue to operate until it is revoked.

The State Fish Commissioners, backed up by the Attorney General, say they are the only persons who have authority to grant spawn-taking permits. The County Commissioners of Washoe county reply by charging that at the time the permit was issued the State Fish Commissioners had not qualified and that under the law they were given authority to issue the permit.

Snipe and Mushrooms.

Game Warden George Neale of Sacramento says he has found from long experience that there is an intimate relation between mushrooms and snipe. He declares that when the weather is too cold and sunless to cause earth-worms, which are dainties for snipe, to come to the surface of the ground, it is too cool for mushrooms. When there is no mushroom weather, therefore, there are no snipe afield. It is a fact that this season's mushrooms have been very scarce and snipe scarcer.

Game Protective Association Organized.

A meeting was held recently at the Dry Creek school house, at which steps were taken to organize a fish and game protective association similar to the one lately organized in Healdsburg. The following sportsmen signed the membership roll: I. S. R. Tevendale, A. J. Galloway, W. S. Kelly, Charles J. Whitlock, J. H. Hall, G. Zambrino, Ira C. Jones, George C. ones, W. O. Block, George W. Parker, Arthur Burnham, M. P. Kelly, Clyde Clark and R. H. Bagley. Membership petitions are being circulated and a meeting to effect permanent organization and elect officers will be held today.

A Big Jew Fish.

Considerable excitement was caused early last Sunday afternoon at Coronado Beach when it was seen that a fisherman on the pier had hooked a large fish which proved that James W. Waller's customary luck has evidently not deserted him, as in company with A. B. Shaw and E. R. Niles he succeeded after a struggle lasting three hours in bringing in a three hundred and eighty-seven pound jew fish. This remarkable catch deserves special mention as the sea bass had been less numerous during the past few weeks in the Coronado waters. Mr. Waller bore the honors modestly, as with him it is in the nature of an old story, as he and Mr. Shaw are intrepid fishermen and have to their credit many monsters of the deep. Mr. Waller succeeded in carrying off the trophies for the best catches of scarbina during the past two summer seasons. The jew fish proved a great attraction on the lawn of Del Coronado, where a large crowd gathered to see it, and several snap shots were taken. During the afternoon it hung suspended from a line in front of the hotel and was viewed by large numbers of persons, including the usual Sunday crowds that visit Coronado.

Salmon in Monterey Bay.

Schools of salmon have made their appearance in the bay off Monterey City. On the 2nd inst. three large fish were caught. During the last week salmon have been caught, more or less, daily; no catches of large numbers, however, have been reported. This is rather an early appearance of the fish for they are not very numerous in the bay, generally, until about the end of April. Other varieties of salt water fish, particularly smelt and king fish, are very plentiful and big hauls have been made by the market fishermen. Possibly this plentitude of the small fry may have something to do with the early arrival of the salmon.

Perch and Black Bass.

Many anglers have indulged in fishing for perch recently in Lake Chabot, which variety of fish is plentiful in the lake and proves to be an exceedingly toothsome panfish. But the catching of perch has only a soothing effect to the real sport that comes on April 1st, for while some skill is required to catch a perch, after being hooked he comes up like a dishrag. The perch season opened on February 15th, and in the meantime many good catches have been made at the lake. Those who have been fishing there have been overjoyed to find that the black bass planted there two years ago are propagating very fast, one angler catching no less than twenty in an afternoon, other catches of from one to a dozen being reported. Of course these fish are immediately returned to the water, as it is unlawful to take them before June 1st.

The club holding the sporting privileges of the lake are just now in a quandary as to what course to pursue in the matter of taking fish. The opening seasons for perch and bass conflict, the former being three and a half months ahead of the latter, and it is impossible for an angler to try for perch without being as likely to catch bass. The club, which issues permits at \$2.50 per season, to pay the expenses of a keeper, did not know until the first dozen permits had been issued, that the bass were so numerous, and just as likely to be caught as the perch, otherwise no fishing would have been permitted until June 1st. On the other hand the perch dominate the lake, having thrived there for years, and they make better eating in the spring when the waters are fresh than later

in the summer. It is quite likely that next year no fishing will be allowed till June 1st. The number of nimrods in our city, according to our dealers in fishing tackle, is greatly on the increase.

The largest halibut ever caught by Tacoma fishermen was brought in February 26th by the steamer Edith. The fish was 13 feet and 3 inches in length, weighing exactly 972 pounds. It was sent East and will be put on exhibition in Chicago. The halibut was caught on a hook and the fishermen had great difficulty in landing it.

This afternoon and tomorrow morning the San Francisco Fly-Casting Club members will meet at Stone lake for the second contest in the classification series, 1906.

The projected preserve for the California Anglers' Association on Waddell creek is now a fixture. At a recent meeting of the Board of Directors arrangements were made to acquire for a number of years a lease of fishing privileges on about four miles of the stream.

Stockton anglers recently met and organized the Stockton Anglers' Association. A. N. Buell was elected president and A. Kaiser secretary.

But three brief weeks hence and the anglers will be off to the streams. The first of April falls on a Sunday, too, and that means the exodus of an army to the trouting waters. Up to date the rains and pleasant weather argue most favorable conditions, but the enthusiasts will be on pins and needles, watching the weather from day to day. A heavy storm the last week of this month is liable to cause an attack of heart failure for some of the rodsters.

Game Warden Reed reports steelheads running this year very large, weighing from fifteen to sixteen pounds, as against from eight to nine last year. Mr. M. Shebley, on Thursday, got 50,000 eggs from seven salmon.

Superintendent Shebley, Game Warden Reed, Supervisor Miller and J. F. Helms were at the Powder Mill dam on the San Lorenzo, Santa Cruz county, the afternoon of Washington's Birthday, and in about two hours some seventy steelheads jumped the dam, many of them landing in the trap. It was a great sight to watch the fish make a jump, then miss it, and after several repeated attempts jump the intervening five feet to the stream above.

DOINGS IN DOGDOM.

Coast Show Judges.

The San Francisco Kennel Club has secured Mr. George Raper for May. When the dates were changed to June Mr. Raper, provided the change did not prevent, was still the club's selection.

Seattle will endeavor to have Ben Lewis as the "all-rounder." For Portland Mr. James' Mortimer has been invited to judge all classes. Los Angeles, with James Cole, about closes the selection of Eastern judges, for, unless we have been much misinformed, San Jose and Santa Cruz will depend on home talent.

Fox Terriers at Boston.

Harry Lacy says of the breed at Boston last week: "The judging the first afternoon did not create much enthusiasm except perhaps in the terriers, where Mr. Lynn turned them around a bit from New York. Puppy dogs, smooth, Sabine Raven, Warren Seaman; Novice, S. Raven, Warren D'Orsay; Limit, N. All Blue, Warren Recorder, the Philadelphia winner. In open, Sabine Recruit had to give way to Wandee Knight, Recorder third. The latter two winners. Puppy bitches, Warren Destiny beat two, Sabines Favor and Fairplay. Novice, Sabine Facile, Warrens Destiny and Berilla; Limit, Sabine Figent, Wandee Music, W. Destiny; Open, W. Doris, Sabine Figent, Warren Jenny, Doris and Figent Winners. In wires, they were turned round. Puppy dogs, E. Prevail. Novice, repeat. Limit, E. Pennant, Rowsley Jester, Radnor Criterion, Rowsley Joker. Open, Selwonk Topper, Pennant, Rowsley Jester, W. Coastguard, Hillcrest Friar. Puppy bitches, E. Precision, Corey Hill Wire, Hillcrest Flox. Novice, Precision, Flox and Warren Balance. Limit, Rowsley Courtney, Siren and Hope, Prescilla reserve, same open.

Mr. T. S. Bellin of Minneapolis, Minn., judged Fox Terriers, and also Bull Terriers at New York.

Mr. Jas. J. Lynn of Port Huron, Mich, judged Fox Terriers at Boston.

Bull Terrier Importation.

J. I. Sparrow received this week a likely looking Bull Terrier bitch from a London breeder. Wild Rose, the new one, is by Kingdom Wild out of Rosa Glenn. Glenn is a sister to Champion Cothouse Trotter, he by Bloomsbury King. Rose was eighteen days on the trip and shortly after arriving here whelped eight puppies, all now doing well. Chader Wild is the sire of the litter.

Crockett Kennels have ready several well broken young English Setters for sale. These dogs are bred in the purple and thoroughly broken by a reliable trainer.

Among the recent good ones arriving here is a grand specimen of the Chesapeake Bay Dog, which S. Christenson received originally from a Cleveland breeder and then turned over to a trainer, who thoroughly broke the new comer on ducks.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

The Ruffed Grouse.

Vegetable Food.—The vegetable food of ruffed grouse examined consisted of 11.79 per cent of seeds, 28.32 per cent of fruit, 48.11 per cent of buds and leaves, and 0.86 per cent of miscellaneous vegetable matter. Grain was not found, though no doubt it would be eaten if obtainable. In fact, Major Bendire says that grouse procure it along roads from the droppings of horses. (Life Hist. N. A. Birds (I), p. 26, 1892.)

The seed element of the food is mast and miscellaneous seeds. The mast—5.33 per cent—consists of hazelnuts, beechnuts, hornbeam seeds, chestnuts and acorns. The last, furnishing by all odds the largest supply, includes those of the scrub oak, scrub chestnut oak, white oak and red oak. Acorns are often swallowed whole, half a dozen to a dozen at a meal being not uncommon. Beechnuts also are taken whole, and from 20 to 60 are sometimes found in a crop. Miscellaneous seeds make up 6.46 per cent of the entire food. Like many other gallinaceous birds, the ruffed grouse takes some leguminous seeds, though fewer than might be expected. The kinds known to have been eaten are the tick-trefoil, so abundant in the edge of woods frequented by grouse, and vetch. Winged seeds are often sampled, such as those of the hemlock, the pitch pine and the maple. The following miscellaneous seeds are taken by the ruffed grouse: Blackberry lily, beggar-ticks, chickweed, sheep sorrel, sedge, violet, witchhazel, beechdrops, avens, persicaria, forest weed and jewel weed.

The list is interesting mainly for what it does not contain. Further investigations may show that the ruffed grouse, like the bobwhite and other so-called granivorous species, is fond of ragweed, sunflower and grass seed. A grouse taken in British Columbia during October showed a peculiar liking for the apparently dry husks of geum seeds, no fewer than 500 appearing in its crop.

Buds and Leaves.—The ruffed grouse spends most of its feeding time in browsing and berry picking. It thus secures, respectively, 48.11 per cent and 28.32 per cent of its food. The country boy knows where it resorts for budding, and often bags it without the aid of a dog or hammerless gun. The buds and foliage of poplar, birch and willow form 20.20 per cent of the entire food. Budding is most practiced in winter and early spring, when many other kinds of food are buried in snow. Birch and poplar buds form by far the largest share of this cold-weather diet. Edward A. Preble says that in Canada in spring the sitting hen grouse leave the nest, fly to poplar trees, rapidly fill their crops with buds, and then hurry back to their eggs. He thinks that the males, having plenty of time to spare at that season, prefer to search for choicer food. The crop of a hen bird that he shot at Fort Chipewyan, Athabasca, May 29, 1901, was filled with young leaves of poplar. The number of buds to a meal is surprising. A grouse shot at Pamer, Mich., December 15, 1894, contained 300 poplar buds. When engaged in budding, grouse take both flower buds and leaf buds; grown leaves of poplar also are eaten, and, not infrequently, the flattened petioles that catch the wind and give the leaves their characteristic quiver. Populus balsamifera, P. remuloides, and P. grandidentata are among the species on which they feed. Birch buds also are a staple; they are taken from the canoe birch, the gray birch, the yellow birch and the black birch. Everybody who is familiar with New England woods has seen the grouse at dusk balancing on the ends of birch branches and snipping off buds. As with the poplar, both leaf buds and flower buds are taken. A grouse shot in Quebec, December 18, 1896, had filled its crop with 200 catkins of the canoe birch. As a rule birds appear to prefer the male to the female flowers. Baird, Brewer and Ridgway are authority for the statement that in Maine the buds of black birch are so freely eaten that they impart to the bird's flesh a distinctive and agreeable flavor. The ruffed grouse feeds also on the buds and leaves of different species of willow, as Major Bendire (Life Hist. N. A. Birds (I), p. 66, 1892) and other authors have reported. A bird shot on Roseau river, Minnesota, October 20, 1896, had eaten twenty willow flowers. In budding, the grouse often clips from a fourth to half an inch of a twig which bears two or three buds.

In addition to the buds and leaves of willow, birch and poplar, browse from miscellaneous plants provides the bird with 27.91 per cent of its food. Such relatives of the willow as the alder, hazel, beech, ironwood and hornbeam furnish a part of the above. Apple trees on outlying parts of farms are favorite sources of supply. This fact, noted by many observers and confirmed by the present investigation, has given rise to considerable discussion as to whether or not the tree are seriously injured by the budding. Dr. Clarence M. Weed says: "The ruffed grouse, however, is capable of inflicting real damage by a too close pruning of buds, and cases are known where apple orchards located near woods have been rendered useless by them." (Birds in Their Relation to Man, p. 40, 1903).

Mr. C. J. Maynard states that he took 180 apple buds from one crop, and says that in Massachusetts at one time a bounty of 25 cents was offered by certain towns for the birds' heads. (Birds of Eastern

N. A., p. 353, 1881.) Miss M. E. Paine of Royalston, Mass., in a letter to the writer describes her observations on the habits of the ruffed grouse by gause as follows: "The ruffed grouse feeds on the buds of apple trees, but it is a help rather than a damage. Last year a wild apple tree on top of a hill, between pasture and mowing, was almost entirely budded. I thought entirely at first, but the terminal buds were almost always left uninjured, also many minute buds on each limb. The result was the terminal buds were pushed out and grew rapidly and strongly. The tree blossomed abundantly and the fruit hung in clusters toward the ends of the branches. The tree is of medium size and the branches droop to the ground. In the fall the golden apples occupied fully as much room as the green leaves, and as one looked at the tree a few rods away—a perfect picture, barrels of apples on it, all nearly perfect and fair, just the result of a vigorous trimming. This year it was not so badly budded—less snow in winter. Many small buds farther back in the branches have started again this year and grown, and it is well fruited, owing to the budding two years in succession. No tree could have been more entirely budded, but the grouse can not stand so as to reach the outmost terminal buds, as a rule; their weight is too great."

The present investigation of stomachs revealed only an insignificant percentage of apple buds, probably because most of the grouse examined were shot in places remote from orchards. The bird has been known to eat also pear and peach buds, and probably would not refuse cherry buds. From one crop, leaves of blackberry or raspberry were taken, and bud twigs of blueberry and other species were not at all uncommon. The twigs severed by the sharp-edged bill of the grouse are all about the same length, one-third of an inch. They appeared in the stomachs as little whitish sticks, from which digestion had removed the bark. The extent to which the ruffed grouse browses on leaves and twigs suggests an herbivorous mammal rather than a bird.

The ruffed grouse feeds on leaves and buds of the mayflower, and likes exceeding the leaves of the partridge berry. It nips off also leaves of both red and white clover, to the extent of 1 per cent of its food. It is partial to the leaves of sheep sorrel, which it cuts across as sharply as if by a pair of scissors, but it eats yellow sorrel with less relish. It appears to like dandelion greens, and has a queer taste for the fronds of ferns. In its relation to conifers it differs widely from the spruce grouse, for it derives therefrom only an insignificant percentage of its food, while the spruce grouse obtains nearly 50 per cent. Spruce needles and foliage of arborvitae have been seen in several stomachs. Edward A. Samuels believes that the ruffed grouse will eat leaves of evergreens only when all other food is lacking. (Our Northern and Eastern Birds, p. 387, 1883.) In Alaska, E. W. Nelson found the bird feeding exclusively on spruce buds. He states that the flesh becomes disagreeable from this pitchy diet. (Nat. Hist. Coll. in Alaska, p. 131, 1888.) The effect of highly flavored food on the flesh of game birds has already been referred to.

The ruffed grouse buds the highly poisonous laurel (*Kalmia latifolia*). On this subject Alexander Wilson writes: "During the deep snows of the winter, they have recourse to the buds of alder, and the tender buds of the laurel. I have frequently found their crops distended with a large handful of these latter alone; and it has been confidently asserted that, after having fed for some time on the laurel buds their flesh becomes highly dangerous to eat, partaking of the poisonous qualities of the plant." (Am. Ornith., vol. II, p. 319, 1831.)

Dr. John H. Brinton of Jefferson Medical College has known several cases of glossitis (inflammation of the tongue) caused by eating grouse that had fed on laurel (Warren, Birds of Penn., p. 108, 1890), and Dr. N. Shoemaker has also known of serious illness from the same source (North Am. Med. Journ., I pp. 321-322, 1826). V. K. Chestnut, department specialist on poisonous plants, gave an extract made from laurel leaves to a chicken, which he subsequently killed and fed to a cat. The cat was seriously affected, but ultimately recovered. In Philadelphia in 1790 the public was alarmed over the possibilities of laurel poisoning, and the sale of these birds was for a time forbidden. Dr. B. H. Warren shot ten birds when the ground was deeply covered with snow, and found their crops stuffed with laurel buds (Birds of Pennsylvania, p. 108, 1890). Not more than half a dozen stomachs of the 208 examined by the Biological Survey contained fragments of this plant, the explanation probably being that only a few stomachs were collected in late winter, when birds most resort to it. Four of the birds that contained laurel were used for food, with no evident ill effect. One of these had eaten fourteen grams of laurel, nearly all leaves, with only a few buds. The leaves had been clipped into bits as if by scissors. Investigation of this habit of the grouse, known to be a common one, is much needed. The maple is often selected for budding, and sometimes the spicebush. Flowers are sometimes plucked by browsing grouse. Asters and red clover have been identified in their food, and the green ovary of bloodroot was found in a bird's crop by Amos W. Butler.

The following plants also are in the list of browse of this bird: Heuchera, chickweed, catnip, clinquefoil, buttercup, speedwell, saxifrage, liveforever, meadow rue, smilax, horsetail rush, azalea, false goat's beard, aster, cupweed.

Fruit.—The ruffed grouse is pre-eminently a berry eater. Not only does it consume more fruit than the bobwhite, but it is our most frugivorous game bird. More than one-fourth of its yearly food—23.32 per cent—consists of fruit, distributed as follows: 3.82 per cent rose hips, 2.46 per cent poison ivy and sumac,

3.01 per cent grapes, and 19.03 per cent miscellaneous fruits.

The taste for rose hips, seedy and husky as they are, and often beset with fine bristles which irritate the human skin and would seem really dangerous to internal tissues, is one of the singular freaks of bird feeding. It reminds one of the cuckoo's liking for caterpillars which are so bristly that its stomach becomes actually felted and sometimes pierced by the stiff hairs. Rose hips hang on the bushes throughout the winter, accessible to the hungry grouse as they journey about in the snow for food, and are usually swallowed whole.

The bird likes grapes also. No less than 3.01 per cent of the year's diet consists of them, and in November they make 17.2 per cent of the total food for the month. All experienced sportsmen know of this taste, and during this month they always count on getting their best shooting in the vicinity of heavily fruited grapevines. The wild grapes with small berries, such as *Vitis cordifolia*, are especially liked, but also large grapes are greatly relished. The species from which cultivated varieties have been derived (*Vitis labrusca*) appears to be commonly selected. Thirty to forty grapes are often swallowed at a meal. From this taste one might expect the grouse to commit depredations on cultivated grapes, but no reports of such damage have come to the Biological Survey.

Like many other birds, the ruffed grouse eats the berries of sumac and other species of *Rhus*. This food contributes 2.46 per cent of the year's diet. Among the non-poisonous sumacs selected are the dwarf sumac, the staghorn sumac and the scarlet sumac. Not uncommonly from 300 to 500 berries of the dwarf sumac are swallowed at a meal. This liking for the dry and apparently non-nutritious sumac is another curious freak of bird appetite. Probably, as with the bobwhite, the seeds are broken up in the gizzard and the inclosed meat, or endosperm, set free for digestion. The immunity of the bird from poisoning by poison sumac and poison ivy, which also it eats, is interesting. That these seeds retain their virulence after being eaten was shown in the case of an investigator in the Biological Survey who was poisoned while examining stomachs of crows that had fed on poison ivy berries. At times the ruffed grouse eats many of these berries, as proven by one collected by Prof. S. A. Forbes at Jackson, Ill., December 9, 1890, which had eaten 280 of them. Where grouse are numerous, poison sumac is usually less abundant than poison ivy, and consequently it appears less frequently in stomach examinations. One hundred and sixty poison ivy berries were taken from the crop of a ruffed grouse shot by Dr. A. K. Fisher at Lake George, N. Y., October 24, 1892.

Miscellaneous fruits amount to 19.03 per cent of the annual food. The two favorite kinds are the partridge berry and the thorn apple (various species of *Crataegus*), both of which were eaten by forty of the 208 grouse examined. At least two species of thorn apple are used for food—the cockspur thorn and the scarlet thorn. These apple-like fruits afford a nutritious food. At Peterboro, N. Y., the writer observed grouse coming to thorn-apple trees during November and well into December. That they take large numbers at a meal is shown by an individual obtained at St. Vincent, Minn., which had eaten thirty-eight. W. H. Kobbe says that grouse eat with great relish the small wild crab apple of the Northwest (Auk, XVII, p. 351, 1900). They enjoy cultivated apples, seldom missing a chance at trees on the edge of woodlands. At Chocorua, N. H., in October, 1898, some of the birds killed in old orchards of abandoned farms had fed principally on apples. After thorn apples and partridge berries, a number of other fruits are also staples. The large brilliant clusters of the mountain ash are acceptable, and the delicious wintergreen berries, with scarlet skin and snowy pulp, are also relished. The bayberry is a favorite food wherever accessible. In grouse stomachs one often finds nothing but the little round granules contained in the waxy drupes of this berry. Blueberries also are eaten in large quantities. A bird killed at Chocorua, N. H., July 25, 1892, had eaten a hundred blueberries, and one killed at Chateaugay, N. Y., in September, contained about 300. The high-bush blackberry and the huckleberry also are eaten, as well as the cranberry. Dr. A. K. Fisher found twenty-one whole cranberries in a bird shot at Lake George, N. Y., November 2, 1901. The extent to which blackberries are sometimes eaten is shown by the fact that the stomach of a grouse contained about 800 blackberry seeds. Another bird had eaten over a hundred sarsaparilla berries. An explanation of the delicious flavor of the ruffed grouse appears in its varied and highly flavored diet of fruit, herbs and seeds. In addition to the fruits already noted the following kinds found in the birds examined may be named, though the total number mentioned in this bulletin is probably not a fourth of the complete list of fruits eaten by this bird: Greenbrier, hairy Solomon's seal, smooth Solomon's seal, blackberry, black raspberry, raspberry, domestic cherry, cultivated plum, wild black cherry, wild red cherry, elder, red elder, black haw, nannyberry, withe rod, maple-leaved arrow, high-bush cranberry, mountain cranberry, snowberry, feverwort, black huckleberry, black alder, flowering dogwood, bunchberry, cornel, silky cornel, pepperidge, mulberry, bittersweet, manzanita, barberry, Virginia creeper.

The seeds of most of these berries pass through the digestive tract unharmed and are capable of germinating. Thus the grouse assists in planting many fruiting trees and shrubs, the heavy seed of which must be disseminated mainly through the agency of animals that feed on them.

Food of the Young.—The young of most birds are far more insectivorous than adults, a statement that

applies to gallinaceous birds, though to a less extent than to passerines. More than 95 per cent of the diet of eight grouse chicks examined, none of which was more than a fourth grown, was insects. Seven adults collected in the breeding season had consumed only 30 per cent of insects. Newly hatched chicks eat the largest proportion of insects. As they grow older they gradually become more frugivorous and granivorous. Three chicks, only a day or two old, collected by Prof. S. A. Forbes at Waukegan, Ill., June 9, 1876, proved to have been exclusively insectivorous. They had eaten cutworms, grasshoppers, Lampyrid beetles, ants, parasitic wasps, buffalo tree hoppers and spiders. "A grouse about a week out of the shell, collected by F. H. King, had eaten a white grub, seven spiders and thirteen caterpillars (Trans. Wis. Ag. Soc., vol. 24, pp. 472-473, 1886). It should be noted, therefore, that the ruffed grouse, though only slightly insectivorous when adult, as a chick destroys great numbers of insects, and deserves much more credit from farmers than it usually receives.

(To be continued.)

TRADE NOTES.

A Good Score.

The Ontario and Quebec Challenge Shield, which was competed for at Ottawa, Ont., on February 24th, was won by W. J. Johnstone of Ottawa with a score of 95, Mr. Johnstone using "New Schultze."

Fred Coleman's Marvelous Shooting.

The many friends of Fred Coleman of Philadelphia will be interested and pleased to note some of his magnificent work at live birds and "Best Rocks" in England. He has been across the water the past few months teaching the young idea how to shoot, and proving conclusively the superiority of the Parker gun. Up to January 28 Fred had shot in 25 sweeps, and either divided or won every one. Fred Coleman has shot under the name of "Alfred Daniels," and uses only the "Old Reliable Parker Gun."

At Leeds, Jan. 12 (at Lightcliffe Gun Club), in match with W. Pickles, acknowledged champion shot, North of England, Fred Coleman scored 45 out of 51, at 31 yards, and W. Pickles 44 out of 51 at 28 yards rise.

At Kirkheaton Cricket, Dec. 11; in match with J. Sykes (grounds near Manchester), at best rocks, Fred Coleman scored 15 out of 18 to Sykes' 7 out of 18, at 30 yards rise.

On Dec. 15, in match with J. Iddon (at Lightcliffe Gun Club), Fred Coleman scored 37 out of 48, at 31 yards rise, to Iddon's 32 out of 47 at 30 yards rise.

At Leeds, Nov. 28—24 out of 25 at 31 yards; 25th bird dead out of bounds.

At Manchester, Nov. 27—23 out of 25.

At Metholloyd, Nov. 26—8 straight, one barrel.

At Leeds, Nov. 29—19 out of 20, at 28 yards rise.

At Leeds, Nov. 29—19 out of 21.

At Audenshaw, Dec. 19—37 out of 40, at 30 yards rise. (Near Manchester.)

At Gisburne, Dec. 28—47 straight, at 29 yards rise.

During week Nov. 26—Mr. Coleman shot at 105, scored 100; 5 dead out of bounds.

During week of Dec. 22, shot at 100; scored 90; 7 dead out of bounds; 3 missed; at 30 to 31 yards rise.

At Barnsley, Jan. 8—14 out of 15; 1 dead out of bounds.

At Barnsley, Jan. 3—24 out of 25, at 29 yards rise.

At Heckenwick, Dec. 5—11 straight, with one barrel.

At snipe, near Manchester, 47 out of 50; which is best score ever seen in north of England at these fast birds.

At Grayson, Jan. 25, at best rocks, 28 out of 30, at 31 yards rise.

Winchester Supplemental Chamber.

This handy and simple device permits the use of the popular pistol cartridges in the high-power rifles chambered for the .30 Winchester, .30 U. S. Army, .303 Savage, .303 British, .32-40 Winchester, .32 Winchester Special, 35 and .405 Winchester cartridges without change or readjustment of the rifle, except the sights. The Winchester Supplemental Chamber

is inserted in the rifle barrel, the same as a regular cartridge, and, as it is extracted from the rifle in the same manner as an empty shell, it does not interfere with the instant use of regular ammunition. For short-range shooting or indoor target practice it gives excellent results, which makes it a valuable addition to every sportsman's equipment. It is also an aid to attaining proficiency in the use of a regular hunting rifle at a minimum expenditure for ammunition. The Winchester Supplemental Chamber is made to take the following cartridges: The .30 Winchester, .30 U. S. Army, .303 Savage, .303 British, .32 Winchester Special, and .32-40 Winchester caliber chambers take

either the .32 Smith & Wesson or .32 short Colt pistol cartridges. The .405 Winchester caliber chamber takes the .41 short Colt D. A. pistol cartridge. These chambers are patented, and manufactured by the Winchester Repeating Arms Company, and they recommend the use of Winchester smokeless powder cartridges with the supplemental chambers, as black-powder ammunition will soon foul barrels having such quick twists as the above mentioned. Those desiring to purchase these chambers will find them on sale by all sporting goods dealers throughout the United States, the list price being 60 cents each.

J. W. PACE, Sec.

GENERAL CONDITIONS for Butte, Bozeman, Livingston, Billings, Big Timber, Great Falls and Missoula.

All harness races shall be on the Three Heat plan. Money divided at the end of each heat unless otherwise specified on programs. Money divided 50, 25, 15, 10. Entrance 5%, payable as follows: 1% April 10 when entries close; 1% May 1; 1% June 1; 1% July 1, and last payment August 1, when horse must be named, and unless otherwise specified 5% additional will be deducted from the first and second money winners only in each heat. Horse distancing the field entitled to first and fourth money. Horses not finishing within 100 yards of the winner in any heat will be barred from further competition in the event. American Trotting Association Rules to govern, except hoppers not barred on horses over three years old.

NOTICE—Each member of the Circuit has good track, plenty of stable accommodations and good hotels and every assistance will be given horsemen to get the best of shipping accommodations. The Circuit is arranged with no dates conflicting, and no long jumps or doubling over road. Each member reserves the right to declare off or reopen as a purse any stake not filling satisfactorily by refunding entrance money, and to postpone or call off races in case of bad weather. Books, auctions and mutuels will be used. For further particulars and Entry Blanks address the local Secretaries or the Circuit Secretary.

TWO HARNESS AND TWO RUNNING RACES DAILY.

Pres., R. D. STEELE, Bozeman.

Circuit Sec., A. D. GALBRAITH, Butte.

TEXAS FEVER IN CATTLE.

A publication will soon be issued by the U. S. Department of Agriculture on the subject of Texas fever, a disease which has been a very serious obstacle to the development and prosperity of the cattle industry of this country, especially in the South. Some years ago it was conclusively proven by the experts of the Bureau of Animal Industry, after extensive investigations, that this disease, which is also known as splenic fever and Southern cattle fever, is transmitted by the cattle tick, and that without this Texas fever tick there would be no Texas fever. Later experiments have been made with the object of determining the best methods of eradicating the ticks and preventing the disease. The results of these various investigations are presented in Bulletin No. 78 of the Bureau of Animal Industry. The bulletin contains valuable information for stockmen concerning practical methods for eradicating the Texas fever tick from both the animals and the pastures, and also describes measures to be adopted for the prevention and treatment of the disease itself.

The cattle tick is not only the carrier of the Texas fever infection, but is a parasite which deprives cattle of much blood, retards growth, reduces the milking capacity, and induces an irritable state known as "tick worry." It therefore becomes manifest that the extermination of this tick will be of

the greatest advantage to the profitable raising and feeding of cattle in the infected district. This territory has been carefully studied and a quarantine line established which extends across the country from the Atlantic to the Pacific.

It is well known that the animals coming from below this line and sold in the northern stock yards bring an average of one-fourth to one-half a cent less per pound than the quoted market prices. If we allow an individual weight of 600 pounds for all classes of animals, including stock, beef and dairy cattle, there is a decrease in value of at least \$1.50 per head for the estimated 705,000 southern cattle annually marketed under these conditions, which amounts to a loss of \$1,057,500 each year. This decreased value reacts and fixes the valuation of all cattle which remain in the infected territory. Thus, it is estimated that there are in the quarantined area four and a half millions of cattle east of the Mississippi and eleven millions west of that river, which at a reduction of \$1.50 per head will give the enormous shrinkage in value of \$23,500,000, directly chargeable to the cattle tick. This should be regarded as an unnecessary reduction in the assets of the infected country.

The above figures do not include the decrease in flesh and the lack of development of the infested animals, nor the expense to the Federal, State, and local governments for enforcing the quarantine regulations. The shrinkage in the milk production of cattle harboring many ticks will average one quart per day, and the loss occasioned at 3 cents per quart for the 875,000 ticky dairy cattle out of more than 4,000,000 dairy cattle below the quarantine line would amount to \$26,250 per day, or, counting 300 milking days for each cow to the year, to \$7,875,000 annually. It has also been calculated that approximately 387,500 animals die each year of Texas fever, and at an estimated value of \$15 per head this means a loss of \$5,812,500 per annum.

If all these losses are taken into account, it will be seen that Texas fever is responsible for a loss of about \$40,000,000 annually to the stockmen of this country. These appalling losses and annual sacrifices of the cattle raisers it is believed can be entirely effaced, in time, by methods outlined in this publication, and at a small proportionate cost, for, with the general application of the measures described, the cattle tick may be wholly exterminated. Every dollar wisely expended in this work will be returned many fold during each succeeding year.

One of the difficulties encountered by the cattle raisers in fighting the plague is in confusing the Texas fever tick with the various other ticks occasionally found on cattle, but which are

entirely harmless so far as the transmissible of the disease is concerned. For this reason a brief popular description of the various ticks found on cattle, together with colored illustrations showing their appearance in different stages, is contained in this publication.

The Department of Agriculture has just issued the annual regulations for the prevention of the spread of Texas fever, effective February 1. On and after that date cattle are not allowed to be moved from the quarantined area to other parts of the country except by rail for immediate slaughter and under certain conditions prescribed in the regulations.

Most of the cattle in the Southern States are immune to Texas fever, but as they are infested with ticks they disseminate the disease, which is very destructive to other cattle. It is therefore necessary to observe strict regulations during the greater portion of the year to prevent the spread of the infection to non-infested areas, as serious losses would surely follow.

During the winter months the danger of infection is so diminished that cattle are permitted to be moved from the quarantined area under less stringent regulations than at other seasons of the year. The open season applies during the months of November, December, and January, to all localities, and for the states of Virginia and North Carolina the time is extended to March 15th.

The quarantined area for 1906, as prescribed in the regulations just issued, includes the following territory: The whole of the states of Arkansas, Louisiana, Mississippi, Alabama, South Carolina and Florida, the Indian Territory, all of Georgia except a few northern counties, the southern half of California, the southeastern half of Oklahoma, the eastern half of Texas, the southern half of Tennessee, a few counties in southeastern Kentucky, the eastern three-fourths of North Carolina, and the southeastern part of Virginia.

Southern cattle which are properly dipped or otherwise satisfactorily treated under government supervision and freed from ticks may be shipped without restrictions.

In some of the states and territories which are quarantined on account of this disease the local authorities are putting forth efforts to exterminate the ticks which infest the cattle. This work is mainly conducted in localities contiguous to the quarantine line, and when the cattle ticks are eradicated from a given district the quarantine line is changed and shipping restrictions are removed.

Copies of the above-mentioned bulletin and regulations may be obtained from the Chief of the Bureau of Animal Industry, Washington, D. C.

VETERINARY ADVICE FREE

Dr. S. A. Tuttle, a veterinary surgeon of long experience has written a book entitled "Veterinary Experience" on the diseases of horses, giving symptoms and treatment in plain terms. It is fully illustrated with diagrams showing the skeleton and circulatory and digestive systems with references that make them plain. Tells how to buy a horse and know whether it is sound or not. Every horse owner should have one. It is sent to any one.

TUTTLE'S ELIXIR

Is the only guaranteed cure for Colic, Curb, recent Shoe Boils and Callosities. It locates lameness, relieves and cures Spavins, Ring Bone, Cockle Joints, Grass Heel, Scratches, Catarrh, etc. Send today and get the book free and information about Dr. Tuttle's specifics. Tuttle's Elixir Co., 52 Beverly St., Boston, Mass. Mack & Co., San Francisco and F. W. Braun, Los Angeles, California Agents.

SHROPSHIRE BREED OF SHEEP.

The Shropshires are exalted in the Shepherd's Criterion as follows:

The Shropshire breed of sheep stands unsurpassed as an all-round farmer's sheep, adapted to all conditions. Not only is the Shropshire a farmer's sheep, but it is the rich man's sheep also. They keep them on their large farms because of their beauty and prolificacy. The Shropshire is the universal breed. It is found in large numbers in England, Ireland, Scotland, the United States, Canada and almost everywhere known to sheep growers.

Everywhere Shropshire rams are used to grade up the common class of ewes. And why is this so? It is because they have proved themselves to be the most profitable. Shropshires are also very profitable when raised in pure bred flocks. The ewes of this breed drop a large number of lambs and nurse them well, and as soon as the lambs are partially matured ready sale at good prices for them is immediately found. The ranchmen buy Shropshire rams by the car load, a very large majority of the smaller sheep growers use Shropshire rams, and when you get the exceptionally good one there are plenty of pure bred breeders willing to pay you well for your product.

The fleece of the Shropshire sells at a very high figure. The Shropshire produce the highest priced mutton that goes on the market. Time and time again have grade Shropshire lambs topped the Chicago and other leading markets. At the leading shows, such as the International held at Chicago, Shropshire wethers have always carried away a large portion of the laurels for champion mutton.

No other animal kept in the stables in winter will make more or richer manure for the live weight of them or for the feed consumed than the sheep.

Sheep will eat brush and weeds when they can get no better roughage, and when they acquire this habit they persist in it and do well.

Rock Island Sheep's Wool Sponges, in all sizes, for vehicle washing and harness cleaning. At harness dealers, or delivered on receipt of price. S. ADDERLEY, 307 Market St., S. F., Cal.

SAVE-THE-HORSE SPAVIN CURE

COSTS LESS
For Results Than All Other Known Treatments and Remedies.

CHICAGO, BURLINGTON & QUINCY RAILWAY CO. Keokuk, Ia.

TROY CHEMICAL CO., Binghamton, N. Y.
My horse had bone spavin in both legs, so that I had very little use out of her for over a year. I used two bottles of your Spavin Cure.
I have been using her all summer and up to the present time has not shown any lameness. I think you have a remedy of considerable merit, especially when you take into consideration my horse is 15 years old. Yours very truly,
M. E. JUSTICE.

"SAVE-THE-HORSE" permanently cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boli, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.
At druggists and dealers or express paid.

BROOD MARES TO LEASE.

On account of leaving the county, I will lease two of the best producing brood mares in the State:

HABE, dam of Just It 2:19 1/4, winner of Occident-Stanford pace of 1905; trial 2:13. Habe is by Danton Moultrie 17064, he by Guy Wilkes, dam Carrie Malone, full sister to Chas. Derby and Klatawah 2:05 1/4 (3-year-old champion). Her dam was by Soudan 5103, half brother to Stamboul 2:07 1/4, champion trotting stallion in his day; second dam by Nutwood 600, half brother to Maud S. 2:08 1/4, queen of the turf in her day; third dam by Owen Dale, the handsome son of Belmont, the foundation of the California trotter; fourth dam by Old Gray Eagle, four-mile runner.

FANNY MALONE, dam by Anteeo, second dam the dam of California Nutwood by Geo. M. Patchen Jr.; third dam, the Chicago Mare.

Both of the above mares will foal by March 10th to J. R. C. In answering please state what horse you intend to breed to, for particulars address,
THOS. J. KELL,
No. 95 So Market St., San Jose, Cal.

Washington McKinney 35751

By McKinney 2:11 1/4; dam, Lady Washington. In every point he shows his breeding; has good style and action. Stands 16 hands, weight 1200 pounds. His get bring big prices.

Will make the Season at Rose Dale Stock Farm. Fee, \$30 for season. For further particulars address ROSE DALE STOCK FARM, Santa Rosa, Cal.

FOR SALE.

BAY MARE, THREE YEARS OLD, BRED by Mr. Meek of Haywards. Sire, Wm. Harold; dams by Direct, Mambrino Wilkes, Woodburn and Williamson's Belmont. Fair size, good style and looker; trotted half at matinee, Jan. 29th, in 1:22 to high-wheel road cart. Can trot a 35 gait on track or road any day without any rigging or boots. Sound and tough and as well able to be put to work as many 4 or 5 year olds. Price \$200. Apply to BREEDER office.

FOR SALE.

A HANDSOME PAIR OF COBBY BUILT coal black Geldings; five years old; 15 1/2 hands high. By a son of McKinney out of standard bred mares. This is a thoroughly high-class park or road team and has style and manners that would win in a show ring. They are broken to stand, walk and trot; are fearless of all objects on road and steam cars; guaranteed to drive single or double, or on the lead in four-in-hand, and sound and kind in every particular. Address H. R. RAND, The Renaissance, corner Franklin and Fell Sts., San Francisco, Cal.

\$50 THE SEASON.

OAKWOOD PARK STOCK FARM,
Danville, Cal.

SEYMOUR WILKES REG. No. 0232. Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:10 1/2
and Joe Eviston (3) 2:22

Will make the Season of 1906 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; record dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco

CLOSELY RELATED TO JOHN A. McKERRON 2:04 1-2.

T. C. 2:30 Trial 2:20

Sire, NUTWOOD WILKES 2:16 1/2, sire of John A. McKerron 2:04 1/2, Tidal Wave 2:09, Miss Idaho 2:09 1/2, Who Is It 2:10 1/2, Stanton Wilkes 2:10 1/2, Cresco Wilkes 2:09 1/2, etc., etc.
Dam, ZETA CARTER by Director 2:17, sire dams of John A. McKerron 2:04 1/2, Ozanam 2:07, Little Thorne 2:07 1/2, Leonardo 2:08 1/2, etc., etc.; second dam, Lida W. 2:18 1/2 (dam of Nutwood Wilkes 2:16 1/2, etc.) by Nutwood 600, greatest sire of broodmares that ever lived; third dam by Geo. M. Patchen Jr. 31; fourth dam, Rebel Daughter by Williamson's Belmont.

T. C. is one of the best bred young stallions in California. A two-year-old filly by him has been one of the sensational young trotters at Pleasanton this winter, and is as handsome as a picture. T. C. will make the season

At Alameda Race Track. Fee \$30 the Season.
with usual return privilege.

Excellent pasturage for mares at reasonable rates. Send to the undersigned for card containing tabulated pedigree and other information. I will take a few horses to train for road or track.
GEORGE T. ALGEO, 1207 Eagle Ave., Alameda, Cal.

LYNWOOD W. 32853

RECORD AS A 2-YEAR-OLD 2:20 1-2

Sired by GUY WILKES; dam, the great brood mare LINDALE by Sultan Jr. 12771

LYNWOOD W. was a sensational colt trotter and is fast proving himself to be a great sire, although he never covered but eight standard bred mares prior to 1905. Still he has to his credit Dumont S. 2:20, Clipper W. 2:24 1/2, Sonoma Queen 2:25, Sonoma May 2:29 1/2, all trotters with records made in 1905. The following are the only colts that ever had any training. They have worked as follows: R. W. P. 2:12 1/2, Charles Belden 2:13 1/2, Sonoma Girl 2:15, Sly B. (3) 2:16 1/2, Dumont S. 2:17, Ayerces 2:18, Sonoma May 2:19 1/2, Jim V. 2:25, Ella V. (3) 2:21, Clipper W. 2:23, Sonoma Queen (3) 2:22, Sonoma Star (3) 2:27 1/2, Dennis 2:30, Frank G. (2) 2:30.

Will make the Season of 1906 at Santa Rosa.

SERVICE FEE \$25. H. A. CARLTON, Owner, Santa Rosa, Cal.

THE PERFECTLY GAITED TROTTERING STALLION

of the

Sacramento Valley Stock Farm

STALLIONS, BROOD MARES,

and Young Stock Suitable for Training.

CH. STALLION, FOALED 1902, "DILLCARR."—Sire Sidney Dillon; 1st dam, Guy-cara 2:18 1/2, by Guy Wilkes 2:15 1/2; 2nd dam, Biscara (dam of 5 in list, 4 below 2:20), by Director 2:17; 3rd dam, Biscara (dam of 6 in list, including the great stallion Pancoast and other producing sires and dams), by Harold 413 (sire of Maud S); 4th dam, Belle (dam of Belmont, sire of Nutwood, McCurdy's Hambletonian 2:26 1/2, and other producing sires and dams), by Mambrino Chief 11; 5th dam, Belle Lupe, by Bellfounder (Brown's), son of Imp. Bellfounder and Lady Allport by Mambrino, a son of Imp. Messenger, the next dam of Brown's Bellfounder being by Tippoo Sahib, son of Imp. Messenger, and the next dam by Imp. Messenger himself.

This young stallion's pedigree is unexcelled, his sire and the sires of his 1st, 2nd, 3rd and 4th dams having produced world-record holders, as well as many others the gamest and best of all times. In looks and make-up he is as great as his pedigree, unexcelled. Although never trained, his natural speed is phenomenal. For the production of world-record holders, he should excel his sire or the sire of his 1st, 2nd, 3rd or 4th dam, each of which enjoy fame in this respect. As a candidate himself for the record he is entitled to much consideration.

CH. STALLION, FOALED 1902, "FLOSSNUT."—Sire Nutwood Wilkes 2:16 1/2; 1st dam, Flossie, by Cornelius (11335), sire of Connelita 2:10 1/2, etc., by Nutwood; 2nd dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 3rd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 4th dam, Emma Taylor by Imp. Glencoe; 5th dam, Lances 4th dam of Palo Alto and 5th dam of Alcyone, Alcantara, etc., by Lance.

The blood lines in this young stallion's pedigree represented the male line of Nutwood Wilkes laid upon two crosses of Nutwood, one of Echo, one of Geo. M. Patchen Jr., and a thoroughbred female line tracing to Lances, to which female line trace such great ones as Alcyone (sire of McKinney), Alcantara, Palo Alto, and many other great ones. The sires in the thoroughbred female line down to Lances have each produced the dams of trotters. The high degree of natural speed, strength and size, Nutwood type of conformation, and make-up of this young stallion make him worthy of use in the stud and worthy of the opportunity to earn a low record on the track.

BAY MARE, FOALED 1903, "FLOWERET BELLE."—Sire Monbells 2:23 1/2, son of Mendocino 2:19 1/2, by Electioneer and Beautiful Bells (world's greatest brood mare), by The Moor; 1st dam, Floweret (dam of 2 in list and full sister to Wildflower, Manzanita, etc.), by Electioneer; 2nd dam, Mayflower 2:30 1/2 (dam of Wildflower, Manzanita, etc.), by St. Clair 16675.

The sire of this filly represents Electioneer's most famous speed producing line, the Electioneer-Beautiful Bells cross. The dam of this filly represents a great performing and producing line that first made Electioneer famous through the great Wildflower, Manzanita, etc., the Electioneer-Mayflower cross. This filly was bred to Dillcara in 1905, and the pedigree of the produce will be composed almost exclusively of the greatest bloodlines of the greatest producers in the trotting world. Her produce from such mating will always rank of the highest value for breeding purposes, as well as for racing.

ALSO SOME TWO-YEAR-OLDS out of dams whose pedigree is given above, suitable for training and breeding purposes, and entered in Futurity Stakes. One grand 2-year-old stallion.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19³/₄Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (2 y. o.) 2:21¹/₄, (3 y. o.) 2:12, (a) 2:09¹/₄, Leonora 2:12¹/₄, Polka Dot 2:14¹/₄, etc. Bay Stallion, 15.3¹/₄ bands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.Sire, ELECTIONEER 125, son of Hambletonian 10. First dam, MANO (dam of MENDOCINO) (3) 2:19¹/₄, Morocoe (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W. (3) 2:17¹/₄, Hyperion 2:21¹/₄, Memento 2:25¹/₄, Mithra (p) 2:14¹/₄) by Hambletonian Jr. 1882; third dam, Glida (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm. Sire, MCKINNEY 8818 (record 2:11¹/₄). First dam, HELENA 2:11¹/₄ (dam of Wildouting 2:11¹/₄; Dabbel 2:23, Hyla (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at PALO ALTO STOCK FARM. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.McKinney, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

McKINNEY.....DIRECTOR.....NUTWOOD

THE STANDARD-BRED TROTTING STALLION

UNIMAK 40936

y MCKINNEY 2:11¹/₄; dam TWENTY-THIRD by Director 2:17; second dam Nettie Nutwood (dam of Hillsdale 2:15¹/₄) by Nutwood 600.

Will make the Season of 1906 at PALO ALTO, Cal.

Usual return privileges or money refunded at the option of the owner of the mare.

Terms, \$40 for the Season.

To Close June 1st

Address or apply to

Excellent Pasture at Reasonable Rates. No
barbed wire. Best of care taken of Mares, in
any manner Owners may desire.CAPT. C. H. WILLIAMS,
Box 151, PALO ALTO, CAL.WAYLAND W. 22516. Record 2:12¹/₄.

ONE OF THE LEADING SIRES OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06¹/₄, leading money earning pacer of season 1905. Sire of Morocoe 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:28, dam Lettie (dam of Wayland W. 2:12¹/₄, Welcome 2:10¹/₄, Maud Singleton 2:28) by Wayland Forrest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Anteeo or any of our great sires, he is the sire of Bolivar 2:06¹/₄, Nellie R. 2:10, Arthur W. 2:11¹/₄, Morocoe 2:12, John A. 2:12¹/₄, Forrest W. 2:14¹/₄, Leland W. 2:16, Al Sandy 2:19¹/₄, Maud Sears 2:21, Bonita Wilkes 2:26¹/₄. Wayland W. will make the Season of 1906 at SANTA ROSA, at McGregor & Rockins' Stables.

Terms \$40 for the Season. Pasture \$3.00 per month.

W. C. HELMAN, Owner.
